# Final Call for Deposits

Approximately 83½% of the publicly held bonds of this Company have now been deposited under the plan of capital readjustment.

Thus, approximately \$780,600 principal amount of bonds remain to be deposited to meet the 90% requirement of the Reconstruction Finance Corporation.

Further deposits will be accepted to the close of business on Saturday, Sept. 23rd, whereupon the RFC will be noti-fied of the amount on hand and action taken for the con-summation or abandonment of the plan as the situation may warrant.

Bondholders who have not yet deposited are requested to do so promptly. For further information, address either of the undersigned.

# The Financial Situation

A GREAT philosopher once remarked in effect that we learn nothing from history save that we learn nothing from history. The judgment may be an unduly harsh one, but the faith of the New Deal managers and their followers in historically discredited panaceas has in recent years often brought the aphorism to the minds of thoughtful men and women. The hasty, emotional, not to say hysterical, reaction

of many elements in the United States to the unspeakably tragic developments across the Atlantic again suggests the same thought. Apparently a great many who have not taken the trouble to refresh their memories concerning the course of events twenty-five years ago are acting under the influence of enduring impressions gained during the latter half of the World War, particularly during the period in which we were engaged in that conflict. Certainly, the violently unneutral feelings of large sections of the population strongly suggest that they have taken up where they left off in 1918, and the panicky purchasing by consumers for hoarding of various articles and commodities of which there is no indication of impending shortages can hardly be laid to any development of 1914, or 1915 for that matter. About equally frantic demand for materials and inventories on the part of industrial consumers, now reported, which, incidentally, is strongly reminiscent of the situation which came to a head in 1937, seems, in some cases at least, to be of somewhat

the same order.

There is likewise all too much evidence of the same state of mind in Washington, where public officials

appear to have lost no whit of their appetite for assuming responsibility for everything and proceeding to control and to manage without limit. The struggle that seems to be in the making for the special session of Congress to begin on Sept. 21 is at bottom a revival of the old one between the Wilsonian "internationalists" and the "Battalion of Death," which fortunately succeeded in preventing us from injecting ourselves further into the tangled maze of European conflicts of interest and animosities at the close of the World War. Much

that has been taking place in the stock market and in some commodity markets during the past week or two is without much question a reflection of the excited and confused thinking of the day, although the quieter and apparently saner behavior of the past few days may (or may not) indicate a greater disposition on the part of the public to indulge in soberer second thought.

# The Neutrality Muddle

Europe is again in the midst of war. The President of the United States has issued proclamations to the effect that in this war this Nation shall stand neutral. But we all realize that laws and statutes and proclamations are not, and will not be, sufficient to maintain successfully a policy of neutrality. Only the united will of the people can accomplish this difficult task.

It is highly proper, therefore, that we openly and frankly discuss all phases of this question, which bears, and will bear, so heavily upon the great body of the people. I want to associate myself tonight with all those who believe we can and ought to remain neutral. I want to resolve with you that we will in good faith put forth our best thoughts and our best efforts to accomplish that great aim.

If we can succeed as a great people, especially in the midst of conditions such as they now are, in establishing here upon this western continent a great neutral Power, a Power standing not for force, not for cruelty and injustice, but for peace, for fair dealing among nations, for reason and justice, we will not only have added honor to our own Nation, happiness to our own people, but we will have rendered to all nations and all peoples a service greater than it will ever be possible for us to render by joining any nation, or nations, in carrying on war.—Senator Borah.

While we find ourselves unable to agree with the Senator as to the proper course of

While we find ourselves unable to agree with the Senator as to the proper course of Congress in the matter of existing neutrality law, we must, as it seems to us all others must, applaud this plainly spoken determination to do what seems to him most effective to prevent the entanglement of this Nation in European quarrels.

What is most keenly to be regretted is that the Senator, in this, his opening address of a campaign to maintain existing legislation in status quo, is able, doubtless with good reason, to add that "the talk here in Washington is no longer that of merely furnishing arms. It is said: We must prepare to fight. One of my colleagues, a most able and sincere Senator, declared a few nights ago publicly: 'Let us give up this dream of impartiality, therefore, of neutrality. It is better,' said he, 'to take sides and fight.' . . . The plan now presented by the advocates of repeal is that the democracies of Europe are imperiled, that we must go to their rescue, that civilization is threatened, that we cannot ignore the problem presented."

It is as unfortunate as it is amazing, the degree in which action to implement our neutrality is being supported with unneutral argument.

### Neutrality

The neutrality law issue, about which we are destined to hear a great deal in the near future, is largely a result of the unneutral spirit by which the whole question of neutrality has been bedeviled for years past, the strange doctrine that under the guise of neutrality we could, by the measures-short-of-war -but-stronger-than-words type of action, somehow greatly contribute to the peace of the world. The President, who now asks changes in the law permitting us, under certain restrictions, to export arms, ammunitions and implements of war to warring countries (which in practice at this moment means export to England and France), is, unfortunately with good reason, credited with making this same demand at an earlier date in behalf of the "democracies," in the thought that in this way the "dictatorships" could be deterred. Unfortunately, moreover, while the President has of late been more discreet in his statements, there are many who demand the change frankly for the reason that it would help England and France in their war on Germany, or so they believe, and it would be asking too much to expect the public, certainly

the so-called isolationists, to believe that the President is wholly without the same motive. While it is true that the law as it stands does not conform to accepted principles of international law, and change is desirable, it is also true that change at this time places us in the awkward position of taking action in the name of neutrality which has long been and is still demanded by many influential leaders on the ground that it would be of aid to one group of belligerents and really, if indirectly, of harm to the opposing side. But for this situation it is doubtful if the so-called

isolationists would have much ground to stand on, and certainly we should not incur animosity from Germany which almost inevitably must follow a correction at this time of a grievous error of the past.

The disregard of centuries of experience in international affairs which is embodied in the socalled Neutrality Act as it now stands will, moreover, rise to plague us in our relations with the so-called sea-powers if it is permitted to remain upon the statute book. The Secretary of State has already felt it necessary to issue a general warning to all nations, particularly perhaps, to Great Britain (with whom we profess and, for that matter, actually feel the warmest sympathy) that we intend to assert our rights as a neutral and expect to have them observed. In this position he is of course on the strongest of grounds, and deserves hearty support from all the American people. It is significant, however, that in issuing such a warning he found it advisable to advert at some length to restrictions we have voluntarily placed upon our citizens, and to state with emphasis that these restrictions will not be regarded by Washington as abridging any rights accorded them by accepted principles of international law. What the attitude of the British and the French Governments will be remains to be seen, but it can hardly be expected that they will not feel aggrieved that the United States Government which refuses in accordance with existing statutes to accord the British nation its accepted rights as a belligerent (that is, to buy freely in this market) is promptly demanding our full rights as a neutral. Adequate alterations in the law are obviously indicated and should be made, but the whole history of the case will never for that reason be greatly to our credit.

# The "War Boom"

As to the "war boom" apparently getting under way in both industry and trade and in the speculative markets, it can find little support in the experience of the earlier months of the World War. It may be true, as many are now so fond of saying, that conditions are wholly different today, that it would be unreasonable to expect the impact of what is going on in Europe today to follow the pattern of 1914 or early 1915, and that the excited transactions of today merely reflect the collective judgment of the community as to the nature and probable consequences of these differences, but all this leaves open the question as to whether that collective judgment is an informed and carefully considered one or whether it is a highly impulsive one stemming in no small measure from impressions remaining from the latter part of the World War. At any rate, the now apparently popular idea of the current situation rests at bottom upon a number of implicit assumptions, some of which may be quite warranted and some of them not. Few, it would appear, have taken the trouble to give definite expression to these assumptions or for that matter, to have recognized their existence. entire question seems to us to have been passed over so lightly that it is well at this time to keep the record straight by a plain, brief statement of some of the presuppositions upon which the boom now beginning or predicted appears to rest.

1. The first of these seems to be that this is to be a "long war" conducted upon a scale of the same order of magnitude as that beginning in 1914.

That is to say, the length of time hostilities will continue, and continue on a considerably larger scale than they have yet assumed, is a matter of years, not months. The British Government in its attitude toward the public has set three years as a minimum period upon which it feels safe in planning its operations, and it has set the destruction of "Hitlerism" as its goal, but, of course, experience teaches the wisdom of taking such statements as these with considerable reservation. Since "Hitlerism" does not appear to differ in essential respects from Fascism, Communism (as known and practised in Russia), and what might be termed "Japanism" for want of a better term, the task that Britain has set for herself is indeed a Herculean undertaking, and if it is pursued to its bitter end, the war is very likely to last a long time, and require great quantities of goods from this country provided that those who require them can pay for them. Obviously, there is, however, a substantial element of conjecture in all this.

2. The ebullience of spirit in evidence in some quarters could hardly be defended without assuming drastic modification of the arms embargo and probably also the Johnson Act. Current estimates of the funds at the disposal of the Allies for purchases here (if they wish to use them all here—it may be that they will find it wise to spend some of them elsewhere), assuming employment of all their gold reserves and control of all privately owned American securities, bank balances and the like, run around \$8,000,000,000. This, of course, is a large sum of money, but a number of questions come at once to mind concerning such estimates as these, and are naturally re-inforced by the course of sterling.

In the first place, it is obvious that in existing circumstances, actual or assumed-a long, costly war ahead for two governments both heavily in debt already—the rapid expenditure of these reserves would play havoc with the credit of the governments both of England and France which must sorely need credit not only for the acquirement of materials at home but to obtain possession of securities and other property now in the hands of individuals. Moreover, such a sum as this, or any other approaching it, would be available to these governments for purchase of goods only upon sale of large blocks of securities in this market, or else their use as collateral for loans now inadmissable under the Johnson Act. It may be true, as often now asserted, that what England and France will want of us, at least in the early stages of a long war, would in large part not be subject to the restrictions of existing neutrality law, but certainly if the World War experience is any guide a substantial part nonetheless of their requirements, would be so restricted.

3. Essential for the support of much of the current optimism is the further assumption that this war will get under full steam much more quickly than did the World War, and that, regardless of apparently accepted reports that England and France already have relatively large war stores, this speeding-up of the war machinery will bring purchases to this country at a much earlier stage than was the case with the World War. This obviously is a matter for individual judgment. It may prove to be as anticipated by the enthusiasts—and then it may not.

4. Another assumption is that the shipping lanes can be reasonably well cleared of German submarines in the relatively early future and kept so, that shipping can be kept protected from air attacks, and that sufficient shipping facilities can be mustered to carry extraordinarily large quantities of goods to British and French ports.

5. In some instances at least the supposition is essential that rapidly rising prices would not materially retard the purchase of American goods by the warring governments during, say, the next six months, or seriously curtail domestic demand for goods.

6. It would appear also that it is necessary to assume that the labor situation, even now none too good, will not grow worse fast enough to pour sand in the gears of any "boom" which actually gets under way.

7. So far as commodity prices are concerned, it appears necessary to suppose that production cannot or will not get under way rapidly enough to satisfy demand without large price increases.

8. Most important of all, perhaps, is the course of the New Deal managers in Washington. The question is how far can any such "boom" as many appear to expect go before the authorities at Washington begin to exercise the vast sweep of power that has been vested in them to control, restrict or to punish. Another matter of vital importance is the wisdom and judgment employed by the President in maintaining our neutral position. On all these scores, there is certainly room for grave differences of opinion. The leanings of Washington as between the so-called "democracies" and the "dictatorship countries" are well known. Already there has been much thundering in the index about "war profiteering," talk of active prosecutions, criminal and otherwise, under the anti-trust laws, and vague discussions of legislation designed to push the "managed economy" program further. Here is certainly a matter that should not escape most careful consideration.

Signs have fortunately not been wholly wanting during the past few days of a realization of such facts as these on the part of forward looking men of influence in the business community. We refer not so much to the more orderly and discriminating securities and commodity markets, although these appear to be furnishing hopeful indications of a calmer, more judicious attitude, as to announcements from important industrialists that they intend to make no increases in their prices at least for the time being, and in some instances actually are reducing prices. It is to be hoped that the entire business community will set itself with determination to meet whatever may come during the next year or two with rather better judgment and intelligent restraint than was sometimes in evidence late in 1915 and during 1916, and than has been in evidence in a number of quarters for most of the time during the past two weeks or more.

# Federal Reserve Bank Statement

OPEN market operations on a huge and unprecedented scale again are reflected in the banking statistics this week. In the weekly statement period to Sept. 13 the Federal Reserve banks made a net addition of \$229,305,000 to their holdings of United States Treasury obligations, this advance coming on

top of the gain of \$168,223,000 noted last week. The net addition for the first two weeks of the current World War thus is \$397,528,000, and the available credit resources of the country naturally have increased correspondingly. As in the first week of the European war, these additions can only be attributed to the requirement for cushioning the rapid decline in market quotations for Treasury obligations, and thus preventing any extraordinary change in the money market structure. The market weakness was most pronounced in Treasury bonds and it is in this section that support chiefly was extended, the bond increase now noted being \$247,581,000 to \$1,268,800,-000. Treasury note holdings increased \$6,924,000 to \$1,245,497,000. In partial offset to such advances, the holdings of Treasury discount bills were permitted to recede \$25,200,000 to \$309,420,000. Bankers' bill holdings remained unchanged at \$546,000. Total holdings of United States Treasury issues now are reported at \$2,823,717,000, which is the highest figure in history.

The surging advance in open market holdings was not the only influence making for an expansion of the credit resources of the country. The gold stocks of the United States increased \$82,000,000 to another record at \$16,808,000,000, and the Treasury deposited gold certificates with the 12 Federal Reserve banks not only for the immediate acquisition but also for a considerable amount of previously purchased "free" gold. The Treasury, moreover, dipped heavily into its general balance with the 12 regional banks, while currency in circulation decreased \$26,000,000. Offsetting these credit-expansion items was chiefly an increase of \$54,000,000 in non-member deposits and other Federal Reserve accounts. Excess reserves of member banks over legal requirements jumped no less than \$300,000,000 to an officially estimated figure of \$5,270,000,000. The mere increase of the week to the fantastic total now current was held adequate for the entire country in the days before the great 1929 depression. Notwithstanding the prodigious resources, there are no signs of any undue demand for accommodation from business and speculative elements. The condition statement of New York City weekly reporting member banks reflects a gain of \$42,000,000 in business loans to \$1,615,000,000, a similar trend also being current in the general statement covering 101 cities. Loans to brokers on security collateral in the local reporting bank statement fell \$69,000,000 to \$430,000,000.

Gold certificates amounting to \$124,498,000 were deposited by the Treasury with the 12 regional institutions, raising their total holdings to \$14,576,-719,000. Other cash of the 12 banks also increased, and total reserves advanced \$140,783,000 to \$14,-909,429,000. Federal Reserve notes in actual circulation dropped \$4,724,000 to \$4,678,992,000. Total deposits with the Federal Reserve banks showed the huge gain of \$391,872,000 to \$12,896,466,000. Member bank reserve deposits advanced \$385,100,000 to \$11,525,708,000, for most of the fresh funds rapidly were siphoned into such balances. The Treasury found its general account lower by \$60,169,000 at \$615,386,000. Foreign bank deposits moved up \$52,893,000 to \$450,076,000, obviously because funds are being accumulated here for war purposes. Other deposits advanced \$14,048,000 to \$305,296,000. The reserve ratio fell to 84.8% from 85.9%. Discounts by the regional banks increased \$1,255,000 to \$7,253,-

000. Industrial advances fell \$10,000 to \$11,617,000, while commitments to make such advances were off \$12,000 to \$10,919,000.

Government Crop Report

CROP prospects in the United States underwent some slight improvement during August according to the September 1 report of the Department of Agriculture. The Department's corn estimate was raised to 2,523,092,000 bushels from 2,459,888,000 bushels a month earlier; the wheat estimate rose to 736,115,000 bushels, both spring and winter, from 731,432,000 bushels on August 1. The increase in the wheat forecast was entirely in the spring crop which was increased to 185,405,000 bushels from 180,722,000 bushels, while the winter estimate did not change from the 550,710,000 bushels estimate as of August 1.

The increase in the corn crop outlook might have been sufficient basis for Secretary Wallace to have called for a referendum on marketing quotas had not the European war intervened providing anticipation of larger foreign demand than would otherwise have been likely. The law provides for such a referendum when the total supply of corn in prospect exceeds 110% of "normal requirements." With a carryover of approximately 470,000,000 bushels of corn on Oct. 1 estimated by Mr. Wallace, a harvest of the size now forecast would mean a total supply of about 2,993,092,000 bushels; which is about 66,-000,000 bushels greater than the amount considered 110% of normal a year ago, but less than the 3,030,-000,000 bushels fixed as the "marketing quota level" for this year. Mr. Wallace announced September 13, that there would be no referendum this year.

As noted, there was a small increase in expectations for this year's wheat harvest which, however, leaves the prospective crop substantially below the bumper output of 930,801,000 bushels in 1938 and slightly under the ten year, 1928-37, average of 752,-952,000 bushels. Domestic requirements of wheat are usually about 670,000,000 bushels which is 66,-000,000 bushels under the expected crop, which, when added to the July 1 carryover estimated at 254,000,000 bushels, should provide an exportable surplus of about 320,000,000 bushels. This, of course, is far more than shipments have aggregated in recent years, but larger demand from abroad than usual is expected to result from the European war. Because of the sharp price rise which this commodity has lately enjoyed on account of this anticipation, the Department of Agriculture has recently announced abandonment of the wheat export subsidy and lowering of the subsidy on flour shipments.

Just what effect the war may have on foreign demand for our wheat is still to be seen. The fact remains that world crops and carryover this year are believed to be over 5,000,000,000 bushels in the aggregate, and the largest in history. There is the further fact that Canada has in prospect a crop of 449,058,000 bushels, 99,048,000 bushels more than in 1938, and the fourth largest on record. As a result the Dominion is in a position to ship tremendous quantities of the grain to her allies who are engaged in the war in Europe. The estimated Canadian carryover of 102,000,000 bushels should take care of the Dominion's normal consumption of about 100,000,000 bushels.

The official report held little interest for the market which was engrossed in calculations concerning the probable effects of the European debacle.

# **Business Failures in August**

COMMERCIAL insolvencies dropped seasonally in August to the lowest of the year so far, and also substantially below August, 1938. The month's insolvencies, numbering 859, involved \$11,259,000 liabilities, and compared with 917 involving \$14,150,000 in July and 1,015 involving \$16,382,000 in August, 1938.

Of the various commercial groups only the commercial service had more failures or greater liabilities last month than in August, 1938. All the others showed substantial reductions. Retail disasters numbered 528 and involved \$4,461,000 liabilities last month in comparison with 629 involving \$5,903,000 a year ago. Wholesale failures dropped to 93 with \$1,473,000, from 122 with \$2,860,000 in August, 1938. Manufacturing failures numbered 151 involving \$4,069,000 as compared with 173 with \$6,147,000 liabilities in August last year. In the construction division 46 firms failed for \$765,000 in comparison with 57 for \$1,128,000 in August, 1938. In the commercial service division, which moved against the general trend, failures rose to 41 involving \$491,000 from 34 involving \$344,000 in August, 1938.

On a geographical basis, last month's failures show rather a surprising comparison with those of a year earlier, for while the Eastern sections show a substantially smaller number of insolvencies, the Western districts, with the exception of the San Francisco Federal Reserve District, had considerably more failures, or as was the case in the St. Louis District about the same number as last year. As to liabilities involved, the figures were smaller this year in all the Eastern districts and greater in all the Western.

# The New York Stock Market

RADING on the New York stock market was an erratic and busy affair this week, as all interests endeavored to adjust themselves to the European war conditions and the widely varying estimates of what the conflict will mean to the American economy. Stock prices climbed abruptly at times, while dipping almost as quickly at others. The dealings early this week were especially feverish, as demand for stocks carried levels up 2 to 10 points, establishing scores of highs for the year. Profit-taking sales thereafter reduced the quotations for so-called "war babies," but other sections of the market were whirled upward. The result for the week is a highly irregular list of changes, with advances more prominent and spectacular than the declines. Steel stocks especially were marked higher, the trend being aided sharply by a rapid increase of industry operations. Motor issues also improved, but at a slower pace, and many other industrial issues likewise reflect substantial gains. Oil stocks were favorites in some sessions, while railroad issues came into wide demand during Tueday's dealings. Even the utility stocks show scattered advances, but copper issues and other base metal shares suffered from profittaking. The speculative fever was at its height early in the week, when trading in single sessions exceeded 4,000,000 shares. As the week progressed the dealings were progressively smaller, approximating the 2,000,000 level.

The wide swings continued to bear little relation to actual internal developments, for they were based entirely on the belief that European belligerents would find it necessary or advisable to order vast supplies of basic war materials in the United States. The call for a special session of Congress, at which revision of the neutrality laws is to be debated, was anticipated in the market, and the stocks of companies capable of turning out arms, ammunition and implements of war showed wide gains. Rumors from Washington suggested the possibility of a joint purchasing organization of the British and French Gavernments, acting in cooperation with Federal purchasing agencies. Actually, there appears to be no buying as yet for the belligerents, possibly because all were well prepared for war. The extent and nature of the possible purchases clearly hinges on the duration of the conflict, and in this sense our market gained price stimulation from British preparations for a three-year war. Hesitation developed late in the week on reports of the sweeping advances of German armies in Poland, this bringing up the question of a peace offer which the Reich is expected to make to France. The advance, moreover, was carried rather far, and a natural tendency toward caution developed at the higher levels. Closing quotations of even the most ebullient "war babies" yesterday were much under the highs reached early in the week, but generally above those at the close of the previous Friday.

Listed bond trading was far less sensational than in the week immediately succeeding the British and French war declarations. United States Treasury securities were relatively stable, under the guidance and control of the Federal Reserve authorities, who took up for the open market portfolio great quantities of Treasury bonds. Downward pressure still was in evidence, but on a comparatively insignificant scale. Best grade corporate bonds held close to the levels established in the early days of September. Speculative bonds of the corporate list were marked higher, and in some cases generously so. The medium-priced rail bonds developed strength, as did holding company and convertible obligations. Foreign dollar issues were under liquidating pressure. The commodity markets fluctuated sharply, much as did the share market, but the greater upswings in grains and other staples usually were reduced again by profit-taking. At the close yesterday relatively small advances were to be noted in agricultural items, while metals were only a little Foreign exchange trading occasioned some concern, especially when sterling exchange fell abruptly on Thursday, and again yesterday. It would appear that the world faces the prospect of a regulated pound sterling for officially approved transactions, and a free pound for others. French francs fell with sterling, and other units also lost ground in terms of the dollar. Gold movements have become almost entirely a matter of official arrangements.

On the New York Stock Exchange 284 stocks touched new high levels for the year while 82 stocks touched new low levels. On the New York Curb Exchange 156 stocks touched new high levels and 60 stocks touched new low levels. Call loans on the New York Stock Exchange remained unchanged at 1%.

On the New York Stock Exchange the sales at the half-day session on Saturday last were 1,555,390 shares; on Monday, 4,683,630 shares; on Tuesday, 4,168,960 shares; on Wednesday, 3,762,440 shares; on Thursday, 2,008,510 shares, and on Friday, 1,594,300 shares.

On the New York Curb Exchange the sales on Saturday last were 271,198 shares; on Monday, 744,875 shares; on Tuesday, 645,820 shares; on Wednesday, 467,520 shares; on Thursday, 303,985 shares, and on Friday, 230,755 shares.

The tempo of trading was fairly well maintained in the brief session on Saturday of the previous week and equities finished the day strong and at moderately higher prices. Liquidation at times produced some irregularity, but the market had little difficulty in throttling this adverse factor before it gained sufficient headway. Wild buying featured Monday's market as traders got off to a good start in which steel shares were forced upwards during the day to 10 points, trading volume establishing a record for the second heaviest turnover in virtually two years. Aircraft issues also came in for heavy bidding up of prices in anticipation of favorable action on the proposed revision of our present Neutrality law. Spells of profit-taking now and then retarded the market's progress, while equities closed firm but a trifle below the day's best quotations. Apprehension on Tuesday anent the opposition the President will encounter in Congress in an attempt to revise the Neutrality Act and rumors of a Government curb on profits, together with a desire to collect quick profits, rendered the market fairly vulnerable to attack, and stocks in early trading yielded as much as six points. The quick absorption of offerings found traders alert to what was going on, and they returned to the fray and bid up values, quotations reflecting net gains of four or more points at the close. Reaction overtook trading on Wednesday, with equities closing irregularly

The initial hour found war stocks weak as rails grew active and touched higher levels. Around noon all issues moved forward, but their progress was soon arrested and they turned downward. The announcement of a special session of Congress called for Sept. 21, and made in the early afternoon, found stocks again in the ascendancy. War stocks recovered their early losses, but again reacted to lower levels in the final period. Uncertainty dogged the market's movements on Thursday as action by Congress on the Neutrality measure drew closer. Opening prices fell away about two points, to subsequently rally in the first hour and then drifted in aimless fashion until the close, when mixed improvement had a steadying effect on the market. Yesterday activity slackened as interest waned. In the initial hour gains equaled declines, but with dulness growing more pronounced, irregularly lower price changes resulted.

As compared with the closing on Friday of last week, closing prices yesterday were generally higher.

General Electric closed yesterday at 42½ against 39% on Friday of last week; Consolidated Edison Co. of N. Y. at 30% against 29½; Columbia Gas & Electric at 7½ against 7; Public Service of N. J. at 385% against 36¼; International Harvester at 70½ against 64; Sears, Roebuck & Co. at 78% against 77%; Montgomery Ward & Co. at 54% against 52¾; Woolworth at 39½ against 39%, and American Tel. & Tel. at 162 against 162¾.

Western Union closed yesterday at 35 against 27 on Friday of last week; Allied Chemical & Dye at 197 against 192; E. I. du Pont de Nemours at 179 against 183¾; National Cash Register at 18¾ against 15½; National Dairy Products at 15¾ against 15½; National Biscuit at 23 against 23; Texas Gulf Sulphur at 36¾ against 36; Continental Can at 48¾ against 47½; Eastman Kodak at 157¼ against 149½; Standard Brands at 6¾ against 6½; Westinghouse Elec. & Mfg. at 116½ against 114¼; Lorillard at 21¾ against 22½; Canada Dry at 15 against 15¾; Schenley Distillers at 13¾ against 12¼, and National Distillers at 23½ against 22½.

In the rubber group, Goodyear Tire & Rubber closed yesterday at 29¾ against 29 on Friday of last week; B. F. Goodrich at 23¼ against 22½, and United States Rubber at 44½ against 44½.

The railroad shares were mostly higher at the close this week. Pennsylvania RR. closed yesterday at 24% against 21% on Friday of last week; Atchison Topeka & Santa Fe at 30½ against 28%; New York Central at 20½ against 17½; Union Pacific at 99¼ against 101; Southern Pacific at 16¼ against 15; Southern Railway at 18% against 17¼, and Northern Pacific at 10% against 11.

The steel stocks again commanded much attention the present week. United States Steel closed yesterday at 78½ against 68¾ on Friday of last week; Crucible Steel at 49½ against 44½; Bethlehem Steel at 92¾ against 85½, and Youngstown Sheet & Tube at 53½ against 48¼.

In the motor group, Auburn Auto closed yesterday at 3¾ against 3½ on Friday of last week; General Motors at 54⅓ against 52¾; Chrysler at 88 against 85; Packard at 4 against 4⅓, and Hupp Motors at 1¼ against 1⅙.

Among the oil stocks, Standard Oil of N. J. closed yesterday at 52½ against 49¼ on Friday of last week; Shell Union Oil at 15½ against 165%, and Atlantic Refining at 23¼ against 22.

Copper stocks show minor changes for the week. Anaconda Copper closed yesterday at 35 against 37% on Friday of last week; American Smelting & Refining at 58% against 58%, and Phelps Dodge at 45% against 44%.

Trade and industrial reports improved during the week, largely because American buying increased on anticipation of European orders and the possibility of a higher general price level. Steel operations for the week ending today were estimated by American Iron and Steel Institute at 70.2% of capacity, against 58.6% last week, which contained the Labor Day suspension. At this time last month the rate was 62.1%, and a year ago it was 45.3%. Production of electric power for the week to Sept. 9, which contained Labor Day, was 2,289,960,000 kwh., against 2,357,203,000 kwh. in the previous week and 2,048,360,000 kwh. at this time last year. Car loadings of revenue freight for the week to Sept. 9 were 667,409 cars, according to the Association of American Railroads. This was a drop of 54,339 cars from the previous week, but a gain of 98,702 cars over the figure for the same week of 1938.

As indicating the course of the commodity markets, the September option for wheat in Chicago closed yesterday at 85%c. against 85¼c. the close on Friday of last week. September corn at Chicago closed yesterday at 58½c. against 59½c. the close on Friday of last week. September oats at Chicago

closed yesterday at 36%c. against 36½c. the close on Friday of last week.

The spot price for cotton here in New York closed yesterday at 9.48c. against 9.82c. the close on Friday of last week. The spot price for rubber yesterday was 22.25c. against 21.00c. the close on Friday of last week. Domestic copper closed yesterday at 12½c. against 12c. the close on Friday of last week. In London the price of bar silver closed yesterday at 22½ pence per ounce against 21 5/16 pence per ounce the close on Friday of last week, and spot silver in New York closed yesterday at 36½c. against 36¾c. the close on Friday of last week.

In the matter of foreign exchanges, cable transfers on London closed yesterday at \$3.87¾ against \$4.05½ the close on Friday of last week, and cable transfers on Paris closed yesterday at 2.19c. against 2.26c. the close on Friday of last week.

# **European Stock Markets**

ONTINUED dull conditions were noted this week on stock markets in the leading European financial centers. The exchanges at London, Paris and Berlin all are under the pessimistic influence of a major war which, though still in its earliest stages, almost certainly will result in vast changes. There is no discernible tendency toward speculation, but rather a minimum of transactions of the most ordinary sort. Restrictions of various kinds also affect the operations of the European markets, and have seriously hampered the international aspects. In all cases, great taxation programs are foreshadowed by the belligerent governments, and some already are in the process of being applied. The profits that were associated with war in a by-gone era seem chimerical in our own, owing to the complete regimentation of all phases of national life which is the first step after a war declaration in the present period. All this is well realized in the European markets, and the fear also is said to prevail of great social changes if the war continues for years, as seems most likely. The tendency of holders in the markets most directly affected by the current conflict is to sit tight, and most of them doubtless are fatalistically resigned to governmental measures of all sorts which may affect their fortunes.

On the London Stock Exchange trading was quiet throughout the week, a decision to suspend all trading at 2 p. m. adding to the dullness. Gilt-edged stocks were persistently at the minimum prices announced in the first days of the war, and if there were any inter-office transactions at less than the official figures the censored cables from London do not tell of them. British industrial stocks were under intermittent pressure, largely because of fears of vast taxation increases. Similar considerations affected the trading in mining securities. There appears to be some selling of Anglo-American favorites held in London, the holders receiving sterling and the Bank of England the dollar proceeds. Because of exchange difficulties, American securities remained considerably under New York parities. On the Paris Bourse the primary consideration was the institution, last Monday, of a rigid control of foreign exchanges and gold transactions. To these restrictions the market adapted itself slowly, throughout the week, chiefly through fairly good demand for the international securities held in Paris. Rentes were quiet and not much changed, and French equities likewise fluctuated in a relatively narrow range, partly because the Brokers Association endeavored to prevent large changes in price levels. On the Berlin Boerse the trend was lower throughout the week, losses of a point or two being reported day after day in equities, while fixed-interest obligations held to former levels. Large German companies were reported to be liquidating assets in order to finance the construction of war plants.

# Neutrality Problems

N almost every sphere of human endeavor the European war already is exercising its dread effect upon the United States, and the problems thus occasioned are arousing much concern and long debate. Foremost among them is that of keeping the United States neutral and avoiding the mistakes that led us into the first World War. Most departments of the United States Government are bending all their energies to this task. The general problem now looms in a new form, however, owing to a call by President Roosevelt for a special session of Congress, to begin next Thursday. Although Mr. Roosevelt merely indicated that an "extraordinary occasion" required the Congress to convene, it is well established that he aims to have the neutrality legislation altered. The existing law, which remained unchanged in the last session despite strenous efforts by the Administration, calls for an embargo on the exportation of arms, munitions and implements of war, whenever the President finds that a state of war exists anywhere in the world. Efforts by the Administration in the last session, which doubtless will now be renewed, were to change the legislation in a manner that would enable warring countries to purchase arms, munitions and implements of war on a "cash and carry" basis. Indications already are available that a protracted and bitter debate will develop in the Senate, if Mr. Roosevelt insists upon having his own way. It is suggested in Washington reports that the President also will ask for sweeping powers to define war areas and issue regulations keeping Americans out of such areas. Legislation of this nature probably will arouse less antagonism than proposals to change the neutrality law.

Some of the peculiarities of Mr. Roosevelt's foreign policy became evident this week when Canada declared war upon Germany, and the President found it necessary to issue a proclamation invoking the neutrality law against our northern neighbor. The issuance of the proclamation last Sunday followed the precedent established when Britain and France joined the European fray. The question promptly arose whether Mr. Roosevelt's gratuitous pledge to aid Canada "if domination of Canadian soil is threatened by any other Empire," would continue in effect. The President disposed of the matter in a press conference Tuesday, in which he declared that his pledge to Canada stands, although the events clearly show that the pledge places American foreign policy to some degree in the hands of the Ottawa Government. This remains an academic matter, however, since there is not even a remote likelihood of a change in Canadian sovereignty.

More pressing and more intimate are the problems that already are growing out of the blockades being applied by each side against the other in

Europe. Like many other matters that developed only in months and years during the first World War, the question of embargoes and blockades now has reached a delicate stage in an amazingly curtailed period. The British Government late last week announced a list of contraband that will not be permitted to reach Germany through the shipping route, and Germany countered on Wednesday with a declaration that it will endeavor to exercise controls quite similar to the British. These are matters of utmost importance, for the British control of the seas can effectually halt almost all American commerce with Germany, while the German submarine campaign can wreak havoc with the rights of neutral trade with England. A German submarine last Saturday halted the American vessel "Wacosta," but permitted the ship to proceed after examination of the papers disclosed that there were no munitions or implements of war aboard. Owners of the American ship "Black Osprey" announced on Tuesday that they had lodged a strong protest with our State Department against alleged British interference with the journey of the vessel from New York to Antwerp and Rotterdam. In the early stages of the first World War, similar incidents were the prelude to ever greater interferences by the belligerents with American and other neutral shipping, and ever harsher infringements and curtailments of neutral rights. The bitter diplomatic exchanges between the United States and the belligerents on both sides in the World War are a reminder of what the current tendencies may lead to, especially in view of the simple fact that the German submarine campaign disposed this country to a warlike attitude.

Secretary of State Cordell Hull endeavored to clarify some of the problems on Thursday through issuance of a general statement in defense of the rights of neutrals under international law. The restrictions voluntarily imposed by the United States Government upon the travel and trade practices of its nationals, Mr. Hull said, "cannot constitute a modification of the principles of international law." Adhering as it does to these principles, this Government "reserves all rights of the United States and its nationals under international law and will adopt such measures as may seem practical and prudent when those rights are violated by any of the belligerents," he added. The statement was intended, Washington dispatches said, as a caution to Americans to keep out of danger, "actual or potential," and thus avoid creating complications which might involve their government. It was issued only after due consultation with President Roosevelt, and with careful regard to American experience in the years preceding our entry into the first World War. Charles Edison, Acting Secretary of the Navy, issued a warning on the same day against submarine attacks on American ships. The precautions being taken by the United States make it virtually impossible for a belligerent submarine to mistake an American ship for a vessel of another registry, Mr. Edison remarked, and he expressed the opinion that attackers would be "taking a long chance" if an American ship was harmed.

The neutrality of the group of 21 American republics, as a whole, also continued to occupy official attention. The proposal for an inter-American conference at Panama City, to consider problems arising from the European war, reached the

stage on Wednesday where official invitations were extended by the Panamanian Government. Preliminary diplomatic inquiries had established that the meeting would be held under the agreements reached at the Lima conference, and diplomatists from a number of countries immediately set forth on the journey to Panama. The Panamanian Foreign Minister, Narciso Garay, announced that the sessions would begin on Sept. 23. It is evident that the United States Government will take the initiative in the sessions and will bear a peculiar responsibility for the trend of the conference. Although obscured for the moment by the tremendous developments in Europe, this meeting of the 21 American republics represents still another advance in the relationships of countries in the Western Hemisphere.

# **Developing Hostilities**

UROPEAN peoples settled this week as best they could into a war atmosphere that seems likely to remain the overwhelming consideration for years to come in the Western world. The second week of war found the Western front little changed, possibly because of the difficulty of successful attack on either the Maginot or the Limes lines, and possibly because mobilizations and preparations still are in progress. Military engagements in the slim area between the great French and German frontier fortifications increased in scope and intensity, but the principal factor on that front still is the apparent decision of the German command to wage a defensive war, at least until the Polish battles are over. British troops already are reported in France, and a meeting of the Grand Allied War Council was held on French soil, Tuesday. Wordy warfare was carried on with great fervor, London taking the lead in this respect. All units of the British Empire finally were ranged behind the motherland when Canada formally declared war against Germany, last Sunday. German submarine sinkings already have become a regular feature of the daily digest of war reports. London declared a virtual blockade of the German Reich, and Germany followed by a similar move against Great Britain. There were no breaks in the ranks of the neutrals, although Russia appeared to be making preparations for warfare. The scene assumed ever more familiar aspects to those who lived through the trying days of the first World War.

Actual hostilities on the Western Front were not of a nature to prepossess military experts unduly. The brief official communiques of the French Government reported monotonously, day after day, that progress was being made on the relatively narrow front of about 12 miles in the German Saar region which obviously was chosen as a testing ground for the initial operations. No great opposition appears to have been offered by the German staff in the first 10 days of conflict. On Wednesday, however, the French advance apparently reached the point where the German Limes line defenses could be brought into action, for heavy Reich artillery then began to pound the French. Both sides continued to pour new troops into the respective lines. Some confusion arose as to actual participation of the British forces in the conflict along the line from Belgium to Switzerland, but it was accepted that by Wednesday the British were "cooperating fully" with their French ally. The transfer of British troops to French soil was effected secretly, probably

over the last week-end, but the extent of the transfer remains an official secret. Paris reports of Thursday said that "thousands" of English soldiers were fighting shoulder to shoulder with their French comrades in arms. Aerial fighting on the Western Front has been confined to the actual region of military combat and there is no reason to believe that it has yet been extensive, for official reports speak only of a "few" planes lost on either side in the daily conflicts. Late last week a British fleet of bombing planes blasted the German island of Sylt. British propaganda against the Hitler Government continued to take the form of leaflet bombardments, aimed at convincing the German people of the wickedness of their own Government.

If the war news has a brighter side, it is to be found in the observance of neutrality pledges. There have been minor violations on both sides of the territory of neutral nations, but no such terrible incidents as marked the initial stage of the first World War. German airplanes on Wednesday engaged a Dutch craft and forced it down near a Dutch island in the North Sea. When German pilots, realizing their mistake, came down to help the Netherlanders, one of their own airplanes was tossed up on the beach and interned, the incident bringing a prompt apology. British airplanes violated both Dutch and Belgian neutrality, the Belgians bringing down a British bombing plane that had engaged in the leaflet campaign over the Reich. Apologies were tendered by the British Government. All of the neutral nations continued their mobilizations, and frontiers bristled everywhere. Italy remained a passive observer of events and seemingly is intent upon maintaining a neutral position, for Italian ship sailings were resumed. Spain declared its neutrality, and the Eastern European nations were intent upon preserving the happy status of non-combatants. Russia remained an enigma, and an increasingly troublesome one, for Moscow ordered large numbers of reserves into service and steadily augmented the forces at the Polish border. Whether Russia intended to join the war of Germany against Poland, or merely was preparing to resist a virtual invasion of Polish refugees, remained uncertain. There was also some conjecture as to whether Russia might fight the Reich, if a common frontier were established, or might attempt to set up the Polish Ukraine as a buffer State, if Poland succumbed entirely to the hammer blows of the German military machine. Some concern as to the attitude of Moscow was occasioned Wednesday when it appeared that German engineering experts were arriving in Russia, and the concern increased on the following day, owing to assertions in the Russian press that Poland had treated its Russian minority unfairly.

The economic war, of which the war at sea is a part, produced few surprises this week. The horror of the Athenia sinking on a westbound voyage, only a day after war was declared, has been cleared up only to the extent of a finding by a board of inquiry that a submarine was involved, but our own Embassy in London stated there was no evidence of subsequent shelling. Great Britain proclaimed, late last week, that a great variety of wares would be considered contraband, and a number of vessels destined for Belgian and Dutch ports were haled into English ports and subjected to cargo examinations. Several American vessels were detained, and

in one case a cargo of Florida pebble phosphate, shipped to Germany before the war started, was taken for public sale. German forces retaliated with continued submarine sinkings of British vessels, a score of vessels already having been torpedoed. Germany announced on Monday a blockade of Great Britain, quite similar to that of the London Government against the Reich. In the Eastern European neutral countries, British and French agents were reported on Wednesday to be buying up grain and other supplies, obviously with the aim of preventing such materials from falling into the hands of the Reich. Germany was said to be exerting pressure upon Rumania and Yugoslavia for the delivery of goods already contracted for under the German barter system.

The war of propaganda thundered almost as loudly as the roar of artillery on the Western Front. The German Air Minister, Field Marshal Herman Goering, delivered an extraordinary address before German munitions workers, last Saturday, in which he declared emphatically that the Reich wants nothing from France, and that Great Britain is unable to defeat Germany, economically or militarily. "Only America remains for Great Britain," General Goering asserted, "but we can get on without the United States as a source of raw materials." German endeavors to drive a wedge between Great Britain and France were illustrated by this address, but they seemed to make no impression whatever upon the Alglo-French combination. A British official statement immediately made it clear that preparations are being made for a war which is expected to last at least three years. The Canadian war declaration on Sunday reinforced the impression thus made, and on Monday the British Ministry of Information stated that there could be no peace while Herr Hitler and his Nazis rule the Reich. In a statement before the House of Commons in London, Wednesday, Prime Minister Neville Chamberlain asserted that the Nazi "menace" must be destroyed, and he added that not only will Poland be restored, but also that Czechs will be freed from German bondage. The British official belief was expressed, Wednesday, that Germany aims to establish submarine and air bases in Latin America, this declaration bringing the German retort, Thursday, that the Reich has no ambitions in North, Central or South America, and that the British statement merely was made with an aim of influencing American sentiment. Mr. Chamberlain informed the Commons on Thursday that the German bombing of Polish civilians would strengthen the resolve of the Allies to insure "that the menace we are now fighting is finally removed."

In all the belligerent countries preparations were continued for a long and costly war. Germans were advised to pull their belts tighter, and the advice was emphasized through regulations for reduction of the meat ration to one pound weekly. Great Britain remembered the bitter days of 1917 and 1918, and made preliminary arrangements for food rationing, in the event that German submarines sink great tonnages of British ships. War finances were discussed everywhere, with the French adopting the expedient of a 25,000,000,000 franc advance from the Bank of France, while Canada authorized a war loan of \$100,000,000 and adopted a harsh schedule of war taxation. A French Cabinet shift, announced on Wednesday, placed almost all imme-

diate power in the hands of Premier Edouard Daladier, for he assumed the duties of National Defense and War and Foreign Affairs, in addition to those of President of the Council. Former Foreign Minister Georges Bonnet was placed in charge of the Ministry of Justice. In London a good deal of criticism was directed against the officials directing the censorship operations, largely because the British public itself remained without adequate information as to the trend of affairs. Blackout restrictions, which made British life difficult at night, gradually were relaxed as days passed without airplane bombings.

# **Poland Totters**

EFT without effective support by Great Britain and France, her airforce demolished and her lines of supply cut off by the German occupation of industrial areas and the German control of the Baltic Sea, Poland appears to be reaching the final stages of a losing battle against the swiftly moving mechanized forces of the German Army. Already there are rumors in Berlin and Moscow that Poland will be partitioned for the fourth time and rendered militarily impotent, at least for the duration of the war now in progress. In this second week of the undeclared war of Germany against Poland, the Poles continued to offer the same sort of gallant resistance that marked the immediate start of hostilities on the Eastern Front. But all reports agree that they were hopelessly outclassed from the start by the highly mechanized German forces, which thrust motorized fingers deep into Polish territory and then proceeded to close the gaps and make fresh Even the most desperate resistance advances. seemed inadequate to stem the advance of forces employing weapons that challenged all Polish ideas of a war of position. So hopeless seems the Polish situation that Paris admitted the virtual loss of its ally on Thursday, and post-motems began to appear in which the Polish dictator, Edouard Smigly-Rydz, was said to bear the responsibility for the Polish defeat because he failed to heed the advice of Allied military counselors.

The fighting in Poland, this week, merely repeats the tale of an extraordinarily rapid German advance against a resistance which, however stubborn and proved altogether inadequate. tered by the tremendous initial blows of the German forces, Poland's defenders apparently endeavored to gather in the traditional defense area of the triangle where the Vistula is joined by the Bug River. This second and natural line of Polish defense has served the country admirably in times past, but the Germans appear to have cracked the nut without much difficulty. Reports of the military situation were confused and uncertain, early in the week, for all attention was centered on the assault and defense of Warsaw, which is of great psychological importance but not of much military significance. German armored motor units reached the outskirts of the former Polish capital only a week after they began their invasion, and for some days thereafter conflicting claims were made as to possession of the city. Polish civilians, including women, were urged by Polish spokesmen to resist the invaders to the last, and trenches hastily were dug and barriers thrown up to defend the city. In the meantime, however, the German forces swirled around Warsaw and made the defense a matter of comparative military insignificance. By Wednesday the German command was able to announce the complete encirclement of Warsaw, and on Thursday the German advances from East Prussia and from Germany proper effected a junction which isolated the former capital from any defense forces to the east, and also trapped the Polish divisions still fighting in the loop extending from Warsaw westward.

German forces narrowed systematically the western loop, which stretched at the beginning of the week beyond Poznan (Posen) almost to the frontier. The invaders reached out steadily in the remaining territory and swirled especially around the eastern defenses of the Bug-Vistula triangle. Completely in command of the air, they hammered unmercifully at Polish communications and almost isolated Poland entirely from its Eastern neighbors. Long fingers were thrust out by the Reich forces toward eastern Poland, with the apparent aim of cutting off communications of any kind with Rumania. City after city fell to the Reich, and those still in Polish hands were subjected to interminable and merciless aerial bombardments. The German command reported the capitulation of division after division. Some guerrilla warfare behind the German lines apparently occurred, and it brought the threat on Wednesday of unrestricted airplane bombing of undefended Polish towns. There were reports from the German side of atrocities by the fleeing Poles against the German minority, which possibly were intended to bolster the decision to use airplanes against defenseless civilians. But these terrible incidents of warfare failed to change the aspects of the struggle. The Polish port of Gdynia surrendered to the German invaders on Wednesday, after two weeks of desperate defense. The Polish Government, established last week at Lublin, moved on to unnamed villages in southeastern Poland, and some Ministers already are reported to have crossed the border into Rumania. United States Ambassador Anthony J. Drexel Biddle Jr. crossed into Rumania on Wednesday. French military circles admitted on Thursday that a Polish "front" no longer existed, and that scattered aggregations of troops were fighting individual engagements that seemed hopeless. A forlorn Polish request for more effective aid was made to the British Government on Thursday, by Count Raczynski, the Polish Ambassador to London.

The fate of Poland quite possibly was under debate between German and Russian authorities, under their agreement of Aug. 22. Russian forces moved toward the Western frontier of that country in great numbers during recent weeks, and reserves were called to the colors in increasing numbers. Intentions of the Stalin regime at Moscow still are a matter of conjecture, but a broad hint was made available Thursday in statements by the controlled Russian press that Poland had "exploited" its Ukranian and White Russian minorities, which comprise more than one-third of the population of Poland. The antagonism expressed in Moscow toward Poland led to the belief that the country would either be partitioned by Russia and the Reich, or that a buffer State would be set up to keep actual frontiers of the Red and Brown revolutions apart. In the German capital military conversions were continued between Russian and German staffs, and it was conjectured that the disposition of Poland played an important part in the conversations. There were, however, no formal indications of intentions.

# Tripartite Accord

EALISTIC views as to the financial repercus-R sions of the European conflict are highly necessary in official circles in Washington, and to a large degree such views already prevail. All sorts of efforts have been made since Sept. 1 to shield the United States from unfortunate financial developments, with the Treasury Department taking the initiative in this respect. It seems all the more strange, accordingly, that Secretary of the Treasury Henry Morgenthau Jr. finds it difficult to recognize the simple fact that war has thrown completely into the discard the tripartite agreement for international control of currency movements made by the United States, British and French Governments. Weakness of the French franc made a mockery of the understanding from the beginning, and the more recent depreciations of sterling and francs, in terms of the dollar, leave hardly a shred of the arrangement in existence, from any practical viewpoint. This is, perhaps, inevitable from the British and French viewpoints, and not much can be said about the embargoes on gold shipments and the exchange controls promptly instituted by those warring governments, for modern warfare is total and necessitates general measures on finance as well as on other aspects of affairs. There is no use pretending, in these circumstances, that such an instrument as the tripartite monetary accord has any validity. Secretary Morgenthau managed to declare last Monday, according to Washington reports, that the tripartite agreement remains in effect. It appears that the effectiveness, in the opinion of the Secretary, rests with the "spirit" of the agreement. This is nothing more than specious pretension, for it was precisely to prevent the exchange restrictions, gold embargoes and falling currency values now prevalent that the agreement was effected originally. The tripartite accord is an early and unfortunate casualty of the European war.

# Far East

LTHOUGH European hostilities have relegated A Far Eastern affairs to second place, there is still much to be concerned about in the war which Japan is waging against peaceful China, and in the effects of that undeclared conflict upon American and other foreign interests. Owing to the linking of the "Brown Bolshevism" of Germany with the "Red Bolshevism" of Russia in the last 10 days of August, Japanese calculations were upset completely, and the Cabinet change which resulted in the appointment of Premier Nobuyuki Abe is one visible result of the hasty Japanese adjustment to the new alignment. Most Tokio reports indicate that Japan, left without a friend by the German maneuver, is likely to court Great Britain and the United States, while endeavoring at the same time to bring the war against China to an early conclusion. Such interpretations of the Japanese scene are based upon the Japanese conviction that Russia eventually must be engaged in battle and perhaps expelled from the Maritime Provinces of Siberia. The validity of the reports is difficult to contest, but there is also a need for a period of readjustment, in which the Japanese militarists well may attempt fresh measures against foreign interests in China. Shanghai reports of Thursday stated that the international settlement there was nervous and apprehensive about a possible Japanese move designed to oust the British and French from control. There is a faint possibility that these fears are well grounded, for both Moscow and Tokio reports suggest conversations for an "amity" between Japan and Russia which most experts in international affairs would regard as a mere temporary expedient. The Japanese war against China, meanwhile, is simmering down into intermittent airplane raids on Chinese towns far in the interior. The next phase of Far Eastern affairs is only in its early stages, and the developments will bear close watching.

# **Bank of England Statement**

HE weekly return of the Bank dated Sept. 13 revealed a further expansion in note circulation of £3,589,000, which raised the total outstanding to a new record high of £553,475,000. In the three weeks since Aug. 23 circulation has increased £45,412,000. A slight decline in gold holdings of £26,467 together with the jump in note circulation brought a decrease in reserves of £3,615,000. Public deposits fell off £3,028,000 and other deposits £2,078,949. Of the latter amount £1,658,249 represented a loss to bankers' accounts and £420,700 to other accounts. The proportion of reserves to liabilities dropped to 16.7% from 18.3% a week ago; a year ago it was 31.2%. Government securities showed a decrease of £50,000 and other securities of £1,433,155. The latter consists of discounts and advances, which fell off £2,158,-092, and securities, which increased £724,937. Bank's discount rate remained unchanged at 4%. Below we furnish the different items with comparisons for previous years:

# Bank of France Statement

HE statement of the Bank for the week ended Sept. 7 again showed an expansion in note circulation, the current increase being 3,791,000,000 francs, which raised the total outstanding to a new record high of 146,149,000,000 francs. In the three weeks since Aug. 24 the Bank's circulation has increased 23,015,000,000 francs. An increase appeared in French commercial bills discounted of 3,619,000 francs and in advances against securities of 20,000,000 francs, while the items of bills bought abroad and creditor current accounts declined 3,000,000 francs and 1,103,000,000 francs, respectively. The Bank's gold holdings remained unchanged at 97,266,039,155 francs. The proportion of gold to sight liabilities fell off to 58.46%, compared with 45.89% a year ago. The ratio three weeks ago, 65.36%, was the highest of the year to date. Following we furnish the various items with comparisons for back years:

a Includes bills purchased in France. b Includes bills discounted abroad. c In the process of revaluing the Bank's gold under the decree of Nov. 13, 1938, the three entries on the Bank's books representing temporary advances to the State were wiped out and the unsatisfied balance of such loans was transferred to a new entry of non-interest-bearing loans to the State.

were when our and use disastence of such toals was transferred a new entry of non-interest-bearing loans to the State.

Revaluation of the Bank's gold (at 27.5 mg. gold 0.9 fine per franc) under the that date and from June 20, 1937, valuation had been at the rate of 43 mg. gold 0.9 fine per franc; previous to that time and subsequent to Sept. 26, 1936, the value was 49 mg. per franc, and before Sept. 26, 1936, there were 65.5 mg. of gold to the franc.

# **Bank of Germany Statement**

THE statement for the first quarter of September showed another increase in note circulation, this time of 63,000,000 marks, which raised the total outstanding to a new peak level of 10,969,000,000 marks. Notes in circulation a year ago totaled 6,689,200,000 marks. A slight decrease in the Bank's gold holdings of 180,000 marks brought the total down to 76,773,000 marks; last year it was 70,773,000 marks. An increase also appeared in bills of exchange and checks of 321,000,000 marks which raised the total to 10,592,000,000 marks. The proportion of gold to note circulation is now 0.70%, compared with 1.13% a year ago. Below we furnish the different items with comparisons for previous years:

# Foreign Money Rates

IN LONDON open market discount rates for short bills on Friday are  $3\frac{1}{4}\%$ , as against 3 15-16% on Friday of last week, and 3 9-16% for three-months' bills, as against 3 15-16% on Friday of last week. Money on call at London on Friday was  $3\frac{1}{4}\%$ . At Paris the open market rate remains at  $2\frac{1}{4}\%$ , and in Switzerland at 1%.

# **New York Money Market**

BUSINESS in the New York money market was on a highly restricted basis this week, with official rates unchanged. The market continued to reflect the modest change in short-term rates on taxexempt obligations, however, and awards of a new issue of \$100,000,000 Treasury discount bills due in 91 days were made, Monday, at an average of 0.159% on an annual bank discount basis. The previous issue was awarded at 0.108% average. Bankers' bill and commercial paper rates were unchanged, with little business done. Call loans on the New York Stock Exchange held to 1% for all transactions, while time loans again were 1¼% for maturities to 90 days, and 1½% for four to six months' datings.

# New York Money Rates

DEALING in detail with call loan rates on the Stock Exchange from day to day, 1% was the ruling quotation all through the week for both new loans and renewals. The market for time money continues quiet. Rates continued nominal at 1½% up to 90 days and 1½% for four to six months' maturities. There has been a fairly heavy demand this week for prime commercial paper. Supplies of prime paper have improved and the market has been quite active. Rates were advanced on Monday to 5%% 1% from 5% 3¼%.

# Bankers' Acceptances

THE market for prime bankers' acceptances has shown very little activity this week. The demand has been light and high class bills continue in limited supply. There has been no change in rates. Dealers' rates as reported by the Federal Reserve Bank of New York for bills up to and including 90 days are ½% bid and 7-16% asked; for bills running for four months, 9-16% bid and ½% asked; for five and six months, 5%% bid and 9-16 asked. The bill buying rate of the New York Reserve Bank is ½% for bills running from 1 to 90 days. The Federal Reserve Bank's holdings of acceptances remain unchanged at \$546,000.

# Discount Rates of the Federal Reserve Banks

THERE have been no changes this week in the rediscount rates of the Federal Reserve banks. The following is the schedule of rates now in effect for the various classes of paper at the different Reserve banks:

DISCOUNT RATES OF FEDERAL RESERVE BANKS

Federal Reserve Bank	Rate in Effect on Sept. 15	Date Established	Previous Rate
Boston	1	Sept. 2, 1939 Aug. 27, 1937	11/4
Philadelphia	114	Sept. 4, 1937	279
Cleveland	136	May 11, 1935	2
Richmond	134	Aug. 27, 1937	2
Atlanta	11/2	Aug. 21, 1937	2
Chicago	*11/2	Aug. 21, 1937 Sept. 2, 1937	2
St. Louis	11%	Aug. 24, 1937	2
Kansas City	11%	Sept. 3, 1937	2
Dallas	11/2	Aug. 31, 1937	2
San Francisco	11%	Sept. 3, 1937	2

\* Advances on direct Govt. obligations bear a rate of 1%, effective Sept. 2, 1939.

# Course of Sterling Exchange

STERLING exchange showed little variation from last week. The entire foreign exchange market is extremely restricted and quotations for most currencies are largely nominal. The dollar, the belga, the guilder, and the Swiss franc appear to be the only currencies for which there is any demand.

On Sept. 12 the following official exchange rates were fixed by the Bank of England: New York cables, \$4.02-\$4.06; Paris, checks 176-177; Amsterdam, 7.57-7.64, and Canada, 4.40-4.46. Italy and Berlin were not quoted. The official rates established by the Bank compared with the rates fixed on Sept. 5 as follows: New York, \$4.02-\$4.06; Paris checks, 174-175; Amsterdam, 7.57-7.64; Switzerland, 17.93-18.11; Belgium, 24.16, buying rate, and Canada, 4.47-4.51. No rates were announced for Berlin or Milan. The wide spread in the exchange makes dealings difficult, as proved to be the case last week.

In New York the range for sterling this week has been between \$3.72½ and \$4.05½ for bankers' rate, compared with a range of between \$4.03¾ and \$4.22 last week. The range for cable transfers has been between \$3.73 and \$4.06, compared with a range of between \$4.04 and \$4.22½ a week ago.

The foreign exchange market continues immersed in the confusion and excitement of incidents arising from the war in Europe. Price declines are general in nearly all currencies except the neutrals, which are undergoing wide fluctuations. It is practically impossible to do business in future exchange and where a quotation is available, as in the Oslo group, where the spot rate is generally firm, the discount on futures is wide. In the last few days the discount on 90-day guilders ranged between 15 and 20 points below spot, and belgas with a spot rate well above dollar parity were quoted at 40 points below the basic cable rate for 90-day deliveries.

Foreign exchange traders consider the severe decline in the franc with respect to both sterling and the dollar an indication that franc exchange has been cut from its tie to sterling.

It is therefore questioned how far the tripartite agreement can function under present conditions. Certainly the agreement bears no relation to the working of the original plan formulated three years ago. However, Secretary of the Treasury Morgenthau in his press conference on Monday said that despite the exercise of wartime exchange control by Britain and France, the two nations are adhering to the spirit of the tripartite monetary agreement with the United States. He said it is operating with Holland, Belgium, and Switzerland for the exchange of information with Britain and France.

Secretary Morgenthau said that the American business man is assured that proper facilities will be maintained to permit establishment of dollar balances in this country for payment of goods shipped to foreign countries, including the European belligerents. He further stated that although Great Britain and France have adopted exchange control systems, the United States Treasury will continue to buy gold at \$35 an ounce. "The spirit of the agreement is still there," Mr. Morgenthau said, adding that no attempts have been made by either France or Great Britain to take advantage of the situation by entering upon competitive devaluation. Nevertheless, Mr. Morgenthau admitted that the stabilization fund is virtually inoperative.

The international trade agreements between the United States and many other countries are apparently also jeopardized by the existence of war in Europe. Trade experts in Washington analyzing the official British figures for trade with the United States in the first six months of the year find evidence that the reciprocal trade agreement with the

United Kingdom has brought some beneficial results. At the State Department a few days ago it was said that a period of six months was too short to permit a final judgment.

The main purpose of the agreements was to restore the free interchange of goods and commodities which existed before the war of 1914-1918, when for a period of nearly 100 years the economic interdependence of nations was universally recognized. The growth of economic nationalism following the World War is proving at the present time not wholly disadvantageous to those countries which by tariffs, quotas, and exchange restrictions, have achieved a measure of self-sufficiency which renders them less liable to shocks from the derangement of trade relations caused by the war.

The transfer of £280,000,000 in gold by the Bank of England on Sept. 26 to the Exchange Equalization Account, an amount which constituted virtually the Bank's entire gold stock, is regarded in London as a wise measure for the ultimate safety of the currency.

The London discount market is showing a tendency toward greater ease, although at present bill rates continue unchanged from last week. The ease in the discount market gave rise to the possibility that the Bank of England may reduce its rediscount rate in the near future. Just before the outbreak of the war the Bank increased its rate from 2% to 4%.

On Tuesday the Bank of England acted to protect the bill market as it did in 1914. According to advices from London the Bank will advance where required to such acceptors through their bankers the funds necessary to meet maturities of all approved bills accepted before Sept. 3, thus releasing the drawers and endorsers of such bills from their liabilities. Acceptors will be under obligation to make collection as soon as possible and apply these collections against advances made by the Bank of England.

The Bank will charge interest on such advances at 2% above its prevailing discount rate, but not to exceed 6%. The first interest payment will be due on March 1, 1940 and on each Sept. 1 and March 1 thereafter.

The gold movement from Europe to New York is rapidly subsiding. It now seems almost doubtful if the Treasury's gold stock will pass the \$17,000,000,000 mark. On Sept. 13 it reached \$16,808,000,000. The Treasury's gold price continues at \$35 an ounce and the gold stock may be enhanced hereafter by export and sale to the United States of newly mined domestic gold and gold from Canada and South America.

There is also a prospect that if Great Britain and France are compelled to pay for supplies bought on this side, they may first dispose of some part of their earmarked gold held in New York, in which case they would receive dollars and the gold so disposed of would be added to the Treasury stock.

The London gold price continues at 168s per ounce. This is the Bank of England's buying price. No gold is allowed to be exported from England.

London open market money rates are as follows: Call loans against bills are available at  $2\frac{1}{2}\%$ ; two-months bills are  $3\frac{1}{2}\%$ ; three-months bills are  $3\frac{3}{4}\%$ ; four-months bills are  $4\frac{5}{8}\%$ ; and six-months bills are 5%.

At the Port of New York the gold movement for the week ended Sept. 13, as reported by the Federal Reserve Bank of New York, was as follows: GOLD MOVEMENT AT NEW YORK, SEPT. 7-SEPT. 13, INCLUSIVE

Imports

Exports

Imports \$52,150,000 from Canada 30,869,000 from England

None

\$83,019,000 total

Net Change in Gold Earmarked for Foreign Account Decrease: \$5,154,000

Note—We have been notified that approximately \$6,013,000 of gold was received at San Francisco, of which \$5,521,000 came from Japan, and \$492,000 from China.

The above figures are for the week ended on Wednesday. On Thursday \$30,154,000 of gold was received of which \$16,921,000 came from Canada, \$13,231,000 from England and \$2,000 from Guatemala. There were no exports of the metal. On Friday \$16,556,000 of gold was received, of which \$14,383,000 came from Canada and \$2,173,000 from India. There were no exports of the metal.

Canadian exchange is at a sharp discount in terms of the United States dollar, entirely as a result of the decline in sterling and the war in Europe. This week Montreal funds ranged between a discount of 11% and a discount of 6%%.

Referring to day-to-day rates sterling exchange on Saturday last had only a limited market. Bankers' sight was 4.05@4.05%; cable transfers 4.05%\$4.06. On Monday exchange continued restricted. The range was \$4.04@\$4.05½ for bankers' sight and \$4.043/4@\$4.06 for cable transfers. On Tuesday sterling continued under pressure in limited trading. Bankers' sight was \$4.03@\$4.045/8; cable transfers  $4.03\frac{1}{8}$  \$4.04 $\frac{7}{8}$ . On Wednesday new pressure developed in sterling. Bankers' sight was \$4.00@ 4.03%; cable transfers, 4.00% 4.03%. Thursday the market was virtually unchanged. The range was  $\$3.76\frac{3}{4}$ @ $\$4.00\frac{1}{4}$  for bankers' sight and 3.77@4.00% for cable transfers. On Friday the market was without important developments. The range was \$3.721/2@\$3.891/2 for bankers' sight and \$3.73@\$3.90 for cable transfers. Closing quotations on Friday were \$3.87 $\frac{1}{2}$  for demand and \$3.87 $\frac{3}{4}$  for cable transfers. Commercial sight bills finished at 3.85, 60-day bills at 3.81, 90-day bills at 3.80, documents for payment (60 days) at \$3.81\%, and seven-day grain bills at \$3.863/8. Cotton and grain for payment closed at \$3.85.

# Continental and Other Foreign Exchange

FRENCH exchange must continue for a long time to present erratic trends. In Paris the newly created Office of Exchange under the supervision of the Bank of France endeavors to hold the franc rate steady, but in New York and other free markets the rate shows a downward tendency.

On Sept. 11 the Paris authorities established a decree prohibiting or regulating export of capital and exchange operations and gold traffic. These plans were elaborated in detail several months ago but were put in operation only last Monday. They are designed to save the nation's gold stock from the risk of being utilized for any other purpose than the prosecution of the war.

Control is exercised over what all persons resident in France may buy abroad and over the foreign currencies which they may obtain by sales of services abroad. While the control is strict, it appears to be more elastic than the control exercised in London.

All applications for exchange by importers, travelers, and others with obligations abroad will be examined in the Office of Exchange and all exports will be supervised with a view to acquiring all exchange resulting therefrom. However, questions of

general policy will be decided by the Government, which plans, it is understood, to vary its economic procedure to correspond to the procedure applied by each country toward France. Wherever possible France will deal on an equal basis with the other country. This is already assured as regards Great Britain and it is expected that a working agreement with the United States will soon be made.

It would seem that the exchange control intends to make no substantial modification of the rates prevailing between London, Paris, and New York during the past few weeks unless or until it is found inevitable. Thus, according to Paris, the practical mechanism of the tripartite agreement, with the three controls uniting to keep rates as stable as possible and to transfer gold at the end of each day's business, is still in effect.

Under the new regulations anyone planning to leave France must give evidence of and obtain approval of the expenses he requires. For trips abroad the maximum sum authorized for a traveler to take with him is 5,000 francs, which may be increased to 10,000 francs in case the duration of the trip is prolonged.

In explaining the Government's decrees Finance Minister Reynaud said that the Bank of France possesses twice the amount of gold in tons that it did in 1914. As to the immediate financial effort of the country he said that the Bank of France had made no difficulty in advancing 25,000,000,000 francs for defense. Instead of selling their bonds he stated that French people have resumed subscribing and that the surplus of new subscriptions for defense bonds over sales in the first week of the war has been 1,600,-000,000 francs.

Belgian exchange is generally firm but shows wide fluctuations. The firmness is due largely to the neutral position of Belgium and its adherence to gold. There is in effect no quotation for future Belgian exchange, but on one or two occasions in the past week 90-day belgas were quoted at a discount of 40 points from the basic cable rate.

On Sept. 12 the permanent committee of the Oslo Conference Nations assembled in Brussels to exchange views on economic measures to preserve their neutrality. On the agenda was an exchange of views concerning the action to be taken in the field of commercial exchange because of the war. Details of the outcome of the two-day meeting have thus far not been divulged. Delegates attended from Belgium, The Netherlands, Norway, Sweden, Denmark, Switzerland, and Luxembourg.

German marks have been quoted infrequently in New York this week. On the few occasions when quoted they ranged between 38.75 and 40.00 for the so-called free or gold mark. Par is 40.33.

The London check rate on Paris closed on Friday at 176-177, against 176-177 on Friday of last week. In New York sight bills on the French center finished on Friday at 2.18½, against 2.26; cable transfers at 2.19, against 2.26. Antwerp belgas closed at 17.06 for bankers' sight bills and at 17.06 for cable transfers, against 17.07 and 17.07. Berlin marks are no longer quoted in New York. Italian lire closed at 5.21 for bankers' sight bills and at 5.21 for cable transfers, against 5.21 and 5.21. Exchange on Czechoslovakia is no longer quoted in New York. Exchange on Bucharest closed at 0.72 (nominal), against 0.72 (nominal), on Poland 18.80 (nominal), against 18.80 (nominal); and on Finland at 2.05 (nominal), against

2.05 (nominal). Greek exchange closed at 0.78 (nominal), against 0.80 (nominal).

EXCHANGE on the countries neutral during the war of 1914-1918 now moves in entire independence of sterling. The Scandinavian currencies since last week have abandoned the tie which prevailed for many years. Quotations for these units are largely nominal, and when quotations are obtainable the Danish unit shows a tendency toward weakness. The Holland guilder and the Swiss france are the firmest of these currencies but trading is limited.

Bankers' sight on Amsterdam finished on Friday at 53.16, against 53.13 on Friday of last week; cable transfers at 53.16, against 53.13; and commercial sight bills at 53.06, against 53.03. Swiss francs closed at 22.63 for checks and at 22.63 for cable transfers, against 22.52 and 22.52. Copenhagen checks finished at 19.40 and cable transfers at 19.40, against 19.50 and 19.50. Checks on Sweden closed at 23.82 and cable transfers at 23.82, against 23.83 and 23.83; while checks on Norway finished at 22.75 and cable transfers at 22.75, against 22.75 and 22.75.

EXCHANGE on the South American countries is frequently only nominally quoted. The Argentine peso is displaying strength. Exchange on Brazil and Peru is held steady by their respective controls.

The United States Consul General at Buenos Aires recently cabled Washington that numerous exchange restrictions on imports from the United States which were imposed on Aug. 21 have been largely abrogated. The restrictions originally were applied to 173 classes of United States merchandise the importation of which had been suspended for the rest of 1939. Permits are now being granted in unlimited amounts for importation of 62 classes at an exchange rate equivalent to 20 pesos to the pound sterling. Restrictions on a number of other classes have been removed at an exchange rate equivalent to 17 pesos to the pound.

A communique recently published by the Treasury office at Lima, Peru, stated that there is no danger than Peruvian finance will be adversely affected by the outbreak of hostilities in Europe as it was in the World War.

A recent dispatch from the American Embassy at La Paz stated that the Bolivian Government has suspended all foreign exchange transactions pending developments in Europe.

Argentine paper pesos closed on Friday at 28.00 for bankers' sight bills, against 28.00 on Friday of last week; cable transfers at 28.00, against 28.00. The unofficial or free market was 23.25@23.50, against 23.90@24.50. Brazilian milreis are quoted at 5.10, against 5.10. Chilean exchange is quoted at 5.19 (official), against 5.19. Peru is nominally quoted at 19.00, against 19.00.

EXCHANGE on the Far Eastern countries is confused as a result of the European war. For the most part these currencies show ease in sympathy with sterling.

Closing quotations for yen checks yesterday were 23 5-16, against 23.65 on Friday of last week. Hongkong closed at 245%, against 25½; Shanghai at 6¾ (nominal), against 7.00 (nominal); Manila at 497%.

against 49.80; Singapore at 46.00, against 47.75: Bombay at 29.05, against 30.42; and Calcutta at 29.05, against 30.42.

# Gold Bullion in European Banks

HE following table indicates the amounts of gold bullion (converted into pounds sterling at the British statutory rate, 84s. 11½d. per fine ounce) in the principal European banks as of respective dates of most recent statements, reported to us by special cable yesterday (Friday); comparisons are shown for the corresponding dates in the previous four years:

Banks of-	1939	1938	1937	. 1936	1935
	£	£	£	£	£
England	*334.514	327,885,136	328,047,961	247,940,825	194,315,231
France	328,601,484	293,728,209	293,480,435	428,257,505	575,967,151
Germany	b3.838.650	3,008,600	2,493,000	2,223,900	3,259,850
Spain	c63.667,000	63,667,000	87,323,000	88,092,000	90,777,000
Italy	a23,400,000	25,232,000	25,232,000	42,575,000	53,013,000
Netherlands	94.083.000	123,376,000	105,490,000	56,846,000	49,976,000
Nat. Belg.	103.500.000	88,130,000	102,343,000	105,707,000	97,621,000
Switzerland.	96,779,000	113,875,000	83,206,000	54,159,000	46,612,000
Sweden	35,166,000	29,319,000	25,944,000	24,132,000	19,900,000
Denmark	6.500.000	6,538,000	6,549,000	6,552,000	7,394,000
Norway	6,666,000	7,442,000	6,602,000	6,604,000	6,601,000
Total week	762,535,648	1,082,200,945	1,066,710,396	1,063,089,230	1,145,436,232
Prev. week	762.547.033	1,080,670,440	1,066,449,569	1,064,147,780	1,148,145,515

Prev. week. 762.347.033 1,080,670,440 1,066,449,569 1,064,147,780 11,148,145,515

\*Pursuant to the Currency and Bank Notes Act, 1939, the Bank of Engiand statements for March 1, 1939 and since have carried the gold holdings of the Bank at the market value current as of the statement date, instead of the statutory price, which was formerly the basis of value. On the market price basis (168s. per fine ounce) the Bank reported holdings of £661,48s. equivalent, however, to only about £334.514 at the statutory rate (84s. 11½d. per fine ounce), according to our calculations. In order to make the current figure comparable with former periods as well as with the figures for other countries in the tabulation, we show English holdings in the above in statutory pounds.

a Amount held Dec. 31, 1938, latest figures available. b Gold holdings of the Bank of Germany includes "deposits held abroad" and "reserves in foreign currencies." c As of April 30, 1938, latest figure available. Also first report subsequent to Aug. 1, 1936.

The value of gold held by the Bank of France is presently calculated, in accordance with the decree of Nov. 13, 1938, at the rate of 27.5 mg. gold, 0.9 fine, equals one franc; previously and subsequent to July 23, 1937, gold in the Bank was valued at 43 mg. gold, 0.9 fine, per france; before then and after Sept. 26, 1936, there were 49 mg. to the franc; prior to Sept. 26, 1936, 55.5 mg. gold 0.9 fine equaled one franc. Taking the pound sterling at the rate at which the Bank of England values its gold holdings (7,9881 gr. gold 11-12ths fine equals £1 sterling), the sterling equivalent of 296 francs gold in the Bank of France is now just about £1; when there were 43 mg. gold to the franc the rate was about 190 francs to the £1; when 49 mg., about 165 francs per £1; when 65.5 mg., about 125 francs equaled £1.

# National Labor Relations Act Alien to American Philosophy of Government

Although the National Labor Relations Act is one of the shortest of the basic New Deal statutes, perhaps the major goal towards which a program for its revision should aim is simplification of the law—even complete elimination of numerous of its provisions. This fundamental requisite has never been better illustrated than in certain decisions of the Labor Board handed down within the last few weeks, decisions that may be found entirely proper in view of the present form of the statute, despite the fact that they violate certain more important rules of ordinary common sense.

Consideration of these decisions and the need for particular changes in the Wagner Act they call for is merited at this time, moreover, because the House committee's investigation of the law, which is to be directed by Representative Smith of Virginia, has announced that it will start its formal hearings early next month with a review of certain Labor Board cases. The cases to be considered below are offered as ideal subjects for the committee's attention, because they demonstrate not, so far as the writer knows, any abuses of the administrative functions vested in the Board, but rather an abuse arising from the provisions of the law itself.

The Smith Committee will face a severe temptation to direct its probe at the deficiencies in administration of the Wagner Act. Certainly, the many mistakes and indiscretions committed by Board members and employees should provide more entertaining news than a considered review of just what the Board's interpretations of the law mean to industry and to the public. Yet, unless the Smith Committee resists the temptation to probe exclu-

sively the Board's numerous shortcomings, a real danger exists that it will be forced to publish a report calling only for a reorganization of the law's administration and not the constructive revision of the law that is so desperately needed.

The first of these decisions selected illustrates a fundamental flaw in one of the basic sections of the law, that which makes it mandatory for all employers to bargain collectively at their employees' desire. The Labor Board quite early in its career found that this mandate must be implemented by certain important rules, lest it become meaningless. Thus it asserted the doctrine that employers must not only bargain collectively, they must bargain "in good faith."

Now the Board itself realized to some extent that the task of determining when an individual was bargaining in good faith was a formidable one, so it set up certain precepts or criteria to simplify this task. Thus it ruled that employers, to show their good faith, must be willing to meet employee representatives as often as was convenient. found it necessary to decide that good faith required more than just a meeting, for employers were informed that they could not fulfill the requirements by meeting employees and then rejecting all their demands. Instead, they must offer counterproposals to union demands to demonstrate their "good faith."

But late last month the Board found it necessary to further implement the rules with regard to bargaining in good faith—in the Dallas cartage case. Here the Board ruled that not only must the employer make counter-proposals, if he rejected union demands, but he must also make genuine counterproposals, not concessions which were "wholly illusory." Also criticized in this case was the employer's "captious criticism" of union demands, although to one experienced in actual market trading, such criticism might be deemed an evidence of real bargaining. And the Board branded as wholly illusory a proposal of the employer to sign a contract binding existing wages and hours until and unless, after a conference with the union, the management decided to change them.

Now it is hard to read from this decision any inference other than that an employer must tender some sort of a wage increase or other improvement in working conditions to prove his good faith, and if this inference is justified the ruling is perhaps fully as amazing in its implications of bureaucratic control as any the Board has handed down. But entirely apart from this inference, consider the degree of control involved in the dogma itself-that bargaining in good faith requires counter-proposals which are not wholly illusory. Obviously the determination of when such a proposal is illusory must always depend entirely upon judgment and requires a degree of insight into motives that few individuals possess-meaning, of course, that the Administrator will eventually have to decide according to his own prejudices.

Yet if the Wagner Act does require employers to pargain in good faith, it is hard to see how an administrative agency can avoid the necessity of probing the genuineness of employer counter-proposals, however impossible the task.

An even more recent case—that of the Waumbec Mills, Inc. (Manchester, N. H.)-decided less than two weeks ago, demonstrates how far-reaching still another fundamental provision of the Wagner Act may become. This is the provision forbidding employers to discriminate either in hire or tenure for reasons of union activity. The Board's Waumbec ruling ordered the employer to offer employment to a worker refused a job allegedly because of past union affiliations, and what is more important, to give him remedial back pay consisting of the difference between what he actually earned and the amount the company would have paid him from the date of the refusal of a job to the time he went on the payroll.

As startling as this ruling appears at first glance, it seems perfectly proper under the law which forbids employers to discriminate in hiring policies. Here again, however, the personal equation of administration enters in, and one must ponder the dangers inherent in such rulings. In rehiring workers after seasonal or other layoffs, how can an employer make certain he will not violate the law if he does not rehire only union men? If he even carefully tries to maintain the same proportion of union and non-union workers as formerly prevailed in the plant (and just how is he supposed to know that), may not the union workers refused jobs run to the Board and demand jobs and back pay? Since the Board never accepts an employer's word that he does not discriminate in hiring policies, how can the employer make sure that he is not violating the law?

Even assuming the most reasonable administration possible of such a doctrine, the potential litigation and the costs thereof should terrify many employers.

Now these two rulings only suggest some of the implications of two of the most basic parts of the Wagner Act. Going back over the past four years, dozens of illustrations could be cited to show how the basic essentials of the Wagner Act require a terrific degree of intervention and control of industry.

Sometimes the prosecution of the law out to the limits of its implications results in rulings that are amusing, if not ridiculous. Thus probably few of the general public know that the Labor Board has held a wage increase to be against the law. In the Picker X-Ray case, two months ago, it reached this somewhat surprising verdict on the grounds that the employer granted the wage increase on the eve of an employee election with the intent of influencing the outcome of the poll. And to complete the cycle, in the Dallas cartage case cited above it held a wage cut to be also a violation of the statutebecause the cut occurred while negotiations with a union were in progress and should have been discussed (perhaps such a proposal would not have been "wholly illusory") at these sessions.

Another point needs to be driven home. Both of the decisions cited came some time after the appointment of the new member, Dr. William Leiserson, to the Board, and both occurred after the Senate and House Labor Committee hearings on Wagner Act amendments supposedly forced the agency to become more "reasonable" and less the advocate of organized labor. However desirable a change in the law's administration, therefore, it can hardly be contended that anything save a thorough-going revision of the statute itself will prevent its application in ways not foreseen at the time of its passage and still not even clearly foreseeable, ways

that are certain to hamper the normal functioning of industry.

As it stands today the Act is alien to the American philosophy of government in that it calls for government by men instead of government by law.

# Professor Moley as a People's Witness

The close of a series of eleven articles by Doctor Raymond Moley, relating the facts of his association with the candidacy and the Presidency of Mr. Roosevelt, create an appropriate occasion to congratulate the distinguished author, the "Saturday Evening Post," which published them, and the readers to whom they have been made available. Professor Moley and the editors of "Evening Post" have conferred a distinct public benefit that ought not to go unrecognized. Than the author of this series, no man had closer contacts with the President, during the years of his struggle for the nomination, during his first campaign for election, and during most of the period of his first Administration, nor is there anyone better equipped accurately to apprehend to singularities of the Presidential temperament or to report its almost pathological development under the stimulation of conscious power. That he is no longer in the Presidential service is, in view of the facts which he relates and other facts known to all who are closely in touch with current events, highly to Doctor Moley's honor and he is especially to be commended upon the courageous candor of his recent contribution to the store of information and intelligent analysis available to the general public. The powers of an American President are so vast and comprehensive, the latitude of action always open to his constitutional discretion, the enormous force and breadth of his influence in fields beyond any delegated authority, all combine to make the personality of the Chief Executive of unequaled importance at every stage in the Nation's history. In all these elements that importance has expanded largely since the Civil War and never so rapidly as under the rather commonly exaggerated exigencies of the long current depression. Hence, it is most important that every available avenue of information and understanding of the character and personality of the President should be kept open to as many as possible of the general public. If the suspected ambition for a third term hereafter materializes in an actual candidacy, such comprehension will contribute to a sound determination; if it does not, the public will have learned better to evaluate the risks which it has avoided and to weigh the relative merits and demerits of future aspirants for the highest office.

Dr. Moley was called to the service of Candidate Roosevelt at a time during his Governorship when it was believed that progress towards the exalted goal of his ambition required something more than an exhibition of winning ways and the negative qualities of facile adjustment. There must be some substance, or the simulacrum of substance, in any long series of campaign addresses and it became Dr. Moley's task, which he was plainly gratified to assume, not only to form a group, the Brain Trust, to compile and collate facts, but himself, principally by suggestion, to supervise most of the details and the results, and to insure co-ordination in conformity with a tenable program, not too definite to be widely persuasive. This is not precisely the way in which Dr. Moley describes his labors but it

is a concise re-statement of the much longer explanation which he volunteers. During the period of the campaign he appears to have risen steadily until he attained first rank in the confidence and esteem of his chief and an influence that was regularly exercised toward a liberal conservatism and against radical commitments unwarranted by the facts and not supported by thorough inquiry. This position of trust and influence persisted at least through the hundred days of the First New Deal, the period when sound economy in public expenditures was strongly envisaged and a balanced budget remained as a goal that could be announced without destructive qualifications. His own confidence in the President's vision and consistency of purpose seems to have been rudely shocked by the cynical scuttling of the London Economic Conference, and it may be that relations were thereafter somewhat strained upon both sides, for there seems to have been something less than complete co-incidence of intention in most of the relations of their subsequent contacts, but effectual co-operation continued beyond the Philadelphia convention and until after the November election of 1936. The period and the opportunity suffice for a diagnostical description of a metamorphosis in the mentality and conduct of an individual in the highest place that has rarely, if ever, been equaled in the pages of fiction.

At Albany, while he was candidate and Governor, Dr. Moley found Mr. Roosevelt friendly, unassuming, considerate and modest; welcoming facts and arguments, never impatient or resentful when criticism was friendly and constructive. He had something of a flare for the rococo in political expedients, and was already too easily convinced that resort to any conceivable nostrum suggested as a remedy is better than to postpone action during a period of cautious inquiry, but he was not over-sure of his own wisdom nor too thoroughly convinced that he possessed a subtle power over public opinion or that in him alone the voters reposed a confidence that could not be successfully assailed no matter where he attempted to lead. The alteration which Dr. Moley describes as the product of four years of power is extreme, radical, and frightening. exercise of great power has subtly served to convince the President that in himself he is great. Flattery has created in him an exhilarating and intolerant faith that alone he is infallible. That he finds himself committed, even by chance and tem-

porarily, to any policy or plan, at once results in a conviction that is beyond and above discussion that that particular policy or plan is an essential of public safety and must be prosecuted relentlessly and without permitting the slightest modification. Opposition to anything he proposes, from the moment it is proposed, becomes suddenly immoral or malevolent-only tories, economic royalists, oppressors of the under-privileged one-third are capable of such iniquity. He no longer listens patiently to advice, unless it conforms closely to his preconception, and he willfully closes every avenue that might lead to the correction of his most superficial thought. With this transformation of mental habits and methods, defects of mind and character that were minor when their consequences might be offset in common council, are largely expanded and acquire an importance they never before possessed. Dr. Moley undoubtedly believed that he was drawing an accurate portrait of his former chief when out of his abundant personal experience he wrote:

Ultimately a man closed off from free opinion and advice suffers a kind of mental autointoxication. He lives in a world of ideas generated only by himself, a world of make-believe, a world like Prospero's island, where his magic can create things in the image of his own devices—an insubstantial pageant of humanity . . . power is dangerous. It grows by what it feeds upon, dulling the perceptions, clouding the vision, imprisoning its victim, however well-intentioned, in that chill isolation of a self-created aura of intellectual infallibility which is the negation of the democratic principle.

Probabaly, among the 31 individuals who have held the office of President there was never any other so susceptible to this inscrutably and intellectually debilitating influence of high position and great power as the present incumbent. All his past experience, his over-privileged youth, his educational environments, his sudden leap to political eminence based upon the reminiscent prestige of another and very different Roosevelt, the business opportunities conferred because of his political standing, all these have contributed to deprive him of the poised comprehension which would repel exaggerated flattery and reject the persuasions of self-conceit. The lesson is not, however, for this day alone. If Mr. Roosevelt's strange progress affords an unusually convincing lesson in the dangers of continued power, it is still true that the same influences, in more or less effective degree, always attend the office which he holds. It is a wise public policy that has heretofore restricted the duration of this deteriorating influence.

# Gross and Net Earnings of United States Railroads for the Month of July

In keeping with the slow but persistent improvement of general business conditions in the United States, financial statistics of railroad operations in July reflect modest gains, as against the same month of last year. nance and continuance of this trend would, of course, tend in the long run to alleviate the many difficulties under which the carriers struggle. But it must again be emphasized that the Congress which adjourned a little more than a month ago took no steps toward mitigation of railroad troubles, notwithstanding repeated urgings and many legislative proposals. In the meantime the situation has undergone an abrupt change, through the German war upon Poland and the generalization of the conflict. Whether the United States can remain neutral, and what the European war will mean to our economic affairs, are matters of primary importance which only the future can deter-mine. The immediate reactions of the securities market are not necessarily indicative, for the gains in prices that developed soon after Great Britain and France declared war against Germany on Sept. 3 are difficult to justify on any comparison of the present situation with that which prevailed in 1914. For the time being railroad problems have been obscured by the overwhelming general considerations of the European war. It would seem, however, that such special problems will have to be faced and met in some manner, regardless of the ultimate effects of the European conflict upon the United States. At the beginning of the first World War many months elapsed before the relatively unprepared European combatants turned heavily to the United States for supplies. They are now far better prepared for a conflict which all believe will be long and bitter, but on the other hand the lessons learned from the first World War may occasion forehanded action in the Second World War, so far as supplies are concerned. The railroads of the United States naturally will be affected as the country in general is affected.

The creeping economic advance of the United States from the deep depression conditions of late 1937 and early 1938 continued in the month of July, 1939, and railroad financial statistics reflect that movement. Strike conditions hampered some industries in that month, but the business of railroad transportation apparently shared in the betterment of the economic picture as a whole. Losses of carrier business to competing methods of transportation continued, especially to motor trucks, and it would seem that this is one of the special aspects of the railroad problem which

needs further clarification, although something already has been accomplished through Interstate Commerce Commission regulations of interstate commerce in motor vehicles. Gross revenues of the railroads in July amounted to \$331,-878,000, against \$298,986,884 in July, 1938, a gain of \$32,-891,116, or 11.00%. Operating expense increases absorbed most of this gain in revenues, but the railroads nevertheless were able to increase their net revenues for July to \$90,457,198, from \$77,317,123 in July, 1938, a gain of \$13,-140,075, or 16.99%. When the comparison is extended to earlier years it will be seen that the results for July were better than in some of the depression years that followed 1939, but poorer than others. The contrast with the 1920's is distinctly unfavorable to the current period and suggests most pointedly the need for basic improvements in the railroad picture, without regard to the possible repercussions of the European war. We present in tabular form the financial statistics for July, as compared with the same month of last year:

Month of July	1939	1938	Inc. (+) or Dec. (-)
Mileage of 134 roads	233,396	234,296	-900 <sub> </sub> -0.38
Gross earnings Operating expenses Ratio of expenses to earnings		221,669,761	+32,891,116 +19,751,041 +8.91
Net earnings	90 457 198	77 217 192	±13 140 075 ±16 99

We turn now to the course of general business in July, as it affected the transportation industry. In order to indicate in a simplified form the measure of trade activity in relation to its bearing on railroad revenues during the month under review, we have brought together in the table we give below the figures indicative of activity in the more important industries, together with those pertaining to grain, cotton, livestock receipts and revenue freight car loadings, for the month of July, 1939, as compared with the same month of 1938, 1937, 1932 and 1929. It will be readily seen, on examination, that without a single exception the output of all the industries mentioned in the table is on a greatly increased scale. A very substantial increase (resulting from the larger production of the various industries) is also shown in the number of cars loaded with revenue freight. Receipts of cotton at the Southern outports were also very much larger and livestock receipts (taking them collectively) at the leading cattle markets showed an increase. On the other hand, receipts at the Western primary markets of the various farm products (taking them as a whole) were on a very much smaller scale.

Note—Figures in above table issued by:
a United States Bureau of the Census. b F. W. Dodge Corp. (figures for 37 States east of Rocky Mountains). c National Bituminous Coal Commission. d United States Bureau of Mines. e Association of American Railroads. f Compiled from private telegraphic reports. 2 Reported by major stock yard companies in each city. h New York Produce Exchange. k "Iron Age." I American Iron and Steel Institute. m National Lumber Manufacturers Association (number of reporting mills varies in the different years). x Four weeks. z Five weeks.

All that has been said above applies exclusively to the railroads of the country as a whole. Turning our attention now to the separate roads and systems, we find the exhibits in consonance with the results shown in the general totals. In the month under review 47 roads are able to show increases in gross earnings in excess of \$100,000, while only five roads report losses above that amount, and in the case of the net earnings 35 roads record gains of more than \$100,000, and eight roads decreases. Outstanding among the roads and systems which are able to show increases in both gross and net earnings alike are the Pennsylvania RR., which heads the list in the case of the gross, with a gain of \$4,917,482, and an increase in net earnings of \$564,873; the New York Central, reporting \$4,226,854 increase in gross and \$2,177,442 increase in net (these figures cover the operations of the New York Central and its leased lines; when, however, the Pittsburgh & Lake Erie is included, the result is an increase in gross of \$4,656,711 and a

gain in net of \$2,314,932); the Chesapeake & Ohio, showing a gain in gross of \$2,199,958 and in net of \$1,484,465; the Norfolk & Western, with \$2,078,861 gain in gross and \$1,341,259 in net; the Southern Pacific System, reporting an increase of \$1,391,309 in gross and a gain in net of \$1,021,248, and the Duluth Missabe & Iron Range, with \$1,301,080 increase in gross accompanied by a gain in net of \$1,115,842. Two roads which report losses in both gross and net are the Chicago Burlington & Quincy, with a decrease in gross of \$739,121 and in net of \$1,169,115, and the Missouri Pacific, with a loss of \$437,199 in gross and of \$387,153 in net. In the following table we show all changes for the separate roads and systems for amounts in excess of \$100,000, whether increases or decreases, and in both gross and net:

a These figures cover the operations of the New York Central and the leased lines—Cleveland Cincinnati Chicago & St. Louis, Michigan Central. Cincinnati Northern and Evansville Indianapolis & Terre Haute. Including Pittsburgh & Lake Erie, the result is an increase of \$2,314.932.

When the roads are arranged in groups, or geographical divisions, according to their location, it is found that all the three great districts—the Eastern, the Southern and the Western—as well as all the various regions comprising these districts, with the single exception of the Southwestern region in the Western District, show increases in gross earnings, while all the districts with their various regions, with the exception of the Central Western region and the Southwestern region in the Western District, reveal gains in the net earnings. It will be observed, too, that the percentage of increase reported by nearly all the regions is high in the case of the net earnings, reaching 36.28% in the Northwestern region; 38.17% in the Great Lakes region, and no less than 44.91% in the Pocahontas region. Our summary by groups is as below. As previously explained, we group the roads to conform with the classification of the Interstate Commerce Commission. The boundaries of the different groups and regions are indicated in the footnote to the table:

SUMMARY BY GROUPS-MONTH OF JULY

District and Region	1939	1938	Inc. (+) or Dec. (-)

NOTE—Our grouping of the roads conforms to the classification of the Interstate ommerce Commissions, and the following indicates the confines of the different EASTERN DISTRICT

New England Region—Comprises the New England States.

Great Lakes Region—Comprises the section on the Canadian boundary between New England and the westerly shore of Lake Michigan to Chicago, and north of a line from Chicago via Pittsburgh to New York.

Central Eastern Region—Comprises the section south of the Great Lakes Region east of a line from Chicago through Peoria to St. Louis and the Mississippi River to the mouth of the Ohio River, and north of the Ohio River to Parkersburg, W. Va., and a line thence to the southwestern corner of Maryland and by the Potomac River to its mouth.

SOUTHERN DISTRICT

SOUTHERN DISTRICT

Southern Region—Comprises the section east of the Mississippi River and south of the Ohio River to a point near Kenova, W. Va., and a line thence following the eastern boundary of Kentucky and the southern boundary of Virginia to the Atlantic.

Pocahonias Region—Comprises the section north of the southern boundary of Virginia, east of Kentucky and the Ohio River north to Parkersburg, W. Va., and south of a line from Parkersburg to the southwestern corner of Maryland and thence by the Potomac River to its mouth.

WESTERN DISTRICT

Northwestern Region—Comprises the section edicates. Considering Considering Tenade Iving Tena

WESTERN DISTRICT

Northwestern Region.—Comprises the section adjoining Canada lying west of the Great Lakes Region, north of a line from Chicago to Omaha and thence to Portland, and by the Columbia River to the Pacific.

Central Western Region.—Comprises the section south of the Northwestern Region west of a line from Chicago to Peoria and thence to St. Louis, and north of a line from St. Louis to Kansas City and thence to El Paso and by the Mexican boundary to the Pacific;

The grain movement over Western roads (taking them collectively) in July the present year fell far below that of July, 1938. With the exception of barley and rye, the shortage extended to all the different cereals, the falling off in the case of corn having been especially severe. For the five items, wheat compacts harden and management. the five items, wheat, corn, oats, barley and rye, combined, the receipts at the Western primary markets for the four weeks ended July 29, 1939, reached only 121,517,000 bushels, as against 140,984,000 bushels in the same four weeks of 1938, and 126,911,000 bushels in the same period of 1937, but comparing with but 57,386,000 bushels in 1932 and 106,-454,000 bushels in the corresponding period of 1929. Details of the Western grain movement, in our usual form, are set out in the table which follows:

WESTERN FLOUR AND GRAIN RECEIPTS

As to the cotton traffic over Southern roads-never very large in July, as it is the tail end of the crop season—while the port movement of the staple was on a greatly increased the port movement of the staple was on a greatly increased scale as compared with July, 1938, the overland shipments of cotton were very much smaller. Gross shipments overland aggregated only 51,394 bales in July, 1939, as against 64,557 bales last year, but comparing with 33,189 bales in the same month of 1937. Back in 1932 the shipments totaled but 14,361 bales. In 1929, however, they reached 60,918 bales. In the subjoined table we give the details of the bales. In the subjoined table we give the details of the port movement of cotton for the past three years:

# The Course of the Bond Market

War psychology has continued to dominate the bond market, but declines in high grades have not been as pronounced as they were last week, nor have gains in speculative rails been as extensive. The average of eight longterm United States Governments has lost less than a point since last Friday.

High-grade railroad bonds have continued to decline. Virginian 3%s, 1966, dropped 1% to 102%, while Duluth Missabe & Iron Range 31/2s, 1962, lost 1 at 103. Mediumgrade and speculative rails have been marked with buoyancy. Great Northern G 4s, 1946, advanced 5¼ points to 107¼, and New York Central 4s, 1942, were up 5 points at 84. Defaulted railroad bonds have been actively traded, new 1939 highs being recorded in many instances. Wisconsin Central 4s, 1949, at 16 were up 3 points.

There has been a resumption of the declining trend in high-grade utility bond prices this week, but the market has been more orderly and losses have been limited to generally moderate proportions. More prominent in this class have been Louisville Gas & Electric 3½s, 1966; Northern States Power 3½s, 1967; Union Electric 3¾s, 1962, and Virginia Electric & Power 3½s, 1968. Speculative types have been irregular, with small advances in evidence in many instances. Listed Canadian utility bonds such as Canada Northern Power 5s, 1953, and Power Corp. of Canada 4½s, 1959, have been very weak, the latter losing 9 points at 81.

Industrials have been mixed. Most convertibles, notably in the steel and oil groups, have been higher. Moderate gains have been registered among paper obligations of the more speculative type, and building material company issues have been mixed, with the Certain-teed 5½s, 1948, recovering several points. Shipping company obligations gained several points more, despite losses toward the close of the week. Gains of several points also have been registered among coal company obligations, both bituminous and anthracite. In the automobile group, the Studebaker conv. 6s, 1945, showed several points gain. Sugars weakened.

The general trend of the foreign bond market has again been downward. Losses up to 6 points were registered by Belgian, Danish and Australian bonds. Italian issues surrendered most of last week's gains, while German bonds churned around recent lows. Polish obligations, under consistent pressure, reached new lows. Uruguayan issues have been weakest in the South American group, where Brazilian bonds steadied after early declines upon announcement of interruption of the debt parley. Japanese bonds closed irregularly lower.

Moody's computed bond prices and bond yield averages are given in the following tables:

\* These prices are computed from average yields on the basis of one "typical" bond (4% coupon, maturing in 30 years), and do not purport to show either the average level or the average movement of actual price quotations. They merely serve to illustrate in a more comprehensive way the relative levels and the relative movement of yield averages, the latter being the truer picture of the bond market.

† The lat est complete list of bonds used in computing these indexes was published in the issue of Aug. 19, 1939, page 1086.

# Indications of Business Activity

# THE STATE OF TRADE-COMMERCIAL EPITOME

Friday Night, Sept. 15, 1939.

Figures on business activity the past week were slightly below the previous week, this, of course, reflecting the Labor Day holiday. The markets appear to be hitting a more normal stride now. Trading has shown a decided slowing up in the securities market, this giving a much needed breathing spell after the wild period following the outbreak of the war. Commodity markets have also shown a decided slowing up, with some departments showing drastic declines. The threat of the Government to take effective steps against excessive speculation, profiteering and gouging apparently had its effect on the skyrocketing antics of commodity prices. However, many lines of business and industry are expanding rapidly, and the upturn that was in progress before the war has undoubtedly been given considerable impetus. This is especially noteworthy in the steel industry.

An avalanche of orders since the outbreak of war in Europe has lifted steel ingot production to 71% of capacity, a gain of 12 points over the Labor Day holiday week, and has sent scrap prices to the highest level since early October, 1937, "Iron Age" said in its weekly report. "Bookings of the last week have greatly exceeded those of the week before, the totals of some products, particularly sheets and bars, assuming almost fantastic proportions and resembling the mad rush to buy in the early part of 1937 in anticipation of steel strikes," the magazine pointed out. Bookings of some products have gained from 35% to 200% over their weekly averages of August, and a New York sales office of one large company booked as much domestic business in three days as in the whole of August. Foreign business has expanded, but only to a small degree, because of shipping conditions. The "Iron Age" scrap composite price has advanced \$1.13 over a week ago to \$16.75. However, the magazine stated, the steel companies are disposed to do all

in their power to prevent a runaway market. Carnegie-Illinois Steel Corp. reaffirmed prices of virtually all steel products for the fourth quarter of this year, stating that present prices will apply on all domestic shipments up to Dec. 31, but that shipments made after that date will carry "prices in effect at the date of shipment." The last clause will be interpreted by some as implication that steel prices will be officially higher during the first quarter of 1940. "The automobile industry, headed into its 1940 model production year, expects considerable truck business from abroad and is taking steel heavily for fall production of cars. Railroads are opening their shops for the repair of cars and locomotives to take care of an expansion in car loadings. Inquiries for new cars and locomotives are ex-Shipbuilding will continue to boom. No falling off in structural steel business is expected. Ore shipments on the Great Lakes are being speeded up."

Electricity production by the electric light and power industry of the United States for the week ended Sept. 9 showed a smaller than seasonal decrease from the preceding week and totaled 2,289,960,000 kwh., an increase of 11.8% over the 2,048,360,000 kwh. a year ago, Edison Electric Institute reported. Output in the week ended Sept. 2 totaled 2,357,203,000 kwh., against 2,148,954,000 kwh. in the same 1938 week, an increase of 9.7%, and in the week ended Aug. 26 the output was 2,354,750,000 kwh., against 2,144,057,000 kwh., against 2,134,057,000 kwh. a year previous, an increase of 10.3%.

Car loadings of revenue freight for the week ended last Saturday totaled 667,409 cars, according to data made public today by the Association of American Railroads. These loadings constitute a decline of 54,339 cars, or 7.5%, compared with the preceding week. The decline was largely attributed to the Labor Day holiday. It was an increase of 18,702 cars, or 17.4%, however, over the loadings of 1938

and a decrease of 40,793 cars, or 5.8%, compared with 1937.

A sharp upswing in bank clearings this week over the preceding holiday period brought the current total to the highest level since the opening week of this year. The margin of increase over last year was the widest since the week of Feb. 8, 1939, and extended the series of year-to-year gains to eight successive weeks. Total transactions for 22 leading cities of the United States for the week ended Wednesday, Sept. 13, according to Dun & Bradstreet, Inc., were \$6,119,562,000, as compared with \$5,164,437,000 for the same 1938 week, or an increase of 18.5%. Clearings this week exceeded those of the preceding short week by \$1,742,622,000, as compared with a rise of \$1,005,822,000. \$1,713,622,000, as compared with a rise of \$1,005,832,000 between the two similar weeks of last year.

It is stated that New York's hotel business jumped 30% last month above August, 1938. Authoritative sources state that New York room sales were up 39% and restaurant trade up 17%. City-wide occupancy for transient hotels in New York City reached 70% in August, with many of the mid-town hotels doing much better, it is said.

Automobile production this week nearly tripled that of the same week a year ago, and was more than 50% greater than that of the previous week, according to Ward's Automotive Reports, Inc. Output this week totaled 41,245 units, an increase of 25,245 units over the same 1938 week, and 14,380 units greater than the previous week. A continuance

of the advance is expected by Ward's.

Retail trade was 8% to 12% higher than in the corresponding week of 1938, while wholesale trade, retarded to some extent as buyers began to appraise the situation following last week's rush, showed gains, according to Dun & Bradstreet, Inc., in their weekly review. This publication also pointed to the gains in steel production, bituminous coal output, daily average crude oil output, automobile production, power output and freight car loadings. Bradstreet state that all branches of trade and industry moved forward this week as buyers continued to place orders in advance of the activity expected to result from the outbreak of war in Europe, according to various indices released today.

There were no spectacular changes in the weather the past week. Some of the features were a general absence of rainfall and high temperatures in most of the central parts of the country. In Eastern sections the week was largely dry, except for scattered showers, while abnormally warm weather prevailed on the 8th. Drought is reported to be very severe in the Great Plains. The continuation of inadequate rainfall in the Great Plains, attended by extremely high temperatures, aggravated an already serious condition, and soil moisture is now badly depleted from Oklahoma to Nebraska, as well as in adjoining areas, notably in Missouri and western Arkansas. Throughout this region late crops were badly burned, forage and pastures dried up, and stock water and wells were failing. operations were seriously impeded by the heat and the hard, ary soil. In the New York City area the weather has been generally clear, with cool to warm temperatures prevailing

The weather was generally fair and warm today. Temperatures ranged from 59 degrees to 80 degrees. Partly cloudy and somewhat warmer temperatures are predicted for tonight, Saturday and possibly Sunday.

Overnight at Boston it was 64 to 79 degrees; Baltimore,

56 to 78; Pittsburgh, 63 to 88; Portland, Me., 63 to 77; Chicago, 73 to 99; Cincinnati, 67 to 102; Cleveland, 71 to 100; Detroit, 73 to 98; Milwaukee, 70 to 96; Charleston, 68 to 84; Savannah, 68 to 82; Dallas, 73 to 97; Kansas City, Mo., 76 to 100; Springfield, Ill., 68 to 99; Oklahoma City, 72 to 96; Salt Lake City, 37 to 58; Seattle, 54 to 63; Montreal, 62 to 72, and Winnipeg, 61 to 76.

# Revenue Freight Car Loadings Total 667,409 Cars in Week Ended Sept. 9

Loading of revenue freight for the week ended Sept. 9 totaled 667,409 cars, the Association of American Railroads announced on Sept. 14. This was an increase of 98,702 announced on Sept. 14. This was an increase of 98,702 cars or 17.4% above the corresponding week in 1938, but a decrease of 40,793 cars, or 5.8%, below the same week in 1937. Loading of revenue freight for the week of Sept. 9, which included Labor Day Holiday, was a decrease of 54,339 cars, or 7.5%, below the preceding week. The Association further stated:

Miscellaneous freight loading totaled 266,819 cars, a decrease of 17,914 cars below the preceding week but an increase of 34,051 cars above the corresponding week in 1938.

Loading of merchandise less than carload lot freight totaled 135,770 cars, a decrease of 21,095 cars below the preceding week but an increase of 1,378 cars above the corresponding week in 1938.

Coal loading amounted to 124,600 cars, a decrease of 8,035 cars below

the preceding week but an increase of 24,800 cars above the corresponding week in 1938.

Grain and grain products loading totaled 36,297 cars, a decrease of 3,903 cars below the preceding week but an increase of 5,780 cars above the corresponding week in 1938. In the Western districts alone, grain and grain ducts loading for the week of Sept. 9 totaled 22,912 cars, a decrea 3,514 cars below the preceding week but an increase of 2,746 cars above the corresponding week in 1938.

Live stock loading amounted to 16,650 cars, an increase of 2,633 cars above the preceding week and an increase of 1,983 cars above the corresponding week in 1938. In the Western districts alone, loading of live stock for the week of Sept. 9 totaled 13,114 cars, an increase of 2,771 cars above the preceding week and an increase of 2,018 cars above the corresponding

Forest products loading totaled 30,003 cars, a decrease of 3,229 cars below the preceding week but an increase of 3,384 cars above the corresponding week in 1938.

Ore loading amounted to 49,478 cars, a decrease of 3,013 cars below the preceding week but an increase of 24,484 cars above the corresponding week

Coke loading amounted to 7,792 cars, an increase of 217 cars above the preceding week and an increase of 2,842 cars above the corresponding week in 1938.

All districts reported increases compared with the corresponding week in 1938. All districts reported decreases compared with the corresponding week in 1937 except the Eastern and Pocahontas.

# Moody's Commodity Index Higher

Moody's Daily Commodity Index did not continue the vigorous advance of last week, but showed a moderate net gain. On Friday it was 169.9, as compared with 167.7 a week ago. The principal individual changes were the gains in steel scrap, rubber and wool prices, and the declines for sugar and hogs.

The movement of the index is as follows:

Fri.,	Sept.		Two weeks ago, Sept. 1146.9
Sat .	Sept.		Month ago, Aug. 15
Mon.,	Sept.		Year ago, Sept. 15144.5
Tues	Sept.	12167.5	1938 High—Jan. 10152.9
Wed	Sept.	13167.9	Low—June 1
Thurs	Sept.	14169.9	1939 High—Sept. 14169.9
Fri.,	Sept.	15169.9	Low-Aug. 15138.4

## Colonel Ayres Surveys Effects of European War on American Securities—Notes Downward Trend in High Grade Bond Prices—Reviews 1914 Experience

One of the important, but undramatic results of the outbreak of war will probably prove to be the downturn in the price trends of high grade bonds, according to Colonel Leonard P. Ayres, Vice-President of the Cleveland Trust Co., in the company's monthly "Business Bulletin," dated Sept. 15. During recent years, he continues, bond prices have been persistently rising until they reached in this past summer new high levels for all time. They were pushed upward by investors seeking safety for their funds, by regulations which confined bank investments to restricted groups of issues, and by a shortage of other desirable loans and securities. Now that the price trends have turned downward, they are likely to continue for a long period. Pursuing the subject further, Colonel Ayres observes:

In the past, long-term trends of bond prices have persisted for as long as 20 to 30 years, and when they have made downturns they have done so for one of two reasons. Trends of bond prices turned downward either because competing forms of investment appeared to offer greater advantages or because the prices of bonds mounted so high, and the returns from them

became so small, that investors preferred to hold liquid funds idle rather than to risk the future shrinkages which appeared to be involved in bond investments. This downturn has resulted from a combination of both of those influences.

Now that war has begun investment sentiment has turned to the idea that stocks may continue to advance in price and to pay greater dividends, and that commercial loans may increase in volume. Such influences have turned the long-term trends of high grade bond prices downward. Nevertheless conservative individual and institutional investors may be well advised to retain their high grade bonds since the only alternatives are more speculative. However, at present the public clearly favors these more speculative alternatives.

Meanwhile, as long as these sentiments prevail, the prices of many lower grade bonds will advance while those of the highest grades will decline. We are in the process of undoing a specialized form of inflation which has dominated bond markets. Banks will almost surely have to forego important book profits which had accrued on their holdings of government securities, but while they will regret that development it will not disturb them. We are now leaving an era dominated by managed economics, and entering one controlled by the more potent influences of war.

When war broke out in Europe in the summer of 1914 we were having a mild depression in this country. The depression increased in severity during the first months of the war, and by the end of the year it resulted in greatly decreased industrial production and widespread unemployment. Different sorts of business activity were affected in widely varying ways in the period prior to our entry into the war. The diagram (this we omit.—Ed.) shows monthly changes during 1914, 1915, and 1916 in four important business indicators.

The line representing railroad revenues is a 12 months moving centered average of the operating revenues of all class I railroads, with the average of those of 1914 taken as equal to 100. Revenues were falling when war began, and they continued to decline until the end of 1914. Then they began to advance, and the upward trend continued strongly until by the end of 1916 the rail revenues reached 127 as contrasted with the average of 100 in 1914.

Capital issues both for new money and for refunding are also represented by a 12 months moving centered average. They declined until the early months of 1915 and then turned upward and advanced vigorously to the late summer of 1916 when they turned downward again. In those days bank clearings were our best index of the volume of check transactions, and so of the amount of business being done. They were strongly influenced by the volume of stock market activity. They began to advance almost from

the outbreak of war, and while the stock exchanges were still closed, and they continued upward to the end of 1916.

Our export trade began to increase as soon as war began, and almost trebled in the first seven months. There was a moderate decline in 1915, and then the advance was resumed and it continued so vigorously that by the end of 1916 exports were going abroad in monthly dollar values that were almost five times as great as those that were recorded in the month when war began. The first great increase in exports was in agriculture. month when war began. The first great increase in exports was in agricultural products consisting largely of grains. The increase in 1916 consisted largely of manufactured goods among which munitions of war constituted important proportions. In 1916 there was also a large increase in the volume

The most important differences between results following the impact of war now and those of 25 years ago are in the financial markets rather than in such factors as those shown in the diagram. Now the markets show confidence; then they reflected fear. Now stock prices advance because people believe the belligerents will buy goods; then they fell because foreigners sold American securities.

# U. S. Department of Labor—Index of Wholesale Com-modity Prices Advanced 4.1% During Week Ended Sept. 9

A marked advance in wholesale commodity prices occurred during the week ended Sept. 9 Commissioner Lubin of the Bureau of Labor Statistics announced Sept. 14. Bureau's index rose 4.1% to the highest point reached since September of last year," Mr. Lubin said. "The increase is the greatest which has occurred in any one week since the inauguration of the weekly index in 1932. Sharp price advances were reported in most export and import commodities such as grains, cocoa, beans, meats, raw sugar, vegetable oils, hides, raw silk, hemp, non-ferrous metals, and crude rubber. The index does not reflect the full extent of the upward movement in commodity prices during the week because most of the quotations relate to Sept. 5 and 6." The Commissioner went on to say:

Foods and farm products, each with a gain of nearly 9%, advanced more than other groups. In the foods group, "other foods", which includes sugar, lard, vegetable oils, oleo oil, edible tallow, and pepper advanced by almost 16%. Meats went up nearly 12%. Rises in other subgroups averaged less than 10%. Among the farm products, grain prices rose over 26% from Sept. 2 to Sept. 9. Livestock and poultry prices, which had already advanced considerably in late August, gained about 10% and "other farm products," including cotton, eggs, potatoes, beans, and foreign wools, averaged about 4% higher than on Sept. 2.

Prices of hides and skins Hides and leather products rose about 4%. Prices of advanced 20% and leather prices increased about 5%. No change was reported in the average wholesale prices for shoes and other leather goods.

Other commodity groups except miscellaneous and chemicals and drugs advanced less than 2% on the average. Building materials and housefurnishing goods remained practically unchanged from the week before. Sharp price advances were reported for chinawood oil, linseed oil, and shellac

Raw materials and semi-manufactured articles rose about 7% to their highest levels of the year. Prices of finished products, which move more slowly, advanced by less than 3%.

The following tables show index numbers for the main groups of commodities for the past five weeks and for Sept. 10, 1938, Sept. 11, 1937, Sept. 12, 1936, and Sept. 14, 1935; and the percentage increases in wholesale price indexes of important subgroups from Sept. 2 to Sept. 9, 1939.

# Wholesale Commodity Prices Advanced 4.1 Points During Week Ended Sept. 9, According to "An-

According to the "Annalist" commodity prices advanced on a broad front last week as a direct result of the outbreak of war in Europe. The "Annalist" weekly index of wholeweekly index of wholesale commodity prices jumped 4.1 points to close at 82.3 on Sept. 9. Prices are now at the highest level since the middle of March, 1938, and almost 10% above the levels of four weeks ago. The announcement of the "Annalist" went

As might be expected, the war commodities led last week's rise. Wheat and other grains were much in demand. The highly speculative items,

such as copper, zinc, tin, lead and rubber rose sharply. Cotton recovered Livestock prices were husky from its attack of nerves and rallied strongly. with price advances setting all time records

"ANNALIST" WEEKLY INDEX OF WHOLESALE COMMODITY PRICES

	Sept. 9, 1939	Sept. 2, 1939	Sept. 10, 1938

All commodities	82.3	78.2	80.6

# Wholesale Commodity Prices Sharply Advanced Dur-ing Week Ended Sept. 9 to Highest Level Since Spring of Last Year According to National Fertilizer Association

Continuing the upward trend of the three previous weeks, the wholesale commodity price index compiled by the National Fertilizer Association, inspired by the European War, rose sharply during the week ended Sept. 9 to 75.5 from 71.7 in the preceding week, the highest level recorded since the spring of 1938. A month ago the index (based on the 1926-28 average of 100) stood at 70.3 and a year ago at 73.6. The previous high point in the present year was 73.3, recorded in the first week of January. The Association's announcement, under date of Sept. 11, continued:

Last week's rise in the index was the sharpest registered since the index was first compiled in 1925. The largest weekly gain in the inflationary price rise in the summer of 1933 was 2.3 points, compared with the 3.8

Although marked upturns were common throughout the commodity list, they were most pronounced in foods and farm products. The rise in industrial products, however, was sufficient to take the average for all com-modities except farm products and foods to the highest point reached since April of last year

The broad nature of the advance is indicated by the fact that 77 price series included in the index advanced last week and not a single one declined. Such a uniformity of price movement can only take place in a period of great National interest in commodity price trends.

# August Chain Store Sales Increase Gains Over 1938

Sales of leading chain store companies in August showed a larger percentage increase over the corresponding 1938 period than in July, according to the current review by Chain Store Age.

The composite index of sales of 20 leading chain organizations was 113.0 in August, relative to the 1929-1931 average taken as 100. This level represented an increase of 6.6% in sales over August, 1938. The July index was 113 and represented an increase of 4.6% over the previous year. The index figures by groups for August compare as follows:

follows:

	August, 1939	July, 1939	August, 1938
Grocery	103	102	99.7
Variety	116	119	109.4
Drug	131	129	127
Shoe	131	126	119
Apparel	124	126	116

# Department Store Sales Increased More Than Seasonally from July to August, Reports Board of Gov-ernors of Federal Reserve System

Department store sales increased by more than the usual seasonal amount from July to August, the Board of Governors of the Federal Reserve System announced on Sept. 9, and the Board's adjusted index advanced 3 points to 89, about the same as the level reached in the latter part of last year. The index is shown below for the last three months and for August, 1938.

INDEX OF DEPARTMENT STORE SALES. 1923-25 AVERAGE=100

	Aug., 1939	July, 1939	June, 1939	Aug., 1938
Adjusted for seasonal variation	89	86	86	83
Without seasonal adjustment	70	60	83	65

Sales in August were 7% larger than in August, 1938, and the total for the first eight months of the year was 4%

above last year, the Board said, in presenting the following compilation:

REPORT BY FEDERAL RESERVE DISTRICTS

### Electric Output for Week Ended Sept. 9, 1939 11.8% Above a Year Ago

The Edison Electric Institute in its current weekly report estimated that production of electricity by the electric light and power industry of the United States for the week ended Sept. 9, 1939, was 2,289,960,000 kwh. The current week's output is 11.8% above the output of the corresponding week of 1938, when production totaled 2,048,360,000 kwh. The output for the week ended Sept. 2, 1939, was estimated to be 2,357,203,000 kwh., an increase of 9.7% over the like week a year ago.

## August Engineering Construction Highest Since 1929-Private Awards Gain in Month and Year

Heavy engineering construction awards for August total \$311,222,000, the highest August volume since 1929, as reported by "Engineering News-Record." The weekly average for the five weeks of August, \$62,244,000, tops the four-week July average by 37%, and the four-week August, 1938, average by 7%.

The August construction total brings the volume for eight months of 1939 to \$2,049,915,000, an increase of 16.3% over the volume for the corresponding period last year. Public construction to date, \$1,509,186,000, is 30% above a year ago, but private awards, \$540,729,000, are 10% lower.

Private awards for August, on the weekly average basis, are the highest since April, 1938, are 77% above a month ago, and are 88% higher than a year ago. Increased volume of commercial and industrial buildings, and private unclassified construction are responsible for the private gains. Public construction is 23% above last month, but is 13% below last year. Values of awards for the three months are:

	August, 1938	July, 1939	August, 1939
	(4 Weeks)	(4 Weeks)	(5 Weeks)
Private	\$45,806,000	\$48,722,000	\$107,859,000
	185,965,000	132,747,000	203,363,000
	135,894,000	108,462,000	159,174,000
	50,071,000	24,285,000	44,189,000
Total	\$231,771.000	\$181.469.000	\$311,222,000

In the classified construction groups, August industrial buildings reach the highest weekly average recorded since January, 1938, and gain 45% over the July average. gains over a month ago are in public buildings, 67%; commercial building and large-scale private housing, 40%; bridges, 56%; water-works, 198%; earthwork and drainage, 61%, and unclassified, 92%. Losses are in streets and 61%, and unclassified, 92%. I roads, 21%, and sewerage, 16%.

Comparison of current averages with those of August, 1938, shows increases in public buildings of 102%; industrial buildings, 120%; commercial building and large-scale private housing, 15%, and unclassified construction, 17%. Decreases are reported in streets and roads, 26%; bridges, 32%; waterworks, 28%; sewerage, 14%, and earthwork

and drainage, 9%.

Geographically, every section of the country gains over last month, and all but New England and Far West top their respective volumes of a year ago. The gains over last year range from 0.5% in the west of Mississippi States to 78% in Middle West States. The increases over last month range from 15% in the South to 68% in New England.

New Capital

New capital for construction purposes for August totals \$380,620,000, an increase of 21% over the volume for August, 1938. The current month's total is made up of \$296,000,000 in Federal appropriations for Work Projects Administration construction, \$10,501,000 in Federal appropriations for departmental construction, \$32,377,000 in corporate security issues, \$26,873,000 in the State and municipal bonds, \$14,433,000 in United States Housing Authority loans for low-cost slum clearance, and \$436,000 in Reconstruction Finance Corporation loans.

New construction financing for 1939 to date, \$2,149,-740,000, is 24% below the volume reported for the eightmonth period last year.

### Dodge Corp. Reports Total Contracts for First Eight Months Highest Since 1931

Construction contract volume in August increased substantially over both June and July, according to F. W. Dodge Corp. Last month's total for the 37 Eastern States. amounting to \$312,328,000, was practically equal to the figure for August, 1938, in spite of the current tapering of the public works program. During the first eight months of this year total contracts awarded amounted to \$2,311,575,000, which represents a 26% increase over the same period last year and is the highest total recorded since 1931.

Residential contracts awarded in August amounted to \$127,163,000. With the exception of May of this year, this monthly total is the highest since October, 1929, and represents a 28% increase over August, 1938. The cumulative total of residential building for the first eight months of this year is the highest of any comparable period since 1929 and is 50% greater than the total for the same months of 1938

In terms of better housing conditions, there were 68% more dwelling units provided for during 1939 to date than in the comparable period last year. Small residential construction, including one- and two-family houses, and large residential construction each showed approximately the same increase in the number of dwelling units during the same period. Small residential building, however, accounted for 65% of the total of all dwelling units constructed in 1939 to date.

Publicly-owned residential projects contributed appreciably to the dwelling unit increase in large residential construction. However, the dollar volume of publicly-owned residential projects amounted to only 13% of the total residential construction recorded during the first eight months

# Bank Debits 19% Higher Than Last Year

Debits to individual accounts, as reported by banks in leading cities for the week ended Sept. 6, which included only five business days, aggregated \$7,297,000,000, or 8% above the total reported for the preceding week and 19% above the total for the corresponding week of last year, which also included only five business days.

Aggregate debits for the 141 cities for which a separate total has been maintained since January, 1919, amounted to \$6,731,000,000, compared with \$6,184,000,000 the preceding week and \$5,633,000,000 the week ended Sept. 7 of last year. These figures are as reported on Sept. 11, 1939, by the

Board of Governors of the Federal Reserve System.

SUMMARY BY FEDERAL RESERVE DISTRICTS

# Industrial Stocks of Raw Materials in July Lowest in Recent Years-Supplies 19% Under 1938 Peak

Manufacturers' inventories of raw materials fell about 1% in volume in July, continuing the decline that began in

the spring of 1938, according to a preliminary estimate of the Division of Industrial Economics of the Conference

The cumulative decline, which has amounted to 19% in the space of 15 months, brought the Conference Board's Index of Raw Materials down to 94 (1936—100), the lowest point in the six-year period covered by the Index.

Industrial inventories of semi-finished goods also declined about 1%, marking a drop of 9% from the 1938 peak, but the volume of these stocks remains about 11% higher than

the volume of these stocks remains about 11% higher than the 1936 average.

Finished goods in the hands of manufacturers rose only 7-10ths of 1% from June to July, despite the fact that industrial production continued to advance.

New orders and shipments of manufacturing industry declined sharply from June to July, according to reports received by the Conference Board directly from 169 large and small manufacturing concerns.

A summary of the reports of 82 companies reveals that the value of new orders in July fell 16% below that in June. There was a gain of 21%, however, as compared with July, 1938.

Shipments reported by 157 companies declined 9% in July, but remained 19% greater than a year ago. Unfilled orders rose slightly and were 25% higher than in 1938.

The value of inventories, which was reported by 163 concerns, gained 1% in July, but was 8% lower than a year ago. At the end of July, stocks were equivalent to 3½ months' shipments, compared with 3 1-6 months' shipments for this sample in June. In July, 1938, stocks were equivalent to more than  $4\frac{1}{2}$  months' shipments at the rate of business then prevailing of business then prevailing.

The following table gives the Conference Board indexes for these three classes of commodity holdings at the end of June, 1939, together with the comparable monthly figures since January, 1933:

# Summary of Business Conditions in Federal Reserve Districts

The trend of business in the various Federal Reserve districts is indicated in the following extracts taken from the "Monthly Review" of the Federal Reserve Districts of Boston, New York, Philadelphia, Cleveland, Richmond, Atlanta, Chicago, St. Louis, Minneapolis, Kansas City, Dallas and San Francisco:

# First (Boston) District

"The level of general business activity in New England during July was higher than that which prevailed in June, after allowances had been made for customary seasonal changes, and the improvement between June and July, like that between May and June, seemed to be general throughoutmost of the major lines of activity," states the Federal Reserve Bank of Boston in its "Monthly Review" of Sept. 1. In part, the "Review" also said:

Total revenue freight car loadings in New England during the four-week period ending Aug. 5 were 7.0% higher than in the corresponding four-week period last year, and department store sales in New England during July exceeded those of July last year by 6.0%.

The value of total construction contracts awarded in New England during July was \$20,937,000, which was nearly the same amount as in June and almost 20% more than in July a year ago. . . .

The amount of raw cotton consumed by mills in New England during July was 63,598 bales, as compared with 72,095 bales in June and 55,239

and was higher than in July last year by nearly 9%. . . . . During July there was an increase of 2.9% over June in the total number of wage earners employed in representative manufacturing estabhimber of wage earners employed in representative manuacturing establishments in Massachusetts and an increase of 3.9% occurred in the amount of aggregate weekly payrolls, according to the Massachusetts Department of Labor and Industries. During the 14-year period 1925-38, inclusive, there has been an average decrease of 0.5% in employment between June and July and a decrease of 0.1% in the amount paid in wages, but this year between June and July both employment and payrolls increased.

# Second (New York) District

The Federal Reserve Bank of New York, in presenting its monthly indexes in its "Monthly Review" of Sept. 1, states that "from preliminary evidence it appears that business activity on the whole was well maintained during August, allowing for the usual seasonal movements."
"Review" goes on to say:

Model changeovers reduced automobile assemblies sharply, but, while taking place unusually early, the decline itself is a recurring seasonal one. Automobile manufacturers completed runs on 1939 models during August and some plants were reported to be nearing volume production of 1940 and some plants were reported to be hearing volume production and active and well diversified demand. The operating rate, which averaged 54½% of capacity in July and which had reached 60% at the beginning of August, moved up to about 63% at the end of the month. Cotton textile mills, despite a diminished inflow of new business, were reported to have maintained the high rate of activity that characterized July, and electric power production expanded to a new high level. On the other hand, a 15-day shutdown of oil wells by six major petroleum producing States, in an effort to support crude oil prices, resulted in a sharp curtailment of petroleum production in the latter half of the month. Bituminous coal production increased somewhat less than seasonally, and little change was indicated in total freight car loadings.

The general level of production and trade rose somewhat further during July, after adjustments are made for seasonal factors. Output of steel ingots and of pig iron expanded instead of declining as in most years, and bituminous coal mining recovered to the highest level since March, prior to the controversy over the renewal of union contracts and attendant mine shutdowns. There was a sharp contraction in automobile assemblies mine shutdowns. There was a sharp contraction in automobile assemblies as the period of model changeovers approached, but retail sales of motor cars were reported as only moderately below the June level and about 50% ahead of July, 1938. Cotton and wool mill activity, as evidenced by data on consumption of the fibers, was reduced less than usual in July, activity at meat packing plants was well maintained, shoe manufacturing increased, and there was a renewed rise in machine tool orders to the highest point since April, 1937. Copper output was reduced about seasonally, but production of tobacco products declined more than usual.

Less than the usual seasonal decline during July was indicated in sales of chain stores other than grocery, but about the customary reductions or chain stores other than grocery, but about the customary reductions occurred in department and chain grocery store sales, and somewhat more than the usual decrease was shown in mail order house sales. Merchandise and miscellaneous freight car loadings were about unchanged from the June rate, while shipments of bulk commodities increased more than seasonally.

(Adjusted for seasonal variations, for estimated long term trend, and where neces for price changes)

# Third (Philadelphia) District

The Federal Reserve Bank of Philadelphia, in its "Business Review" of Sept. 1, reported that "business activity in the Third (Philadelphia) Federal Reserve District con-tinues at a moderately high level." The Bank further reported:

The volume of orders and deliveries has increased since earlier in the summer. Inventories have been reduced further, back-logs of orders for future delivery are substantial, and general industrial prices are firm.

Production of manufactured goods has been well sustained throughout the summer period, little change being reported in July, when there is usually a decline. The seasonally adjusted index in July reached the highest level in nearly two years. Output of bituminous coal in July increased somewhat more than usual, and the decline in the production of crude oil was smaller than was to be seasonally expected. The output of both electric power and anthracite, however, was reduced substantially. Industrial activity in August has continued well sustained.

Employment in the 12 principal lines of trade and industry in the district was nearly the same in July as in June, and wage disbursements declined less than usual. . . .

Building construction continues active, with a substantial volume of work being done on low-cost residential units in the larger cities. The value of contracts awarded increased from June to July. . . .

Sales at retail were well sustained in July, after allowing for the customary seasonal decline, and early reports indicate substantial increases during August. Wholesale trade sales decreased from June to July, as was to be expected, but the outlook for the fall season continues favorable.

### Fourth (Cleveland) District

In its Aug. 31 "Monthly Business Review" the Federal Reserve Bank of Cleveland reports that "activity in several lines of business in this district continued to increase in July and the first three weeks of August. This further extended the upturn which started in late June and which continued with less interruption from seasonal fluctuations than is usual." The Bank further states:

Of chief importance, in this connection, was the course of steel mill operations which, at most local mills, rose to the highest level since the fall of 1937. Pronounced gains were evident in centers engaged in preparing to supply the auto and auto parts industries with materials. Some ingot and semi-finished steel produced was in anticipation of releases at a later date, however, and moderate inventory accumulation was indicated. Demand for steel from other sources was reported to have held up well for this season of the year.

Demand for machine tools continued its upward trend during July, and the index of new orders rose to a new peak for the recovery movement. A large portion of the demand was from abroad, however, and commitments from foreign sources were said to have fallen off in August. Demand from domestic sources, on the other hand, was said to have been well maintained.

The low point of automobile assemblies was passed in the third week of August, and local parts producers reported that orders and releases in the first half of the month were up considerably. Compared with a year ago, large gains were reported, although the earlier date of new model introductions was a factor. Tire production and operations of the rubber industry have held up year well.

industry have held up very well. . . .

In other consumers' goods lines activity was well maintained during July and August. Employment at Ohio shoe factories rose 8% from June to July, and production was at a seasonal peak during the summer worth.

Both wholesale and retail trade were down seasonally in July, but the decline in department store sales was a little less than usual.

# Fifth (Richmond) District

The Aug. 31 "Monthly Review" of the Federal Reserve Bank of Richmond reports that "July is a between-seasons month, and trade and industry in many lines tend to decline to approximately the year's low levels, but business in July this year continued substantially above July, 1938, and some of the seasonal declines were smaller than usual." The following is also from the "Review":

Employment in July and early August showed some seasonal drop in industry, but held up unusually well in coal mining and rose in construction and tobacco warehouses. Textile mills restricted operations about 7% in July to give vacations to employees and to overhaul machinery and take inventories. Coal mines, busy bringing depleted reserves back to normal, dug 6% more coal than in June. Building permits issued in the Fifth District last month were 15% above those issued in the preceding month of June, and contract awards, while lower than in June, were higher than in any other July since 1930. Tobacco markets which opened in the South Carolina belt early in August gave employment to several hundred warehouse workers and handlers.

# Sixth (Atlanta) District

The following regarding business conditions in the Sixth Federal Reserve District is taken from the Aug. 31 "Monthly Review" of the Federal Reserve Bank of Atlanta:

In July merchandise distribution through department stores in the Sixth District declined less than usual, wholesale trade was only slightly lower, and there were notable gains in building permits, in contracts awarded for residential construction, and in the rate of pig iron and coal production. Textile operations declined and there was a decrease in the total value of contract awards because of a decline in "all other" contracts.

In the year that ended July 31 cotton mills in Georgia, Alabama and Tennessee consumed 2,251,373 bales of cotton, a gain of 23.4% over the preceding cotton year. Only in the cotton year of 1936-37 was total consumption in these States greater.

# Seventh (Chicago) District

In the Aug. 25 "Business Conditions" issue of the Federal Reserve Bank of Chicago it is stated that business in the Seventh [Chicago] Federal Reserve District has slowed down somewhat in accordance with the usual expectation at this season of the year. Two major industries, however, steel and construction, have shown increased activity, and business generally has continued relatively good in com-

parison with year-earlier levels. The report also had the following to say:

July declines of 3½% and 6% in aggregate employment and payrolls, respectively, were due largely to recessions in the automobile industry. The agricultural outlook has improved, in so far as crop production is concerned, with major crops making relatively better progress on Aug. 1 in the Seventh District than in the country as a whole.

Sustained business from miscellaneous sources enabled steel mills in the Chicago area to operate at 56% of capacity through late July and early August and to raise the rate of 58% in the middle of the latter month, although it had declined again to 56½% by the third week of August. Automobile production by mid-August had about reached the seasonal low point of the year; several producers at that time were assembling 1940 models in preparation for this year's earlier showings. New business booked during July by malleable casting roundries of the district rose slightly above the preceding month's level, but that of steel casting foundries dropped off considerably in the aggregate; output declined sharply. Following the furniture mart showings in June, incoming orders of district furniture manufacturers decreased 30% during July, and activity at paper mills in this area likewise receded. Construction contracts awarded in the Seventh District during July established a nine-year high for the month, totaling 35% in excess of the same 1938 period; residential contracts were 43% larger in this comparison. Industrial payrolls in the Seventh District, influenced by lower levels in the automotive group, declined by 6% from June to July, while the volume of employment decreased 3½%. Both declines were somewhat greater than seasonal. Bituminous coal mined in Illinois and Indiana rose during July sharply above the preceding month's levels.

July department store sales in the Seventh District were about one-third or somewhat more than seasonally less than in the preceding month, and the margin of gain over a year ago narrowed rather sharply. However, some improvement was noted in the year-to-year comparison during the first three weeks of August. Retail distribution of shoes by dealers and department stores recorded the usual substantial decline during July, as did that of furniture. Wholesale distribution in the district followed the same seasonally downward trend noted in the retail field. Retail stocks remained under last year's levels, while wholesale inventories increased slightly in the aggregate over a year earlier.

### Eighth (St. Louis) District

In its Aug. 30 "Business Conditions" the Federal Reserve Bank of St. Louis states that "general business activity in the Eighth District during July and the first half of August maintained, and in several important lines bettered, the rate of the similar period immediately preceding, which earlier period marked the high point of the improvement beginning last May." The survey also stated:

While a number of manufacturing classifications and retail trade in July showed the usual midsummer slump, the extent of the recession was much less pronounced than is ordinarily the case, and in certain lines, notably iron and steel, lumber and petroleum, contra-seasonal gains were recorded. Industrial production as a whole in the area was substantially greater in volume than a year ago.

greater in volume than a year ago.

Output of bituminous coal in fields of this district in July increased 14.6% over the month before and was 8.5% greater than the tonnage lifted in July, 1938. Production of crude oil in June increased 3.3% over May, and was 185.6% larger than in June last year.

July production of lumber increased about 4.5% over June, and district mills continue to report current orders and shipments in excess of output. Consumption of electric power by industrial users in the principal cities in July was 2.0% and 12.6% greater, respectively, than a month and a year earlier. At mills in this area output of steel ingots advanced to 57% of capacity at mid-August, the best rate since the week of March 21, and comparing with 36% a year ago.

comparing with 36% a year ago.

The volume of retail trade in the district in July, as gauged by sales of department stores in the principal cities, was about one-fifth less than in June, but 5.9% greater than in July, 1938; cumulative total for the first seven months was 5.5% in excess of the same interval last year. . . .

Taken as a whole, the employment situation underwent little change from June to July. Factory employment increased slightly, contrary to the usual seasonal experience, while completion of the wheat harvest and other seasonal agricultural activities resulted in a moderate decrease in the number of workers employed on farms. Employment in the building trades and transportation held about steady.

# Ninth (Minneapolis) District

The volume of business in July in the Ninth (Minneapolis) Federal Reserve District, measured by seasonally adjusted indexes, resumed the upward swing that began last March after having been temporarily halted in June, and continued to be well above the volume of a year earlier, it is learned from the "Monthly Review" of the Minneapolis Federal Reserve Bank issued Aug. 28. The following is also taken from the monthly summary:

also taken from the monthly summary:
Department store sales in July were 2% larger than in July last year
for the district as a whole. Sales at country stores showed a gain of 3%
but at city stores were only 2% larger.

Business failures in July were smaller in both number and amount than in June. The number, however, was somewhat larger than in July, 1938, but the liabilities were only about half as large.

Iron mining activity as measured by car loadings increased seasonally in July to twice the July, 1938, volume, and iron ore shipments from upper lake ports were nearly double those of one year earlier. Steel mill activity has increased from about 50% of capacity in May to 62% at mid-August. As a result, iron ore consumption by furnaces increased sharply in June and a further increase was reported in July. Iron ore stocks on hand at furnaces and Lake Erie docks on Aug. 1 were about the usual size on that date. Copper and gold production declined but silver production increased slightly during July. Production of all three of these metals, however, was substantially larger than a year ago. . . .

The volume of production in our district in July, as indicated by several unadjusted indicators, declined less than seasonally. Flour production at Minneapolis declined a little but production at other Northwestern mills was higher. Flour and linseed product shipments from Minneapolis declined somewhat. The cut of lumber in July declined sharply. Compared with July, 1938, all of these indicators were slightly smaller.

The Minnesota employment index rose 2.8 points to 104.7 in June. The index has advanced each month since last January, when it was 94.7, and is now the highest for any month since November, 1937.

## Tenth (Kansas City) District

The following regarding business and agricultural conditions in the Tenth (Kansas City) Federal Reserve District is taken from the Aug. 31 "Monthly Review" of the Federal Reserve Bank of Kansas City:

Dolar volume of sales at reporting department stores in the district showed much less than the usual seasonal decline during July, following a larger than seasonal decrease during the preceding month. Sales in July, as in the first six months of the year, were only slightly above a year ago, but sales for the first three weeks of August showed an increase of 8% over last year.

Total retail sales in the district both in July and in the first seven

months of the year were better than 3% above a year ago. . . . The value of July wholesale sales in the district dropped more than 3% under a year ago. . . .

Abnormally hot, dry weather in July drastically changed prospects for corn and seriously damaged many other late crops in non-irrigated sections of the district just as it has in nearly all of the last 10 years.

Wheat marketings increased further during July and were 5% above

Wheat marketings increased further during July and were 5% above the 10-year average, but fell far short of receipts in July a year ago. . . . Marketings of all livestock increased considerably during July, the increase in hog marketings being contrary to the usual seasonal trend. . . .

increase in hog marketings being contrary to the usual seasonal trend. . . . Industrial employment and payrolls in the district increased further from the middle of June to the middle of July, when employment was 3% and payrolls 5% higher than a year earlier.

### Eleventh (Dallas) District

According to the Dallas Federal Reserve Bank, business and industrial activity in the Eleventh District showed some improvement in July and the first half of August. In its "Monthly Business Review" of Sept. 1 the Bank also had the following to say:

Department store trade held up better than usual in July and reflected some expansion in the subsequent two weeks. In the latter period sales were moderately larger than a year earlier, whereas they were at about last year's level in June and July. Wholesale distribution during July continued larger than in the corresponding month of 1938, but the margin of gain was smaller than in the preceding three months. The value of construction contracts awarded increased from June to July, due principally to the larger awards for publicly-financed projects, although the volume was slightly smaller than in July, 1938. Petroleum production increased moderately in July and the first half of August, and was in about the same volume as in the corresponding period last year. Following a substantial reduction in crude oil prices, oil wells in Texas were shut down on Aug. 15 for a period of 15 days, and subsequently wells in five other States affected by the shutdown orders produced 68% of the total output in the United States.

## Twelfth (San Francisco) District

The gains in Twelfth (San Francisco) District business volumes noted during May have been retained during the past three months, it was noted by the San Francisco Federal Reserve Bank in its "Business Conditions" of Aug. 29. Aggregate industrial output in July was fully as large as in May, after allowance for seasonal influences, while factory employment was higher than in any month since January. The Bank goes on to say, in part:

New residential construction declined considerably in July following the sharp expansion in June. Preliminary data indicate, however, that the seasonally adjusted index will rebound in August to a point almost as high as in June, and perhaps higher. Movement of freight by rail has been unchanged since May and, judging from information available on retail trade, consumer purchases of goods have been seasonally well maintained.

Recovery in the lumber industry has been an outstanding feature in the Twelfth District business situation in recent months. New lumber orders received by district mills in July were higher on a daily average basis than in June, marking the fifth successive monthly increase, and further gains in the first three weeks of August carried the daily average to the highest level since 1929. Production of lumber has increased continuously and substantially since February of this year, but the expansion in new orders has been somewhat larger. As a result unfilled orders have increased considerably, and on Aug. 19 were higher than at any time in more

In the furniture and copper industries little net change in output has been reported since April or May. Automobile assemblies have also been fairly stable since May, after declining sharply earlier in the year, while activity in the aircraft industry has increased persistently and is now at record levels. District flour mills continued to operate close to post-war record levels in July. In the important district food canning industry, in which activity is currently at a seasonal peak, the total pack of fruits and vegetables will be about as large as in 1938, while the pack of canned salmon probably will be considerably smaller than a year ago.

# Weekly Report of Lumber Movement, Week Ended Sept. 2, 1939

The lumber movement during the week ended Sept. 2, 1939, in relation to the seasonal weekly averages of prior years, according to reports to the National Lumber Manufacturers Association from regional associations covering the operations of representative softwood and hardwood mills, was as follows:

the second second second	Production	Shipments	Orders
Percent of 1929 Percent of 1937	62	74	79
Percent of 1938	88	103	118 127

Compared with the preceding week, production and shipments of the week ended Sept. 2, as reported by 10% fewer mills, were, respectively, 10% less and 1% less. New business was 0.5% greater than in the previous week. New business was 17% above production. Shipments were 17% above output. Reported production for the 35 weeks of the year to date was 18% above corresponding weeks of 1938; shipments were 16% above the shipments, and new orders were 16% above the orders of the 1938 period. For the 35 weeks of 1939 new business was 8% above, and shipments 5% above output.

During the week ended Sept. 2, 1939, approximately 475 mills produced 225,060,000 feet of softwoods and hardwoods combined; shipped 262,668,000 feet; booked orders of 262,802,000 feet. Revised figures for the preceding week were: Mills, about 530; production, 249,369,000 feet; shipments, 264,160,000 feet; orders, 261,525,000 feet.

Lumber orders reported for the week ended Sept. 2, 1939, by about 395 softwood mills totaled 251,857,000 feet, or 16% above the production of the same mills. Shipments as reported for the same week were 252,744,000 feet, or 16% above production. Production was 216,964,000 feet. Reports from 97 hardwood mills give new business as 10,945,000 feet,

Reports from 97 hardwood mills give new business as 10,945,000 feet, or 35% above production. Shipments as reported for the same week were 9,924,000 feet, or 23% above production. Production was 8,096,000 feet. Last week's production of about 390 identical softwood mills was

Last week's production of about 390 identical softwood mills was 216,531,000 feet, and a year ago it was 212,478,000 feet; shipments were, respectively, 252,237,000 feet and 209,767,000 feet, and orders received, 251,229,000 feet and 184,135,000 feet. In the case of hardwoods, 86 identical mills reported production last week and a year ago 7,581,000 feet and 6,580,000 feet; shipments, 8,395,000 feet and 7,247,000 feet, and orders, 9,488,000 feet and 6,820,000 feet.

### Production and Shipments of Lumber During Five Weeks Ended Sept. 2, 1939

We give herewith data on identical mills for five weeks ended Sept. 2, 1939, as reported by the National Lumber Manufacturers Association on Sept. 11:

An average of 497 mills reported as follows to the National Lumber Trade Barometer for the five weeks ended Sept. 2, 1939:

( t - 1 000 ft - 1)	Production		Ship	ments	Orders Received	
(In 1,000 Feet)	1939	1938	1939	1938	1939	1938
Softwoods	1,164,136 34,320		1,235,413 40,031			
	1 108 456	1 130 984	1.275.444	1.115.702	1.331.544	1.035.884

Froduction during the five weeks ended Sept. 2, 1939, as reported by these mills, was 6% above that of corresponding weeks of 1938. Softwood production in 1939 was 5% above that of the same weeks of 1938 and 10% below the record of comparable mills during the same period of 1937. Hardwood output was 32% above production of the 1938 period.

Shipments during the five weeks ended Sept. 2, 1939, were 14% above those of corresponding weeks of 1938, softwoods showing gain of 14% and hardwoods, gain of 20%.

Orders received during the five weeks ended Sept. 2, 1939, were 29% above those of corresponding weeks of 1938. Softwood orders in 1939 were 28% above those of similar period of 1938 and 19% above the same weeks of 1937. Hardwood orders showed gain of 30% as compared with corresponding weeks of 1938.

sponding weeks of 1938.

On Sept. 2, 1939, gross stocks as reported by 420 softwood mills were 3,554,716 M feet, the equivalent of 103 days' average production (three-year average 1936-37-38), as compared with 3,686,379 M feet on Sept. 3, 1938, the equivalent of 107 days' average production.

On Sept. 2, 1939, unfilled orders as reported by 418 softwood mills were 782,358 M feet, the equivalent of 23 days' average production, compared with 587,421 M feet on Sept. 3, 1938, the equivalent of 17 days' average production.

### Car-Makers Group Estimates August Sales at 97,200 Units

A decrease of 55% in motor vehicle shipments was indicated for the month of August as compared with July in the preliminary estimate of the industry's operations, contained in the September, 1939, issue of "Automobile Facts," a publication of the Automobile Manufacturers Association.

The Association estimated the industry's August volume at 97,200 units. On the basis of this estimate the industry's operations in August were 0.3% higher than the corresponding month last year.

The Association's report is summarized as follows: August, 1939, 97,200; July, 1939, 218,478; August, 1938, 96,946.

# India Wheat Crop Shows 8% Decline from Year Ago

Final figures on the wheat crop of India for 1938-39, recently compiled in that country, indicate that the acreage planted was about 1% less than the preceding fiscal year and the yield was about 8% less than a year ago, the Department of Commerce announced on Sept. 7. It was also said:

According to the All-India General Memorandum on Wheat, based on returns received from Provinces and States comprising nearly 98% of the total wheat acreage of India, a total area of 35,289.000 acres was planted in 1938-39 as compared with 35,640 000 acres in the preceding season.

Total estimated yield, which has already been harvested, is placed at 9,927,000 tons as against 10,764,000 tons last year.

9,927,000 tons as against 10,764,000 tons last year.
These statistics are based on a report of Barry T. Benson, United States
Trade Commissioner at Calcutta, and made public by the Department of

### Department of Agriculture Reports Wheat and Flour Contracts for Export of 12,070,000 Bushels Were Made in July and August

The Department of Agriculture announced Sept. 13 that contracts were made during the period from July 1 through Aug. 31, 1939 for the export of 12,070,000 bushels of wheat under the wheat and flour export programs. This total of wheat and flour was handled for export under three phases of the general wheat export program. Contracts were made for the exportation of wheat under the bid-payment plan which was made effective on Aug. 19 1938 loan wheat was sold to United States exporters; and contracts were made for the exportation of flour under the export indemnity payment plan. Further details were announced as follows:

Under the bid-payment wheat export plan contracts were made from Aug. 19 through Aug. 31 for payments on the exportation of 4,101.000 bushels of wheat.

Through Aug. 31, the Federal Surplus Commodities Corp. bought from the Commodity Credit Corp. 13,881,000 bushels of 1938 loan wheat to which the CCC had taken title. Of this total, 4,638,000 bushels were sold

by the FSCC through Aug. 31 to United States exporters.

During the period July 11 through Aug. 31, contracts were made for export indemnity payments on the exportation of 724,200 barrels of flour. This is the equivalent of 3,331,000 bushels of wheat. These contracts were made under a continuation of the flour export program which was in effect during the past fiscal year. The program was continued under a new authorization which became effective on July 11.

Export benefit payments on wheat and flour during the July 1-Aug. 31

period averaged approximately 33½ cents a bushel. This average includes not only payments on wheat under the bid-payment plan and the export indemnity payments on flour, but also the differential between the price at which the FSCC bought the loan wheat from the CCC and the price at which that wheat was sold to exporters.

# Canada Has Big Wheat Crop—Estimate 440,000,000 Bushels Can Be Exported

The 1939 wheat crop of Canada, harvesting of which is now practically completed, is estimated by the Dominion Bureau of Statistics in Ottawa at 440,000,000 bushels, the fourth largest crop on record in that country, according to a report issued Sept. 14, by the Office of Foreign Agricultural Relations. The report went on to say:

Only three Last season's crop amounted to only 350,000,000 bushels. times in the history of the Canadian wheat industry has the crop exceeded this year's level. More than 450,000,000 bushels were produced in 1923 and 1927 but the record occurred in 1928 when the crop reached 567,000,000 In recent years, 1933-37, the crop has averaged only 248,000,000 bushels because of drought.

The Aug. 1 wheat carry-over in Canada was estimated at 95,000,000 bushels. Adding that carry-over to the new crop gives a total supply of 544,000,000 bushels for the 1939–40 marketing year, August-July. Deducting from that figure the usual consumption of 100,000,000 bushels leaves a balance of about 440,000,000 bushels for export during the current season or for carry-over into 1940-41.

The marketable supply of 440,000,000 bushels for 1939-40 is the largest since 1932-33. Total exports of wheat including flour last season (1938-39) amounted to 167,000,000 bushels compared with the average of 175,000,000 bushels for the 5-year period ending with 1937-38. The British market normally takes about 65% of the wheat exports.

# Census Report of Cottonseed Oil Production

On Sept. 13 the Bureau of the Census issued the following statement showing cottonseed received, crushed, and on hand, and cottonseed products manufactured, shipped out, on hand, and exported for the months of August, 1939 and 1938:

COTTONSEED RECEIVED, CRUSHED, AND ON HAND (TONS)

State	Received at Mills* Aug. 1 to Aug. 31		Crushed Aug. 1 to Aug. 31		On Hand at Mills Aug. 31	
	1939	1938	1939	1938	1939	1938
Alabama	4,936	27,175	5,334	22,405	10,524	16,731
Arkansas	7.288	6,703	5,309	17,503	6,135	9,422
Georgia	21,837	38,064	19,196	27,921	16,745	25,437
Louisiana	28,911	17,475	15,382	10,197	14,076	13,160
Mississippi	19,559	21,121	22,944	29,358	18,431	33,561
South Carolina	8,111	5.441	4,745	2,728	4,179	4,265
Texas	132,038	132,431	69,868	90,694	116,674	223,810
All other States	4,404	12,432	8,476	22,689	8,946	48,079
United States	227,084	260,842	151,254	223,495	195,710	374,465

## Census Report on Cotton Consumed and on Hand, &c., in August

Under date of Sept. 14, 1939, the Census Bureau issued its report showing cotton consumed in the United States, cotton on hand, active cotton spindles and imports and exports of cotton for the months of August, 1939 and 1938. Cotton consumed amounted to 628,448 bales of lint and 73,646 bales of linters, compared with 521,405 bales of lint and 74,032 bales of linters in July, 1939, and 559,409 bales of lint and 71,455 bales of linters in August, 1938. It will be seen that there is an increase in August, 1939, when compared with the previous year, in the total lint and linters combined of 71,230 bales, or 11.3%. The following is the statement:

AUGUST REPORT OF COTTON CONSUMED, ON HAND, IMPORTED AND EXPORTED, AND ACTIVE COTTON SPINDLES (Cotton in running baies, counting round as half bales, except foreign, which is in

WORLD STATISTICS

The world's production of commercial cotton, exclusive of linters, grown in 1938, as compiled from various sources was 28,221,000 bales, counting American in running bales and foreign in bales of 478 pounds lint, while the consumption of cotton (exclusive of linters in the United States) for the year ended July 31, 1939, was 27,028,000 bales. The total number of spinning cotton spindles, both active and idle, is about 144,000,000.

Petroleum and Its Products-Moffett Defends Oil -Capital Backs Oil Conservation Measure Industry-Sinclair Expands Crude Purchases Due to War-Mr. Ickes Hits Illinois Legislature—Crude Prices Advanced in Several Fields—Texas Railroad Commission Lifts Crude Allowable-Crude Oil Production Sharply Higher-Crude Inventories Lower

Answering remarks laid to Secretary of the Interior Ickes that the oil industry operated unsatisfactorily during the World War, James A. Moffett, Secretary of the National Petroleum War Service Commission during the first World War, defended the American petroleum industry's economic conduct in a speech delivered before the National Petroleum Association convention at Atlantic City on Sept. 14. The War Service Commission handled all American oil sold to the

Allies during the first World War.

"It would appear," Mr. Moffett said, "that the Secretary was misinformed by someone who might have a desire to seize the opportunity of the present emergency to take over the petroleum industry under Federal control. . . . If Mr. Lekes had asked me. I would have teld him that anythe Mr. Ickes had asked me, I would have told him that crude oil did not go to \$3 a barrel; the basic supply of crude oil did not exceed \$2.25 a barrel at the well and for a considerable

time the top price was \$2.

time the top price was \$2.

"Shipments made abroad," he continued, "were a small percentage of the total daily consumption. Oil resources were not exploited and the industry was not conducted in a wasteful manner. Material and drilling costs increased considerably. The industry established minimum prices and maintained them through the war, general charging prices lower than it could properly have charged. It delivered kerosene, Diesel oil and other high cost products, when fuel oil was not available, at the same price as fuel oil.

oil was not available, at the same price as fuel oil.
"It placed tank steamers in the danger zone at one-third the going market rate. During the winter of 1917, when everything was frozen up and it was impossible to move coal normally required, the oil industry had to take on this additional burden and supply fuel oil." In conclusion, Mr. Moffett, now Chairman of the Board of the Bahrein Petroleum Co., said that on the basis of its past war record, the oil industry should be left to manage its own affairs "100 per cent" in case another war breaks out.

Meantime, in Washington increased attention on the part

Meantime, in Washington increased attention on the part of the Administration was seen for its bill for cooperative Federal-State conservation of petroleum. Regardless of the outcome of the present fighting in Europe, it is certain that the national defense aspect of the oil problem is going to hog the spotlight when hearings on the measure start late this The bill, drawn up at the request of President Roosevelt, is pegged to the Authority of the Congress to provide for national defense. Under the present European situation, it appears as though the Administration was foresighted last July when the measure was introduced by Representative Cole.

As the Sinclair Refining Co. removed its order on production in the Alleghany oil field, W. B. Chenault, General Manager of the company's plant in Wellsville, New York, said that "war has undoubtedly spurred business to some extent." Under the order, which canceled an order issued in 1937 providing for specific amounts of crude from each well, "purchasing requirements for crude oil, effective immediately, will be the total production from properties now owned or controlled by you, even though this total might be over and above an allowable established or contract on your properties." The order was sent to all producers in the Wellsville area from which the company purchases oil. Sharp criticism of the Illinois Legislature for its failure to enact oil conservation laws was voiced by Secretary of the

enact oil conservation laws was voiced by Secretary of the Interior Ickes in Washington this week as he characterized Illinois as a "wildcat state as far as oil is concerned." While Governor Horner's stand on oil conservation has been "perfectly splendid," Mr. Ickes said, the Legislature had failed to back up the State Executive. Illinois is the only major crude oil producing State which does not operate under the Connally hot-oil act whereby interstate shipment of crude oil or its products is prohibited if it has been produced in excess of State allowables.

As the national crude oil price structure strengthened in response to the drastic shutdown just completed, and the response to the drastic shutdown just completed, and the war situation with its promise of improved foreign demand, prices were advanced in several fields. Standard of Louisiana, barrel to a new figure of \$1.28 for 40 gravity and above. The same company also advanced Shreveport crude oil prices 10 cents to \$1.05 on the same day.

The Sohio Corp. on Sept. 12 lifted the price of crude oil in the Salem, Ill., area 10 cents a barrel to 95 cents a barrel. On the following day. Standard of Louisiana posted adjust-

On the following day, Standard of Louisiana posted adjust-ments in prices of crude oil from the Buckner, Magnolia and Village fields. Under the new schedule, which became effective immediately, crude of 25 gravity and above was posted at 63 cents a barrel with a two-cent differential for each higher degree of gravity with a top price of 95 cents for 40 gravity and above. Effective Sept. 15, the Ben Frankling Refining Co. of Ardmore, Okla., advanced the price of Healdton and Oscar crude oil 7 cents a barrel to 84 cents a

barrel for 36 gravity and above crude oil.

The Texas Railroad Commission, meeting in Austin Monday, announced an increase in the allowable crude oil production in East Texas of approximately 115,000 barrels daily. Under the new allowable, Texas production is set at a daily allowable of 1,527,700 barrels until Nov. 1. This compares with a United States Bureau of Mines estimate of market demand of approximately 1,408,000 barrels for Texas during September. The Commission's action was not unanimous, E. O. Thompson not voting. The new allowable for the East Texas field is set at not to exceed 490,000 barrels

daily, with the Saturday-Sunday shutdowns continued.

There is "no apparent justification" in the action of the Texas Railroad Commission in raising production allowables in the East Texas field, Secretary of the Interior Ickes said at his press conference in Washington Thursday. If the other oil-producing States increase their allowable, Mr. Ickes pointed out, "we will have over-production and that means waste." Mr. Ickes also disclosed that if the special Ickes pointed out, "we will have over-production and that means waste." Mr. Ickes also disclosed that if the special meeting of Congress scheduled for Sept. 21 considers general legislation, he will press his efforts for the passage of the Cole oil bill which provides for increased Federal control of the oil industry.

Postponement of the hearings originally scheduled for Sept. 18 before the Temporary National Economic Conference in Washington was announced in Washington at week-end. The postponement was made at the request of

A. J. Byles, President of the American Petroleum Institute, who said that more time was needed to complete the petro-leum industry's presentation before the TNEC.

With the States swinging back into normal production levels following the drastic shutdown of all production during the latter half of August, daily average production of crude oil for the week ended Sept. 9 climbed 945,450 barrels to a figure of 3,228,650 barrels, according to the mid-week report of the American Petroleum Institute. Sharpest gain was shown in Texas where daily average production jumped 458,400 barrels to a total of 1,350,250 barrels. Oklahoma showed a gain of 235,500 barrels with a daily average production of 242,000 barrels. An increase of 89,150 barrels for

duction of 242,000 barrels. An increase of 89,150 barrels for Kansas lifted daily average production there to 93,150 barrels. Louisiana production was up 63,700 barrels to a daily figure of 225,050 barrels. California's gain of 20,700 barrels set a daily production figure of 621,800. Illinois was up 11,250 barrels to a daily allowable of 321,500 barrels. Showing the effects of the heavy drains upon inventories as result of the crude oil shutdown during the final two weeks of August, stocks of domestic and foreign petroleum held in the United States showed a decline of 10,339,000 barrels during the week ended Sept. 2. The United States Bureau of Mines report disclosed that holdings of domestic crude oil dropped 10,266,000 barrels to play the major role crude oil dropped 10,266,000 barrels to play the major role in reducing total stocks to 236,463,000 barrels. Inventories of foreign crude oil were off only 71,000 barrels from the

previous week.

The week's crude oil price changes follow:

Sept. 12—The Ben Frankling Refining Co. advanced the price of Healdton and Oscar crude oil 7 cents a barrel to a top of 84 cents a barrel, ef-

Sept. 12-Standard of Louisiana advanced crude oil prices in the University field to \$1.28 a barrel to top-gravity, against \$1.20 previously

Sept. 12-Standard of Louisiana advanced Shreveport crude oil prices 10 cents a barrel to \$1.05.

Sept. 12-Sohio Corp. advanced Salem, Iil., crude oil prices 10 cents a barrel to 95 cents.

Sept. 13-Standard of Louisiana advanced Buckner, Magnolia and

Village crude oil to a top of 95 cents for 40 gravity and above. Sept. 14—Caddo Crude Oil Purchasing Co. increased Lison, North Louisiana, crude oil prices, 5 cents a barrel to 82 cents for top-gravity. Sept. 15- Lion Oil Refining and Root Petroleum Cos. lifted crude prices

# in Schuler County (Ark.), 15 cents to 95 cents for top-gravity. Prices of Typical Crude per Barrel at Wells (All gravities where A. P. I. degrees are not show:

REFINED PRODUCTS-GASOLINE PRICES MOVE HIGHER IN NEW YORK AREA-FUEL OIL PRICES ALSO ADVANCED-WAR DEMAND NOT YET FELT IN GASOLINE STOCKS-DECLINE OVER LABOR DAY WEEK-END DISAPPOINTING

Socony-Vacuum Oil Co., Inc., on Sept. 13 posted an increase of 4-10-cent a gallon in the dealer tank wagon price of Mobilgas in New York City, from 8 cents to 8.4 cents a gallon, exclusive of taxes. The retail price was advanced to 17 cents from 16.4 cents, taxes included. Both increases, which became effective the following day, were extended to prices in the metropolitan area surrounding New York City. Standard Oil Co. of New Jersey two days earlier had increased tank car and tank wagon prices of gasoline throughout New Jersey by 7-10-cent a gallon. In Louisiana, Ar-

out New Jersey by 7-10-cent a gallon. In Louisiana, Ar-kansas and Tennessee, its southern subsidiary, Standard Oil Co. of Louisiana, posted an increase of 1/2-cent a gallon in gasoline prices.

These increases, which were met by competing companies in the areas affected, were mainly the result of higher tanker rates from the Gulf Coast. Prices have risen sharply in recent weeks and the steady tone of the gasoline markets, which is in distinct contradiction to the statistical weakness of the market, is the after effect of the sustained rise in tanker

rates which has been in evidence recently. Other refined petroleum products also moved higher during Other refined petroleum products also moved higher during the week. Petroleum Heat & Power announced in New York City on Sept. 13 that, effective the following day, it would make an increase of ¼ cent a gallon in the price of No. 1, No. 2 and No. 3 fuel oil in Bronx, Manhattan, Queens and Nassau County. The top contract price for the current heating season is 6¾ cents a gallon. Standard of New Jersey early in the week had raised the prices of kerosene and No. 1 heating oil ¼ cent a gallon at New York, Baltimore, Norfolk, Charlestown and Philadelphia.

There was no evidence of any boom in European demand.

There was no evidence of any boom in European demand for gasoline during the Sept. 9 week, with the trade regarding the drain upon inventories over the Labor Day week-end as disappointing. The American Petroleum Institute reported that stocks of finished and unfinished gasoline for this period were off 950,000 barrels to 72,244,000 barrels. Refinery operations showed only a fractional rise at 81.2% of capacity, while daily average runs of crude oil to stills of capacity, while daily average runs of crude oil to stills were up 5,000 barrels to 3,380,000 barrels.

Representative price changes follow:

Sept. 11-Standard of New Jersey advanced kerosene and No. 1 heating oil 1/4-cent a gallon at New York, Baltimore, Norfolk, Charlestown and

Sept. 11—Standard of New Jersey advanced tank car and tank wagon prices of gasoline 7-10-cent a gallon throughout New Jersey.

Sept. 11—Standard of Louisiana advanced gasoline prices ½-cent a gallon. Sept. 13—Socony-Vacuum advanced dealer tank wagon prices of Mobilgas 4-10-cent a gallon in the metropolitan New York area to 8.4 cents a gallon, and advanced retail prices from 16.4 cents to 17 cents.

Sept. 13—Petroleum Heat & Power advanced No. 1, No. 2 and No. 3 heating oil ¼-cent a gallon in the metropolitan New York area.

Gas Oil, F.O.B. Refinery or Terminal 

### Daily Average Crude Oil Production for Week Ended Sept. 9 Gains 945,450 Barrels

The American Petroleum Institute estimates that the daily average gross crude oil production for the week ended Sept. 9, 1939, was 3,228,650 barrels. This was a gain of 945,450 barrels from the output of the previous week, but the current week's figure was below the 3,510,700 barrels calculated by the United States Department of the Interior to be the total of the restrictions imposed by the various oil-producing States during September. Daily average production for the four weeks ended Sept. 9, 1939, is estimated at 2,420,800 barrels. The daily average output for the week ended Sept. 10, 1938, totaled 3,206,900 barrels. Further details, as reported by the Institute follow:

Imports of petroleum for domestic use and receipts in bond at principal United States ports for the week ended Sept. 9, totaled 1,142,000 barrels, a daily average of 163,143 barrels, compared with a daily average of 136,714 barrels for the week ended Sept. 2 and 168,214 barrels daily for the four weeks ended Sept. 9.

There were no receipts of California oil at Atlantic and Gulf Coast ports for the week ended Sept. 9, compared with a daily average of 32,857 barrels for the week ended Sept. 2 and 24,929 barrels daily for the four weeks

Reports received from refining companies owning 86.0% of the 4,338,000 barrel estimated daily potential refining capacity of the United States, indicate that the industry as a whole ran to stills, on a Bureau of Mines' basis, 3,380,000 barrels of crude oil daily during the week, and that all companies had in storage at refineries, bulk terminals, in transit and in pipe lines as of the end of the week, 72,244,000 barrels of finished and unfinished gasoline. The total amount of gasoline produced by all companies is estimated to have been 11,250,000 barrels during the week.

x Minus. z Plus.
a These are Bureau of Mines' calculations of the requirements of domestic crude oil based upon certain premises outlined in its detailed forecast for the month of September. As requirements may be supplied either from stocks, or from new production, contemplated withdrawals from crude oil inventories must be deducted from the Bureau's estimated requirements to determine the amount of new crude to be produced.

produced.

b Pending results of adjustment hearing Sept. 11.
c[Recommendation of Central Committee of California Oil Producers.

Note—The figures indicated above do not include any estimate of any oil which might have been surreptitiously produced.

# Production of Natural Gasoline for Month of July

The daily average production of natural gasoline decreased The daily average production of natural gasoline decreased in July, 1939, according to a report prepared by the Bureau of Mines for Harold L. Ickes, Secretary of the Interior. The daily average in July was 5,656,000 gallons, compared with 5,733,000 gallons in June. The most outstanding decreases in July were in Oklahoma City and Kettleman Hills, and the largest increase in east Texas.

Stocks continued to increase, and the total on hand at the end of the month was 299,166,000 gallons (7,123,000 barrels), compared with 283,458,000 gallons on June 30.

# Weekly Coal Production Statistics

The Bituminous Coal Division of the United States Department of the Interior in its current weekly coal report stated that production of soft coal continued to increase in the week ended Sept. 2. The total output is estimated at 8,100,000 net tons, an increase of 405,000 tons, or 5.2%, over the preceding week. Production in the corresponding week of 1938 amounted to 6,934,000 tons.

The United States Bureau of Mines reported that production of Pennsylvania anthracite for the week ended Sept. 2 is estimated at 917,000 tons, a gain of 72,000 tons (8.5%) from output in the week of Aug. 26. In comparison with the corresponding week of 1938 (Sept. 3) however, there was a reduction of 31,000 tons.

# Crude Petroleum and Petroleum Products, July, 1939

The current monthly petroleum report of the United States Bureau of Mines showed that the production of crude oil increased in July, following the decline in June, and the daily average of 3,578,600 barrels was just above May and 91,700 barrels more than in June. The Bureau further reported:

The principal changes in the State production averages were sizable gains in Texas and Illinois, and a moderate loss in Oklahoma. California, Louisiana, Kansas and New Mexico showed little change in daily average output. Texas's average increased about 65,000 barrels to 1,377,400 barrels for July. This increase was quite generally distributed, with the largest gains in the Gulf coast and west Texas. Illinois continued to occupy the principal spotlight, its average rising from 236,100 barrels in June to a new peak of 281,800 barrels in July. Oil wells completed in Illinois in July totaled 286, averaging 400 barrels initial. Arkansas's average increased due to developments in the Magnolia field.

creased due to developments in the Magnolia field.

The gain in output and a decline in crude runs to stills were partially offset by lower imports and much higher exports; nevertheless, the reduction in refinable crude stocks in July (about 2,750,000 barrels) was considerably less than in June.

# Refined Products

The yield of gasoline in July was 44.5%, the same as in June. The most important change in yields was a decline of 1% for gas oil and distillate fuel oils.

The domestic demand for motor fuel in July, 50,508,000 barrels, was 6% above July, 1938; but, considering the distinctly more favorable weather this year, this increase was disappointing. Exports of motor fuel were also below expectations, being only 3,585,000 barrels, compared with 4.277,000 barrels in July, 1938. The withdrawal from finished inventories was far less than normal, only about 2,500,000 barrels being taken out. Furthermore, stocks of both natural gasoline and unfinished gasoline continued to increase.

tinued to increase.

The demands for the light fuel oils, kerosene and distillate, were about the same this July as last, but domestic deliveries of heavy fuel oil were 13% higher.

According to the Bureau of Labor Statistics, the price index for petroleum products in July, 1939, was 52.2, compared with 52.5 in June and 56.8 in July, 1938.

The crude oil capacity represented by the data in this report was 4,110,000 barrels, hence the operating ratio was 84%, compared with 85% in June and 79% in July, 1938.

# Buying of Major Non-Ferrous Metals Moderates as Prices Tend to Steady

"Metal and Mineral Markets" in its issue of Sept. 14 reported that though the volume of business in non-ferrous metals again was large, buying moderated in the last few days of the week on news that Great Britain had taken action to fix values at a comparatively low levels and on indications that Washington was strongly opposed to a sharp upward movement in prices here. Consumers feared a repetition of what happened in the World War, but, in many instances, producers of copper, lead, and zinc pointed out that the situation now is not at all comparable with the 1914-18 period. The publication further stated:

# Copper

Domestic sales of copper for the week amounted to 28,285 tons, against 115,797 tons in the preceding week. Though some business was booked during the week at 12½c., Valley basis, the market was not quotable above 12c. Leading producers parceled out metals daily to cover "legit-

imate" needs of fabricators at the lower level and were not disposed to move the price under present circumstances. Sales of copper to the demestic trade for the month to date totaled 141,486 tons.

At a press conference in Washington on Sept. 12, President Roosevelt Sales of copper to the

went on record with a statement to the effect that plenty of copper could be produced at 12½c. a pound at a fair profit and the Govern-ment wanted no repetition of the World War situation, when copper sold at about 28c. He spoke of the general commodity situation, but again singled out copper when he touched on non-ferrous metals. The trade was not surprised at this action.

The move in Great Britain to fix prices on Empire copper at comparatively low levels astonished most operators here. The Cartel virtually ceased to function and the foreign market was unsettled at all times. Sale of prompt metal here for export commanded a premium. Generally speaking, producers here were willing to take on regular export business on an f.a.s. basis, settling in dollars.

The British Control Board established the price of elecrolytic for United Kingdom needs at £51 per long ton. This price, fixed for the present, is the equivalent of about 9.20c., c.i.f.

Unusually heavy buying of lead continued during the last week, as consumers bought a total of 24,227 tons, against 28,984 tons in the previous week. Sales for the calendar week ended Sept. 9 were reported to be over 42,000 tons, the largest on record. The trade believes consumers consider the present price level of lead attractive, and that with increased orders on their books they are anxious to acquire extra supplies of the metal. Producers have assured consumers that ample stocks of refined lead exist, and there is no likelihood of a shortage in this country.

Quotations closed firm at 5.50c., New York, which was also the contract settling basis of the American Smelting & Refining Company, and 5.35c., St. Louis.

British Metal Control has for the present established the price of Empire lead at £17 per long ton ex ship and foreign lead ex warehouse in the United Kingdom at £17 5s.

Zinc Demand for zine was brisk most of the week, and the price, after becoming firmly established at 6c., St. Louis, on Sept. 7, moved up to 61/4c. late on Sept. 11. Business booked on the last-named date was about evenly divided between the 6c. and 6%c. levels. Consumers were eager for the first-quarter 1940 metal. Sales by the Prime Western division for the calendar week ended Sept. 9 amounted to 24,473 tons, the bulk of which called for November forward shipment. The market closed firm at 6½c., St. Louis. Concentrate advanced to the basis of \$40 per ton, Joplin, Mo.

British Metal Control has, until further notice, set the price of or-dinary zinc for consumption in the United Kingdom at £17 5s. per long ton ex ship on Empire metal and £15 per ton ex ship on non-Empire metal, duty for buyer's account,

### Tin

Domestic business in tin last week involved some transactions in a disrupted market at prices that increased daily. Offerings of metal for the nearby position were few. Prices were wholly nominal all week. Tinplate production has suddenly increased to about 70% of capacity.

The International Tin Committee announced on Sept. 12 that the production quota for the third quarter has been increased from 60%, established a week ago, to 80%. The production rate for the last quarter, however, remains unchanged at 60%.

Correction—Standard tin, London, Sept. 6th, spot. 629974: three

-Standard tin, London, Sept. 6th, spot £229%; three

months, £2271/2.

Chinese tin, 99%, was nominally as follows: Sept. 7th, 61.250c.; 8th, 62.600c.; 9th, 63.500c.; 11th, 64.000c.; 12th, 67.875c.; 13th, 72.375c.

DAILY PRICES OF METALS ("E.' & M. J." QUOTATIONS)

	Electrolytic Copper		Stratts Tin	Le	Zinc	
	Dom., Refy.	Exp., Refy.	New York	New York	St. Louis	St. Louis
Sept. 7	11.775	11.800	62.500	5.50	5.35	6.00
Sept. 8	11.775	11.800	64.750	5.50	5.35	6.00
Sept. 9	11.775	11.800	66.000	5.50	5.35	6.00
Sept. 11	11.775	11.900	70.000	5.50	5.35	6.00 + 6.25
Sept. 12	11.775	11.925	70.000	5.50	5.35	6.25
Sept. 13	11.775	11.875	74.500	5.50	5.35	6.25
Average	11.775	11.850	67.958	5.50	5.35	6.104

Average prices for calendar week ended Sept. 9 are: Domestic copper f.o.b., refinery. 11.575c.; export copper, 11.588c.; Straits tin, 62.650c.; New York lead, 5.425c.; St. Louis lead, 5.275c.; St. Louis zinc, 5.920c.; and silver, 36.313c.

The above quotations are "M. & M. M.'s" appraisal of the major United States markets, based on sales reported by producers and agencies. They are reduced to the basis of cash, New York or St. Louis, as noted. All prices are in cents

per pound.

Copper, lead and sine quotations are based on sales for both prompt and future deliveries: tin quotations are for prompt delivery only.

In the trade, domestic copper prices are quoted on a delivered basis; that is, delivered at consumers' plants. As delivery charges vary with the destination, the figures shown above are net prices at refineries on the Atlantic seaboard. Delivered prices in New England average 0.225c. per pound above the refinery basis.

Export quotations for copper are reduced to net at refineries on the Atlantic seaboard. On foreign business in copper sellers usually name a c.i.f. price—Hamburg, Havre, and Liverpool. The c.i.f. basis commands a premium of 0.325c. per pound above f.o.b. refinery quotation.

All are in pounds sterling per long ton (2,240 lb.).

### August Anthracite Shipments Reach 3,146,744 Net Tons

Shipments of anthracite for the month of August, 1939, as reported to the Anthracite Institute, Amounted to 3,146,744 net tons. This is an increase, as compared with shipments during the preceding month of July, of 535,445 net tons, or 20.50%, and when compared with August, 1938, shows an increase of 810,246 net tons, or 34.68%.

Shipments by originating carriers (in net tons) are as follows:

THE SECOND SECON	August, 1939	July, 1939	August, 1938	July, 1938

# United States Steel Corp. Shipments 43.9% Higher Than Last Year

Shipments of finished steel products by subsidiary companies of the United States Steel Corp. for the month of August, 1939, amounted to 803,822 tons.

The August shipments compare with 676,309 tons in the preceding month, an increase of 127,513 tons, and with 558,634 tons in the corresponding month in 1938 (August),

an increase of 245,188 tons, or 43.9%. For the year 1939 to date, shipments were 5,873,397 tons, compared with 4,010,558 tons in the comparable period of

1938, an increase of 1,862,839 tons, or 46.4%.

In the table below we list the figures by months since January, 1935:

TONNAGE OF SHIPMENTS OF STEEL PRODUCTS BY MONTHS FOR YEARS INDICATED

Month	Year 1935	Year 1936	Year 1937	Year 1938	Year 1939

# Steel Buying in Heavy Volume-Ingot Rate Rises to 71%

The Sept. 14 issue of the "Iron Age" reported a tremendous volume of steel orders, almost unprecedented within so short a period, has been piling up on mill books since the outbreak of war in Europe. Bookings of the past week have greatly exceeded those of the week before, the totals in some products, particularly sheets and bars, assuming almost fantastic proportions and resembling the mad rush to buy in the early part of 1937 in anticipation of steel strikes. The "Iron part of 1937 in anticipation of steel strikes. Age" further states:

Business has come in so fast as virtually to swamp the sales and clerical force of steel companies. Under the circumstances an accurate estimate of total bookings of the past 10 days is impossible, but some products have gained from 35 to 200% over their weekly averages of August. a New York sales office of a large company in three days booked as much domestic business as in the entire month of August.

Comparatively little of the heavy inflow of tonnage has come from abroad. Export business has expanded, but not as greatly as domestic buying, the chief hindrance being the shipping situation.

The sharp gain in business has been accompanied by a quick rise in steel ingot production to 71%, a gain of 12 points over the Labor Day holiday

week, and advancing scrap prices, which have raised the "Iron Age" scrap composite price to \$16.75, a gain of \$1.13 to the highest level since early October, 1937. Heavy melting steel at Pittsburgh is \$2 higher and there

have been lesser rises in other markets.

Pig iron production is also being increased both for steel making and merchant trade, presaging a further rise in steel making operations on the one hand and greater foundry activity on the other. The Carnegie-Illinois Steel Corp. has blown in five furnaces, three in the Pittsburgh district and two in the Chicago district; the Jones & Laughlin Steel Corp. has blown in one and the Republic Steel Corp. one at Birmingham. The Hamilton, Ohio, merchant stack of the American Rolling Mill Co. has gone in, while this week Sloss-Sheffield and Woodward Iron will each add a furnace, the former to make ferromanganese

Owing to advance in raw material costs, steel companies have withheld announcement of fourth quarter prices until the situation could be more clearly appraised. These announcements may come this week. No general increase is expected, but adjustments may be made to cover additional costs that have already been incurred, such as the higher spelter

prices which will run up costs of making galvanized sheets.

Whatever prices are named probably will be on an "until further notice" basis, subject to change within the fourth quarter if conditions warrant. This is seen in the announcement of the extension of the current price of \$5 per base box on tin plate, but the rise in the tin price to 75c. per lb. raises doubt as to the long continuance of this quotation. Demand for tin plate has risen contra-seasonally and operations have been lifted to 68%. With the prospect that added foreign and domestic business will being still higher production. bring still higher production.

There is patently a disposition among steel companies to do all in their power to prevent a runaway market both in the matter of price advances and in the restriction of purchases that can be identified as of a speculative character. In some products, notably semi-finished steel and bars, the mills have virtually allocated tonnage to various consumers, cutting down the size of orders when they appeared to be excessive in relation to normal requirements.

A considerable share of business booked in the past week consisted of sheets and strip which were taken at low prices last May. All mills insisted on complete specifications by mid-September, and the result has been to load some mill books with about all the flat rolled tonnage they

can produce over the remainder of the year. However, new business in and strip has been booked for immediate shipment at current prices. When forced to do by insistent customers, steel companies have taken s for later shipment with prices ruling at the time to govern, but there has been a disposition to avoid such commitments if possible until fourth quarter prices are announced. In all events, mills are trying to limit orders for completion before the year-end.

Merchant pig iron producers are taking contracts for the fourth quarter at no change in price and have booked heavy tonnages. Ferromanganese prices have been advanced \$20 a ton to \$100, Spiegeleisen is up \$4 a ton to \$32 for the 19 to 21% grade, and fluorspar is \$1 to \$2 a ton higher. Trading in foreign ores is at a standstill, but stocks in this country are ample for some time to come.

Meanwhile, various steel using industries are being greatly stimulated. The automobile industry, headed into its 1940 model production year, expects considerable truck business from abroad and is taking steel heavily for fall production of cars. Railroads are opening their shops for the reapir of cars and locomotives to take care of an expansion in carloadings. Inquiries for new cars and locomotives are expected. The Erie is considering the purchase of 900 cars and a number of locomotives, the Norfolk & Western is rebuilding 1,000 hopper cars and the Virginian will build 500 in its own shops. Supplementary rail buying includes 30,000 tons for the Louisville & Nashville, 5,000 tons for the Scaboard Air Line and 2,000 tons for the Illinois Central, all placed with the Tennessee Coal, Iron & Railroad

o., which is starting up its Ensley rail mill. Shipbuilding will continue to boom. Bethlehem has been awarded 10 ships and the Maritime Commission has asked for bids on 33 additional, requiring 160,000 tons of steel.

No falling off in structural steel business is expected even though Government-financed jobs should taper off, as there will be fresh demands from

Ore shipments on the Great Lakes are being speeded up, about 30 ships having been added to the ore-carrying fleet. The season's shipments are expected to total about 43,000,000 tons.

Though British and Belgian steel interests are unable to foretell the future functions of the International Steel Cartel, the Steel Export Association of America will continue to cooperate with the Cartel insofar as war conditions permit.

Repeal of the Neutrality Act, which is confidently expected in well-informed circles, undoubtedly will add to industrial activity here if the war is of long duration. Labor's full cooperation in the tense period which lies ahead for the steel industry is assured by Philip Murray, head of the Steel Workers Organizing Committee, who states to the "Iron Age" that "whoever looks for the American steel workers to close the mills by irresponsible, unreasonable strikes now or in any future hour of still greater need, will look in vain. If the fight to save civilization is to be decided, in this age of steel, in the plants of industry, the steel workers are ready.'

"Steel" of Cleveland in its summary of the iron and steel markets on Sept. 11, stated:

Steel buyers have responded to the outbreak of war with a heavy rush

of orders.

Ingot production has snapped back promptly from the holiday letdown early last week. Scheduled gains this week, ranging up to 10 points or more in a number of leading districts, will push the national steelmaking rate to a new high for the year to date. Mills are heavily booked on many products into October.

Scrap prices are stronger in most areas, and "Steel's" price composite is

up 29 cents to \$15.79, highest in nearly two years.

Movement of iron ore over the Great Lakes is being speeded, with an additional 25 carriers expected to be placed in commission before the end of September

The flood of inquiries and orders for practically all steel products is the result of several circumstances. Primarily it reflects relatively good prospects for domestic consumption the remainder of the year and buyers' fears of higher prices. Attractiveness today of prices at which large lots of sheets and strip were placed last spring has prompted heavy specifying against such contracts before their expiration. Similarly, bar demand has been stimulated by approaching application of higher extras.

Export inquiries also have been swelled sharply by the European situation, as many neutral countries must seek new sources of supply. So far, however, little foreign business has been placed. A complicating factor in export trade is the current scarcity of available ships. Export prices on steel products have stiffened markedly, but in most instances continue under domestic levels.

Steelmakers have refused to be stampeded by the abrupt increase in demand, and for the first time in many months are selecting tonnage. siderable business offered at current prices for future delivery has been turned down. The policy on forward buying has been to quote on the basis of the price prevailing at time of shipment, but in some cases this is being limited to regular custom

Indications point to higher steel prices before the end of the year, but the industry is not inclined to take advantage of the present confused situation by instituting large advances that would tend to arrest domestic re-In view of the likelihood of higher production costs through advancing prices on various raw materials, steel quotations over coming months are expected to be subject to more frequent revisions than in the past, when quarterly adjustments usually sufficed.

Tin plate producers have advised customers fourth quarter business will be accepted at current prices, but the door has been left open for changes later in the year should conditions warrant them. Tin plate production still is declining seasonally, but the outlook for increased export demand is promising.

Some pig iron producers without formal announcement also are taking orders at present prices for fourth quarter delivery.

The automobile industry is calling for more steel, as new model assemblies expand steadily. The holiday retarded last week's output, although the 26,865 units built marked a gain of 1,625 and compare with 17,485 produced a year ago. Ford and Chevrolet, normally accounting for nearly one-half of the industry's total output, still have their assembly lines

Railroads show more interest in steel requirements for equipment repairs. The carriers have improved prospects for a sizable increase in freight

movement this fall, which, in turn, enhances outlook for car building.

Equipment orders include 150 subway cars for New York. The Milwaukee road is expected to build 1,000 to 2,000 freight cars, the Burlington is planning construction of 100 units and the Erie is inquiring for 1,000. Steelmaking averaged 62% last week, the 2-point drop resulting from the

holiday interruption. This compares with 41½% a year ago. Exceptions to the downward trend were eastern Pennsylvania, up 2 points to 46; Detroit, up 9 points to 99; and Youngstown, up 1 point to 57.

Pittsburgh operations declined 4 points to 55, but are expected to rebound to 65 this week. Other reductions included 3 points to 51 at Chicago. 6 points to 80 at Wheeling; 5 points to 70 at Birmingham; 1½ points to 62 at St. Louis; 12 points to 68 at Cleveland, and 9 points to 57 at Cincinnati. Unchanged were Buffalo at 60½ and New England at 70.

Steel ingot production for the week ended Sept. 11 is placed at about 60% of capacity, according to the "Wall Street Journal" of Sept. 14. This takes into account part of the closing down for Labor Day. In the previous week the rate was 63½%, and two weeks ago it was 63%. "Journal" further reported:

U. S. Steel is estimated at 471/2%, compared with 571/2% in the week

U. S. Steel is estimated at 47½%, compared with 57½% in the week before, and 57% two weeks ago. Leading independents are credited with 71%, against 70% in the preceding week and 69½% two weeks ago. In the current week there will be a substantial recovery by the subsidiaries of the United States Steel Corp. At this time it is estimated that these units will average at least 66% and perhaps more for the period, whereas the gain anticipated from the leading independents will probably be comparatively small. Many of these plants did not close for Labor Day, which kept up their operations in the current report.

The following table gives a comparison of the percentage of production

following table gives a comparison of the percentage of production with the nearest corresponding week of previous years, together with the approximate changes in points, from the week immediately preceding:

# Secretary of State Hull to Speak at New York World's Fair on Pan-American Day, Sept. 21

Pan-American Day at the New York World's Fair will be held on Sept. 21, with Cordell Hull, Secretary of State, as the principal guest and speaker. The ceremonies will take place on the Court of Peace fronting the Federal Building and will be sponsored by the Pan-American Union of which Dr. Leo S. Rowe is the Director General. Jose Richling, of Uruguay, who is Vice-Chairman of the Pan-American Union, will preside during the speaking part of the program. In recognition of his work in fostering commercial peace through his trade agreements program, Mr. Hull will receive a gold medal from the Inter-American Commercial Arbitration The presentation will be made by Thomas J. Commission. Watson, Chairman of the Commission and recent President of the International Chamber of Commerce.

### Current Events and Discussions

### The Week with the Federal Reserve Banks

During the week ended September 13 member bank reserve balances increased \$385,000,000. Additions to member bank reserves arose from increases of \$230,000,000 in Reserve bank credit, \$82,000,000 in gold stock and \$3,000,-000 in Treasury currency and decreases of \$26,000,000 in money circulation, \$37,000,000 in Treasury cash and \$61,000,000 in Treasury deposits with Federal Reserve banks, offset in part by an increase of \$54,000,000 in non-member deposits and other Federal Reserve accounts. Excess reserves of member banks on September 13 were estimated to be approximately \$5,270,000,000, an increase of \$300,000,-000 for the week.

The principal change in holdings of bills and securities was a net increase of \$230,000,000 in United States Government securities, direct and guaranteed. Holdings of bonds and notes increased \$248,000,000 and \$7,000,000, re-Holdings of spectively, while holdings of bills decreased \$25,000,000.

The statement in full for the week ended Sept. 13 will be found in pages 1716 and 1717.

Changes in the amount of Reserve bank credit outstanding and related items were as follows

### Complete Returns of Member Banks of the Federal Reserve System for the Preceding Week

As explained above, the statements of the New York and Chicago member banks are given out on Thursday, simultaneously with the figures of the Reserve banks themselves and covering the same week, instead of being held until the following Monday, before which time the statistics covering the entire body of reporting member banks in 101 cities cannot be compued.

In the following will be found the comments of the Board of Governors of the Federal Reserve System respecting the returns of the entire body of reporting member banks of the Federal Reserve System for the week ended with the close of businss Sept. 6:

The condition statement of weekly reporting member banks in 101 leading cities shows the following principal changes for the week ended Sept. 6: Increases of \$79,000,000 in commercial, industrial and agricultural loans and \$32,000,000 in loans to brokers and dealers in securities: decreases of \$67,000,000 in holdings of obligations guaranteed by the United States Government and \$34,000,000 in holdings of United States Treasury bills; increases of \$121,000,000 in reserve balances with Federal Reserve banks and \$179,000,000 in deposits credited to domestic banks,

and a decrease of \$56,000,000 in demand deposits—adjusted.

Commercial, industrial and agricultural loans increased in nearly all districts, the principal increases being \$28,000,000 in New York City and \$15,000,000 in the Chicago district, and the total increase being \$79,000,000 at all reporting member banks. Loans to brokers and dealers in securities increased \$32,000,000 in New York City and at all reporting member banks.

Holdings of United States Treasury bills decreased \$27,000,000 in the Chicago district and \$34,000,000 at all reporting member banks. Holdings of Treasury notes decreased \$6,000,000 and holdings of United States Government bonds decreased \$16,000,000 at all reporting member banks. Holdings of obligations guaranteed by the United States Government decreased \$54,000,000 in New York City and \$67,000,000 at all reporting member banks. Holdings of "other securities" decreased \$12,000,000 in New York City, \$9,000,000 in the San Francisco district, and \$29,000,000

at all reporting member banks.

Demand deposits-adjusted decreased \$44,000,000 in New York City, \$19,000,000 in the Chicago district, and \$56,000,000 at all reporting member banks.

Time deposits decreased \$12,000,000 at all reporting member banks. member banks.

Deposits credited to domestic banks increased in all districts, the principal increases being \$67,000,000 in New York City, \$16,000,000 each in the Richmond and Chicago districts, and \$15,000,000 in the Kansas City district, and the total increase being \$179,000,000 at all reporting member banks. Deposits credited to foreign banks increased \$25,000,000 in New York City and \$29,000,000 at all reporting member banks.

Borrowings of weekly reporting member banks amounted to \$1,000,000 cm. Sort 6

on Sept. 6.

A summary of the principal assets and liabilities of reporting member banks, together with changes for the week and the year ended Sept. 6, 1939, follows:

### Canada Declares War on Germany—Appropriates \$100,000,000—Britain Gratified at Canadian Action

Canada entered the list of nations at war with Germany Sept. 10 when a formal declaration of war was proclaimed by the Canadian Prime Minister, W. L. Mackenzie King. The text of the proclamation was cabled to London for the signature of King George VI. The Prime Minister's action had been authorized by Parliament the day before when the Senate voted unanimously for it and the House of Commons approved without a record vote. The Government was supported by two of the three opposition parties The Governin its demand that war be declared, and only four voices

were raised in protest in the House.

Addressing the House, the Prime Minister said the Government proposed to institute immediately plans for the "rapid expansion of air training and of air and naval facili-

ties and the dispatch of trained air personnel."

The question of an expeditionary force for service overseas would require the fullest examination, he told the House. He sharply criticized war profiteers as belonging "to the underworld."

The proclamation and its signature by the King, as sovereign of Canada, set a precedent. In 1914 Canada was at war with official publication of Great Britain's dec-

A war appropriation bill approved by Parliament Sept. 11 poses. In introducing the bill Finance Minister J. L. Ilsley remarked that \$50,000,000 of a recent \$65,000,000 appropriation for armaments remained unspent because of inability to get deliveries.

As we note in a separate item, the United States extended the embargo on arms shipments to Canada shortly after the declaration of war.

The Dominion followed Great Britain by just a week in going to war with Germany in 1939. Three other dominions-New Zealand, Australia and the Union of South Africa-preceded Canada with war declarations.

India was considered automatically at war with the

Reich upon Great Britain's declaration.

Respecting the reception of the Canadian declaration in London, Canadian Press advices of Sept. 11 from London

The Ministry of Information, in a communique issued tonight, said that Canada's decision to participate in the war was an "event of the greatest importance."

The communique remarked that "while Australia and New Zealand have to rely primarily on the United Kingdom for external defense against aggression, the same does not apply so fully to Canada." It stated that "the Monroe Doctrine, as extended or interpreted by the statement made last year at Kingston by President Roosevelt on the interest of the United States in the preservation of the integrity of Canada from invasion, places Canada in a special position."

Following is the text of the royal proclamation issued Sept. 10 declaring Canada at war with Germany: eedsmuir [L.S.].

George the Sixth, by the Grace of God of Great Britain, Ireland and the British Dominions beyond the Seas King, Defender of the Faith, Emperor of India.

To all to whom these presents shall come or whom the same may in anywise concern, greeting:

A PROCLAMATION

Ernest Lapointe, Attorney General, Canada.

Whereas by and with the advice of our Privy Council for Canada we have signified our approval of the issue of the proclamation in the "Canadian Gazette" declaring that a state of war with the German Reich exists and has existed in our Dominion of Canada as and from the 10th day of September, 1939;

Now therefore we do hereby declare and proclaim that a state of war with the German Reich exists and has existed in our Dominion of Canada

as and from the 10th day of September, 1939.

Of all which our loving subjects and all others whom these presents may concern are hereby required to take notice and to govern themselves

accordingly.

In testimony whereof we have caused these our letters to be made patent and the Great Seal of Canada to be hereunto affixed. Witness: our right trusty and well-beloved John, Baron Tweedsmuir of Elsfield, a member of our most honorable Privy Council, Knight Grand Cross of our most distinguished Order of St. Michael and Saint George, Knight Grand Cross of our Royal Victorian Order, member of our Order of the Companions of Honour, Governor General and Commander-in-Chief of our Dominion of

Canada. At our Government House, in our City of Ottawa, this 10th day of September, in the year of Our Lord one thousand nine hundred and thirty-nine and in the third year of our reign.

By command,

W. L. MACKENZIE KING, Prime Minister of Canada.

### Canada Levies Higher Taxes to Meet War Costs— Extraordinary Powers Vested in Cabinet

The Canadian House of Commons on Sept. 12 overwhelmingly adopted a war budget providing for a deficit, including war costs, in the fiscal year ending March 31, 1940, of about \$156,000,000. New taxes were also voted which are expected to raise \$21,000,000 revenues in the balance of the current fiscal year and thereby reduce the deficit to \$135,000,000. These war taxes, it is estimated, will bring in about \$63,000,000 in a full fiscal year.

Inflation, it is said, has been rejected as a means of paying the cost of the war, which the country is attempting to put on a "pay-as-you-go" basis. Excess profits, individual and corporate incomes, liquor, tea, coffee, and tobacco, will be subject to higher levies.

Parliament adjourned Sept. 13 after voting extraordinary powers to the cabinet for the duration of the war. Its next regular session starts next January.

Canadian Press advices of Sept. 12 from Ottawa, described the new taxes as follows:

All businesses, whether incorporated or not, will pay a tax ranging from 10% up to 60% of profits ranging in excess of 5% to 25% of capital, or an alternative tax of 50% on all profits in excess of the average for the last four

Individual and corporate income taxes are increased, the former by a surtax of 20% of the total normally paid, and the latter by 3% over the present level.

Domestic and imported spirits will be taxed an additional \$3 a gallon excise duty, the excise tax on all wines is doubled, the excise duty on imported beers increased by 9 cents a gallon and corresponding increases m in the excise duty on malt, malt syrup and beers brewed from other than

No change was made in the sales tax rate but some exemptions were removed, including electricity and gas used for domestic purposes. Excise duties on cigarettes will be increased by \$1 a 1,000 and on tobacco by 5

Aerating preparations going into the manufacture of soft drinks will be taxed 2 cents a pound. Customs tariff rates on tea will be increased 5 cents a pound when invoiced up to 35 cents,  $7\frac{1}{2}$  cents when invoiced up to 45 cents a pound, and 10 cents when invoiced at 45 cents or more a pound. Coffee, now generally entered free, will be increased by a straight 10 cents a pound under all tariffs.

Changes under the Excise Act, the special war Revenue Act and the customs tariff are effective Sept. 12, except in the case of the increase in excise and customs duties on spirits including brandy, which are to be effective as of Sept. 3, 1939.

In his budget speech, Mr. Ilsley estimated revenue for the current fiscal without taxation changes, at \$495,000,000, against \$490,000,000 estimated in the last budget.

In another item in this issue we refer to Canada's declaration of war against Germany.

### Great Britain and Germany Designate Articles Regarded as Contraband of War

A list of "contraband of war" issued by the British Government Sept. 4 received royal approbation Sept. 9. Germany issued a similar list Sept. 13. The designation is said to apply to goods which a neutral may not ship to a belligerent without risk of seizure. Following is the full British list:

Absolute Contraband

A. All kinds of arms, ammunition, explosives, chemicals or appliances suitable for use in chemical warfare and machines for their manufacture or repair; component parts thereof; articles necessary or convenient for their use; materials or ingredients used in their manufacture; articles necessary or convenient for the production or use of such materials or ingredients.

B. Fuel, all kinds; all contrivances for or means of transportation on land, in water or air and machines used in their manufacture or repair; component parts thereof; instruments, articles or animals necessary or convenient for their use; materials or ingredients used in their manufacture; articles necessary or convenient for the production or use of such materials or ingredients. materials or ingredients.

C. All means of communication, tools, implements, instruments, equipment, maps, pictures, papers and other articles, machines or documents necessary or convenient for carrying on hostile operations; articles neces-

sary or convenient for their manufacture or use.

D. Coin, bullion, currency, evidences of debt; also metal materials, dies, plates, machinery or other articles necessary or convenient for their

Conditional Contraband

All kinds of food, foodstuffs, feed, forage and clothing and articles and materials used in their production.

Concerning the German contraband law, Associated Press dispatches of Sept. 13 from Berlin said:

The German Government tonight published a contraband law which, authoritative sources said, was designed as a "definite measure against the English blockade." A decree also was issued changing regulations governing prizes. This broadened the field of contraband.

Explaining the necessity of such measures, the semi-official Dienst aus Deutschland information service, which is close to the Foreign Office, said:
"By breaking legal international obligations and usage, England has

opened an economic war against Germany, which, according to English avowal, was to starve the German people.

"But this battle affects at least in the same measure neutral countries which are intended to be forced to renounce trade with Germany by

genuine terroristic methods.

"If they do not bend to the English dictate they, just as Germany, then are to be starved out and cut off from their vital connections. "In view of this open proclamation of the English fight, the Reich Government was left no other choice but to act on the principle of retaliation and meet English methods by all necessary means."

Last of Contraband

The German list of contraband goods, if intended for enemy territory

or enemy forces, follows:

Weapons of all kinds, their parts or accessories; munitions and munitions parts, bombs, torpedoes, mines and other kinds of shells; contrivances for shooting such shells, powder explosives, including igniting materials and explosive caps.

All types of warships, their parts or accessories; war trucks of all kinds, their parts or accessories; airplane motors, armor plate of all kinds, armored trains, automobiles and tanks.

Chemical battle materials and apparatus or machines used to throw or

blow such chemicals; military uniforms and equipment, signal communication and military lighting mediums, together with their apparatus.

Transport and communication equipment and parts; horses for riding

and pulling loads; lubricants, fuel of all kinds; gold, silver, currency and debt documents; tools, instruments, machines and materials used to make or to use the above-named products or objects.

The list was described as "unconditional contraband" in the law, which

The list was described as "unconditional contraband" in the law, which was signed by Chancellor Hitler, Colonel-General Wilhelm Keitel, Chief of the High Command of the Armed Forces and member of the War-time Ministerial Cabinet; Foreign Minister Joachim von Ribbentrop and Justice Minister Franz Guertner at Herr Hitler's headquarters at the Polish front. Conditional contraband includes food and clothing. The law goes into effect immediately.

### Economic Control Measures Taken by Britain

The United States Department of Commerce on Sept. 12 reported on economic control measures taken by Great Britain, as follows:

United Kingdom has adopted several economic control measures since the beginning of September, including control of stocks, prices, and distribution of several groups of commodities, extensive powers for controlling unemployment granted to the Ministry of Labor, the rationing of metor fuel, the creation of a new Ministry entitled the Ministry of Economic Warfare, in addition to various forms of import, export and exchange

## British Government Takes Over Foodstuff Import Trade—Maximum Prices Fixed for Many American

The British Food Defence Department, to be known in the future as the Food Ministry, is to have sole authority over the importation of all essential foodstuffs into the United Kingdom, according to a cable to the Office of Foreign Agricu Relations from the American Embassy in London, it was announced Sept. 13, by the United States Department of Agriculture. The announcement also said:

Organization of the new Ministry is still incomplete, but it has been announced that among its functions will be the acquisition of foreign supplies of foodstuffs, the imposition of domestic price control measures, and the organization and control of distribution. The new Ministry will have a complete monopoly of the British import trade in foodstuffs.

The steps already taken to control food prices in the United Kingdom include the assumption of Government control over stocks in the United Kingdom and supplies in transit of all foodstuffs for which the country is on an import basis and the fixing of maximum prices in pounds sterling for a

Among the products of special interest to American agriculture for which maximum prices have already been fixed are bacon, hams, lard, wheat and flour, dried fruits, oilseeds, and vegetable oils. Other products for which maximum prices have been set are butter, cheese, eggs, tea, sugar, potatoes, canned salmon, margarine, hogs, cattle, sheep and fresh meats. The prices have been fixed temporarily at about the levels prevailing shortly before the outbreak of hostilities.

# France Restricts Movement of Capital, Gold, and Foreign Exchange—M. Reynaud Describes Economic Policy of Nation

French decrees controlling the movement of capital and operations in foreign exchange and gold were issued Sept. 10, and on the same date Finance Minister Paul Reynaud outlined the country's financial and economic policy in a radio address. The following bearing on the decrees and remarks of M. Reynaud is taken from United Press dispatches from Paris, Sept. 10:

M. Reynaud's financial decrees, published today in the official journal, were:

1. "Capital exports are prohibited in any form without the Finance Minister's authorization." Future decrees will define what operations constitute capital exports.

2. Any foreign exchange operations authorized under Article 1 must be negotiated through the Bank of France or other institutions specially designated by the Finance Minister on the advice of the Bank of France.

designated by the Finance Minister on the advice of the Bank of France. A future decree may subject to the same regulation the purchase, sale, transfer or use as security of foreign shares, bonds or credits.

3. "All transfers, negotiated and other operations in gold are subject to the Bank of France's authorization." The import and export of gold are prohibited except with the Bank of France's authorization. Future decrees will establish all prohibitions, obligations and regulations in the execution of the present decree, which also provides heavy penalties.

The second article portends eventual mobilization of private French holding in foreign securities, estimated at seven billion dollars.

M. Reynaud said that the Bank of France today possesses "twice as many tons of gold as in 1914."

"With these tons of gold," he continued, "we shall purchase the raw materials necessary for war and army planes abroad. These tons of gold mean so many fewer war days, so many French lives more."

mean so many fewer war days, so many French lives more."

M. Reynaud said the Government had held to its promise not to introduce a moratorium, nor has the Treasury yet touched its 25,000,000,000

francs Bank of France overdraft. Commenting on currency restrictions, the Finance Minister said one aim was to prevent importation of unnecessary goods and export of products which might help France wage its war. He added that they also were important to prevent profiteering. The decree prevented speculation in foreign currency and commodity prices, he said.

M. Reynaud stressed that national production much be kept at a high level despite mobilization of all able-bodied men.

M. Reynaud emphasized that the Government had made impossible the "scandalous enrichment of purveyors to the national defense."

"scandalous enrichment of purveyors to the national defense."

As another measure to reduce consumption, he announced an increase in taxes. Specialized workers will have to pay 15% instead of 2% taxes

on their wages.

The restrictive measures announced today are the first financial and monetary restrictions France has imposed since hostilities began.

Previous reference to putting French finances on a war basis appeared in our issue of Sept. 9, page 1552.

#### Redemption of Part of City of Copenhagen 4% Loan of 1901

The City of Copenhagen (Denmark) has called for redemption on Nov. 15, 1939,, 639,232 Kr. principal amount of its 4% loan of 1901, according to announcement made by Heidelbach, Ickelheimer & Co., 49 Wall Street, New York.

### Member Trading on New York Stock and New York Curb Exchange—Figures for Weeks Ended Aug. 19 and Aug. 26

On Sept. 8 the Securities and Exchange Commission made public figures showing the volume of total round-lot stock sales on the New York Stock Exchange and the New York Curb Exchange for the account of all members of these exchanges in the week ended Aug. 19, continuing a series of current figures being published weekly by the Commission. Short sales are shown separately from other sales in the New York Stock Exchange figures.

During the week ended Aug. 19 trading on the Stock Exchange for the account of all members (in volume lot transactions) totaled 1,452,250 shares, which amount was 19.84% of total transactions on the Exchange of 3,659,470 shares. of total transactions on the Exchange of 3,659,470 shares. This compares with member trading during the previous week ended Aug. 12 of 1,283,022 shares, or 19.56% of total trading of 3,280,420 shares. On the New York Curb Exchange member trading during the week ended Aug. 19 amounted to 220,345 shares, or 19.57% of the total volume on that Exchange of 563,055 shares; during the preceding week trading for the account of Curb members of 208,725 shares was 19.65% of total trading of 531,110 shares.

The SEC also made available (Sept. 15) the figures for the week ended Aug. 26. Round-lot transactions for the account of members of the Stock Exchange during that week amounted to 2,255,415 shares, or 20.78% of total trading

amounted to 2,255,415 shares, or 20.78% of total trading of 5,427,060 shares. On the Curb Exchange member trading amounted to 295,545 shares, or 19.76% of the total volume on that Exchange of 747,825 shares.

The figures for the week ended Aug. 12 were given in these columns of Sept. 9, page 1553. The Commission, in making available the data for the week ended Aug. 19 and Aug. 26 said:

The data published are based upon weekly reports filed with the New York Stock Exchange and the New York Curb Exchange by their respective members. These reports are classified as follows:

	Week Ended Aug. 19		Week End	ed Aug. 26
	New York Stock Exchange	New York Curb Exchange	New York Stock Exchange	New York Curb Exchange
Total number of reports received	1.073	795	1,072	794
1. Reports showing transactions as specialists	196	101	199	101
2. Reports showing other trans- actions initiated on the floor	210	47	238	46
3. Reports showing other trans- actions initiated off the floor	239	65	249	80
4. Reports showing no trans- actions.	574	599	542	578

Note—On the New York Curb Exchange the round-lot transactions of specialists in stocks in which they are registered are not strictly comparable with data similarly designated for the New York Stock Exchange, since specialists on the New York Curb Exchange perform the functions of the New York Stock Exchange odd-lot dealer as well as those of the specialist.

The number of reports in the various classifications may total more than the number of reports received because, at times, a single report may carry entries in more than one classification.

TOTAL ROUND-LOT STOCK SALES ON THE NEW YORK STOCK EX-CHANGE AND ROUND-LOT STOCK TRANSACTIONS FOR ACCOUNT

80,763 The term "members" includes all Exchange members, their firms and their partners, including special partners.

a Shares in members' transactions as per cent of twice total round-lot volume. In calculating these percentages, the total of members' transactions is compared with twice the total round-lot volume on the Exchange for the reason that the total of members' transactions includes both purchases and sales, while the Exchange volume includes only sales.

b Round-lot short sales which are exempted from rules are included with "other sales."

#### Argentina's Restrictions on United States Imports Eased

The first tangible effect of the European war on Argentina-United States commerce was the loosening on Sept. 8 of restrictions on the importation of United States products, it is learned from Associated Press Buenos Aires advices of Sept. 8. The Government will admit 66 different groups of merchandise out of a total of 291 which have been

on the import restriction lists. The advices also said:

United States citizens here said the most important result would be the export from their country of coal, steel and iron products to Argentina to supply demands formerly satisfied in Great Britain, Germany, France and

Argentina, without known domestic coal deposits, normally imports 3,000,000 tens annually. Two-thirds of this has been coming from the United Kingdom, plus 338,000 tons from Germany, 232,000 tons from Poland, and lesser amounts from other places.

Shipping interests already are seeking vessels to accommodate cargoes from North America bound for Argentina.

A decree also removed restrictions on the importation of United States

tin-plate and steel products. Argentina normally imports about \$37,000,000 worth of iron, steel and their fabricated products annually.

### Odd-Lot Trading on New York Stock Exchange During Week Ended Sept. 2

The Securities and Exchange Commission on Sept. 8 made public a summary for the week ended Sept. 2, of complete figures showing the daily volume of stock transactions for the odd-lot account of all odd-lot dealers and specialists who handle odd lots on the New York Stock Exchange, continuing a series of current figures being published by the Commission. The figures are based upon reports filled with the Commission by the odd-lot dealers and specialists. Figures for the previous week ended Aug. 26 were given in our Sept. 9 issue, page 1554.

### New York Stock Exchange Short Interest Decreased During August

The short interest existing as of the close of business on the Aug. 31 settlement date, as compiled from information obtained by the New York Stock Exchange from its members and member firms, was 435,273 shares, compared with 481,599 shares on July 31, both totals excluding short positions carried in the odd-lot accounts of all odd-lot dealers. As of the Aug. 31 settlement date, the total short interest in all odd-lot dealers' accounts was 41,837 shares, compared with 38,855 shares on July 31. The Exchange's announcement, issued Sept. 14, further said:

Of the 1,230 individual stock issues listed on the Exchange on Aug. 31, there were 21 issues in which a short interest of more than 5,000 shares existed, or in which a change in the short interest of more than 2,000 shares occurred during the month.

The number of issues in which a short interest was reported as of Aug. 31, 1939, exclusive of odd-lot dealers' short position, was 381, compared with 413 on July 31.

In the following tabulation is shown the short interest existing at the opening of the last business day of each month since Aug. 31, 1937:

1937—	1 1	938		193	39—

### New York Stock Exchange Clarifies Restrictions on Dealing in New Securities of Belligerent States

The New York Stock Exchange on Sept. 11 called to the attention of its membership the restrictions on financial transactions contained in the Neutrality Act. The Act prohibits any person within the United States from dealing in securities of belligerent States and their political subdivisions, if the securities were issued after the date of the President's neutrality proclamation. Heavy penalties are provided for violation of the Act. The restrictions do not apply to an American republic or republics engaged in war against a non-American State or States, provided the American republic is not cooperating with a non-American State or States in such war.

The Exchange points out that the President of the United States in proclamations dated Sept. 5, Sept. 8 and Sept. 10, 1939, declared the following States to be belligerent: Germany, France, Poland, the United Kingdom, India, Australia, New Zealand, the Union of South Africa and Canada. It is assumed that the scope of these proclamations will be extended to any States which may become belligerent States subsequent to the date of the proclamations referred to above.

# Governors of New York Stock Exchange Accept Report of Public Examining Board—Two Recommenda-tions Adopted—Other Proposals Will Be Studied

The Board of Governors of the New York Stock Exchange, at a regular meeting, Sept. 13, unanimously adopted a resolution offered by William McC. Martin Jr., President, looking to the prompt consideration of the recommenda-tions contained in the report of the Public Examining Board, which was reported in our issue of Sept. 2, page 1409. The resolution follows:

I move that the Board of Governors accepts the report of the Public Examining Board, approves the philosophy on which the report is based as set out in Section 1 of the report, and directs that the specific details of the report be assigned to appropriate committees for immediate study and recommendations.

Two of the recommendations of the Public Examining Board have already been adopted. One requires that member firms distribute, at least annually, a printed financial statement, audited and prepared by a firm of public accountants. The effective date has not yet been fixed. The other recommendation which has been adopted increases the minimum capital requirements of member firms carrying customers' accounts from \$25,000 to \$50,000, effective March 1, 1940.

In order to effectuate the other recommendations of the Public Examining Board, as speedily as possible, Mr. Martin, pursuant to the resolution, announced the initiation of the following studies:

Recommendation No. 1 of the Public Examining Board's report, relating to customers' cash balances, is assigned to the Committee

Recommendations Nos. 2 and 3 will be discussed by Mr. Martin with Chairman Jerome H. Frank of the Securities and Exchange Commission. Recommendation No. 2 relates to the advisability of bringing about amendments to the Federal Bankruptcy Act to make it clear that cash balances segregated and securities held in safekeeping and in segregation are not subject to the claims of a broker's general creditors in case of his insolvency. Recommendation No. 3 relates to the advisability of his insolvency. amending the rules of the Exchange respecting capital requirements order that a Member Firm may not be penalized (as at present) for placing customers' credit balances in segregation.

particular recommendations which relate to the advisability increasing the revenue of the Exchange and of its member firms and of creating a substantial reserve fund to meet emergency or unusual needs which may arise are already being studied by a special committee, of which Philip W. Russell, a member of the Board of Governors, is Chairman. The other members of the committee are: Trowbridge Callaway, Vice-Chairman; John A. Coleman, Robert J. Haremshlag and Harry K. Smith.

The recommendation relating to the possible advisability of clarifying the rules of the Exchange in order that a customer, if he so desires, may request his broker to act as his agent in negotiating a separate individual loan from a bank, secured by a customer's collateral, is being studied by the Committee on Member Firms.

individual loan from a bank, secured by a customer's collateral, is being studied by the Committee on Member Firms.

The recommendation relating to standard minimum amounts of fidelity insurance on employees, to be maintained by member firms, and, to the extent found feasibly after further study, the application of these rules to cover insurance on partners are being studied by a special committee, of which J. Gould Remick is Chairman. The other members of the committee are: Howland S. Davis, Charles E. Saltman and A. Tate Smith.

The recommendation relating to the advisability of requiring member firms, as soon as satisfactory mechanisms are devised, to separate their horokerage from their dealing and underwriting business is assigned for

The recommendation relating to the advisability of requiring member firms, as soon as satisfactory mechanisms are devised, to separate their brokerage from their dealing and underwriting business, is assigned for study to a special committee which is to be appointed and which will include representatives of houses engaged in underwriting and dealing activities.

The recommendation that the Exchange consider the adoption of rules requiring for commodity accounts the same minimum margins as required by commodity exchanges is already being studied by John Dassau, Treasurer of the Exchange. In conducting this study Mr. Dassau is examining exhaustively the policies of commodity exchanges.

The other recommendations are being studied by the Committee on Member Firms. Recommendation No. 12 relates to the advisability of requiring every active member doing business as an individual to file a financial statement annually with the Exchange. Recommendation No. 13 relates to the advisability of providing that the annual audit of member firms by public accountants be conducted on a surprise basis and that such audit include a spot check of the firm's records of receipts from and deliveries of cash and securities to individual members.

Recommendation No. 14 relates to the advisability of further strengthening the examining staff of the Exchange.

The special Committee studying the recommendations of the Public Examining Board with reference to brokers' and Exchange revenue and the creation of a reserve fund by the Exchange began a survey on Sept. 14 of the general subject of compensation to brokers for their services to customers. In a letter sent to member firms together with a questionnaire the Committee explained:

It is the desire of the Committee to establish by this survey a consensus of considered opinion as to what services are performed by brokers for customers as a matter of regular practise, and to establish as nearly as possible a fair basis of compensation for those services, based on estimated costs. We earnestly request your assistance in establishing these basic facts. It is our desire, and it must be yours as well, to approach this whole subject in an objective attitude of mind and to base our findings on a study of facts.

The Committee wishes to emphasize that it is undertaking this study without any preconceived opinion as to what its ultimate recommendation will be with respect to possible changes in the basis of compensation to brokers for services rendered to customers.

There are two main sources of income of brokers for consideration and study: (1) commission income and (2) charges for services which are not directly, and in some cases not even remotely, connected with the execution of orders in securities. While a study will be made by this Committee of possible revision of the commission schedule, its first study will be charges for services not covered by commissions.

### Short Interest on New York Curb Exchange Decreased During August

The total short position of stocks dealt in on the New York Curb Exchange for the month of August, reported as of Aug. 31, amounted to 10,007 shares, compared with 11,612 shares on July 31. The Exchange's announcement of Sept. 11 continued:

Only five issues showed a short interest of 500 shares or more. They were American Gas & Electric Co. common, with a short interest of 565 shares against 35 at the end of July; Baldwin Locomotive Works warrants, with a short interest of 518 warrants against 32 in the preceding month; Electric Bond & Share Co. common, with a short interest of 995 shares as compared with 725 at the end of July; Lockheed Aircraft Corp., with a short interest of 800 shares as against 200 on July 31, and United Gas Corp. common, with a short interest of 1,001 shares as against 7 at the end of July.

#### Governors of New York Curb Exchange Adopt New Rule Regarding Obligations in Respect of Security Underwritings

The Board of Governors of the New York Curb Exchange at a meeting held Sept. 13, adopted a new rule, to be designated as Rule 445, which reads as follows:

"Rule 445. Every member firm having obligations in respect of security underwritings shall submit to the Committee on Member Firms weekly a statement of such obligations and the net positions resulting therefrom in such form as the Committee may direct. Such statements need not be filed by a member firm which submits similar statements to another Exchange of which it is a member."

#### Toronto Stock Exchange Rescinds Prohibition of Short Selling of Stocks Interlisted with New York Stock and New York Curb Exchanges

To permit Canadian shareholders the same privileges as American, the prohibition of short selling on the Toronto Stock Exchange with respect to stocks interlisted with the New York Stock Exchange and the New York Curb Exchange was rescinded at the opening of the market on Sept. 7.

#### Gas Industry Can Face Future with Confidence, According to New York Trust Co. Survey—Serves More Customers Than at Any Time in Its History and Has Greater Sales and Revenues Than 1929

With more customers than it has served at any time in its history and with greater sales and revenues than it enjoyed in 1929, the gas industry, the oldest utility in the United States, seems to have reason to face the future with confidence, according to a survey appearing in the current issue of the "Index," published by the New York Trust Co., New York City. Serving a total of 17,135,000 customers, or about 60% of the Nation's homes, the gas industry represents a total investment in plants and equipment of almost \$5,000,000,000, the "Index" states. Total sales of the industry in 1938 are estimated at \$786,576,000. The "Index" goes on to say:

In a difficult period the (gas) industry has succeeded in expanding its market both in domestic and in industrial uses. Through improvement of appliances it has made its product more acceptable to consumers. Confronted with changing business conditions and habits of living, the industry has shown itself flexible enough to take advantage of these changes to improve its position in a highly competitive field.

The growth of the gas industry and its record in adverse times, therefore,

The growth of the gas industry and its record in adverse times, therefore, indicate that with any upturn in business generally it may be expected to achieve even greater advances than those already made in its century and a

quarter of orderly progress.

The progress achieved by the gas industry has been made against keen competition which has confronted it in practically all its fields of use. In most of the areas served by gas the industry's advance has been accomplished despite the availability of coal, oil and electricity and of modern devices for their use. In brief, with the gas industry, as with other forms of private enterprise in the United States, competition has fostered progress.

#### Decrease of \$975,873 in Outstanding Bankers' Acceptances During August—Total Aug. 31 Reported at \$235,034,177—\$23,285,435 Below Year Ago

The volume of outstanding brokers' dollar acceptances on Aug. 31, 1939 amounted to \$235,034,177, a decrease of \$975,873 as compared with the July 31 figure of \$236,010,050, it was announced Sept. 13 by the Acceptance Analysis Unit of the Federal Reserve Bank of New York. As compared with last year, when the acceptances outstanding on Aug. 31, 1938, amounted to \$258,319,612, the Aug. 31 figure represents a decrease of \$23,285,435.

The decrease in the volume of acceptances outstanding on Aug. 31 from July 31 was due to losses in credits drawn for exports, domestic shipments and dollar exchange, while in the year-to-year comparison all branches of credit declined except dollar exchange.

The following is the report for Aug. 31 as issued by the New York Federal Reserve Bank:

BANKERS DOLLAR ACCEPTANCES OUTSTANDING—UNITED STATES
—BY FEDERAL RESERVE DISTRICTS

Decrease for month, \$975,873. Decrease for year, \$23,285,435.

#### Banks in New York Qualified to Conduct French Exchange Operations—Exchange Committee Named

Four New York banks were designated Sept. 14 by an official French decree as qualified to conduct foreign exchange operations under the supervision of the French National Exchange Office. The banks are:

The National City Bank, the Chase National Bank, the Guaranty Trust Co. and J. P. Morgan & Co. of New York City.

Another decree announced the appointment of a committee to act in an advisory capacity and to rule on exchange and gold transactions. Members of the commission are Louis Martin, director of the Credit National; Charles Rist, honorary governor of the Bank of France, and Henri Ardant, director of the Societe Generale.

### Cash Position of Federal Home Loan Bank of Chicago Better Than Year Ago, Says A. R. Gardner

With a cash position of 20.9% of assets the Federal Home Loan Bank of Chicago began September with a much greater ability than this time last year to cope with the disturbing influences of war on the world of finance, it was reported Sept. 2 by A. R. Gardner, President. He said that the bank which supplies funds to Illinois and Wisconsin savings, building and loan associations had only 15% cash a year ago. The bank's announcement also stated:

The savings and loan institutions were not materially affected by the last World War, Mr. Gardner said, but their greater prominence in the financial world now as compared with then, plus the larger number of individuals investing with them, would probably lead to some much greater needs for Home Loan Bank funds than are now apparent. He also pointed out that it was immediately after the last war that the first moves were made in Congress to establish a reserve system for savings and loan such as finally came into being in 1932.

In Illinois and Wisconsin today there are \$500,000,000 in savings, building and loan assets and 500,000 people are shareholders. In 1914 their resources were a little over \$100,000,000 and their shareholders less than half of the present number.

The bank's cash today is larger than at any time since the end of April, he pointed out.

# National Bank Earnings for First Half of 1939 Decreased Below Previous Six Months, Reports Comptroller of Currency Delano—Current Net Earnings of \$126,216,000 Compare with \$136,-175,000 in Last Half of 1938

Comptroller of the Currency Preston Delano announced on Sept. 8 that the 5,209 active National banks in the country on June 30, 1939, reported gross earnings for the first six months of 1939 amounting to \$416,039,000 and expenses of \$289,823,000, resulting in net earnings from current operations of \$126,216,000, compared to \$136,175,000 in the previous six months. Adding to the net earnings profits on securities sold of \$84,517,000 and recoveries on loans and investments, &c., previously charged off of \$39,474,000, less losses and depreciation of \$111,337,000, the net profits before dividends in the period amounted to \$138,870,000, which was 8.87% of the par value of common and preferred stock and 4.10% of capital funds. Dividends declared on common and preferred capital were \$66,025,000 and \$4,191,000, respectively, a total of \$70,216,000, representing 4.48% of the total par value of capital stock, Comptroller Delano said, adding:

In the year ended June 30, 1939, the net profits of National banks before dividends were \$224,954,000, an increase of \$16,531,000 in the amount reported for the previous year.

amount reported for the previous year.

The gross earnings from current operations aggregated \$839,135,000 and the expenses \$576,744,000, resulting in net earnings from current operations of \$262,391,000, a decrease of \$2,278,000 in the year. Recoveries from assets previously charged off of \$211,923,000, including profits on securities sold of \$129,790,000, increased \$50,181,000, and losses and depreciation charged off of \$249,360,000 increased \$31,372,000.

Dividends declared on common and preferred stock totaled \$137,798,000,

Dividends declared on common and preferred stock totaled \$137,798,000, in comparison with \$143,764,000 in 1938. The dividends were 8.80% of common and preferred capital and 4.07% of capital funds.

### New Offering of \$100,000,000, or Thereabouts, of 91-Day Treasury Bills—To Be Dated Sept. 20, 1939

Secretary of the Treasury Morgenthau announced on Sept. 15 that tenders are invited to a new offering of 91-day Treasury bills to the amount of \$100,000,000, or thereabouts, to be sold on a discount basis to the highest bidders. Tenders will be received at the Federal Reserve Banks and the branches thereof up to 2 p. m., (EST) Sept. 18, but will not be received at the Treasury Department, Washington. The Treasury bills will be dated Sept. 20 and will mature on Dec. 20, 1939, and on the maturity date the face amount of the bills will be payable without interest. There is a maturity of a similar issue of bills on Sept. 20 in amount of \$100,938,000. In his announcement of the offering, Secretary Morgenthau also said:

They (the bills) will be issued in bearer form only, and in amounts or denominations of \$1,000, \$10,000, \$100,000, \$500,000, and \$1,000,000 (maturity value).

No tender for an amount less than \$1,000 will be considered. Each tender must be in multiples of \$1,000. The price offered must be expressed on the basis of 100, with not more than three decimal places, e. g., 99.125. Fractions must not be used.

Tenders will be accepted without cash deposit from incorporated banks

Tenders will be accepted without cash deposit from incorporated banks and trust companies and from responsible and recognized dealers in investment securities. Tenders from others must be accompanied by a deposit of 10% of the face amount of Treasury bills applied for, unless the tenders are accompanied by an express guaranty of payment by an incorporated bank or trust company.

Immediately after the closing hour for receipt of tenders on Sept. 18, 1939, all tenders received at the Federal Reserve Banks or branches thereof up to the closing hour will be opened and public announcement of the acceptable prices will follow as soon as possible thereafter, probably on the following morning. The Secretary of the Treasury expressly reserves the right to reject any or all tenders or parts of tenders, and to allot less than the amount applied for, and his action in any such respect shall be final. Those submitting tenders will be advised of the acceptance or rejection thereof. Payment at the price offered for Treasury bills allotted must be made at the Federal Reserve Banks in cash or other immediately available funds on Sept. 20, 1939.

The Treasury bills will be exempt, as to principal and interest, and any

The Treasury bills will be exempt, as to principal and interest, and any gain from the sale or other disposition thereof will also be exempt, from all taxation, except estate and inheritance taxes. (Attention is invited to Treasury Decision 4550, ruling that Treasury bills are not exempt from the gift tax.) No loss from the sale or other disposition of the Treasury bills shall be allowed as a deduction, or otherwise recognized, for the purposes of any tax now or hereafter imposed by the United States or any of its possessions.

Treasury Department Circular No. 418, as amended, and this notice prescribe the terms of the Treasury bills and govern the conditions of their issue.

# Tenders of \$340,813,000 Received to Offering of \$100,-000,000 of 91-Day Treasury Bills—\$100,107,000 Accepted at Average Rate of 0.159%

Secretary of the Treasury Henry Morgenthau Jr. announced on Sept. 11 that the tenders to the offering last week of \$100,000,000, or thereabouts, of 91-day Treasury bills totaled \$340,813,000, of which \$100,107,000 was accepted at an average rate of 0.159%. The Treasury bills are dated Sept. 13 and will mature on Dec. 13, 1939. Reference to the offering appeared in our issue of Sept. 9, page 1557.

The following regarding the accepted bids to the offering is from Secretary Morgenthau's announcement of Sept. 11:
Total applied for \$340,813,000.
Total accepted, \$100,107,000

Range of accepted bids:

High 99.980 Equivalent rate approximately 0.079%.

Low 99.955 Equivalent rate approximately 0.178%.

Average price 99.960 Equivalent rate approximately 0.159%.

(69% of the amount bid for at the low price was accepted).

# Tripartite Declaration Continues in Effect in Spite of Exchange Control in France and Britain—Silver Agreement Between United States and Canada Studied

Secretary of the Treasury Henry Morgenthau Jr. declared on Sept. 11, at a press conference, that although France and Great Britain have instituted exchange control systems the tripartite agreement relating to the rate of exchange between those countries and the United States remains in effect. He said that France and England were adhering to the "spirit" of the agreement. With reference to the French situation, Mr. Morgenthau issued a statement which read as follows:

The Secretary of the Treasury stated that he had been advised by the Minister of Finance of France of the emergency action of the French Government in setting up a system of exchange control in France and in French territories overseas. The Secretary said that the United States Government recognized the emergncy conditions which impelled this action, and stated that the tripartite declaration continues in effect.

Washington advices of Sept. 11 to the New York "Herald Tribune" relating to Mr. Morgenthau's press conference said, in part:

The Secretary, however, did not explain how the agreement continued in effect in the light of these new developments. Under the declaration the signatories—the United States, England and France—agreed to the free transfer of gold in settlement of currency transactions. The war-time exchange controls were instituted to protect the gold holdings of the Banks of England and France and prevent a flight of capital.

Banks of England and France and prevent a flight of capital.

Before England established exchange control and pulled its support from the pound sterling, the pound was quoted at about \$4.60. However, it has slumped substantially below that level, and is currently quoted at about \$4.05.

Under these circumstances, and the Secretary's statement that he will help the French and the English when they seek assistance, it was difficult

to see how the agreement was in operation, according to observers.

The Secretary said that the "machinery exists" to help importers and exporters. However, he was asked if any arrangements had been made to free any blocked funds if the occasion arose. He told his questioner: "You are three jumps ahead of us."

He said that the Treasury was prepared to sell dollars to Great Britain and France for gold, if they asked for it. However, Great Britain and France are not anxious to deplete their gold stocks and at present have large dollar balances in this country.

It is recalled that the Treasury in the past has extended monetary help to the Chinese Central Bank through the expedient of simply placing dollar balances to its credit and accepting gold as collateral. The Chinese then were permitted to sell goods in this country and repay the dollar balances created.

A similar step might be undertaken for England and France in order to protect their gold stocks. For example, England might market tin in

this country and repay any dollar credits which the Treasury can set up and accept gold for collateral.

However, at present this is not necessary because of the large balances which both countries have in the United States. The Treasury furthermore can make gold available to the Allies by accepting the securities sequestered by the British from their nationals as payment for gold.

Mr. Morgenthau emphasized that the tripartite agreement continues in operation with regard to Holland, Switzerland and Belgium, the other

signatories.

Even the question of any indirect financial help to France and England may hit a snag under the neutrality law. Financial help was given to China because President Roosevelt refused to recognize the undeclared war in the Far East, but in the case of France and England they already have been labeled as belligerents.

The Secretary was asked whether the agreement between the United States and Canada whereby the Treasury buys 2,000,000 ounces of silver monthly was still in effect. Canada was recognized as a belligerent yesterday. He said that question would also be studied in the light of new

developments.

### Treasury to Study Effect of European War on Budget— Views of Secretary Morgenthau

A study of potential effects of the European war on the current and next Federal budgets has been undertaken by the Treasury Departments according to statement made Sept. 14 by Secretary of the Treasury Henry Morgenthau Jr. Mr. Morgenthau indicated that savings of the Government which may result from better business and higher commodity prices may be offset by larger defense appropriations.

Further reporting Mr. Morgenthau's remarks, the "Wall Street Journal" of Sept. 15, said:

Mr. Morgenthau explained that if commodity prices should advance to a point where farmers were receiving near "parity" for their products, part of the \$227,000,000 made available by the past session of Congress for price adjustment payments could be saved. He mentioned sugar specifically as offering a possible chance for savings, explaining that if no benefits are paid on next year's crops, the usual \$40,000,000 to \$50,000,000 in benefits to sugar growers could be kept in the Treasury.

Under the statute providing for parity payments, these benefits to farmers are designed to make up the difference between the actual average farm price and 75% of parity. Thus, if the prices of wheat, corn, cotton, tobacco and rice—the commodities on which price adjustment payments are made should advance sufficiently to bring the average for the current calendar year to 75% of parity, no payments would have to be made and the appropriation would remain unexpended.

The Treasury, Mr. Morgenthau said, also is going into the possibility that increased business activity will reduce the number of unemployed and in this way cut down the relief load.

Nothing conclusive, however, has been developed thus far, Mr. Morgen-

In other Treasury quarters, officials said it is unlikely that any savings of consequence will result this year because of war conditions abroad.

Mr. Morgenthau said the Treasury has no legislation at this time to recommend to the special session of Congress. He added, however, that the "bright boys in the Treasury may think up something" later.

He said at this time there is no intention of asking the special session to

increase the \$45,000,000,000 statutory debt limit. He said that the RFC had been asked whether it will need the \$119,000,-000 appropriated by Congress to free the capital of the Commodity Credit Corp. of impairment.

### President Roosevelt Issues Proclamation Inviting Foreign Nations to Return to New York World's Fair in 1940

proclamation issued by President Roosevelt formally inviting foreign nations to continue their participation in the New York World's Fair in 1940 was made public on Sept. 9. The President had announced Sept. 2 that he would extend the invitation; this was noted in our issue of Sept. 9, page 1566. President Roosevelt stated that it was especially proper at the present time "that the ideal of peaceful intercourse" between nations be maintained and he praised the Fair as a medium for the promotion of peace and international understanding.

The text of the President's proclamation, signed Sept. 8,

follows:

### WORLD'S FAIR, NEW YORK

By the President of the United States of America

A Proclamation

Whereas, There is now in progress at New York a World's Fair for the purpose of celebrating the 150th anniversary of the inauguration of the first President of the United States of America and of the establishment of the national government in the City of New York; and Whereas, I has been made evident that through the medium of the

World's Fair at New York peaceful intercourse between nations is promoted, and the exchange of ideas, experience and technical knowledge between many parts of the earth has been encouraged; and

Whereas, especially at the present time, it is fitting and proper that the idea of peaceful intercourse be firmly maintained as offering the only ulti-

mate hope towards progress and peace; and
Whereas, a joint resolution of Congress, approved June 15, 1936, reads
in part as follows:
Resolved by the Senate and House of Representatives of the United States
of America in Congress assembled, that the President of the United States be, and he is hereby, authorized and respectfully requested by proclamation, or in such manner as he may deem proper, to invite foreign countries and nations to such proposed World's Fair with a request that they participate therein; and

Whereas, by proclamation dated the sixteenth day of November, 1936, in compliance with the aforesaid joint resolution, I invited the particina tion of the nations in this World's Fair, and many nations are presently

Now, therefore, I. Franklin D. Roosevelt, President of the United States of America, in compliance with the aforesaid joint resolution of Cons, do invite the nations presently participating in the said World's Fair to continue their participation therein during the calendar year 1940 or such part thereof as may seem appropriate.

In witness whereof I have hereunto set my hand and caused the seal of the United States of America to be affixed.

Done at the City of Washington this eighth day of September in the year of Our Lord nineteen hundred and thirty-nine and of the independence of the United States of America the one hundred and sixty-fourth. FRANKLIN D. ROOSEVELT

CORDELL HULL, Secretary of State

Meanwhile, the exhibit of Southern Rhodesia at the Fair was closed on Sept. 12 and it was announced that it would not participate in next year's exposition. A British colony, Southern Rhodesia has joined England in war against Germany. During the past week The Netherlands and Venezuela announced that they would not return in 1940, and Sweden indicated that she may not return.

In an effort to persuade leading nations to participate next year, Gover A. Whalen, President of the Fair Corporation, will sail today (Sept. 16) for Europe. He is expected to visit Great Britain, France, Spain, Italy, Portugal, Netherlands

and Switzerland.

### President Roosevelt Tells Women Democrats Partisanship Must Be Renounced Because of European War—Cancels Scheduled Address

President Roosevelt cancelled an address he was scheduled to make to Democratic women Sept. 16, explaining that the tension created by the European war required that he address himself only to the people as a whole and disregard political ties. Mrs. Roosevelt will speak on the program, however, according to the original schedule.

Mr. Roosevelt's letter, which was dated Sept. 7, and addressed to Mrs. Thomas F. McAllister, director of the Women's Division of the Democratic National Committee,

read as follows:

"The swift movement of events which has shattered the peace of Europe and imposed grave responsibility upon the United States as a Nation has of course, completely altered the conditions under which I accepted your kind invitation to address the Democratic women of the country.

The ramifications of the impact in Europe are world-wide, and it becomes our duty as Americans to bend all our efforts to promote national unity.

A week ago I might consistently have spoken words primarily addressed to our Democratic women. But the events of the past few days render it imperative that every utterance of mine in these days of tension be addressed to all of our citizens, regardless of sex, age or political affilia-

We must all stand together in a firm resolve to bear witness before

all nations to our unshaken patriotism.

And we shall not succeed in this herculean task if we approach it in any spirit of partisanship. Because I feel this way, I must cancel my acceptance of your invitation to speak over a nation-wide hook-up on the evening of Sept. 16. Our plain duty now is to fulfill our obligation to

the Nation, regardless of political or partisan considerations.

One essential duty which lies especially within the power and influence of our American women is maintenance of the American home. We must, these critical times, maintain our old loyalties and the old ways of life upon which all of our happiness rests. To do this we must exercise a vigilant guardianship over our children. We must protect them from every evil force which would shake their faith in our fundamental institu-

tions of democracy.

To do this we must teach them, even in their tender years, to discriminate between truth and falsehood, whether we apply our American standards to news of the conflict now raging in Europe or to those concerns which are paramount in the preservation of our traditions of freedom.

Although our women, as home-makers, have a special task, the present duty of all of us—men, women and children—is to keep this Nation safe and to throw all of our weight into the cause of peace.

### President Roosevelt Urges Retailers to Curb Price Rises—American Retail Federation Resolution Opposes War Profiteering

President Roosevelt asked the cooperation of retailers in preventing "unwarranted price increases" resulting from the European war, in a letter addressed to the National Retail Dry Goods Association, made public Sept. 9. The President's letter was written on the occasion of National Retail Demonstration Week, which started Sept. 11, under the sponsorship of the Dry Goods Association. In response, Lew Hahn, General Manager of the Association, declared that while the President's appeal "strikes responsive chords in the minds of the retailers' representatives," the retailers "have no control over what is happening in production and wholesaling markets." The American Retail Federation on Sept. 10 adopted a resolution against war profiteering and forwarded the resolution, together with a letter offering its cooperation in the event of crisis, to President Roosevelt. Following is the President's letter to the National Retail Dry Goods Association:

Once again the attention of the American people is being called to the importance of the Nation's retailers to our economic and social life. Many seem not to appreciate the complex and important business into which retailing has developed. In whatever manner National Retail Demonstration Week, sponsored by the National Retail Dry Goods Association, can impress this picture upon the minds of our people, it will be serving a useful purpose.

American retailers have been enjoying the fruits of this year's upward business swing. The retailer's responsibility to the business. unquestionably be increased by the tragic events abroad. These developments will demand business statesmanship to discourage and prevent any unwarranted advance in prices.

It is absolutely essential that we protect the consumer by preventing any general rise in prices. Unwarranted increase in prices would absorb purchasing power and block expansion of sales volume. Such a development

would mean serious threat to continuance of our business progress.

I hope that the Nation's retailers, comprising as they do such an important segment of our economic life, will meet these new responsibilities in a manner best serving the interests of all our people.

Mr. Hahn's remarks were quoted in the Sept. 10 New York "Herald Tribune," in part, as follows:

Retailers are not aware of any threatened shortage of raw materials as yet. They know of nothing which can justify stiff price advances, and they are disposed to oppose such movements wherever possible because they know only too well that when all the factors along the line have finished making price advances it is up to the retailer to face the public and try to sell the product. It is our judgment that the retailers as purchasing agents for the public can best fulfill the hope of the President and serve the general good at this time by keeping their heads, refusing to be stampeded and by resisting price increases which do not seem to be warranted."

The resolution of the American Retail Federation was adopted by telegraphic vote of the Federation's Board of Trustees. Following is the text of the resolution and the letter, signed by David P. Craig, President of the Federation, to President Roosevelt, which accompanied it:

#### Text of Resolution

The Board of Trustees of the American Retail Federation recognizes the economic problems existing in the United States because of the war in Europe.

The Board recognizes that the major task of retailing in this period of international crisis is to continue its normal function of supplying consumers with goods they want at prices they can afford to pay. It recognizes the duty of the retailing industry to make every effort to avoid profiteering.

The American Retail Federation will urge its members to do all in their power to limit the charges for distribution service to the minimum required to cover operating expenses, and a normal rate of net profit.

The Board of Trustees of the American Retail Federation will exert its

influence to prevent use of the war scare and unwarranted threat of higher

prices as a reason for urging buying today.

Unless this condition is avoided it may bring about an artificial inflation with its inevitable evil effect on American living and the national economy.

#### Letter to President

The American Retail Federation, before whose Retailers' National Forum you spoke last May, wishes to place its entire facilities at the disposal of the National Government in the event of serious crisis.

The Federation represents, as you know, retailers of all kinds—large and small, chain and independent alike—and is vitally concerned with the fundamental problems of distribution and their effect upon the consumer.

fundamental problems of distribution and their effect upon the consumer.

With its facilities for research, coordination of retail activities and ability to command and respect of leaders in the American retailing field, the American Retail Federation is prepared to offer its fullest cooperation to the Federal Government should its services be needed.

#### Reorganization of Executive Offices Provided in Executive Order Issued by President Roosevelt

Reorganization of White House offices to enable efficient handling of problems in time of national emergency as well as in the ordinary course of events was provided for in an executive order of President Roosevelt issued Sept. 9 and made effective Sept. 11. The President, in a statement accompanying the order, contrasted the comparatively small White House staff required 40 years ago with the vast amount of correspondence handled today. Only with a more orderly organization can the President conduct the executive business of the Government, he said. The intent of the order, the President declared, is to effectuate the purposes of the Reorganization Act of 1939 and the two reorganization plans which have been put into effect under that Act. Six divisions of the executive office are set up under the order, as follows:

- 1. The White House office.
- Bureau of the Budget.
- 2. National Resources Planning Board.
- 4. Liaison Office for personnel management.
  5. Office of Government Reports (formerly the National Emergency Council).

6. The proposed new office for emergency management.

It is noted as significant that the so-called "brain trust". is not provided for under the new arrangement, and it is suggested that Stephen T. Early, White House Press Secretary, had this in mind when he commented to reporters as he handed out the order: "This would seem to toss out the window certain creatures of the imagination. I don't see in the executive order any place for those we've previously heard about."

The text of the Reorganization Act of 1939 was given in our issue of April 22, page 2353, and the texts of Reorganization Plans Nos. I and II appeared in these columns of April 29, page 2511, and May 13, page 2825, respectively.

The following is the complete text of the President state-

ment and executive order, issued Sept. 9:

The Seventy-sixth Congress, in the Reorganization Act of 1939, required the President, subject to the approval of the Congress, to undertake the reorganization of the executive branch. The first steps toward effecting this reorganization have been taken. Among other organizational changes there have been transferred to the executive office of the President, with the concurrence of the Congress, certain agencies having to do with the over-all management and central direction of the executive branch of the Federal Government.

Heretofore the intimate and immediate direction of business by the President has been confined to the White House office. Although the President under the Constitution and the statutes actually is responsible for the conduct of the administrative management of the executive establishment of the executive establish lishment, he has not heretofore had appropriate means to discharge this responsibility effectively.

Particularly, under the Pendleton Act of 1883 he was charged with certain duties with respect to personnel, and in the Budget and Accounting Act of 1921 he was made responsible for the preparation and the execution of the budget; and, in many Acts of Congress since 1789, responsibilities

have been placed directly upon him for which he had no compensating authority or machinery for carrying into effect.

authority or machinery for carrying into effect.

This is all a part of the continuing growth of the Nation's business. Forty years ago President McKinley could deal with the whole machinery of the executive branch through eight or 10 persons, and a small personnel secretarial staff was sufficient to care for all his personal and official correspondence. Now, when inquiries with respect to the business of the Government come to the President from private citizens in thousands that the property of the purpose of the complex of the purpose of the state of the purpose. every day, to say nothing of the complex character of the business of the Government itself, the President can conduct the executive business of the Government only if he has a more orderly organization.

The services that the Government renders, and the tasks of protection and supervision that are imposed upon it, are carried on through departments and agencies specially set up by the Congress and provided with the funds to carry out the work that had been determined upon by the people and the Congress, but, nevertheless, the task of general supervision and over-all management continues to rest upon the President as the constitutional Chief Executive.

This particular responsibility of the President requires better organization, and to that end, with the concurrence of the Congress, under the Reorganization Act, certain agencies and functions were transferred to the executive office of the President. These transfers give the executive office no new powers, no new duties, no additional responsibilities, but are merely the organizational expression of existing law and practice.

But the mere transfer of these agencies and functions to the executive office of the President is not sufficient. They, along with the White House office, must be molded into a compact organization, with the functions and duties of each unit clearly prescribed, with relationships between units carefully defined, and with systematic procedures developed so that the flow of work will be speedy, smooth and effective. Only after this has been accomplished will the President have adequate machinery for the business-like handling of his job.

In the time of national emergency, domestic or foreign, the job of the

President is even more difficult. In such periods it has always been found necessary to establish administrative machinery in addition to that Set up in a time of required for the normal work of the Government.

stress, these special facilities sometimes have worked at cross-purposes both within themselves and with the regular agencies.

In order that the Nation may not again be caught unaware, adequate resources for management should be provided in advance of such periods of emergency. Although these management facilities need be brought into action only when an emergency or serious threat of emergency exists, the serious threat of emergency exists, they must function in an integral relationship to the regular management arms of the President.

#### TEXT OF THE EXECUTIVE ORDER

To accomplish these objectives the following executive order has been issued by the President:

#### Executive Order

Establishing the divisions of the executive office of the President and defining their functions and duties.

By virtue of the authority vested in me by the Constitution and statutes, and in order to effectuate the purposes of the Reorganization Act of 1939, Public No. 19, Seventy-sixth Congress, approved April 3, 1939, and of Reorganization Plans Nos. I and II submitted to the Congress by the President and made effective as of July 1, 1939, by Public Resolution No. 2, Seventy-sixth Congress, approved June 7, 1939, by organizing the executive office of the President with functions and duties so prescribed and responsibilities so fixed that the President will have adequate machinery for the administrative management of the executive branch of the Government,

it is hereby ordered as follows: I. There shall be within the executive office of the President the following principal divisions, namely: (1) The White House office, (2) the Bureau the Budget, (3) the National Resources Planning Board, (4) the Liaison Office for Personnel Management, (5) the Office of Government Reports, and (6) in the event of a national emergency, or threat of a national emergency, such office for emergency management as the President shall

II. The functions and duties of the divisions of the executive office of the President are hereby defined as follows:

### THE WHITE HOUSE OFFICE

In general, to serve the President in an intimate capacity in the performance of the many detailed activities incident to his immediate office. To that end the White House office shall be composed of the following principal subdivisions, with particular functions and duties as indicated:

### The Secretaries to the President

To facilitate and maintain quick and easy communication with the Congress, the individual members of the Congress, the heads of executive departments and agencies, the press, the radio and the general public.

### The Executive Clerk

To provide for the orderly handling of documents and correspondence within the White House office and to organize and supervise all clerical services and procedure relating thereto.

### The Administrative Assistants to the President

To assist the President in such matters as he may direct, and at the specific request of the President, to get information and to condense and summarize it for his use. These administrative assistants shall be personal aides to the President and shall have no authority over anyone in any department or agency, including the executive office of the President, other than the personnel assigned to their immediate office. In no event shall the administrative assistants be interposed between the President and any one of the divisions in the executive office of the President.

### THE BUREAU OF THE BUDGET

- (a) To assist the President in the preparation of the budget and the formulation of the fiscal program of the Government.
- (b) To supervise and control the administration of the budget.(c) To conduct research in the development of improved
- administrative management, and to advise the executive departments and agencies of the Government with respect to improved administrative organization and practice.
- (d) To aid the President to bring about more efficient and economical conduct of Government service.
- (e) To assist the President by clearing and coordinating departmental advice on proposed legislation and by making recommendations as to presidential action on legislative enactments, in accordance with past
- (f) To assist in the consideration and clearance and, where necessary, in the preparation of proposed executive orders and proclamations, in

accordance with the provisions of Executive Order No. 7298 of Feb. 8, 1936. (g) To plan and promote the improvement, development and coordina-tion of Federal and other statistical services.

(h) To keep the President informed of the progress of activities agencies of the Government with respect to work proposed, work actually initiated and work completed, together with the relative timing of work between the several agencies of the Government; all to the end that the work programs of the several agencies of the executive branch of the Government may be coordinated and that the moneys appropriated by the Congress may be expended in the most economical manner possible with the least possible overlapping and duplication of effort.

#### THE NATIONAL RESOURCES AND PLANNING BOARD

(a) To survey, collect data on, and analyze problems pertaining to national resources, both natural and human, and to recommend to the President and the Congress long-time plans and programs for the wise use and fullest development of such resources.

(b) To consult with Federal, regional, State, local and private agencies in developing orderly programs of public works and to list for the Presi-dent and the Congress all proposed public works in the order of their relative importance with respect to (1) the greatest good to the greatest number of people, (2) the emergency necessities of the Nation, and (3) the social, economic and cultural advancement of the people of the United

(c) To inform the President of the general trend of economic conditions and to recommend measures leading to their improvement or stabilization.

(d) To act as a clearing house and means of coordination for planning activities, linking together various levels and fields of planning.

### THE LIAISON OFFICE FOR PERSONNEL MANAGEMENT

In accordance with the statement of purpose made in the message to Congress of April 25, 1939, accompanying Reorganization Plan No. 1, one of the administrative assistants to the President, authorized in the Reorganization Act of 1939, shall be designated by the President for liaison officer for personnel management and shall be in charge of the Liaison Office for Personnel Management. The functions of this office shall be:

(a) To assist the President in the better execution of the duties imposed upon him by the provisions of the Constitution and the laws with respect to personnel management, especially the Civil Service Act of 1883, as amended, and the rules promulgated by the President under authority of that Act.

(b) To assist the President in maintaining closer contact with all agencies dealing with personnel matters in so far as they affect or tend to determine the personnel management policies of the executive branch of the Government.

#### THE OFFICE OF GOVERNMENT REPORTS

(a) To provide a central clearing house through individual citizens, organizations of citizens, State or local governmental bodies, and where appropriate agencies of the Federal Government may transmit inquiries

and complaints and receive advice and information.

(b) To assist the President in dealing with special problems requiring the clearance of information between the Federal Government and State

and local governments and private institutions,

(c) To collect and distribute information concerning the purposes and activities of executive departments and agencies for the use of the Congress, administrative officials and the public.

(d) To keep the President currently informed of the opinions, desires

and complaints of citizens and groups of citizens and of State and local governments with respect to the work of Federal agencies.

(e) To report to the President, on the basis of the information it has obtained, possible ways and means for reducing the cost of the operation

of the Government.

III—The Bureau of the Budget, the National Resources Planning Board and the Liaison Office for Personnel Management shall constitute the three principal management arms of the Government for the (1) preparation and administration of the budget and improvement of administrative management and organization, (2) planning for conservation and utilization agement and organization, (2) planning for conservation and utilization of the resources of the Nation, and (3) coordination of the administration of personnel, none of which belong in any department but which are necessary for the over-all management of the executive branch of Government, so that the President will be enabled the better to carry out his constitutional duties of informing the Congress with respect to the State of the Union, of recommending appropriate and expedient measures, and of receiver that the leave are faithfully executed.

recommending appropriate and expedient measures, and of seeing that the laws are faithfully executed.

IV—To facilitate the orderly transaction of business within each of the five divisions herein defined and to clarify the relations of these divisions with each other and with the President, I direct that the Bureau of the Budget, the National Resources Planning Board, the Liaison Office for Personnel Management and the Office of Government Reports shall, respectively present resources of their internal overse. respectively, prepare regulations for the governance of their internal organizations and procedures. Such regulations shall be in effect when approved by the President and shall remain in force until changed by new regulations approved by him. The President will prescribe regulations governing the conduct of the business of the division of the White House office.

V-The Director of the Bureau of the Budget shall prepare a consolidated budget for the executive office of the President for submission by the President to the Congress. Annually, pursuant to the regular request issued by the Bureau of the Budget, each division of the executive office of the President shall prepare and submit to the Bureau estimates of proposed appropriations for the succeeding fiscal year. The form of the estimates and the manner of their consideration for incorporation in the budget shall be the same as prescribed for other executive departments and agencies.

The Bureau of the Budget shall likewise perform with respect to the several divisions of the executive office of the President such functions and duties relating to supplemental estimates, apportionments, and budget administration as are exercised by it for other agencies of the Federal

Government,

VI—Space already has been assigned in the State, War and Navy Building, adjacent to the White House, sufficient to accommodate the Bureau of the Budget with its various divisions (including the Central Statistical Board), the central office of the National Resources Planning Board, the liaison office for personnel management, and the administrative assistants to the President. And although, for the time being, a considerable portion of the work of the National Resources Planning Board and all of that of the office of Government Reports will have to be conducted in other quarters, if, and when, the Congress makes provision for the housing of the Department of State in a building appropriate to its function and dignity and provision is made for the other agencies now accommodated in the State, War and Navy Building, it then will be possible to bring into this building, close to the White House, all of the

personnel of the executive office of the President except the White House

This order shall take effect on Sept. 11, 1939.

FRANKLIN D. ROOSEVELT.

### President Roosevelt Approves Housing Loans Totaling \$24,499,000—USHA Loan Contracts Now Amount to \$493,949,000

Loan contracts to local housing authorities for construction of low-rent projects to rehouse low-income families from the Nation's slums neared the \$500,000,000 mark Sept. 6 when President Roosevelt, upon recommendation

of Nathan Straus, Administrator of the United States Housing Authority, approved loans totaling \$24,499,000.

The United States Housing Authority so far has \$493,-949,000 in loan contracts with which local housing authorities in 130 communities will attack their slums and build decent homes for families in the lowest income group.

Besides the \$493,949,000 in loan contracts, there are outstanding earmarkings of \$177,731,000, making a total of \$671,680,000 in USHA commitments for 161 communities participating in the national slum clearings and low-rent housing program.

### Monroe Doctrine Applies to Canada, President Roosevelt Tells Press Conference

President Roosevelt on Sept. 12 told a press conference that he interpreted the Monroe Doctrine to mean that the United States would not tolerate any attempt to extend European sovereignty in the Western Hemisphere or to transfer territory in this hemisphere from one European sovereignty to another. And it applies, he added, not only to Canada but to all of the Americas, including British and Dutch Guiana, British Honduras, Guadeloupe, Martinique and other possessions of European powers in this hemisphere. Associated Press advices from Washington Sept. 12 added:

The discussion of the Monroe Doctrine arose when a correspondent began questioning the President about his speech made at Kingstown, Ont., last year saying that "the people of the United States will not stand idly by if domination of Canadian soil is threatened by any other empire (than the British empire).

The position of the United States toward Canada, in the light of the Monroe Doctrine and of that statement by the President, has been the subject of much conversation and speculation here, since Canada joined the rest of the British empire in declaring war on Germany

But even more intensively some conversations have dealt with what the United States would do should a victorious Germany seize British and French holdings near the Panama Canal, and thereby enable themselves to construct naval and air bases close to that vital passageway.

The Monroe Doctrine was enunciated, Mr. Roosevelt said, at a time when a number of portions of Central and South America had won their inde-pendence from European sovereignties and had set up republics. At that time there was talk in Europe of forming a coalition of powers to restore European sovereignty over Central and South America, Mr. Roosevelt

Much was written on the subject of the doctrine at the time, said the President, adding that a reading of this literature would disclose that the Monroe Doctrine, as accepted by the country at that time, included a definite thought that no European power should re-establish its sovereignty over any section which had gained its freedom. It applied, too, he added, to changes in the sovereignty of sections which had not revolted.

The latter, he went on, were not large, were, in fact, mostly small islands in the West Indies, together with some sections of South America held by

England, France and the Netherlands.

Time, he said, brought a general acceptance of the sovereignty of these nations because the United States never had any trouble over them, and they never bothered any American nations, with the exception of one boundary dispute which was settled through the intervention of the United States. But a change in the sovereignty of these sections now might present a different situation, he said.

Thus, Mr. Roosevelt concluded, his statement at Kingston presented not a new statement of the Monroe Doctrine but a restatement of that in-

ton, Ont., Aug. 18, 1938, was given in our issue of Aug. 20, page 1124.

### President Roosevelt Endorses Air Progress Week-Civilian Pilot Training Program Advanced

President Roosevelt felicitated the National Aeronautic Association on its program for Air Progress Week which opened Sept. 11, in a letter addressed to the Association, which was made public Sept. 10. The President emphasized the need of awakening the American public to a full realization of the importance of air progress.

Meanwhile it was indicated that the civilian pilot training program authorized by the last session of Congress was going forward, with the disclosure Sept. 10 that the Civil Aeronautic Authority had informed 166 colleges and universities that their applications to participate had been approved.

Washington dispatches of Sept. 10 to the New York "Herald Tribune" bearing on the President's letter and on the pilot program said, in part:

Federal aviation agencies, Chambers of Commerce, aviation groups and local governmental and civic organizations are cooperating with the N. A. A. in the air progress observance, which will extend from tomorrow through Sunday, Sept. 24. Participating communities are planning air meets and tours, model plane contests, displays, radio programs and other demonstrations.

In disclosing the speeding up of the pilot training program, Robert H. Hinckley, Chairman of the C. A. A., pointed out that the approved applications listed today were not a complete list of the schools which would take part. He said the list represented schools which were most prompt

to apply for participation and whose qualifications were obviously satisfactory. A second list of schools will be announced by Wednesday. Applications of at least 300 institutions will have been approved by Sept. 18, it is estimated.

The civilian pilot training program, authorized by the last session of Congress, provides for the training, under the direction of the C. A. A., of about 11,000 new civilian pilots during the coming school year.

The President's letter to the National Aeronautical, Association in con-

nection with the inauguration of the group's aviation education program

"Every measure of aeronautical achievement shows that during the last year we have accomplished great things. To insure a continuation of these advances the Government has, during that period, enacted many important legislative measures. The Civil Aeronautics Authority has been set up to stabilize the future of air transportation and private flying in this country. Its program, designed to train at least 11,000 new civilian pilots during the coming scholastic year, will be under way within the next few weeks. Provision has been made for the expenditure of great sums to increase the size and effectiveness of our military and naval air

forces.
"But equally vital, if progress is to continue, is the awakening of the "But equally vital, if progress is to continue, is the awakening of the American public to a full realization of the importance of these efforts. I am sure that the program outlined by the National Aeronautical Association for an air progress observance from Sept. 11 to Sept. 24 will do much to accomplish this end. May I wish you every success of your efforts?"

### **Executive Order Governing Enforcement of Neutrality** of the United States

President Roosevelt on Sept. 5 issued an executive order "prescribing regulations governing the enforcement of the neutrality of the United States." In our issue of Sept. 9, page 1559, we gave the full text of the President's proclamation declaring the neutrality of the United States in the existing European war. We now give below the complete text of the executive order:

WHEREAS, under the treaties of the United States and the law of nations it is the duty of the United States, in any war in which the United States is a neutral, not to permit the commission of unneutral acts within the jurisdiction of the United States;

AND WHEREAS, a proclamation was issued by me on the fifth day of September declaring the neutrality of the United States of America in the war now existing between Germany and France; Poland; and the United Kingdom, India, Australia and New Zealand:

NOW, THEREFORE, in order to make more effective the enforcement of the provisions of said treaties, law of nations, and proclamation, I hereby prescribe that, during said war, the departments and independent offices and establishments of the United States Government shall have the follow ing duties to perform in enforcing the neutrality of the United States, which duties shall be in addition to the duties now prescribed, or hereafter prescribed, by law, or by other executive order or regulation not in conflict herewith, for the departments and independent offices and establishments of the United States Government:

1. War Department. Enforcement of the neutrality of the United States as prescribed in the above-mentioned proclamation so far as concerns the military land forces of neutral and belligerent powers; except as provided in paragraphs numbered 2b and 4 hereof.

2. Navy Department. Enforcement of the neutrality of the United States as prescribed in the above-mentioned proclamation, (a) so far as concerns vessels of the naval establishments of neutral and belligerent powers and other vessels operating for hostile or military purposes, except as provided in paragraph numbered 4 hereof; (b) enforcement of the neutrality of the United States as prescribed in said proclamation in outlying possessions subject to the exclusive jurisdiction of the Navy Department; (c) in the Philippine Islands, enforcement of the neutrality of the United States as respects all vessels as prescribed in said proclamation, with the special cooperation of the Department of State and the Department of the Interior.

3. Treasury Department and Commerce Department. (Under such further

division of responsibility as the Secretary of the Treasury and the Secretary of Commerce may mutually agree upon) Enforcement of the neutrality of the United States as prescribed in the above-mentioned proclamation so far as concerns all vessels except those referred to in paragraph numbered 2 hereof, with the special cooperation of the Department of the Interior in the territories and outlying possessions where the Treasury Department and the Commerce Department are required by law to carry out their respective functions, and except in the Philippine Islands, the Canal Zone, and the outlying possessions subject to the exclusive jurisdiction of the Navy Department.

4. Governor of the Panama Canal. Enforcement within the Canal Zone of the neutrality of the United States as prescribed in the above-mentioned proclamation, and administrative action in connection therewith. The military and naval forces stationed in the Canal Zone shall give him such assistance for this purpose as he may request. If an officer of the Army shall be designated to assume authority and jurisdiction over the operation of the Panama Canal as provided in Section 8 of Title 2 of the Canal Zone Code, such officer of the Army shall thereafter have the duties above assigned to the Governor of the Panama Canal.

5. Department of Justice. Enforcement of the neutrality of the United States as prescribed in the above-mentioned proclamation, not especially delegated to other departments, independent offices and establishments of the United States Government, and prosecution of violations of the neu-

the United States Government, and prosecution of the United States.

6. All Departments and Independent Offices and Establishments of the United States. Enforcement of neutrality in connection with their own activities, furnishing information to, and assisting all other departments and independent offices and establishments of the United States Government in connection with the duties herein assigned; and issuing rules and ment in connection with the duties herein assigned; and issuing rules and regulations necessary for carrying out the duties herein assigned.

### Congress Called to Convene in Special Session Sept. 21 Neutrality Act Revision to be Considered

Congress was called to meet in extra session at noon Sept. Congress was called to meet in extra session at noon Sept. 21, by proclamation of President Roosevelt issued Sept. 13. Leaders of both parties in the House and Senate, Vice-President Garner, and Speaker Bankhead were sent telegraphic requests by the President, requesting that they reach Washington on Sept. 20 to meet with him in conference at the White House. Although no mention was made of the purpose of the special session it is clearly understood to

be to consider chiefly revision of the Neutrality Act. Proposals of Mr. Roosevelt in that direction failed of enactment at the recent session of Congress which adjourned Aug. 5. References to the defeat of that legislation appeared in our issues of July 29, page 659 and July 22, page 492.

The President's proclamation follows:

CONVENING THE CONGRESS IN EXTRA SESSION By the President of the United States of America

### A PROCLAMATION

Whereas public interests require that the Congress of the United States should be convened in extra session at 12 o'clock noon, on Thursday, the twenty-first day of September, 1939, to receive such communication as may be made by the Executive

Now, therefore, I, Franklin D. Roosevelt, President of the United States of America, do hereby proclaim and declare that an extraordinary occasion requires the Congress of the United States to convene in extra session at the capitol in the city of Washington on Thursday, the twentyfirst day of September, 1939, at 12 o'clock, noon, of which all persons who shall at that time be entitled to act as members thereof are hereby required to take notice.

In witness whereof, I have hereunto set my hand and caused to be affixed the great seal of the United States.

Done at the city of Washington this thirteenth day of September, in the year of Our Lord Nineteen Hundred and Thirty-nine, and of the Independence of the United States of America the one hundred and sixty-fourth. FRANKLIN D. ROOSEVELT SEAL

By the President:

CORDELL HULL,

Secretary of State.

Associated Press advices from Washington Sept. 13, said: The telegrams inviting leaders to the White House conference the day before the session starts went to Vice-President Garner, House Speaker Bankhead, Senator Barkley, Democratic leader; Senator McNary, Republi-can leader; Senator Minton, assistant Democratic leader; Senator Austin, assistant Republican leader; Senator Pittman, Chairman of the Foreign Relations Committee; Senator Byrnes (D., S. C.); Representative Rayburn, House Democratic leader, and Representative Martin, House Republican leader

The President advised these leaders that after a careful study of the whole situation he had decided to call a special session. He expressed the hope that each of them could arrive in Washington a day early for the informal meeting with him.

While the Chief Executive is anxious to limit not only the legislative scope of the session to neutrality revision but also would like the session to end as quickly as possible, many Senators, including Borah (R., Idaho), Vandenberg (R., Mich.), and Nye (R., N. D.) have declared they would insist on full debate, although without any effort to filibuster

Prior to the call for the special session, Associated Press advices of Sept. 12, from Washington indicated the views of Senator's Borah, Nye and Townsend as follows: (Radio address of Senator Borah Sept. 14, is covered in a separate item in today's issue):

Senator Nye (R., N. D.) asserted today the Administration would "run into a real war in the legislative field" over any attempt to repeal the

arms embargo provision of the Neutrality Act.

Although Senator Nye said he knew of no present move for a Senate filibuster to block repeal, he declared there would be "extended and thorough" debate on the proposal which many legislators say would benefit England and France in their war with Germany.

The neutrality law, which President Roosevelt applied to the European warfare, prohibits sales of arms, ammunitions and implements of war to belligerents. Proposed elimination of this provision is expected to furnish

the principal controversy in the anticipated special session of Congress.

Observing that Administration leaders appeared to be considering "in-

voking the gag rule," Senator Nye said he did not believe the Senate would vote for any limitation of debate. He added the opinion that if Congress was called into special sessin it would remain so throughout the Winter. Senator Nye said he had found sentiment in the Middle West strongly against Hitler. He observed, however, that there also was a strong sentiment against involvement of this country in war. He said he thought the American people should be told that sales of war materials to belligarents. American people should be told that sales of war materials to belligerents would be likely to bring involvement.

"I think," he said, "the American people can be made to see how utterly

impossible it is to stay out of war if we are going to give our aid to one side."

Senator Borah (R., Idaho) and several of his Republican colleagues discussed the issue yesterday and one of them predicted afterward that the President would have to "fight for everything he gets" if he calls a special sion to revise the Neutrality Act.

The Idahoan, senior minority member of the Senate Foreign Relations Committee, served notice that he would insist on full opportunity to debate the issue, but added he had no desire to "kill time." The Administration program, he asserted would "inevitably bring us into war." Senator Nye said he was "greatly heartened" by the strong sentiment

he found in favor of retention of the embargo and predicted there would be a "determined fight" to preserve it. Senator Townsend (R., Del.) commented that there was even more opposition to the Administration's

neutrality plan than he at first believed.

Senator Nye said he thought President Roosevelt had "aggravated" the situation when he flung an accusation of partisanship at the Senate Foreign Relations Committee members, who voted against consideration of his

gram at the last session.
"He will have to fight for everything he gets," Senator Townsend said.

### Neutrality Statement Issued by Secretary Hull-United States Not to Surrender Any of Rights as Neutral

ry of State Cordell Hull on Sept. 14 issued a state ment clarifying the position of the United States with respect to interference with American rights during the war in Europe. He said that the United States government did not intend to surrender any of the rights which it possessed as a neutral under international law, even though it took steps to force its citizens and shipping to avoid danger zones. Following is the text of Secretary Hull's neutrality state-

The Government of the United States has not abandoned any of its rights as a neutral under international law.

It has, however, for the time being prescribed, by domestic legislation, retain restrictions for its nationals which have the effect of requiring them to refrain from the exercise of privileges which but for such legislation they would have the right to exercise under international law, such as the right to travel on belligerent vessels, to make loans and extend credits to belligerent governments, etc.

ese restrictive measures do not and cannot constitute a modification of the principles of international law, but rather they require nationals of the United States to forego, until the Congress shall decide otherwise, the exercise of certain rights under those principles.

Furthermore, this government gives the widest possible notice to American shipping regarding danger areas as the information is acquired by it. This government also warns American nationals and American shipping against actual danger in any other respect as situations involving such danger are brought to its attention, whether those situations result from lawful or unlawful activities of the belligerents. It endeavors to exercise all due diligence in the protection of American lives and property and, of course, must expect American nationals likewise to exercise due diligence in keeping clear of danger-actual or potential.

In the letters which I addressed to Senator Pittman and Representative Bloom on May 27, 1939, I stated the situation as follows: "The rights of our nationals under international law may properly be restricted by our own legislation along certain lines for the purpose of avoiding incidents which might involve us in a conflict. In indicating certain restrictions upon the exercise of our rights as a neutral I do not wish to be considered as advocating the abandonment of these, or indeed of any, neutral rights; but there is reasonable ground for restricting at this time the exercise of these rights."

The principles of international law as regards neutrals and belligerents have been evolved through the centuries. While belligerents have frequently

departed from these principles on one pretext or another, and have endeavored to justify their action on various grounds, the principles still subsist.

This government, adhering as it does to these principles, reserves all rights of the United States and its nationals under international law and will adopt such measures as may seem most practical and prudent when those rights are violated by any of the belligerents.

### United States Prohibits Arms Shipments to Canada— President Roosevelt Extends Neutrality Act After Dominion's Entry in War

Canada was made subject to the United States embargo on shipments of war materials to belligerent nations on Sept. 10, following her declaration of war on Germany. Washington advices of Sept. 10 to the New York "Times

Two proclamations, one proclaiming the neutrality of the United States under international law and the other extending the arms embargo to Canada under the Neutrality Act, had been ready for several days in the expectation that the Ottawa Government would take the step it did today.

The documents were signed by the President and issued through the State Department along with supplementary regulations for enforcement of America's neutrality status. The several steps were similar to those previously taken in the cases of the United Kingdom, Germany, France, Poland, India, Australia, New Zealand and South Africa.

The effect is to shut off the United States as a source of supply for Canada in respect to arms, ammunition and implements of war. There

is no embargo against other materials, such as petroleum, cotton, copper and other essential supplies for waging war, since these are not covered

by the neutrality statute.

While, in case of a long war, the effect of the embargo on Canada may be considerable, for the present it is slight. A search of the records by the State Department today showed that the only arms, ammunitions and implements of war that Canada has on order in this country are seven airplanes. They cannot now be shipped.

Following we give the texts of President Roosevelt's proclamations proclaiming the neutrality of the United States and prohibiting arms exports to Canada, and also an executive order of the President relating to the enforcement of the neutrality of the United States with reference to Canada:

Neutrality

By the President of the United States of America:

### A PROCLAMATION

Whereas a state of war unhappily exists between Germany, on the one

hand, and Canada, on the other hand;
Now, therefore, I, Franklin D. Roosevelt, President of the United States of America, in order to preserve the neutrality of the United States and of its citizens and of persons within its territory and jurisdiction and, to enforce its laws and treaties, and in order that all persons, being warned of the general tenor of the laws and treaties of the United States in this behalf, and of the law of nations, may thus be prevented from any viola-tion of the same, do hereby declare and proclaim that all of the provisions of my proclamation of Sept. 5, 1939, proclaiming the neutrality of the United States in a war between Germany and France, Poland, and the United Kingdom, Indía, Australia and New Zealand apply equally in respect to Canada.

In witness whereof, I have hereunto set my hand and caused the seal of the United States of America to be affixed.

Done at the city of Washington this 10th day of September, in the

year of our Lord nineteen hundred and thirty-nine, and of the independence of the United States of America the one hundred and sixty-fourth.

FRANKLIN D. ROOSEVELT.

By the President:

CORDELL HULL, Secretary of State.

Embargo on Arms

By the President of the United States of America:

### A PROCLAMATION

Whereas Section 1 of the joint resolution of Congress approved May 1, 1937, amending the joint resolution entitled "Joint resolution providing for the prohibition of the export of arms, ammunition and implements of war to belligerent countries; the prohibition of the transportation of arms, ammunition and implements of war by vessels of the United States for the use of belligerent States; for the registration and licensing of persons engaged in the business of manufacturing, exporting or importing arms, ammunition or implements of war, and restricting travel by American citizens on belligerent ships during war," approved Aug. 31, 1935, as amended Feb. 29, 1936, provides, in part, as follows:

"Whenever the President shall find that there exists a state of war "Whenever the President shall find that there exists a state of war between, or among, two or more foreign States, the President shall proclaim such fact, and it shall thereafter be unlawful to export, or attempt to export, or cause to be exported, arms, ammunition, or implements of war from any place in the United States to any belligerent State named in such proclamation, or to any neutral State for transshipment to, or for the use of, any such belligerent State."

And whereas it is further provided by Section 1 of the said joint resolution that

resolution that

"The President shall, from time to time, by proclamation, extend such embargo upon the export of arms, ammunition, or implements of war to other States as and when they may become involved in such war."

Now, therefore, I, Franklin D. Roosevelt, President of the United States of America, acting under and by virtue of the authority conferred upon me by the said joint resolution, do hereby proclaim that all of the provisions of my proclamation of Sept. 5, 1939, in regard to the export of arms, ammunition and implements of war to France, Germany, Poland and the United Kingdom, India, Australia and New Zealand, henceforth apply to Canada.

And I do hereby enjoin upon all officers of the United States charged with the execution of the laws thereof the utmost diligence in preventing violations of the said joint resolution, and this my proclamation issued thereunder, and in bringing to trial and punishment any offenders against

And I do hereby delegate to the Secretary of State the power to exercise any power or authority conferred on me by the said joint resolution, as made effective by this my proclamation issued thereunder, and the power to promulgate such rules and regulations not inconsistent with

law as may be necessary and proper to carry out any of its provisions.

In witness whereof I have hereunto set my hand and caused the seal of the United States of America to be affixed.

Done at the City of Washington this 10th day of September, in the year of our Lord nineteen hundred and thirty-nine and of the independence of the United States of America the one hundred and sixty-fourth.

FRANKLIN D. ROOSEVELT.

By the President:

CORDELL HULL, Secretary of State.

### EXECUTIVE ORDER

Prescribing regulations governing the enforcement of the neutrality of the

Whereas, under the treaties of the United States and the law of nations it is the duty of the United States, in any war in which the United States is a neutral, not to permit othe commission of unneutral acts within the jurisdiction of the United States;

And whereas, a proclamation was issued by me on the 10th day of September declaring the neutrality of the United States of America in war now existing between Germany, on the one hand, and Canada, on the other hand:

Now, therefore, in order to make more effective the enforcement of the provisions of said treaties, law of nations, and proclamation, I hereby prescribe that the provisions of my Executive Order No. 8233 of Sept. 5, 1939, prescribing regulations governing the enforcement of the neutrality of the United States, apply equally in respect to Canada.

FRANKLIN D. ROOSEVELT.

The White House, Sept. 10, 1939.

The text of the neutrality proclamation and the arms embargo proclamation issued by the President Sept. 5 were given in these columns of Sept. 9, page 1559.

### State Department Announcement States Shippers of Arms Must Prove That They Are Not Destined for Belligerents

An announcement issued by Secretary of State Cordell Hull on Sept. 5, following the arms embargo proclamation of President Roosevelt, declares that the weight of evidence that arms shipments are not intended for countries at war rests on the exporter. The announcement reads:

rests on the exporter. The announcement reads:

No export licenses will be issued for shipments destined to France, Germany, Poland, or the United Kingdom, India, Australia and New Zealand of any of the arms, ammunition, or implements of war enumerated in the President's proclamation of Sept. 5, 1939.

By virtue of the power delegated to the Secretary of State by this proclamation of Sept. 5, 1939, to promulgate such rules and regulations not inconsistent with law as may be necessary to carry out any of the provisions of the joint resolution of Congress approved May 1, 1937, as made effective by this proclamation, the Secretary of State may require exporters of any of the arms, ammunition, or implements of war enumerated in the proclamation to present convincing evidence that they are not in the proclamation to present convincing evidence that they are not destined to France, Germany, Poland, or the United Kingdom, India, Australia and New Zealand, and may refuse to issue an export license for the same until such convincing evidence has been presented to him.

The text of President Roosevelt's embargo proclamation was given in our issues of Sept. 9, page 1559.

# State Department Promulgates Regulations with Respect to Solicitations in United States for Medical Aid in Warring Nations

Regulations governing the solicitation or collection by any person or organization in the United States of contributions for medical aid and assistance in the countries engaged in the European War were issued by Secretary of State Cordell Hull, Sept. 5. The American National Red Cross was specifically exempted, however, in view of its purposes and ciai status

The regulations state in part:

Any person within the United States, its territories, insular possessions (including the Philippine Islands), the Canal Zone, and the District of Columbia who desires to engage in the solicitation or collection of contributions to be used for medical aid and assistance in France; Germany; Poland; or the United Kingdom, India, Australia and New Zealand, or for food and clothing to relieve human suffering in any of those countries, and who is not acting for or on behalf of the governments of France; Germany; Poland; or the United Kingdom, India, Australia and New Zealand, or any political subdivision of any of such countries, shall register

with the Secretary of State. To this end, such person shall make application

to the Secretary of State upon the form provided therefor.

No person shall solicit or collect contributions without having in his possession a notice from the Secretary of State of acceptance of registration which has not been revoked; Provided, however, that nothing in this regula-tion shall be construed as requiring a duly authorized agent of a registrant

to have in his possession a notice of acceptance of registration. Chapters named in the parent organization's registration may, of course, operate under this registration. Notices of acceptance of registration shall not be exhibited, used, or referred to, in any manner which might be construed as implying official endorsement of the persons engaged in the solicitation

or collection of contributions.

or collection of contributions.

In view of the purposes and special status of "The American National Red Cross" as set forth in the Act of Congress approved Jan. 5, 1905, entitled "An Act to incorporate the American National Red Cross" (33 Stat. 599), and particularly in view of the fact that it is required by law to submit to the Secretary of War for audit "a full, complete, and itemized report of receipts and expenditures of whatever kind," so that the submission to the Secretary of State of reports of funds received and expended would constitute an unnecessary duplication, "The American National Red Cross" is not required to conform to the provisions of these regulations.

Court Fines Fownes Bros., Inc. for Violation of Wage-Hour Law

Fownes Bros., Inc., glove manufacturers of Amsterdam, New York, and three employees on Sept. 12 were fined by Federal Judge Frederick H. Bryant a total of \$7,500, on charges of violating the Federal Wage-Hour Law. Judge Bryant also ordered payment of all back wages due employees before Dec. 11, when sentences on three counts of a nineteen-count indictment charging the firm with violations of the law will be pronounced.

Associated Press advices of Sept. 12, from Syracuse, said:

The counts, to which the company pleaded nolo contenders yesterday, charge failure to pay time and one-half for overtime, shipping goods produced by underpaid workers in interstate commerce and failure to keep required records.

A count charging the company with falsification of records was dismissed. A previous dispatch erroneously reported this count among those on which sentence would be pronounced Dec. 11.

### Attorney General Murphy Says Justice Department May Offer Legislation at Special Session of Curb

Anti-profiteering legislation may be undertaken at the pecial session of Congress called for Sept. 21 if the situation demands, according to a statement made Sept. 14 by Attorney General Frank Murphy.

Further reporting Mr. Murphy's remarks Washington dispatches of Sept. 14, to the New York "Times" said:

He intimated that the laws would follow the principle of the Lever Food Control Act of the World War period, but would guard against the possibility of having Congress delegate legislative authority to the President, and instead require that the Executive "act within a certain lane." The Lever act was overthrown when the Supreme Court decided a vital amendment unconstitutional on the ground of illegal delegation of power.

Such legislation, Mr. Murphy explained, would be much more effective than present attempts to cope with profiteering through the anti-trust statutes. The anti-trust laws, he intimated, entail long prosecutions which

statutes. The anti-trust laws, he intimated, entail long prosecutions which run through the courts for several years, and the result is not known until the final decision. But an anti-profiteering statute would tell the public in advance what it could and could not do.

"The object of the proposed legislation," said the Attorney General, "is to keep commodity and food prices normal, to prevent profiteering and gouging, especially in the necessities of life. We should have these laws carry a yardstick or measure by which it could be determined whether a practice was reasonable or unreasonable. They should be as free from vagueness as possible so one would know whether he was violating the statutes."

There have been some recent examples of profiteering "without the slightest justification," Mr. Murphy asserted, but he said the practice was neither "prevalent nor widespread." He said that anti-trust laws would be vigorously used for the present against profiteering.

"I am not an authority on prices, but it does not seem to me that prices are too high," Mr. Murphy went on. "It would be a healthy thing for this country to let normal economic laws operate for a while especially since we have the Department of Justice to see that business operates freely."

Continuing with this idea that "the government effort should be directed

to normal recovery of things," Mr. Murphy said that in some instances it would be reasonable to have some of the prices increased if the rise was not unjustifiable.

No one, he stated, had suggested to him the regulation of copper prices. President Roosevelt recently spoke of the rise in copper prices during the

### Radio Station WMCA Denies Alleged Violation of Communications Act

Formal denial was made Sept. 14 by the Knickerbocker Broadcasting Co., licensee of radio station WMCA, to the charge of the Federal Communications Commission that the station had intercepted and rebroadcast secret code messages sent out by the German and British governments. The FCC had, on Sept. 12, issued an order requiring the company to show cause within 72 hours why its license should not be revoked for the alleged violation of the Communications Act of 1934. According to the FCC order the Act provides that "no person not being authorized by the sender shall intercept any communication and divulge or publish the existence, contents, substance, purport, effect

or meaning of such intercepted communication."
Washington advices of Sept. 14, to the Associated Press

said:

William Weisman, Vice-President of the company, filed an affidavit with the Commission today in which he said WMCA "neither directly nor in-directly intercepted or caused the interception" of secret radio communi-

cations by the governments of Germany and Great Britain "or any other

Mr. Weisman's affidavit said he was aware of an advertisement which appeared in the Sept. 6 issue of a radio paper reproducing excerpts from columns of New York newspapers in which it was stated that WMCA had

decoded secret orders of the governments of Germany and Great Britain.

"The Knickerbocker Broadcasting Company does not control, directly or indirectly, in any manner, either the said publications or any of the writers of said columns," Mr. Weisman said.

"The Knickerbocker Broadcasting Company used the said items in the advertisement only as an indication of the fact that WMCA did broadcast the news items in advance of other radio stations or in advance of their pubthe news items in advance of other radio stations or in advance of their publication in the daily newspapers in New York city, but not for the purpose of advertising that WMCA had in fact intercepted or decoded any of the secret orders of Germany, Great Britain or any other Government.

### Air Flights Over Panama Canal Zone Restricted

Regulations governing aircraft flights over the Panama Canal Zone were issued by President Roosevelt Sept. 14.

Associated Press advices of that date from Washington

An executive order created the "Canal Zone military air space reserva-on," which includes territorial waters within the three-mile limit off both entrances of the waterway

The order barred all flights unless specifically authorized by either the Civil Aeronautics Authority or the State Department. It prescribed detailed routes which must be followed and directed that cameras be sealed. Foreign planes must be escorted by war planes of the canal garrison. President Roosevelt put the canal under military rule last week, when

the War Department ordered troop reinforcements for the garrison.

Major Gen. David L. Stone, army commander, received full authority and already has put guards on all ships making the transit and increase safety measures at such vulnerable points as locks.

Reference to the placing of the Canal Zone under military rule was made in our issue of Sept. 9, page 1562.

### International Cotton Conference in Washington— Secretary Wallace Sees War Reducing Cotton Consumption

Secretary of Agriculture Wallace, addressing the international cotton conference meeting in Washington Sept. 5 declared that the net effect of war should be a decrease in the use of cotton. Foreign delegates to the conference lent no encouragement to hopes of United States officials for an international cotton production and marketing control program, indicating that their countries would not favor cutting acre-

Countries represented at the conference in addition to the United States, were Great Britain, France, India, Egypt, the Sudan, Russia, Brazil, Peru, and Mexico.

Washington advices of Sept. 5, to the New York "Times," reporting on Mr. Wallace's address, said:

Secretary Wallace's remarks represented a drastic change in the conference program, which was designed when the meeting was arranged a month ago to deal merely with the economics of cotton production and dis-tribution. The commodity in war time assumes an extraordinary political as well as economic importance.

"So far as the immediate cotton situation is concerned," Mr. Wallace said, "the events of the last few days cannot be interpreted optimistically. In fact, the world cotton situation has become more difficult. bilities of utilizing in the immediate future the burdensome supplies of cotton have become poorer rather than better.

It seems likely that any increased use of cotton for military purposes in the combatant countries will be much more than offset by decreased use for ordinary purpose

"Also, the problem of transportation from exporting countries to import-ing countries has become acute."

Mr. Wallace noted that the world carry-over of cotton into the current year was about 22,000,000 bales, compared with an estimated consumption of 27,000,000 bales—an estimate made before the war started—while a new

crop in the Northern Hemisphere was coming on the market.

He reviewed for the foreign delegates the Agricultural Adjustment Administration cotton plan of the United States which he denied could be called

"subsidy program."
"The effect of the adjustment operations and the loans has been to protect world cotton prices and income as well as cotton prices and income in the United States," said Mr. Wallace. "However, partly because of the loan, this country's cotton exports for the past marketing year dropped to less than 3,500,000 bales, compared with an average of more than 7,000,000 for the previous 10 years. This decline in exports created an emergency. "The aim of our program was the protection of producers, but producers

could not be protected if the greater part of the export market were lost. A logical way out of this situation was an export program which would make the price of American cotton fully competitive in world markets. Such a program was adopted effective in late July.'

### United States Limits Imports of Cotton and Cotton Waste

Limitations on imports of cotton and cotton waste into the United States were proclaimed Sept. 5 by President Roosevelt, in conformance with recommendations made to him Aug. 25 by the United States Tariff Commission.

The Department of Agriculture had requested these limitations, which are said to be in effect import quotas in order to protect the American market from an influx of foreign shipments of cotton and waste that was expected as a result of the cotton export subsidy program. A brief reference to the President's proclamation was made in our

issue of Sept. 9, page 1558.

The Tariff Commission's report in prescribing limitations

said:

In order to prevent entries of cotton and cotton waste from rendering or tending to render ineffective or materially interfering with the program undertaken with respect to cotton or from reducing substantially the amount of any product processed in the United States from American cotton, it is necessary to prescribe the limitations on imports for consumption indicated in the following tables. These limitations relate to the total quantities of cotton and cotton waste which may be entered, or withdrawn from wa house, for consumption and to the quantities of such cotton and cotton waste originating in various countries which may be so entered or withdrawn during the period of 12 months beginning with the day the proclamation of the President regarding quotas becomes effective and during each corresponding 12-month period thereafter.

COTTON-ANNUAL QUOTAS BY COUNTRIES OF ORIGIN (Other than harsh or rough cotton of less than ¾-inch in staple length and chiefly used in the manufacture of blankets and blanketing, and other than linters)

Country of Origin	Staple Length		
Country of Origin	Less Than 1 1/4 Inches	1 1/4 Inches	
	Pounds	Pounds	
Egypt and the Anglo-Egyptian Sudan	783,816	43,451,566	
Peru.	247,952	2.056,299	
British India	2,003,483	64.942	
China	1,370,791	2.626	
Mexico	8.883.259	-	
Brazil	618,723	3,808

 c Other than Algeria, Tunisia and Madagascar.

COTTON CARD STRIPS, COMBER WASTE, LAP WASTE, SLIVER WASTE
AND ROVING WASTE—ANNUAL QUOTAS BY COUNTRIES
(Whether or not manufactured or otherwise advanced in value)

Country of Origin	* Total Quota	Country of Origin	* Total Quota
United Kingdom	Pounds 4,323,457 239,690	ChinaEgypt	Pounds 17,322 8,135
FranceBritish India	227,420 69,627	Cuba	6,544 76,329
Netherlands	68,240 44,388	Italy	21,263
Beigium	38,559 341,535	Total	5,482,509

\* Provided, however, that not more than 33 1-3% of the quotas shall be filled by cotton wastes other than cotton eard strips and comber wastes made from cottons of 1 3-16 inches or more in staple length in the case of the following countries: United Kingdom, France, Netherlands, Switzerland, Beigium, Germany, Italy.

### FSA Made 6,181 Loans to Tenants for Purchase of Farms in Two Years' Operations of Bankhead-Jones Farm Tenant Act-Loans Aggregated \$33,-

The Farm Security Administration reported on Sept. 1 that during the first two years under the Bankhead-Jones Farm Tenant Act it had made 6,181 loans to tenants for the purchase of farms. The loans aggregated \$33,339,684, or an example of the second seco average of \$5,394 per farmer. Farms acquired by these tenant borrowers averaged 134 acres each, but the average varied greatly from State to State according to the kinds of farming in the various States. The FSA further reports:

Except for Rhode Island, where only one loan was made, the lowest average in continental United States was 43 acres in California, where irrigation makes small farms profitable. The highest was 520 in South Dakota, where range farming prevails.

During the second year of the program, ending last June 30, the loans ran a little higher, the farms were somewhat bigger, and more improvements

ran a little higher, the farms were somewhat bigger, and more improvements were made, than during the first year of the Act.

The 4,341 loans during the second year aggregated \$24,140,675, or an average of \$5,561. The average acreage was 136. The 1,840 loans finally consummated during the first year's program aggregated \$9,199,008, or an average of \$4,999. The average farm bought was 130 acres.

First year borrowers spent \$1,626,733 for improvements to the farms they bought, or about 18% of their loans. Second year borrowers spent

\$5,778,268, or about 24% of their loans for improvements. for the two years was 22%.

This increase had been expected, because as the program progre fewer improved farms are available for purchase at rea requires more of the borrowers to put up their own buildings on unimproved

The Bankhead-Jones law was enacted two years ago in an effort to slow down the rapid increase in farm tenancy in the United States, which had jumped from 20% of the farmers 50 years ago to 42% in 1935.

Congress provided for a slow, experimental start to the program, appropriating only \$10,000,000 the first year, \$25,000,000 the second, and \$40,000,000 for the current fiscal year. Applications are now being received all over the country for the more than 7,000 loans expected to be made this year. With more loans this year than in the two previous years combined, the program has been extended to about 1,300 counties.

Under the Act, loans are made to tenants, share-croppers or farm laborers to be repaid over 40 years at 3% interest. The annual instalments, including principal and interest, must average 4.3% of the loan.

#### cultural Advisory Council Enlarged Secretary Wallace Says Ultimate Effects of Major War Are Agricultural Disastrous for Farmer—CCC Regains Part of Losses

Four more individuals were named to the newly organized Agricultural Advisory Council Sept. 13 by Secretary of Agriculture Henry A. Wallace. The new appointees are:

Winthrop C. Adams, President of the National American Wholesale Grocers' Association, Cambridge, Masa.; C. A. Bitner, Chairman of the Packing House Workers' Organizing Committee, Chicago; Mayor F. H. LaGuardia of New York, and Daniel Tobin, President of the International

Brotherhood of Teamsters, Shoppers, Stablemen and Helpers of America, Indiana polis

At his press conference the same day Secretary Wallace mmented on the effects of war on agriculture. Washingcommented on the effects of war on agriculture. Washington advices of Sept. 13, to the New York "Times," reported his remarks as follows:

Any expectation that farmers would profit, in the long run, from a major war was rejected today by Secretary Wallace on the basis of experience showing that temporary profits are invariably wiped out by the costs of realignment of production in peacetime

The post-war situation for agriculture is straight hell," he said, in

discussing this topic at a press conference.

"The farmer's attitude against war is traditional," he went on. "Then, too, his memory is still fresh about what happened to farm profits after the last war. If the memory is not fresh, it should be recalled. The triple A pictures the whole problem and as an example we should keep it as bright and

Mr. Wallace's remark was made in the midst of a talk in which he expressed the hope that agricultural prices might go higher and more nearly approach parity, but in which he also coupled the hope that rises would be based only on the sound basis of supply and demand and not on specula-

The speculation which war fever encouraged was doubly harmful, he said, not only because it raised many prices artifically, but because it encouraged farmers to plan crops for which there was no reasonable expectation of need.

When asked if the department had discovered actual evidence of profiteering, Secretary Wallace said that the facts were not yet acertainable; that, in fact, almost as many complaints had been received about excessively s about too high ones

Among those who have profited by the rise in agricultural commodities he revealed was the Federal Government, which, through the Commodity Credit Corporation, has made an indicated profit of \$95,000,000 on products it holds.

The corporation received from the recent Congress an appropriation of \$119,000,000 to restore losses in capital occasioned by its operations. The new "profit" would indicate a very large recovery of that loss, but Secretary Wallace said it is too soon to count profits or losses, since large sums might have to be loaned to tobacco growers to offset the expected loss in British

A previous reference to the Agricultural Advisory Council appeared in our issue of Sept. 9, page 1564.

### Wheat Export Subsidies Discontinued—Flour Sub-sidies Reduced According to FSCC

Government wheat subsidies which were abandoned early in September, have not been resumed according to statements credited to officials of the Federal Surplus Commodity Corp. which were reported Sept. 14. They said further that there is no indication when they will become active again, but that their recurrence is dependent upon the political situation abroad.

The "Wall Street Journal" of Sept. 15 said:

However, during the period since the FSCC temporarily stopped its wheat activity, two small transactions in direct sale of loan wheat to exporters for shipment to Latin-American countries have been made. Officials explain that negotiations on these sales were begun before the FSCC withdrew from the export picture and it was thought advisable to complete the deals. The amount of wheat in both these deals was "consideralby" less than 100,000 bushels, officials said.

The abandonment of wheat export subsidies was originally announced Sept. 5 and Washington advices of that date to the New York "Journal of Commerce" reported:

Abandonment of the wheat export subsidy and reductions in similar aids provided for flour exports were made by Agriculture Department officials today to meet conditions brought about by war abroad.

Studies now are being made of further revisions that may be needed

to meet economic changes.

Suspension of the wheat subsidy plan may be only temporary, but today no offers by exporters for sales of wheat abroad were accepted.

The Federal Surplus Commodities Corporation, which has been handling the export subsidy programs, took action due to the increases which
have brought wheat prices up about 21c per bushel above season lows.

The future course of wheat prices and action taken by other wheat

exporting countries to continue or discontinue the use of subsidies will decide whether or not the domestic wheat subsidy program has been permanently or temporarily abandoned. Discontinuance of the subsidy by other exporting countries will probably lead to the dropping of such bounties by the United States as long as prices cemain at present levels, it is thought.

With respect to the flour subsidy, FSCC is moving to decrease such payments gradually rather than stop them all at once. Today the subsidy on exports from United States ports other than those on the Pacific Coast to foreign countries was dropped to \$1.30 per barrel from the previous rate of \$1.50 per barrel. Similar reductions were made in the rates on exports from Pacific Coast ports to China and Hong Kong, the Philippines, and other foreign countries.

# Producers to Vote on Amendment to New York Milk Marketing Program—Sale of Milk in Chicago Area Put Under Federal Control

A mail referendum on an amendment for increasing producer milk prices until May 1, 1940 under the Federal order for the New York metropolitan market, will be conducted among approximately 60,000 dairymen throughout the New York milkshed during a period ending Sept. 22, the Division of Marketing and Marketing Agreements of the Department of Agriculture announced Sept. 13. Ballots will be mailed to producers in New York and in parts of Pennsylvania, New Jersey, Connecticut, Massachusetts, and Vermont. The amendment to the order, which regulates the handling of milk in interstate commerce and complements similar provisions which would be incorporated in New York State regulations for the New York market, was issued by Secretary of Agriculture Henry A. Wallace. The Secretary also has tentatively approved a marketing agreement for the signature of handlers which contains the same provisions as the amended order. From the announcement in the matter

To become effective, the amendment to the Federal order must be ap proved by at least two-thirds of the producers or by producers of two-third of the volume of milk, who vote in the referendum, and the agreement requires the signature by handlers of at least 50% of the market milk by volume. If the required number of handlers do not sign the agreement, the Secretary under the 1937 Agricultural Marketing Agreement with Presidential approval, issue and amend orders which are binding on

The amendment provides for the following minimum class prices for any

month up to May 1, 1940:

1. \$2.82 per hundredweight for Class I (milk which leaves the plant as fluid milk, chocolate milk, or whole milk drinks). This is an increase of 57 cents over the Class I price now under the order of \$2.25 per hundredweight on the basis of the price of butter.

2. To encourage the consumption of milk among low-income families, the amendment provides for a special producer price of \$2.25 per hundredweight for Class I milk sold or disposed of under any approved program which requires payments from Federal funds.

3. \$1.90 per hundredweight for Class II-A (milk which leaves or is on hand at a plant in the form of cream, except storage cream and cream sold outside the milkshed, and creamed cheese). This is an increase of 35 cents over the Class II-A price of \$1.55 for August in the existing order.

4. 30 cents per hundredweight increase over the Class II-B and Class III-B prices in the existing order. Class II-B milk is milk which is on hand or leaves the plant as plain condensed milk, and frozen desserts or homogenized mixtures sold in New York City. Class III-B milk is milk used as

The new producer prices contained in the amendment are based on the record of a public hearing held last month at the request of dairy farmers supplying milk for the New York market. At the hearing producers testified that the severe drought during the 1939 growing season resulted in heavy destruction of crops in the most extensive year-around producing areas supplying the metropolitan area with milk. In supporting their petition for the price changes, producers said that because they would have to buy heavy supplies of feed and forage from outside sources, the increases were necessary to enable them to assure the market an adequate supply of milk from the producing area during the fall and winter months

Secretary Wallace on Aug. 29, issued an order establishing Federal control of the sale of milk in the Chicago marketing Under a marketing program which began Sept. 1, the Agriculturture Department established minimum prices which distributors and handlers must pay producers.

In reporting this Washington Associated Press, advices of

Aug. 29 said:

Affected by the order will be about 15,700 dairy farmers in Illinois, Wisconsin, Indiana, and Michigan who supply a daily average of about 5,000,-000 pounds of milk to the Chicago area, which includes in addition to Chicago the Illinois cities of Evanston, Glencoe, Kenilworth, Wilmette

The Secretary's action followed a referendum in which producers voted, on the basis of preliminary returns, 11.261 for and 699 against the program.

### No Referendum This Year on Corn Marketing Quotas, Secretary Wallace Announces

There will be no referendum on corn marketing quotas this year, Secretary of Agriculture Henry A. Wallace announced on Sept. 13. The September crop report indicates a 1939 corn crop of approximately 2,523,000,000 bushels, and the Oct. 1 carryover is estimated at 470,000,000 bushels. These estimates indicate a total corn supply for 1939 of 2,993,000,000 bushels. The 1939 marketing quota level, the Secretary said, as determined under the provisions of the Agricultural Adjustment Act of 1938 and in view of the current European situation, is 3,030,000,000 bushels. If the total indicated supply of corn had been above this level, the Act would have made mandatory the holding of a producer referendum in which farmers would have voted on the establishment of corn marketing quotas for their 1939 crop. The Department's announcement went on to say:

Principal factors in holding the corn supply at a level which makes a marketing quota referendum unnecessary this year, despite unusually high yields, are: (1) Increased participation in the Agricultural Conservation Program resulting in a corn acreage adjustment of 18% at the Corn Belt. compared with the 10-year average, and (2) the increased livestock

The corn marketing quota level, as defined in the Act, is 110% of normal The normal supply is a normal year's domestic consumption and exports plus 7% for reserve.

In commenting upon the size of the 1939 supply of corn, the Secretary said:

Out relatively large supply of corn this year is evidence of greatly in-reased efficiency on the part of corn producers. The retirement of poorer land from cultivation, increased use of hybrid seed and generally improved fa ming methods all have been instrumental in appreciably raising our per acre yield. This has become especially apparent during the last 3 years since corn farmers have been cooperating to an increasing degree in the Agricultural Conservation Program. Such efficiency leading to lower per unit costs and improved farm income is one of the primary objectives of

In view of these increased yields it is apparent that farmers can provide abundant corn supplies from fewer acres. Unless conditions change during the coming months, 1940 acreage allotments will necessarily reflect this situation.

### Bernard M. Baruch Urges Maximum Peace-Time Armaments

A plea for expansion of the military and naval establishments to the limit of peace-time authorizations, was made Sept. 14 by Bernard M. Baruch. His remarks followed a conference with President Roosevelt. Reporting his remarks, the "Wall Street Journal" of Sept. 15, said:

Bernard Baruch, former Chairman of the World War industries Board said at the White House yesterday that if this country is wise it will not try said at the white House yesterday that it this country is where with not try
to get too high prices for goods it sells to customers attracted to U. S. markets during emergencies abroad. He said it would be easy to lose the new
customers after a war if the prices were too high, and added that fair prices
would destroy the barter system of Germany.

Mr. Baruch said that he believed America's policy should be one of com-

plete preparedness. He said that if this Nation gets into a war, a ceiling will be placed over prices and taxes will be raised to prevent war time profiteering. He suggested also that if the U. S. ever sat again in a peace conference it should demand in advance the power of veto. Mr. Baruch said that the Administration had consulted him on some problems and that he is ready to do anything he is asked to do.

# Legislation Providing War Risk Insurance for Foreign Traders, More Funds for Export-Import Bank, Urged by Merchants Association of New York

The Merchants' Association of New York, in a telegraphic message to President Roosevelt, asked that if a special session of Congress is called to deal with the subject of neutrality, action be taken on three specific items of great importance to the foreign traders of the United States, it was announced by John Lowry, President of the Association, on Sept. 10. The three proposals of the Association which have been made to the President, after extensive conferences with foreign traders and a study of their needs, are the following:

1. The providing of necessary war risk insurance coverage for American traders as proposed in the Bailey bill introduced in Congress on June 7, last.

2. Making available materially increased funds for the use of the Export-Import Bank of Washington.

3. Careful consideration of the establishment of a guaranty fund for American exports in addition to the facilities of the Export-Import Bank of Washington, along lines that have been in operation in Great Britain

In announcing that the Association had urged on the President the desirability of considering these matters at a special session, Mr. Lowry said:

We believe that in making this request to the President we are voicing the views of probably every foreign trader in the United States. We have been in touch with many of those who are concerned with the export and import business and we know there is a strong feeling that unless prompt action is taken on the first two of these items it will be impossible for American foreign trade to function in a manner which meet the needs of this country.

Furthermore, we think that the time has come for the United States to consider the establishment of a guaranty fund for American exports, such as that which exists in Great Britain, as a means particularly of aiding the small trader, and of enabling our country to meet the increasing demand which is certain to arise for its products.

Our observations have convinced us that both British foreign traders and the British people have greatly benefited from the operation of its export guaranty fund. This fund operates in such fashion that the exporter, upon presentation of his invoices to the Government agency, is able at once to collect a substantial percentage of the value of his shipable at once to collect a substantial percentage of the value of his ship-ment. Such a fund has enabled the British exporters to extend long-term credits. Americans are, of necessity, confined merely to such credit as it is within their ability to extend individually, which has usually meant short-term credit. With the increased demand for American products, which is sure to come from many countries, we think that Congress should certainly take steps to determine whether something patterned after the British fund should be established in the United States. It should be noted that in Great Britain, where the exporter pays a premium for the noted that in Great Britain, where the exporter pays a premium for the advance which he obtains from the Government, the fund has been operated with such care that the British taxpayer has suffered no loss.

So far as the need for the establishment of war risk coverage by the United States is concerned, we are certain that if the war continues the time will come when war risk coverage will not be available unless the Government steps in. Already the pinch of war is being felt. While the private companies are now providing war isk insurance, the rates are going up steadily. In the first week of the war the losses sustained by the sinking of vessels have been substantial. War risk coverage at a fair rate is absolutely essential if American trade is to be kept moving. The Bailey bill, with its provision for reinsurance of marine risks and insurance Bailey bill, with its provision for reinsurance of marine risks and insurance

and re-insurance of war risks would, if enacted, meet the situation.

We also feel that it is essential that the funds available for the use of the Export-Import Bank of Washington be materially increased. At the present time the loans of this Bank are limited to \$100,000,000. We are told that already a large proportion of its funds have been advanced on loans. The exporters feel that the present funds available will not begin to meet the legitimate needs of the exporting trade and that a rufficient to meet the legitimate needs of the exporting trade and that a sufficient sum should be made available to make sure that the trade of the United States will not be checked because of lack of suitable financing facilities.

# Senator Borah Opposed to Revision of Neutrality Act— Says Sale of Munitions Would Be Step Toward Involvement in European War

Senator William E. Borah, of Idaho, in a radio address Sept. 14, assailed proposals to revamp the Neutrality Act so as to permit sale of munitions to the warring nations of

"To those who are advocating repeal," he said, "I submit this question: Is it not your main purpose in securing repeal to enable us to furnish arms, munitions and implements war to one group of nations and to deny them to another group of nations, which groups are now in mortal combat? Is not this laying the foundation for intervention-in fact, is it not intervention—in the present European war? Is it not your purpose to take sides through the authority which will be available when the embargo law is

"And, he continued, "if the purpose of repeal is to do these things, and we do them, is not neutrality broken down, destroyed, and are we not thenceforth by every rule of international law, by every dictate of common sens and common honesty, parties to a European conflict? I further submit to those who hear me: Do you think the time has come when for reasons of humanity, or of national defense, we should take our place in another

"I feel we are really considering in this debate the broad question of whether we are justified as a people in intervening in this conflict and meet the issues as they are being presented upon the battlefields of Europe. for we cannot escape that destination if we move along the lines now pro-

Senator Borah further said in part:

The plan now presented by the advocates of repeal is that the democracies of Europe are imperiled, that we must go to their rescue, that civilization is threatened, that we cannot ignore the problem presented. But, if the war continues and the imperiling of democracies and the threatening of civilization increases, what can we say, having once put our hand to the plow? Will we turn our backs to the whole situation?

I repeat, as I stated a moment ago, what we are really considering these ays is the broad question: Has the time come when the United States must take part in this European conflict? Why deceive ourselves as to what will happen once we enter the conflict? Why shut our eyes to the inevitable

sequences which must follow?

Time will not permit a detailed discussion of what is known as the cashand-carry plan. It is based upon the principle that those who want our arms and munitions or raw material shall come and get them, pay cash, and carry them away. But, while I cannot discuss it in detail, I want to take time to say that this plan does not change the situation, as I understand it, with reference to neutrality.

The cash-and-carry plan repeals the embargo law and enables our government to direct the arms and munitions to one side and withhold them from the other. Whatever merits, or dermerits, this plan may have, it does not seem to me to bear, only most indirectly, upon the question which I have

sought to have you consider this evening.

I am concerned at this time with one proposition, that of avoiding any act, or acts, which will embroil us in a European war. I do not believe the cash-and-carry plan has any considerable bearing upon that point, and I shall therefore content myself with this brief reference.

Where the welfare of an entire Nation and the health and the lives of the people are involved, we can afford to be patient, to be tolerant, and, at the same time, determined in our effort to find the right way.

The democratic processes should at all times be kept intact. Free speech,

free press, uncontrolled consideration in debate are essential to right conclusions and sound judgments in a democracy. We can all afford to trust our cause to the democratic processes, and, when the final judgment is made up according to those processes, we can rest in the belief that the judgment will be a wise judgment.

Twenty years ago we went into Europe to take part in a European war. We went with high hopes and, in my opinion, for ample cause. But even so, how futile the sacrifice we made. Scarcely had the heroic story of our soldiers been written before the so-called peace treaties had set at naught the principles for which our soldiers fought.

very move in that direction, therefore, should be subjected to the test of the best thought and the high motives of the entire American people. If the worst should come, and for any reason we should be involved in another European struggle, nothing should be taken for grante

the sacrifice must be made.

In conclusion: The President has called a special session of Congress for the purpose of removing the embargo on arms, munitions and implements of There are some of us who want to keep the old law-who insist that the sale of arms to all nations engaged in war shall continue to be prohibited.

The only question in controversy, the only matter of difference that I know of, is the sole question of whether we shall sell arms or not sell arms.

We see that the supporters of repeal are anxious to put an embargo on ships going to war zones, on loans to all Nations engaged in war, anxious to prohibit our citizens from traveling in war areas; all this and more is to be done in the name of neutrality in the effort to keep us out of war. We most heartily support this entire program. We say in the name of peace: Do these things. Maintain neutrality as to all these matters.

But we observe here that there is a sudden break in the embargo,—the

most threatening and disturbing of all factors, the most calculated to get us into trouble—arms, munitions and implements of war are to be let through. Embargo is not to apply. What is the significance? We feel sincerely that this is an error. We stand where we stood two years ago, where Congress stood, where the Executive stood and where the people

What is the significance? Why prohibit loans in the name of peace and for the protection of our people but not prohibit arms? Why place an embargo on all these other thaings mentioned but repeal it as to arm That is the sole matter of controversy. What we did two years ago we did in the name of humanity, in the name of peace, to protect our homes, our sons and daughters, and to help keep us out of war. Blame us not therefore if we are slow to surrender our convictions

What we who oppose repeal are contending for is now the law of the land. It has been and is being enforced under the proclamation of the President. No arms, munitions and implements of war are being sold. In what possible way can the United States be benefited by permitting the sale? Who is it that it to be benefited? In what respect is this country threatened by reason of the fact that no sale of arms is being made? In what respect are the safety and security of the people imperiled? This is the sole matter of controversy.

We urge that the same rule, the same principle, be applied to the modeadly of disturbers, arms, along with the other things prohibited.

Earlier in his address Senator Borah urged that the United States "establish freedom from the European system," saying:

But we have no alternative, it is in effect declared, after these 150 years of self-government, we must go in some way or other into all these controversies, broils and wars of Europe. It is useless, we are told, to try to avoid this fate.

Though these wars are not our wars, though they are wars brought on through the manipulation and unconscionable schemes of remorseless rulers, though their national policies are not our policies, though their crimes are not our crimes, still, we have no alternative, so it is urged, but to sacrifice the wealth, the homes, the savings, and the lives of our own people whenever the conflicts arise.

Although our people have sought peace and now seek peace, still we must Though the law of our land banishes racial and religious persecution from our common country, still, because Europe is we must join in the racial and religious conflicts and sacrifice our people over conditions which our forebears long since rejected. Throug we seek no people's territory, nevertheless, because Europe is "near, we must sacrifice the savings of our people and the sons of our mothers in this endless imperialistic strife. Though we would take no part of the loot which was devided up at the close of the World War, we are now called upon to make sure the title to a vast amount of this loot. What a fateful doctrine to propose; Let us renounce it and make the effort at least to establish freedom from the European system.

Pointing out that supplying arms to one side in the war would be a step toward taking the United States into the war, Senator Borah said:

It may be said to repeal the law is not unneutral. I think under the circumstances it is. However, let's not discuss technicalities. But when it is said to me as a Senator: I want you to carry through a program, the first step of which is repeal, the second step of which is the furnishing of arms and munitions to one side, openly, persistently and continually declared, then I know I am voting for intervention, I am helping to take this nation into a European war. I cannot hide behind the fact that they are two different acts because both are, part of one plan, and that plan includes the furnishing of arms, which is beyond question intervention. All any one need to do to know that this is the real, the controlling purpose of repeal is to read the literature on repeal down to the last 48 hours.

The talk here in Washington is no longer that of weekly furnishing arms.

The talk here in Washington is no longer that of merely furnishing arms.

It is said: We must prepare to fight.

It is now proposed to repeal entirely this provision of the law. It is proposed to repeal it to enable this government to furnish arms to one side and to withhold them from the other. The proposal for repeal is based upon the program of taking sides in the furnishing farms. Undoubtedly, so I say we had a right to pass the law, and undoubtedly, we have a right as I say, we had a right to pass the law, and undoubtedly, we have a right to repeal the law. But when we couple the repeal with the announced declared program of furnishing arms and munitions to one side and with-declared program of furnishing arms and munitions to one side and withholding them from the other, such program will unquestionably constitute intervention in the present conflict in Europe.

### War Will Not Reduce Anti-Trust Activities, Thurman Arnold Tells Petroleum Convention

Thurman W. Arnold, Assistant Attorney General in charge of enforcement of the Federal anti trust laws, declared Sept. 13, that his office would make generous use of the criminal indictment to break up war-time profiteering. He promised expansion rather than contraction of "trust bustactivities of the Department of Justice as a result of the war in Europe. His remarks were addressed to the 37th annual meeting of the National Petroleum Association, assembled at the Hotel Traymore, in Atlantic City, N. J. Reporting on Mr. Arnold's speech, Atlantic City dispatches of Sept. 13, to the New York "Times," said:

Mr. Arnold pictured the problem as one of "preventing the other fellow's war from distorting our economy," and put the anti-trust division in the "front-line trenches" in that fight.

After citing the reasons for his belief that trust-busting must go on, Mr. Arnold disclosed that he intended to ask Congress for increased funds to carry on the work of the division and revealed also that he was under orders from Attorney General Frank Murphy to make plans to cooperate

with all of the other governmental agencies concerned with the problem.

This means, he indicated, that the Division must work with the War and Navy Departments, the Department of Agriculture, the Deaprtment of Commerce, the Treasury Department and the War Resources Board.

His announcement was received here with interest because of previous predictions from observers in Washington that mobilization of national resources might mean the ending, for the time being, of the work of Mr. Arnold and his division.

In citing the need for additional funds, he disclosed that the Federal Bureau of Investigation, under J. Edgar Hoover, would need all its men for espionage work, and no longer would be able to lend him any of its operatives, as it has been doing in the past.

In discussing the last World War, Mr. Arnold contended that real wages went down one-third, while thousands of new fortunes were made, and that

"an economy was built up which depended on the perpetuation of the war to prevent its utter collapse." The fear that these conditions may be repeated is causing the present extraordinary purchases of foodstuffs, he

### President Martin of New York Stock Exchange Dis-cusses Increased Activity on Exchange in Radio Address

William McC. Martin, President of the New York Stock Exchange, in an address broadcast over a national hook-up on Sept. 8, described the increased activity on the Exchange since the outbreak of war in Europe as "a reflection of a nation-wide reaction to recent events." He said the volume of trading and movement of prices "reflect the judgment and impulses of people all over the country." While the Exchange does not pass judgment on security prices, he noted, it does require listed companies to provide operating and financial information, and this he urged investors to study carefully. He praised employees, partners, brokers and specialists for their cooperation, which he said enabled the Exchange "to meet this great test of our facilities and to maintain a free and open market. In part, Mr. Martin said:

In making our plans to cope with whatever emergencies might arise at this time, we cooperated closely with officials in Washington, in the Treasury and in the Securities and Exchange Commission.

Our main concern has been to do everything possible to preserve for

the American economy the vital facilities necessary to maintain a free and open market for American securities. In this sense the New York Stock Exchange is simply a public servant—a national institution that exists to serve the needs of the American public.

The recent activity in our market merely reflected the fact that the advent of war in Europe has had varying effects upon American security owners all over the country. Some have decided to change their holdings into other issues in view of the changes which the situation in Europe may have on the prospects of certain types of businesses. Others, undoubtedly, have been influenced in their investment policy by the possibility that business enterprises in this country will receive orders South America and elsewhere-markets which normally were supplied by European countries. In as much as experience has shown that when important nations are at war unusual demands are placed upon the economies of nations not at war. And this has in turn resulted in advance orders to many important lines of American business.

Supplies are looking to their inventories and advance buying has been in evidence to some extent in many lines. Moreover, this has come at a time when the post-Labor Day business indices all point to a general business improvement. All of this has been in many ways reflected in

the shifting of securities and in the price of securities which reflect the

prospects of various lines of business.

I want to emphasize that the function of the New York Stock Exchange is to provide the facilities for a free, stable and orderly market for the exchange of securities of its listed companies. It is the earnest desire of the Exchange to give the buyers and sellers of these securities the assurance that their transactions will be handled efficiently in a well supervised

### Sugar Quotas Suspended in Effort to Curb War Price Boom—Tariff on Cuban Sugar Lifted—Puerto Ricans Seek End of Quotas on Domestic Output —Administration to Guard Against War Profiteering in Commodities

Commodity price rises resulting from the commencement of hostilities in Europe caused considerable concern in Washington this week, and studies of prices of various commodities, both farm and otherwise, were initiated at

the behest of President Roosevelt.

Temporary suspension of sugar import and domestic marketing quotas on Sept. 11 represented the only positive action taken to restrict price rises, and this was apparently done to discourage hoarding of this item by consumers. There is no actual shortage of sugar stocks, according to Department of Agriculture experts, but the persistence of hoarding has given rise to complaints on the part of con-sumers. The quotas might be revived, President Roosevelt said, "if such a step becomes necessary for the benefit of sugar producers." Press advices from Havana described the effect of the action on Cuban producers as "stunning." Under the quota low, the lifting of quotas forced the United States to impose a tariff of 11/2c. a pound on imports of sugar from Cuba, compared with a preferential rate of 9/10c. a pound previously. On Sept. 12, therefore, Secretary of Agriculture Wallace issued a proclamation raising the rate on Cuban sugar. The proclamation did not affect the regular rate of 1.871/2c. a pound on other foreign sugar, nor did it affect the free entry of sugar from United States possessions or the 850,000 long tons of sugar admitted duty free annually from the Philippine Islands.

The President issued a statement in explanation of his

suspension of sugar quotas, which follows:

I have issued a proclamation today temporarily suspending the market quotas on sugar as an emergency measure required under the provisions of the Sugar Act of 1937.

This suspension was made necessary by the increased world demand for sugar as a result of the outbreak of war in Europe, the extraordinary purchases of sugar by consumers, and the apparent speculative activity. Many consumers, presumably, have been purchasing sugar with the view of holding it in reserve against the possibility of a lengthy war, and some speculators and other holders have apparently taken advantage of this situation to advance prices rapidly and capture windfall profits.

The continuance of quota restrictions under the Sugar Act would, of

course, place a restraint on the marketing of sugar produced this year in the beet sugar producing States and in Louisiana and Florida. A great number of complaints have been made within the last few days that the quota restrictions on sugar marketing are making it difficult and costly for housewives and industrial users to get enough sugar to supply domestic

Sugar quotas first became effective in 1934 with the passage of the Jones-Costigan Act. Under peace-time conditions the quota system protected producers of sugar but made ample supplies of the product available at reasonable prices to consumers. Of necessity, however, the quota system meant certain restrictions. The suspension of quotas removes all these

It should be kept in mind that, under the law, the quotas may be reinstated if such a step becomes necessary for the welfare of sugar

It should also be noted that the domestic sugar producers will continue to receive payments under the 1939 conditions payment program now in effect. Producers will, of course, understand that under the provisions of the Sugar Act it should not be assumed that payments can be made with respect to future crops so long as quotas must be continued in suspension. Nor should anyone assume that increased acreage planted under the stimulus of war conditions can be made permanent for purposes of determining

Havana advices of Sept. 11 to the New York "Times" had the following to say concerning the removal of the

The prospect that Cuba must now compete with the United States domestic and insular producers is not pleasant, according to general opinion, and fears are expressed that the market will be seriously upset.

The automatic increase in the tariff owing to the provision which makes the tariff dependent on the quota system further handicaps Cuba in selling to the United States and leaves Cuba dependent on world markets. The Sugar Producers Association, which met this afternoon to decide on its future policy in relation to restrictive measures, new plantings and other questions, was thrown into considerable confusion upon receipt of a report that a proclamation was imminent.

The planters announced that they would consider themselves in permanent session until the situation was clarified.

Hope was expressed that the cancellation of quotas would be only tempo-

rary, in which case, while a drop in price could be expected, later adjustments would put the product on a firmer basis.

It was pointed out that a long war in Europe would, of course, solve the island's problem, but it was hardly expected that there would be any large demand for sugar during the next few months.

The President's remarks concerning the course of prices were reported as follows in Washington advices of Sept. 12 to the New York "Herald Tribune":

President Roosevelt reiterated today that he was carefully watching the course of prices for consumer goods and basic industrial commodities the view of taking some action to avert a recurrence of World War profiteering.

The President asserted, however, that the Government was not contem-

plating any new steps nov

As an example, he cited the fact that the Government was watching the price of copper. Everyone knew, he said, that an American copper producer could produce a lot of copper at a very nice profit at around 12c. a pound. He pointed out that during the World War copper touched a high of 28c. a pound.

The President declared that the taxpayer would pay for any abnormal increase in the price of commodities out of his pocket. Asked about price and profiteering, he replied that profiteering must be looked at

both from the production and retailing end.

He reminded his questioner that in any discussion of production, profits depended on the commodity. Mr. Roosevelt cited the price of cotton. The President said that the price of cotton ought to go up, and speaking of wheat, the question of parity must be considered, and added that the current quotation on wheat indicated that it was below parity.

Citing the Department of Agriculture parity, which he said was around \$1.15 or \$1.20, any rise of the price to parity, he asserted, would bring about only a small increase in the price of bread.

Both the Department of Justice and the Treasury would take an activities and the Treasury would take an activity.

Both the Department of Justice and the Treasury would take an active interest in the question of profiteering and the control of abnormally high prices, it was understood. Attorney General Frank Murphy was requested by the President to reexamine the profiteering statutes, while the Treasury will examine the taxation weapon.

The Puerto Rican Economic Committee was reported in the same advices as intending to act to prevent the restoration of quotas to domestic sugar production. The advices

The Puerto Rican Economic Committee announced that it was planning a move in conjunction with sugar producers in continental United States to insure the American housewife would not again be threatened with sugar shortage and soaring prices in the event of future crises, through forestalling any attempts to restore the sugar quota system to domestic production of sugar. Commenting on the President's suspension of the sugar quotas, the Puerto Rican Committee said:

"As a result of this suspension of the quota system, this United States possession is able immediately to supply an additional 300,000 tons of sugar to the domestic market. Had it not been for the quota system, Puerto Rica along with other United States producers would now have many more tons ready to go into the domestic market, and further forestall soaring prices. But due to the quota system 2,400,000 tons of cane equal to 300,000 tons of sugar were left standing in the field and unharvested.

"Partly as a result of this, the American housewife is now suffering through increased prices. This is a particular hardship, in view of the fact that this is now the canning season in the United States and sugar

is most in demand.

"In conjunction with sugar producers in Continental United States, we are preparing to make an intensive drive to see that any future Sugar Control Acts provide for unlimited domestic production."

### M. S. Eccles Sees Low Interest Rates Continuing

Marriner S. Eccles, Chairman of the Board of Governors of the Federal Reserve System expressed the belief Sept. 13 that all credit requirements that may arise because of the European war, can be met without increasing interest rates on bank loans, mortgages, and other borrowing.

His remarks were reported in Associated Press advices of Sept. 13, from Ogden, Utah, where he is vacationing, as

follows:

"In my opinion, he said, the country is assured of a supply of funds which is far more than adequate to meet every credit need that may be expected to arise as a result of the outbreak of war a broad." His statment continued:

Excess reserves of the banking system are now approximately \$5,000 .-000,000 and there is every prospect that this unprecedented volume will continue to increase. Fank deposits and currency in circulation are billions of dollars in excess of all past totals At no time have the great business and industrial organizations of the country had larger cash reserves on which they would be able to draw to finance a large expansion in their operations sary to borrow from the banks or the money markets.

"Several billion dollars of foreign funds are on deposit or under ear-mark, the expenditure of which would of course entail no borrowing or extension of credit but would increase existing deposits and excess reserves. The government is in a position today that it did not occupy in the past to assure ample supplies of credit on favorable terms to meet any demand.

both public and private, that is likely to arise in the future

"In view of these circumstances, there is no justification for anticipating the development of conditions due to war abroad that would lead to credit stringency and thus to higher interest rates on bank loans, mortgages and other borrowings. In other words, the great volume of excess funds in relation to potential borrowers assures the continuation of easy money indefinitely."

### C. E. Bennett Calls Upon Pennsylvania Bankers to Make Suggestions to Senate Committee Considering Monetary and Banking Policy

Pennsylvania bankers were adjured to take an active interest in the hearings to be held by the Senate Committee on Banking and Currency to consider and recommend "a national monetary and banking policy," in a letter addressed to them Sept. 1 by C. E. Bennett, President of the Pennsylvania Bankers Association. Mr. Bennett's letter read, in part:

It is my feeling that instead of either a negative or a defensive attitude toward these studies, the Federal- and State-chartered banks of Pennsylvania and of the Nation—particularly banks of smaller size should grasp this opportunity for presenting constructive suggestions on their own behalf. My hope is that the Pennsylvania Bankers Association shall be in the forefront of the effort to present to the Senate committee means of lessening and obviating certain practical difficulties now con-fronting banks of smaller size. The time is here to consider questions concerning administrative responsibilities of bank officers who because of new banking laws, new banking regulations and cross-purposes between Federal bureaus in relation to each other and to State banking departments, find themselves perplexed and to some extent dismayed.

As I travel about the State calling on the smaller banks especially, I find that they are wrestling under needless handicaps. Therefore, may I ask all interested bank officials in the State to write to Charles F. Zimmerman, Secretary, at Huntingdon (sending me a copy of the letter) expressing their views based on actual experience, in order that such views may be placed in combination with the views of others for presentation to the Senate committee. Should your response be sufficient, a special committee will be appointed to consider these practical questions and present specific suggestions to the Senate committee. Under no circumstances will the name of the bank, or of the official who writes to us, be revealed.

We will welcome an expression of your experiences and your views with reference to such questions for instance as your need for having interlocking directors, if any (to be outlawed Feb. 1, 1940); granting loans to inactive officers who are Board members; acceptance of stock of local corporations as collateral; Regulation F (trust funds) and examinations thereunder; mortgage accounting practices; restrictions in bond purchases; competitive methods of Federal savings and loan associations; and other rules and regulations which since 1933 have made it increasingly more difficult for us to render the sort of banking service to which the public is entitled.

A reference to the legislation passed by the Senate authorizing this study appeared in our issue of Aug. 12, page 959.

### W. G. Carey Declares Business Men Do Not Seek Profit from War

W. Gibson Carey Jr., President of the United States Chamber of Commerce, on Sept. 8, in a message to members of the Chamber on the European war, emphasized that business men are not desirous of "profit advantage through the wrecking of great cultural and spiritual values."

His message read:

At this moment, when another devastating European war is under way, I wish, as President of the Chamber of Commerce of the United States, to make the following statement:

We business men, as all others, are aghast at the prospect of slaughter and misery abroad. We wish no profit advantage through the wrecking of great cultural and spiritual values which have been built painfully and slowly through generations of thought and effort. We want peace in the world.

In order to fulfill our destiny nobly, we must solve our domestic problems. We are apt to forget that we ourselves are not at war and that, God willing, we shall avoid such a catastrophe. The essential thing is for us to build our national strength on self-discipline, productivity and good will. This is the time for maximum effort, great tolerance and fervent prayer.

I ask that the National Chamber's entire membership, consisting of State and local chambers of commerce, trade and industrial associations, companies and individuals, join with all other constructive groups in their communities and in their fields in an endeavor to bring about understanding. The genius of our country is in its people. It is in our capacity for representative government in our cities, counties and sovereign States, with a Federal administration of coordination. We must work assiduously to solve, to the maximum degree, such burning problems as unemployment and relief, labor relations, farm prices and taxes. Also, inasmuch as a strong national fiscal position is of such vital importance, it seems clear that everything possible should be done to persuade localities and States to cease demanding, or even accepting, unnecessary Federal funds.

I believe I am expressing the views of business men generally when I say that the course of action indicated will be in accord with our interests as a Nation, and that it will be welcomed by a Federal Government which will unquestionably have many pressing problems to solve. In this way, business improvement may be encouraged to the end that the return of men

to useful employment may continue.

I shall appreciate immensely being kept advised of your activity and progress. In any changing situation which may occur, the Chamber of Commerce of the United States is ready for service.

#### Department of Commerce Concentrating on Stimulation of Latin-American Trade, Edward J. Noble Tells Convention of Associated Coffee Industries of America—Meeting also Hears of Methods to Increase Use of Beverage in United States, and Legislation Which Would Have Adversely Affected the Trade

One of the most important goals of the Department of Commerce is the stimulation of trade with Latin America, Edward J. Noble, Under-Secretary of Commerce, said on Aug. 28 in an address before the Associated Coffee Industries of America in New York City. An address before the convention by George Gordon Paton, statistician of the New York Coffee and Sugar Exchange, was reported in the "Chronicle" of Sept. 2, page 1416. Mr. Noble in his remarks said that trade with Latin American countries with which the United States has negotiated trade agreements has increased much more sharply than that with other countries. He added, in part:

Under present conditions it is vitally important for the United States to increase its study of imports, particularly from Latin America. I have, by way of pointing out our keen interest in this current problem, mentioned the fact that this is an assignment of the executive staff. In addition, through the coordination of the commercial attaches with the consular offices under the Department of State into a consolidated Foreign Service, we hope to stimulate all our representatives to a full realization of our active interest in cultivating new import lines. Both the Department of State and the Department of Commerce look to a vastly improved service under this consolidation. We are going to look to our representatives in Latin America to serve us not only as promoters of our trade with Latin America but with renewed efforts to approach the whole question of stimulating Latin America's trade with us.

Coffee is peculiarly suited to a consideration of our commercial relations with the other American republics, since it is the largest single item of export from Latin America and is normally the most valuable single product imported by this country from Latin America. The United States annual coffee imports average over \$125,000,000 a year, and we buy all but a small portion of this from the Southern republics. The United States is not only the world's largest coffee market, but is also the only major market that is free, since all of the other important consuming nations

impose heavy import or excise taxes on coffee. All of the American republics having soils and climates suitable for coffee production share in the benefits of this great market. The fact that this market is always free and open is a double advantage in these uncertain times and in view of trade restrictions currently imposed by many European nations.

Guy M. Sharpe, Chairman of the Associated Coffee Industries of America, on Aug. 28 described the campaign which has been conducted in recent months to promote the consumption of coffee in the United States. From his address we quote:

In the legislative fields a number of bills have been introduced which would have been dangerous or inconvenient to the coffee trade. One, the Lake bill in New York, aimed at abuses not indulged in by the coffee trade, but applying to us because of the nature of our product. This bill we succeeded in having rewritten to protect coffee's interest. The other, the Flanner bill, which would have compelled the trade to label its product as to origin, we have watched from its introduction in Congress, but being sure it would fail of action at the past session we thought it best not to make formal protest, believing that such action should be withheld until it was needed and would have greater effect.

In the field of import standards, I have assumed the responsibility of not appointing the committee authorized at the last convention, on what I believed to be sound advice that the confusion created by the new labeling laws would make it entirely unlikely that any action could be expected from Washington during the year. A governmental reexamination of present standards remains a certainty, but present conditions have made the timing so uncertain that it would seem at the moment quite useless to have a committee functioning on the matter, especially since any agreements they might reach could have no certainty of being put into effect during the committee's life. It is a matter that needs to be closely watched, however, and it is my sincere hope and belief that when we are confronted with the problem, we will be able to solve it to the best interests of all branches of the trade.

During the year I have kept in close contact with the operation of the coffee promotion program. I've seen at first hand the difficult and tedious problems with which the committee has had to contend. It has been a source of great personal satisfaction to me to see the sincere and unselfish approach to this complicated problem evident in all the committee's work.

Approximately 40% of women use too little coffee to brew a good cup of the beverage, the convention was told on Aug. 29 by J. W. Millard, executive of Arthur Kudner, Inc., in connection with a nation-wide survey of coffee consumption and consumer attitude toward coffee. Summarizing the results of this study, the company said:

The survey was conducted among 5,000 housewives, with questioners proportioning their queries to population ratios in the various sections of the country; in addition, urban and rural ratios and income classifications were carefully observed in the conduct of the interviews in order to make the 5,000 interviews as accurate a reflection of actual national coffee habits as possible, Mr. Millard explained.

A wide variance in brewing methods was observed among those ques-

A wide variance in brewing methods was observed among those questioned, he said. Forty-six per cent use a percolator, 39% a drip pot, 11% the ordinary coffee pot, and 7% glass vacuum devices. Thirty-five per cent of those questioned measure the water used with a serving cup; 34% use a standard eight-ounce measuring cup, and 14% estimate by means of a marking on the brewing device. While their answers show that 40% of the women questioned use inadequate amounts of coffee to brew a satisfactory cup, few women would admit that they did not make good coffee, Mr. Millard said.

#### More Comprehensive Statistics on Distribution By Government Agencies Urged By Committee of Twentieth Century Fund

The Special Distribution Committee of the Twentieth Century Fund in a report made public on Aug. 30, recommends "the provision by government agencies of more comprehensive, accurate and promptly available statistics on distribution." Government agencies are urged to cooperate with educational institutions and private companies and agencies, in a general development and expansion of analytical studies of distribution costs, methods and results. In particular, the Committee believes, there is an acute need for the development of "improved methods of distribution cost accounting and analysis." The Committee also recommends the establishment of training courses for distributors in high schools and other educational institutions, and thinks there should be an organized effort to spread information about the hazards of retailing and the qualifications necessary for success in that field.

In making available the conclusions embodied in the report, the Twentieth Century Fund states that 8 national leaders especially concerned with distribution, but of widely differing interests and points of view have come to a unanimous agreement in making a series of recommendations to improve marketing methods in the United States. Their program for action is given in the final report of its Distribution Com-

mittee issued this week.

The first 10 chapters of the report—entitled Does Distribution Cost Too Much?"—present the factual findings in a comprehensive survey of the costs involved in American marketing methods. The final chapter contains the detailed suggestions for increased efficiency in the distributive system. The recommendations include:

A study of the feasibility of charging different prices for a single article, depending upon whether the sale is cash or charge, whether the customer takes the article or has it delivered and whether the article is kept or returned. The establishment of research institute in distribution, under independent

auspices and with a liberal endowment; and

The repeal of all laws which are designed merely to preserve, or to destroy, some special group in the distribution structure without regard for the general public interest.

Regarding the recommendations we also quote the following from announcement by the Twentieth Century Fund.

In the section of the recommendations dealing with legislation, the Committee urges the immediate repeal of all laws designed to preserve or destroy some special group in the distribution structure. Chain store tax laws are given as an outstanding example. The Committee opposes the use of legislation for such purposes and says that "attempts to freeze the structure already in existence, or to control the process of its development, or to tax certain types of distributors out of existence, or to give special governmental aid to others, are . attempts which cannot be justified, as a rule, on economic grounds."

Interstate barriers are condemned in a recommendation urging "the prompt repeal of all State legislation designed to discriminate against the products of other States and to restrict the free movement of goods between the States." The Committee calls for the "strengthening and more effective administration of existing laws designed to prevent and destroy private monopoly, to eliminate price fixing, and to prevent other monopolistic practices." Recognizing, however, that there are instances in which legal restrictions stand in the way of procedures that would result in lower distribution costs, the Committee recommends "Permission by appropriate government agencies, under specific statutory authority, for distributors to agree on the limitation of certain costly excesses in competition where the result will be to reduce the cost to the consumer.

These recommendations were formulated by the Fund's pecial Distribution Committee whose Chairman is Willard L. Thorp, Director of Research for Dun & Bradstreet and formerly Director of the Bureau of Foreign and Domestic Other members of the committee included the Commerce. following:

Stuart Chase, author, and former President of Consumer's Research. Alvin Dodd, President, American Management Association. John P. Frey, President, Metal Trades Department, American Federation

Carl L. Hamilton, of Booz, Fry, Allen & Hamilton.

Helen Hall, head of the Henry Street Settlement.
Hector Lazo, Executive Vice-President, Cooperative Food Distributors.
Paul H. Nyestrom, President, Limited Price Variety Chain Stores Association and Prof. of Marketing, Columbia University.

Robert G. Stewart, formerly Director, Standard Oil Co. of New Jersey.

These members of the Distribution Committee formulated and signed the recommendations without a single dissenting voice in is stated. The research report, which makes up the main body of "Does Distribution Cost Too Much?" was prepared by J. Frederic Dewhurst, Economist of the Fund, and Paul W. Stewart, who headed the special research staff. This report was dicussed in our issue of Aug. 12, page 963. The entire project was carried through with the active collaboration of Evans Clark, Executive Director of the Twentieth Century Fund. From an announcement bearing on the report the following is taken:

In working out its suggestions for improvements in the distribution system the Committee says it makes no attempt to blueprint an "imaginery, perfectly functioning planned economy" and doubts that we would want such a regimented system if we could have it. The Committee says: "We accept and adhere to certain social and political principls coming under the general terms of democracy and freedom of opportunity."

The Committee offers its suggestion of a sliding scale of prices for a single article with full recognition of the difficulties involved, especially for any one store that might try to institute the system alone, but the members believe the plan merits serious study. The proposal is included in a section of the recommendations dealing with the distribution system as it directly touches the consumer. In practice, the proposed plan would mean that a purchase paid for in cash, carried out of the store by the buyer and not returned, would cost less than if any or all of those services were required.

The Committee points out that the principle of differential charging is already followed by many manufacturers, and might well be applied to intermediary as well as retail trade. In another section of its recommendations, the Committee urges that appropriate governmental agencies give official authorization for such moves in cases where the net result will be to lower costs to the consumer

A report by the Committee on the costs of distribution of commodities was referred to in our issue of Aug. 12, page 963.

### New York State Chamber of Commerce Urges **Neutrality Act Changes**

The executive committee of the Chamber of Commerce of the State of New York, Sept. 12 urged President Roosevelt to call a special session of Congress to consider the repeal of certain provisions in the present Neutrality law which he

committee said in effect, put the United States "in the position of being, in fact, unneutral."

Commending the efforts of the President to keep the Nation out of war and the action of his Administration in strengthening national defenses, the committee in an interim report advocated making our sea and air forces "equal to those of any nation and our land forces capable of expansion to meet any emergency.

An announcement issued by the Chamber went on to say: The resolutions emphasized that the history of the United States as well as the history of all nations showed "the terrible penalties nations pay for being unprepared for war."

They pointed out that distance which in the past had been a great factor in our safety had been annihilated and urged the President and Congress to take every means to place this Nation in an impregnable position.

The resolutions also urged members of the Chamber, leaders in Congress and in labor unions and in all walks of life to lay aside partisan politics and personal interests and work together to asist the President in his efforts "to promote national safety and a sound foreign policy."

### Minimum Wage of 32½ Cents for the Textile Industry Approved by Administrator Andrews

Wage-Hour Administrator Elmer F. Andrews on Sept. 13 approved a 321/2 cents per hour minimum wage rate for the textile industry. The rate adopted is the one recommended by the textile industry committee but opposed by Southern interests. Mr. Andrews said he would make the wage rate effective Oct. 24.

Washington advices of Sept. 13 to the New York "Journal of Commerce" said:

It has been estimated that the Administrator's wage order, which is given the force of the law by the Act, will increase the hourly wage rates of approximately 175,000 of the 650,000 workers in the textile industry.

Mr. Andrew's action came in the face of vigorous opposition from Southern manufacturers, who have fought continuously for a wage differential content of the content of the

ential permitting lower wages to be paid in Southern mills than those in effect in the industry in the North.

Mr. Andrews' statement was as follows:

'I have decided to approve the recommendation of Industry Committee No. 1 for the textile industry and to make the minimum wage order based thereon effective Oct. 24. Industry Committee No. 1 recommended a minimum rate of 32½ cents an hour for this industry.

"Hearings were held on this recommendation in Washington and At-lanta, Ga., and I find that the recommendation was made in accordance with law, is suported by the evidence adduced at the hearings, and, taking into consideration the same factors as are required to be considered by the Industry Committee, will carry out the purposes of the Fair Labor Standards

"It appears that Oct. 24 will be a convenient date for placing this recommendation into effect. On this date the statutory minimum wage for all workers covered by the Fair Labor Standards Act, whatever their industry, changes from 25 cents an hour to 30 cents an hour. I am announcing my decision now in order to give the industry adequate time to adjust itself to the 32½ cents an hour minimum wage. My findings and order will be issued at least five days in advance of Oct. 24.

A reference to hearings on the minimum wage appeared in these columns of July 22, page 499.

### Bendix Strike Settled

The strike at the Bendix Products Corp. plant at South Bend, Ind., was settled Sept. 11 after 10 days. As a result 19,000 men, employed at the Bendix plant and other plants forced to shut down because of the Bendix strike, resumed work. South Bend advices on Sept. 11 to the United Press said:

The strike was called at the Bendix plant by Local No. 9 of the United Automobile Workers' Union, affiliate of the Congress of Industrial Organizations, in demand for settlement of grievances and a contract. It had kept

the plant idle since Aug. 31, affecting 3,000 men.

As a result, plants of Nash-Kelvinator Corporation subsidiaries at Milwaukee and Kenosha and the Packard Motor Car Company at Detroit

halted production because parts, furnished by Bendix, were exhausted. Bendix said its 3,000 employees returned to work Sept. 11. Appr mately 3,500 affected by the strike at Kenosha, 2,800 at Milwaukee and 10,000 at Detroit will return as soon as their plants can obtain supplies.

The settlement was reached Sept. 10 after union leaders and Bendix

officials had conferred for 24 hours with Thomas Dewey and M. E. Sherman, Federal conciliators, and Lester Towner, state conciliator. Members of the local ratified the agreement Sept. 10.

Union and company officials declined to reveal the provisions of the

settlement. It was reported that the company had agreed to a one-year contract providing one-week vacations with pay and seniority rights.

A previous reference to the Bendix strike appeared in our ssued of Sept. 9, page 1566.

### Financial Advertisers Association Convention Hears Guy W. Cooke, G. O. Everett and S. H. Fifield

Guy W. Cooke, addressing the convention of the Financial Advertisers Association on Sept. 11, drew attention to the amity existing between the United States and Canada saying "we have much in concord, little in conflict." Noting that cooperation among its members has been the key note of the Financial Advertisers Association he added:

The spirit of cooperation which has always actuated the association is xemplified not only in its membership, but also by contacts with other financial organizations. Association interest and helpfulness do not end with its members. Our facilities have long been extended to others almost without stint and always without price. This policy has enabled many to ride without fee, but has brought, with no touch of resentment, a full measure of satisfaction. Service to those who profit at the expense of those who pay dues is an association contribution to the very aims we seek to further. Good bank advertising benefits not only the bank which sponsors it, but also all banking within its sphere. Good public relations developed by one financial institution are favorable to all. The better quality of financial advertising, with continued and constructive efforts toward better public relations, is a measure of results. The association has its reward in developing a clearer conception and broader use of financial facilities to bring a higher stand of living to more and more people.

George O. Everett, retiring president of the association told the convention Sept. 11 of benefits to be derived by banks from holding meetings of officers featuring the importance of public relations. He said:

Your officers, other than the top-flight ones are probably totally unaware of the deep importance of public relations. Furthermore, they probably we some excellent and untried ideas on public relations. folly to ask them?

On Sept. 14, Stephen H. Fifield, newly elected president of the association, in a speech at the annual banquet of the convention said:

I know this group has heard over and over again the statement "that because of the American system of free enterprise, America has advanced more in the last 150 years than Europe has advanced in the last 1,000 years." We have heard this statement many times, but many of our bankers, I'm afraid, do not yet take it seriously, and even if they do, they have not yet made it plain to the banking public that to do away with the American system of free enterprise would be to affect seriously their personal liberty—the right to own property—freedom of speech—freedom of press or any of the other freedoms that we have all known and enjoyed so long, in this country. It is up to us public relations men and women to continue to tell the story, and by so doing we will help to insure that these rights will not seriously be abridged.

The convention was held at Toronto, Canada Sept. 11 to 14. It was attended by several hundred advertising executives of banks in the United States and Canada.

### Dr. Beckhart and A. W. Newton Address Convention of Sales Finance Companies

Dr. B. H. Beckhart, Secretary of the Board of Trustees of the Banking Research Fund of the Association of Reserve City Bankers, selected "The Bankers Interest in Research" as the topic of a talk delivered at the convention of Sales Finance Companies, held at the Pennsylvania Hotel in New York City Spanies, York City, Sept. 14. Because of the war, he said, the prob-lem of controlling business expansion and speculative activity will become more important than that of stimulating business

His remarks continued as follows:

After tracing the course of general research through the years, Dr. Beckhart pointed out its importance in the social sciences including the study of economics. This brought him to a discussion of the research activities of the Association of Reserve City Bankers. He stated that in February of 1938, \$100,000 had been set aside for the study of Consumer Credit and Installment Financing which is still in progress. He is of the opinion that until hostilities in Europe cease the pattern of

economic change will bear many similarities to that of 1915-16. Business will increase sharply, he stated. Call loans will rise. Increase in commodity prices will occur and long term rates of interest will rise, although

they will lag behind the commodity prices.

Arthur W. Newton, Vice-President of the First National Bank of Chicago, told the convention that he did not believe that earnings of finance companies will ever reach the heights they have occasionally reached in the past, and notably in Continuing:

He included in his talk some notes that he had written before the out-break of hostilities in Europe. "If there were a war," he said, "the higher prices of commodities which would almost certainly ensue would have a stiffening effect on interest rates, and if we were to get into the war ourselves I think that rates would rise very rapidly." He recommended diversification of business for finance companies stating that he noted with in-terest the inclusion of the small loan business which had been undertaken by several of the automobile finance companies.

### American Red Cross to Aid Victims of European War —Expenditures in France and Poland

National headquarters of the American Red Cross have announced that chapters in 21 cities have enrolled to make surgical dressings for civilian victims and hospitals in European war zones. The Red Cross also announced that \$50,000 would be expended for hospital tents, drugs and blankets to be shipped to Poland and that \$25,000 had been advanced to the American Hospital in Paris to meet emergracy demands exceed by the conflict gency demands created by the conflict.

United Press, Washington advices of Sept. 9 went on to say:

"The shipment of supplies for the Polish Red Cross is being rushed in order to meet the grave needs of the injured and sick," it was announced. Norman H. Davis, Chairman of the Red Cross, said that chapters throughout the United States would receive contributions from persons desiring to aid the victims of the European conflict. No nation-wide solicitation is contemplated at this time, however.

The \$25,000 grant will be used to evacuate American patients from the

hospital in Paris to new quarters at Etretat, on the French coast, and for

the purchase of a 100-bed hospital unit.

Under an agreement with the French Government, the Red Cross explained, the American Hospital had been designated by the French medical service as a base hospital for wounded soldiers.

### Issuance of Final 1939 Edition of Rand McNally Bankers Directory

The final 1939 edition of the Rand McNally Bankers Directory, up-to-date as of August, with complete national and international banking and financial information, was issued on Sept. 11. Accurate as to every bank's latest statement, official personnel, directors and correspondents, the final 1939 edition takes care of all bank changes this past year—changes which continue to take place on an average of about 41 a month—new banks, discontinued banks (closings, mergers, absorptions, changes in title, location, etc.). The announcement bearing on the new location, etc.). directory added:

Two lists, revised and added to, are of especial interest to bankers, 1—a list of the nearest banking points to non-bank towns, and 2—a 5-year list of discontinued bank titles, (closings, mergers, absorptions, etc.).

All general information has been revised and added to as of August, 1939—F. D. I. C. status of banks; all Government banking agencies, location and personnel are listed; bank associations; selected list of investment dealers and a list of commercial banks with total resources of vestment dealers and a list of commercial banks with total resources of \$25,000,000 and over. A list of attorneys for every county in the United States, Province of Canada and principal foreign cities goes with the final 1939 edition "Blue Book."

Foreign bank information is also brought up-to-date and the latest Rand McNally maps of foreign countries will be of great interest to users of the final 1939 edition "Blue Book."

This edition totals 2,390 pages of accurate up-to-the-minute vital financial information which will make bank operation easier, more efficient and profitable.

Cloth bound \$15 a copy delivered.

### Inter-American Conference to Consider Neutrality Sumner Welles to Represent United States

Twenty-one American republics will be represented at the conference to be held at Panama City Sept. 23 to consider problems arising from the European war and their effect on nations of the Western Hemisphere.

The date was revealed in cablegrams sent by Panama's Foreign Minister, Narciso Garay to the other 20 American republics which will be represented. According to United Press advices of Sept. 13, from Panama City: The conference rules will be virtually the same as those in force at the

Inter-American Conference for the Maintenance of Peace held in Buenos Aires in 1936 and the Pan-American Conference held last year in Lima.

Jose Ramon Rodriguez, Minister of Foreign Affairs of the Dominican Republic and that country's delegate, arrived today on the Panama liner Cristobal, the first delegate to come to the conference.

The United States will be represented at the conference, the State Department has announced, by Sumner Welles, Under-Secretary of State; Dr. Warren Kelchner, acting chief of the Division of International Conferences; Edwin C. Wilson, formerly counselor of the United States Embassy in Paris and Minister-Designate to Uruguay; Dr. Marjory M. Whiteman, assistant to the legal adviser of the Department of State; Dr. Herbert Feis, international economic adviser to the Department.

Mr. Welles was named as the United States delegate, and

the others were listed as advisers.

The delegation was scheduled to sail on the Santa Clara Sept. 15.

Subjects to be discussed at the conference were listed in Washington advices of Sept. 12 to the New York "Times," as follows:

#### I. Neutrality

Consideration of the rights and duties of neutrals and belligerents in the present situation with a view to the preservation of the integral sovereignty and the peace of the nations of the Western Hemisphere.

Steps to be taken in common or individually:

To suppress violations of neutrality and subversive activities by nationals of belligerent countries or others seeking to promote the interests of belligerent powers in the territory and jurisdiction of any of the American

2. To enforce the obligations of belligerent public and merchant vessels and aircraft in neutral territorial waters and area

To safeguard the carrying on of legitimate international trade, com-merce and communications of the American republics on the high seas, on land and in the air.

4. To discharge neutral obligations toward belligerent nations.

#### II. Protection of Peace of the Western Hemisphere

Consideration of measures to preserve the American continent free from conflict, whether on land, in the air, within territorial waters or within the area of the primary defense of the Western Hemisphere.

#### III. Economic Cooperation

Consideration of measures to safeguard in the present situation the economic and financial stability of the American republics. Such measures

A. Measures to preserve commercial and financial interests of the American republics

B. Continuation and expansion of long-term programs for commercial and economic cooperation among the American republics.

A previous reference to the parley appeared in these columns Sept. 9, page 1552.

### Duke of Windsor Returns to England—Former King's Exile Ended

The Duke of Windsor, formerly King Edward VIII of Great Britain and his Duchess for whom he abdicated the throne Dec. 10, 1936, returned to England Sept. 13 after having lived abroad, in virtual exile, since he abandoned the throne. A statement handed to reporters indicated briefly

that he would take up a war appointment.

The abdication of Edward VIII was noted in our issue of

Dec. 12, 1936, page 3762.

### Sir Herbert Marler, Canadian Minister to United States Resigns

The resignation of Sir Herbert Marler, Canadian Minister in Washington since 1936, was announced to the House of Commons Sept. 11 by Prime Minister Mackenzie King, according to an Associated Press report from Ottawa.

successor is expected to be appointed shortly.

A former cabinet officer, Sir Herbert became Canada's first minister to Japan in 1929. He presented his credentials to President Roosevelt a few months after conclusion of the reciprocal trade pact between the United States and Canada.

### J. F. Twohy Appointed Governor of Federal Home Loan Bank System

The Federal Home Loan Bank Board announced on Sept. 8 the appointment of James F. Twohy of San Francisco as Governor of the Federal Home Loan Bank System, to fill the vacancy caused by the resignation of Preston Delano, now Comptroller of the Currency.

Following service in Washington headquarters as head of the mortgage rehabilitation division, Mr. Twohy has been in charge of the operations of the Home Owners' Loan Corporation as regional manager for the group of States on the Pacific Coast and the Pacific Northwest since 1935.

#### Dr. R. E. Wilson to Receive Chemical Industry Medal Valuable Application of Chemical to Industry

The Chemical Industry Medal of the Society of Chemical Industry will be presented to Dr. Robert E. Wilson, President of Pan-American Petroleum & Transport Co., at a joint meeting of the American section of the Society of Chemical Industry and the American Chemical Society on Nov. 10, with Dr. Wallace P. Cohoe presiding. The medal is awarded annually for valuable application of chemical research to industry and will be given this year to Dr.

Wilson in recognition of his research studies on such varied subjects as flow of fluids, oiliness, corrosion, motor fuel volatility, clay and glue plasticity, and humidity, and in recognition of his industrial contributions in the use of tetraethyl lead, petroleum hydrocarbon cracking, and adoption of chemical engineering engineering engineering tion of chemical engineering principles by the oil industry. The meeting will be held at the Chemists' Club, 52 East 41st Street, New York City.

### Albanian Consulate General in New York Merged with Italian

The Merchants' Association of New York recently announced that the Albanian Consulate General in New York has been consolidated with the Italian Consulate General, 626 Fifth Avenue, New York City, and the same requirements for certificates of origin now apply as for Italy.

This cancels notice of August, 1938, concerning consular documents required for Albania.

### Committee Organized to Advise Secretary Morgenthau on Credits to Warring Nations

John W. Hanes, Undersecretary of the Treasury, announced Sept. 9, that an advisory committee had been established to work on problems relating to ordinary commercial credits and short-term loans to foreign countries under the neutrality law.

The committee consists of Mr. Hanes as Chairman; Adolph Berle, Assistant Secretary of State; Herbert Feis, adviser on international economic affairs for the State Department, and James W. Young, Director of the Bureau of Domestic and Foreign Commerce.

Mr. Hanes is reported to have said:

It will be my desire that the Treasury will administer the provisions under Section 3 of the Neutrality Act with the least possible disturbance to ordinary legal transactions customarily used in normal peace-time business. This follows directly Secretary Morgenthau's wish that we continue on the basis of business as usual.

In our issue of Sept. 9, page 1559, we gave the text of the regulation issued by President Roosevelt making possible credits to belligerents.

#### Railway Business Association to Hold 31st Annual Dinner in Chicago Nov. 9

The 31st annual dinner of the Railway Business Association will be held at the Stevens Hotel, Chicago, on Nov. 9. It is expected that the total attendance will be about 1,500. The members of the Railway Business Association will entertain as their guests the presidents and other leading executives of all the principal railway systems.

### Machine Tool Show Canceled-Was to Be Held in Cleveland Oct. 4-13

The members of the National Machine Tool Builders' Association have decided to postpone indefinitely the Machine Tool Show which was to have been held at Cleveland Oct. 4 to 13, in view of the outbreak of war in Europe. This also involves the postponement of the Machine Tool Congress, a series of meetings which were sponsored by a group of nine engineering and technical societies, and which were to have been held during the Machine Tool Show. Regarding this cancellation Mr. Whipp, President of the Association, said:

The members of the association feel that the greatest contribution the industry can make to the welfare of the nation at this time is to concentrate their entire efforts on the production of the greatest possible number of machine tools. Under the circumstances, the industry and its customers cannot afford the time of their key men for a Machine Tool Show, and postponement is felt to be the wisest course.

### Presidents of Federal Home Loan Banks to Confer in Washington Next Week

The semi-annual fall conference of the 12 Federal Home Loan Bank Presidents will be held in Washington the week of Sept. 18, officials of the Federal Home Loan Bank Board announced Sept. 9. Among the broad subjects to be discussed by the conference are:

Federal Home Loan Bank investment policies; the interest rate on long and short-term advances by the banks to member institutions; savings and loan dividend rates; promotion, advertising, and public relations; amendments to regulations; extension of the Federal Home Building Service Plan as a prime means of bringing about better residential construction; and general economic conditions

The fact that the conference discussions are scheduled to continue for six days, whereas formerly they were for only three or four days, is indicative of the extensive develop-ments in the fields of home financing and residential construction in the last few months, Board officials said.

It was also announced that the autumn meeting of the Federal Savings and Loan Advisory Council will open in Washington on Oct. 2. The Council, acting as spokesman for the 3,950 member institutions of the Bank System, is composed of 18 representatives of member savings and loan associations or other business leaders of the bank districts.

### Treasury Representatives from 21 American Republics to Meet at Guatemala City on Nov. 13

Financial experts from the 21 American republics will meet at Guatemala City on Nov. 13 to discuss the possibility

of closer inter-American cooperation in the fields of monetary, foreign exchange, and banking policy, it was recently announced in Washington by the Pan-American Union. According to the official program of the first meeting of Treasury representatives of the American republics, the forthcoming conference "has as its object the exchange of impressions and viewpoints on the various economic problems of the continent, in addition to making known the experience gained during the decade from 1929 to 1939 in the field of Treasury activities by each country represented, particularly as regards monetary, foreign exchange, and banking matters." "The purpose of the conversations," according to the Pan-American Union announcement, "will be to define the possibility of closer cooperation between the American republics, and to indicate the topics to be considered in succeeding conferences."

Topics slated for discussion at Guatemala City include: Experiences regarding the monetary standard and its influence in the national and international economy of the American countries.

2. Possibility of currency stabilization, on a gold standard, as support for an inter-American economic policy.

3. Methods of putting into effect the principles, declarations, and recommendations adopted by the Montevideo, Buenos Aires, and Lima Conferences, on the elimination of restrictions and limitations imposed on inter-American trade.

4. Policy of central banks and their relations to the State.

 Desirability of a closer cooperation and contact between central banks, both in financial matters and in the furnishing of information on the economic, commercial, and monetary situation, and on bills, laws, decrees, and regulations affecting imports, exports, and the movement of capital.

6. Increase and extension of credit, in its different aspects.

### Cotton Referendum to Be Held Dec. 9, Secretary Wallace Announces

Secretary of Agriculture Wallace announced yesterday (Sept. 15) that the Department of Agriculture would hold a farmer referendum on Dec. 9 on a proposal to invoke market-ing quotas on the 1940 cotton crop. Washington Associated Press advices of Sept. 15 also said:

If approved, this would be the third consecutive year of the imposition of marketing restrictions to keep surplus cotton off the market.

Mr. Wallace said that a quota election was mandatory under terms of the 1938 crop control act because of the existence of a record surplus.

More than 2,000,000 farmers throughout the South and Far West will be eligible to vote.

### Symposium on Trust Investments to Feature A. B. A. Mid-Continent Conference to Be Held in Chicago

A symposium on trust investments will feature the 10th Mid-Continent Trust Conference of the American Bankers Association, to be held at the Stevens Hotel in Chicago, on Association, to be held at the Stevens Hotel in Chicago, on Oct. 26 and 27, according to the program for the conference announced by Samuel C. Waugh, President of the Trust Division of the A. B. A. and Executive President and Trust Officer of the First Trust Co., Lincoln, Neb. The role of Government bonds, municipal bonds, corporate first mortgage bonds, debenture bonds, real estate mortgages, preferred stocks, and common stocks in trust-investment portfolios will be covered by experienced trust-department in folios will be covered by experienced trust-department investment officers participating in the symposium which will be held on Oct. 27. A question-box period on Problems in Trust Law will be held at the concluding session Oct. 27, and will be led by Professor George G. Bogert of the University of Chicago Law School.

The program has been developed to provide discussions of practical interest to the executives of the smaller and average-sized trust institutions throughout the territory, Mr. Waugh

A banquet will be held on the evening of Oct. 26, and will be addressed by Ernest E. Norris, President of the Southern Railway Co., of Washington, D. C.

# Investment Bankers to Consider Broad National Problems at Annual Convention in Del Monte, Calif., Oct. 9-13

Broad national problems will prevail over subjects relating strictly to the internal operations of the investment banking business on the 1939 convention program of the Investment Bankers Association of America. This was disclosed Sept. 11 Bankers Association of America. when preliminary details of plans for the meeting to be held Oct. 9-13, in Del Monte, Calif., were announced by Jean C. Witter of Dean Witter & Co., San Francisco, President of the Association.

Economists and educators, authorities on such subjects as industrial relations, political science, and the financing of municipal projects are prominent on the still incomplete schedule of speakers. The "Presidential Address" with which Mr. Witter will open the convention on Oct. 9, will be the only instance where a "man from the business" appears as a principal speaker. From the Association's announcement we also quote:

Among the guest speakers so far announced are: Lionel D. Edie, consult-Among the guest speakers so far amounted are Lioner D. Edde, consulting economist of New York; James Lynn Beebe of the law firm of O'Melveny, Tuller & Myers of Los Angeles; Almon E. Roth, President of the San Francisco Waterfront Employers Association, and Everett Dean Martin, professor of social philosophy at Claremont Colleges, Claremont, Calif., and for many years director and head of the department of social philosophy of Cooper Union Forum in New York.

On three days of the convention there will be forum type programs, in which one or more authorities will present a subject and then participate

with the audience in a general discussion that follows. The first of these on Oct. 10, will be on the subject, "Private Enterprise in America." The speakers will be Dr. Martin, who will talk on "Conflicting Philosophies of Government Today," and Dr. Edie, whose subject will be private versus socialistic financing of enterprise. This forum will be led by Francis E. Frothingham of Coffin & Burr, Inc., Boston, a former President of the

A forum on industrial relations scheduled for Oct. 12, will be presided over by Roy L. Shurtleff of Blyth & Co., Inc., San Francisco, Chairman of the Association's Industrial Securities Committee. The speaker will be be Mr. Roth who will discuss the role of employers' associations in labor difficulties in the light of the experience of the Pacific Coast in the shipping

The fast growing practice of financing municipal government projects through the issuance of "revenue bonds," payable out of income to be derived from the undertaking, will be discussed at a forum on Oct. 11, that will be conducted by John S. Clark of Fahey, Clark & Co., Cleveland, Chairman of the Association's Municipal Securities Committee. Mr. Beebe will address the forum on the subject, "Intelligent Control of the Issuance of Revenue bonds." Revenue bonds.

As customary, the Association's standing committees, several of which conduct research in their respective fields throughout the year, will make the results of their surveys public during the convention.

Previous reference to the plans for the meeting, regarding special train facilities, was made in our issue of Aug. 12, page 967.

### \$4,464,526 in Dividends Paid to Treasury and HOLC in First Half of 1939 from Investments in Shares of Association Members of FHLBS

Dividends amounting to \$4,464,526 were received during the first half of 1939 by the United States Treasury and the Home Owners' Loan Corporation from their investments in shares of 1,400 savings, building and loan association members of the Federal Home Loan Bank System, officials announced Aug. 26. This, it is stated, brings the total dividends to the Government from this source to \$27,522,204 since the investments were authorized by Congress in 1934. The dividend rates averaged approximately 3½%. The announcement by the Federal Home Loan Bank Board went on to say:

The Government was authorized to invest up to \$350,000,000 in these associations to make available a greater volume of funds for home financing purposes. On June 30 last the HOLO investment stood at \$216,458,810, and that of the Treasury at \$43,991,700. The latter's commitments—limited by law to \$50,000,000—were confined to Federal-chartered associations, while the HOLC could invest in both Federal and State-chartered member institutions.

Nearly \$113,000,000 in dividends have been declared by Federal associations since their establishment was authorized six years ago, \$89,246,300 to private investors and \$23,875,203 to the Government.

### Liquidation of 20 Receiverships of National Banks Completed During August

Preston Delano, Comptroller of the Currency, announced on Sept. 12 that during August, the liquidation of 20 receiverships was completed and the affairs thereof finally closed. This makes a total of 1,353 receiverships finally closed or restored to solvency since the Banking Holiday of March, 1933. It was further reported in the Comptroller's announcement:

Total disbursements, including offsets allowed, to depositors and other creditors of these 1,353 receiverships, exclusive of the 42 restored to solvency, aggregated \$605,456,497, or an average return of 81.18% of total liabilities, while unsecured creditors received dividends amo an average of 68.33% of their claims.

Dividends distributed to creditors of all active receiverships during the month of August, 1939, amounted to \$1,440,264. Total dividends paid and distributions to depositors of all receiverships from March 16, 1933, to Aug. 31, 1939, amounted to \$947,790,343. Data as to results of liquidation of receiverships finally closed during the month are as follows:

### ITEMS ABOUT BANKS, TRUST COMPANIES, &c.

At a meeting of the Board of Trustees of the Irving Savings Bank, New York City, held on Sept. 12, Irving S. Whiting was elected a Trustee. Mr. Whiting is a member of the real estate firm of William H. Whiting and Co. of this city. He is Chairman of the Appraisal Committee of the New York Real Estate Board, Chairman of the Finance Committee of the Bound Brook Trust Co., Bound Brook, N. J., and a trustee of the Real Estate Securities Exchange of New York.

Robert A. Barnet, President, also announced the appointment of John H. Hammett as an Assistant Secretary of the

Daniel F. O'Meara, President of the New York Chapter of the American Institute of Banking, and Assistant Vice-President of the Public National Bank and Trust Co., New York City, announces that on Sept. 18, the New York Chap-ter, with headquarters in the Woolworth Building, begins its 40th year of service with classes commencing the following week.

Six new courses have been added to the Chapter's program this year, making a total of 50 courses in banking, investments, and finance. The new subjects include: Auditing with Howell A. Inghram, Assistant Professor of Accounting, School of Business, Columbia University; Personal Efficiency in Business led by J. Stanley Brown, Personnel Director, Chemical Bank & Trust Co.; Logic taught by Doushan Lazarovich of the Guaranty Trust Co.; Savings Bank Life Insurance led by Everett N. Hatch, Executive Secretary, Savings Bank Life Insurance Council; Debate led by Robert L. Sheppard, Professor of Speech, St. John's University; and *Public Utility Security Analysis* taught by Alan W. Hastings, Vice-President, Engineers Public Service The Graduate work of the Chapter has been augmented by another field of specialized study in Savings Banking which increases the Graduate Study programs to three, the other two being in Credits and Commercial Banking.

The Chapter faculty embraces 88 instructors this year and a fall registration in excess of 3,500 students is anticinated.

Arrangements were made Sept. 12 for the transfer of two New York Stock Exchange memberships at \$65,000. previous transaction was \$65,000 on September 5, 1939.

The Comptroller of the Currency announced on Sept. 9 that the fourth regular dividend payment to the receivers of the insolvent Harriman National Bank & Trust Co. of New York City was authorized on Sept. 2. The amount authorized for payment was \$1,649,300, representing 10% of \$16,493,100 in proved claims, and will be distributed to 9.862 claimants.

At a meeting of the Board of Directors of the Chemical Bank & Trust Co., New York, on Sept. 14, Frank I. Curry, formerly manager of the bank's office at Tenth Avenue and 23d Street, was appointed an Assistant Secretary and transferred to the Waldorf Astoria office; John L. Brenner, formerly assistant manager at Tenth Avenue and 23d Street, was appointed manager of that office to succeed Mr. Curry. John H. Pfeiffer, assistant manager, was transferred from the Waldorf Astoria office to the Tenth Avenue and 23d Street office.

William Heimann, one of the organizers of the Woodside National Bank, Woodside, Queens, N. Y., and its President for the last 10 years, died on Sept. 2 at his home in Wood-side. He was 79 years old. Mr. Heimann was President of the Woodside Sewer & Construction Co., and also headed the Woodside Construction Co.

Frank M. Potts, formerly Assistant Cashier and Assistant Secretary of the Midland Bank of Midland, Pa., was elected Cashier and Secretary of the institution at a recent meeting of the directors to succeed the late Fred G. Bruce, it is learned from "Money & Commerce" of Sept. 9, which also stated that Harold C. O'Brien, heretofore Teller, had been promoted to Assistant Cashier and Assistant Secretary.

G. Fred Berger, Chairman of the Trust Company Section of the Pennsylvania Bankers Association, announced on Sept. 5 the appointment of the Chairmen of the Group's As given in the Philadelphia "Inquirer" committees. Sept. 6, they are:

G. Fred Berger, Chairman of Trust Company Section, Pennsylvania Bankers Association, yesterday announced the appointment of the following Chairmen of the group's committees.

Trust Investments, Frank G. Sayre, Vice-President, Pennsylvania Company For Insurances On Lives & Granting Annuities.

Common Trust Funds, Gwillym A. Price, Vice-President, Peoples-

Pittsburgh Trust Co. Cost and Charges, W. Elbridge Brown, Vice-President, Clearfield Trust

Mortgage Investment Funds, G. Fred Berger, Treasurer, Norristown-Penn Trust Co.

Manuel for Trust Department Operation, Malvin F. Gatalder, Vice-

President, First National Bank, Williamport.

Samuel Haydock Barker, former President of the Bankers Trust Co. of Philadelphia, Pa., and retired financial consultant, died at his home in Roxborough (Philadelphia) on Sept. 13 after a long illness. The deceased banker, who was 67 years old, was born in Wyncote, Pa., and was graduated from the University of Pennsylvania in 1889. The following year he began his business career as a clerk in a banking firm. Ten years later he joined the staff of the Philadelphia North American as a raporter and became Financial Editor of the paper in 1907, a position he held until 1926. Shortly thereafter, he reentered the commercial banking field becoming President in January, 1927 of the Bankers Trust Co., a new institution, of which he was one of the organizers. After the closing of the trust company in December, 1930, Mr. Barker continued in the banking field as a financial consultant.

Alfred E. Wilson, for the past ten years Secretary-Treasurer of the First Bank Stock Corp., was recently elected a Vice-President and Vice-Chairman of the Trust Committee of the First National Bank & Trust Co. of Minneapolis, Minn., to succeed the lat? B. V. Moore. In noting his appointment, the "Commercial West" of recent date further said in part:

Born and educated at Edinburgh, Scotland, Mr. Wilson came to the United States at the age of 16, and in July, 1906, entered the employ of the Security Bank, predecessor of the Security National of Minneapolis, as messenger. When the bank consolidated with the First National in 1915 he became Auditor, and in 1919 he resigned to become manager of a certified public accountants firm in Minneapolis. Three years later he returned to the bank as assistant comptroller, and in 1929 he was elected assistant treasurer First Bank Stock Investment Co., predecessor of First Bank Stock.

Advices from Miles City, Mont., printed in the "Commercial West" of Sept. 9, reported that the First National Bank in Miles City and the Bank of Miles City had been merged at the close of business Sept. 2, when the former institution absorbed the latter. M. J. Flinn, formerly Cashier of the Bank of Miles City, has been named a Vice-President of the enlarged First National Bank in Miles City. We quote the dispatch in part:

The First National is an affiliate of First Bank Stock Corp., which, like Northwest Bancorporation, owns a controlling interest in a number of banks in the Ninth Federal Reserve District, including several in Montana. Total resources of the bank at the opening of business Sept. 5 were \$2,216,052 and deposits were \$1,997,474. Other officers are Claude M. Jones, President; H. F. Lee, Vice-President; W. H. Williams, Cashier; George A. Anderson, Assistant Cashier.

According to the San Francisco "Chronicle" of Sept. 8, the California Group, Investment Bankers' Association of America, at its annual meeting on Sept. 7, elected Harvey Roney of Mitchum, Tully & Co., Los Angeles, Chairman for the ensuing year; A. E. Ponting of Blyth & Co., Inc., San Francisco, Vice-Chairman; and re-elected D. W. Chapman of the American Trust Co., San Francisco, Secretary-Treasurer.

In addition to the foregoing, the following were elected to the executive committee for a period of three years: Robert D. Cavanaugh, Cavanaugh, Morgan & Co., Los Angeles; Theodore C. Coleman, Banks, Huntley & Co., Los Angeles; Robert F. Mulvany, Irving, Lundborg & Co., San Francisco; H. P. Schlemmer, William Cavalier & Co., San Francisco.

William H. Schroeder, Junior Vice-President of the Citizens National Trust & Savings Bank of Los Angeles, Calif., celebrated his 30th anniversary with that institution on Sept. 9. He entered the employ of the bank as a messenger. Today, in charge of the bank's Foreign Exchange department, he is also prominent in other Los Angeles foreign trade circles. He is President of the Foreign Trade Association of Southern California, a member of the Chamber of Commerce and also of its foreign commerce and shipping committees, the Bank Association for Foreign Trade, and of the Propellor Club, Los Angeles Port.

Leon Sloss Jr., a Vice-President for many years of the Anglo-California National Bank, San Francisco, Calif., has resigned, it was announced on Sept. 5, following the acceptance of his resignation by the Executive Committee of the institution. The San Francisco "Chronicle" of Sept. 6, from which this is learned, added:

The acceptance was accompanied by a statement of regret from President W. H. Thompson. Mr. Sloss, member of a pioneer California family, plans to go into the automobile distribution business in Oakland with J. L. Glikbarg.

Albert Maclaren, President of the Maclaren Power & Paper Co., has been elected a director of the Bank of Nova Scotia (general office Toronto, Canada).

### THE CURB MARKET

Advances over a broad list were registered on the Curb market during the fore part of the week but the price movements were somewhat mixed on Tuesday due to profit-taking, and as the volume of transfers declined, the upswing was less pronounced. Industrial specialties were in brisk demand on Monday but the buying interest fell off as the week progressed. Aviation shares registered small gains at times and there was a moderate amount of activity apparent among the aluminum stocks. Shipbuilding issues were irregular, mining and metal stocks attracted some buying and so did the textile shares. Oil issues were practically unchanged and the steel stocks were down, although good gains were recorded in the early part of the week.

Under the leadership of the industrial shares Curb stocks moved briskly forward during the brief session of trading on Saturday, and while there was a fairly long list of gains, there were numerous instances where the closing prices were below the early quotations. The volume of sales was moderately higher, the transfers climbing up to 270,000 shares, against 210,000 on the preceding short session. Public utilities, particularly the preferred stocks, registered modest gains and there was a good demand for the aluminum issues, although the advances were somewhat smaller. Outstanding among the gains were Aluminium, Ltd., 2½ points to 112½; Heyden Chemical, 2½ points to 45; Jones & Laughlin Steel, 2¼ points to 38¾; Koppers Co. pref., 9 points to 71; Mead Johnson, 2½ points to 153; Midvale Co., 3 points to 118; Quaker Oats pref., 5 points to 145; and Todd Shipyards, 2 points to 70.

yards, 2 points to 70.

Industrial stocks led a strong upturn on Monday with metal and machinery shares in sharp demand. Jones & Laughlin Steel was a noteworthy feature as it forged ahead 7½ points to 46, and Midvale Co. climbed upward 6¾ points to 124¾. Public utility issues were mixed with some of the preferred stocks working into new high ground for the year, while others moved to lower levels. Aviation shares were generally stronger, Lockheed advancing 2½ points to 30, Bell gaining 2½ points at 25 and smaller advances for Grumman, Beech, Bellanca and Brewster. Todd Shipyards surged forward 11 points to 81 and registered a new peak for the year and substantial gains were recorded by Bath Iron Works and New York Shipbuilding. The transfers totaled 745,000 shares, against 576,000 on Friday the last full session. Mixed price changes due to profit-taking checked to some

Mixed price changes due to profit-taking checked to some extent the upward surge during the morning dealings on Tuesday. As the session progressed the market strengthened and the early setbacks were gradually eliminated. Public utility shares registered some wide changes especially in the preferred group in which new tops and sharp declines were recorded. Aluminum issues moved within narrow brackets and many of the industrial stocks were below their early tops. Aircraft shares were unchanged or lower with the exception of Bell Aircraft which added 2 points at 27. Chemical stocks were generally higher, Heyden Chemical advancing  $2\frac{1}{2}$  points to  $47\frac{1}{2}$ , while American Potash & Chemical moved ahead 4 points to 94.

Price movements were somewhat irregular on Wednesday due largely to profit-taking among the strong stocks of the preceding sessions. There were a number of the preferred shares in the public utility section that held their gains to the close and a few strong spots scattered through the list, but the enthusiasm of the preceding sessions was lacking. Aluminum stocks were down and many of the active industrial shares were off on the day. Aviation issues were heavy and the industrial specialties registered losses ranging from fractions to 1 or more points. Noteworthy among the stocks closing on the side of the decline were Aluminum Co. of America, 5 points to 134; Aluminium, Ltd., 5½ points to 102; Newmont Mining Co., 4 points to 75; and Pepperell Manufacturing Co., 4 points to 86. The gains included, among others, Alabama Great Southern, 4½ points to 77¾; Brill pref., 6 points to 39; Pa. Salt, 2½ points to 165; and Corroon & Reynolds pref., 3 points to 79.

Further profit taking checked the advance on Thursday though a selected list of industrials held their gains until the session closed. The market continued active but the volume of sales was down to 305,835 shares against 477,340 on the preceding day. Aluminum stocks were off and the mining and metal issues registered sharp declines. Public utilities were higher, the gains ranging up to 4 or more points. Aviation abases were large fractional range being recorded by

Further profit taking checked the advance on Thursday though a selected list of industrials held their gains until the session closed. The market continued active but the volume of sales was down to 305,835 shares against 477,340 on the preceding day. Aluminum stocks were off and the mining and metal issues registered sharp declines. Public utilities were higher, the gains ranging up to 4 or more points. Aviation shares were irregular, fractional gains being recorded by Lockheed and Fairchild, while Bellanca, Beech and Bell were unchanged or slightly off. Industrial specialties were inclined to move lower, the recessions including among others, Cuneo Press, 2 points to 46½; Lynch Corp., 2 points to 27; Scoville Manufacturing Co., 2½ points to 34¾; American Potash & Chemical, 1 point to 93, and Great Atlantic & Pacific Tea Co. nv stock. I point to 88.

Irregular price movements was the outstanding feature of the Curb market on Friday. Trading was fairly active and the price trend pointed upward during the opening hour but considerable realizing developed as the session progressed and several of the speculative favorites lost their early gains.

Irregular price movements was the outstanding feature of the Curb market on Friday. Trading was fairly active and the price trend pointed upward during the opening hour but considerable realizing developed as the session progressed and several of the speculative favorites lost their early gains. Scattered through the list were a number of slow moving stocks that held their gains but the market as a whole ended below the previous close. Heyden Chemical was one of the outstanding strong stocks and forged ahead 10½ points to 60; Mining and metal issues were down, public utilities were generally weak and aircraft shares declined all along the line. As compared with Friday of last week prices were higher, American Gas & Electric closing last night at 34½ against 31½ on Friday a week ago; Babcock & Wilcox at 23½ against 21; Bell Aircraft at 25 against 23; Carrier Corp. at 12 against 10; Child's Co. pref. at 33½ against 29; Chicago Flexible Shaft at 63 against 62; Consolidated Gas Electric Light & Power Co. of Baltimore at 74 against 71½; Glen Alden Coal Co. at 8½ against 7½; Gulf Oil Corp. at 43 against 41¾; Humble Oil (new) at 69¼ against 68; Niles-Bement-Pond at 75¼ against 67½; Niagara HudsonPower at 7½ against 6½; Scoville Manufacturing Co. at 35½ against 31½; South Penn Oil Co. at 36¾ against 35; and United Gas pref. at 87 against 84.

### NATIONAL BANKS

The following information regarding National banks is from the office of the Comptroller of the Currency, Treasury Department: VOLUNTARY LIQUIDATIONS

Sept. 8—The Farmers National Bank of Clay, Ky. Effective Sept. 7, 1939. Liquidating agent, Daron Quirey, Clay, Ky. Succeeded by Farmers Bank, Clay, Ky.

### COURSE OF BANK CLEARINGS

Bank clearings this week will show an increase compared with a year ago. Preliminary figures compiled by us based upon telegraphic advices from the chief cities of the country indicate that for the week ended today (Saturday, Sept. 16) clearings from all cities of the United States from which it is possible to obtain weekly clearings will be 0.1% above those for the corresponding week last year. Our previous total stands at \$6,513,255,063, against \$6,506,251,476 for the same week in 1938. At this center there is a gain for the week ended Friday of 1.6%. Our comparative summary for the week follows:

Clearings—Returns by Telegraph Week Ending Sept. 16	1939	1938	Per Cent
New York	\$3,109,297,569	\$3,059,933,963	+1.6
Chicago	288,153,574	252,679,165	+14.0
Philadelphia	321,000,000	303,000,000	+5.9
Boston	201,284,654	179,854,946	+11.9
Kansas City	88,896,497	77,498,477	+14.7
St. Louis	79,200,000	79,800,000	-0.8
San Francisco	153,499,000	149,401,000	+2.7
Pittsburgh	101,836,189	100,575,870	+1.3
Detroit	79,949,031	84,388,902	-5.3
Cleveland	90,655,968	86,501,575	+4.7
Baltimore	61,030,046	56,306,970	+8.4
Eleven cities, five days	\$4,574,802,528	\$4,429,94C,868	+3.3
Other cities, five days	852,910,041	836,912,415	+1.9
Total all cities, five days	\$5,427,712,569	\$5,266,853,283	+3.1
All cities, one day	1,085,542,514	1,239,398,193	-12.4
Total all cities for week	\$6,513,255,083	\$6,506,251,476	+0.1

Complete and exact details of the week covered by the foregoing will appear in our issue of next week. We cannot furnish them today, inasmuch as the week ends today (Saturday) and the Saturday figures will not be available until noon today. Accordingly, in the above the last day of the week in all cases has to be estimated.

In the elaborate detailed statement, however, which we present further below, we are able to give final and complete results for the week previous—the week ended Sept. 9. For that week there was an increase of 21.2%, the aggregate of clearings for the whole country having amounted to \$5,255,158,294, against \$4,335,056,694 in the same week in 1938. Outside of this city there was an increase of 17.4%, the bank clearings at this center having recorded a gain of 24.0%. We group the cities according to the Federal Reserve districts in which they are located, and from this it appears that in the New York Reserve District (including this city) the totals show an expansion of 23.7%, in the Boston Reserve District of 22.3%, and in the Philadelphia Reserve District of 26.0%. The Cleveland Reserve District registers an improvement of 13.9%, the Richmond Reserve District of 13.0%. In the Chicago Reserve District there is an improvement of 25.9%, in the St. Louis Reserve District of 6.8%, and in the Minneapolis Reserve District of 6.2%. In the Kansas City Reserve District the increase is 16.6%, in the Dallas Reserve District 7.7%, and in the San Francisco Reserve District 10.9%.

In the following we furnish a summary by Federal Reserve districts:

districts:

Week Ended Sept. 9, 1939	1939	1938	Inc.or Dec.	1937	1936

### THE ENGLISH GOLD AND SILVER MARKETS

We reprint the following from the weekly circular of Samuel Montagu & Co. of London, written under date of Aug. 30, 1939:

The Bank of England gold reserve against notes on Aug. 23 amounted to £246,416,965 at 148s. 6d. per fine ounce as compared with £246,555,247 at 148s. 7d. per fine ounce on the previous Wednesday

The political situation and the decision of the authorities on Aug. 25 to cease to support sterling have been reflected in the gold market during the past week. With the depreciation of sterling in terms of the dollar, correspondingly new high record sterling prices of gold were established, the highest being 161s.—quoted on Aug. 28; prices were fixed on the basis of supply and demand. At the daily fixing, the amount which changed hands during the period under review was about £3,250,000, most of which was provided by resales from holdings; purchases were made for shipment to New York, but yesterday it is possible that part of the offerings was taken up by special orders.

Quotations—	Per Fine Oz.	Quotations-	Per Fine Oz.
Aug. 24 Aug. 25 Aug. 26 Aug. 28	-148s. 5d. -150s. 6d. -155s. -161s.	Aug. 29 Aug. 30 Average	157s. 158s. 6d. 155s. 0.83d.

The following were the United Kingdom imports and exports of gold registered from mid-day on the 21st inst. to mid-day on the 28th inst.:

Imports		Exports	
Union of South Africa £	1.532.637	United States of Amer	17.091.194
Southern Rhodesia	71.465	Canada	6.025,999
British East Africa	15.685	Central & South America	52.249

Switzerland	12.471	Syria	23.882
Other countries	11,199	Other countries	7,438
			-

Gold shipments from Bombay during the week amounted to about £375,300; the SS. Strathallan carries £29,600 consigned to London and the SS. President Adams £345,700 consigned to New York.

£2.719.684

#### SILVER

The market has been influenced by the uncertain conditions and quotations have been subject to wide fluctuations; the large movements were on occasion however due mainly to interest being confined to one direction, the pressure thus finding poor resistance and consequently having an effect somewhat greater than appeared warranted by the volume of business. At the beginning of the week, demand from India and to cover bear commitments forced prices upwards until on Aug. 25 prices had reached 20 1-16d. for cash and 20d. for two months' delivery; these represented rises of 2d. and 2 1-16d. respectively in two days. The forward quotation eased ½d. on Aug. 26, but on Aug. 28—the next working day—the Indian Bazaars turned sellers and substantial offerings from this quarter resulted in a sharp downward reaction to 19½d. and 18 13-16d. for the respective deliveries. Yesterday sellers were less in evidence and some enquiry from the Continent caused a recovery of ½d. to 19½d. and 19 3-16d. whilst today, with somewhat quiter conditions and buyers hesitating, prices declined 7-16d. and ½d. to 19 1-16d. and 18 11-16d.

There is little indication as to tendency and, in present circumstances, movements in the near future may continue to be somewhat erratic.

The following were the United Kingdom imports and exports of silver registered from mid-day on the 21st inst. to mid-day on the 28th inst.:

Imports		Exports

### CURRENT NOTICES

—A joint announcement was made by the New York Stock Exchange firms of Winthrop, Mitchell & Co. and Clark Williams & Co. of their merger, effective yesterday. The merged firms will carry the name of Winthrop, Mitchell & Co.

Clark Williams will become a special partner. Frederick H. Clarkson. Francis J. Ridgeway and Frank R. Schumann will become general partners, and all of the partners of Winthrop, Mitchell & Co. will continue as partners in the merged firm.

The enlarged firm will continue its memberships in the New York Stock Exchange, New York Curb Exchange, Chicago Board of Trade, Chicago Stock Exchange, Commodity Exchange, Inc., Winnipeg Grain Exchange, New York Cotton Exchange, and New York Coffee and Sugar Exchange. In addition to offices in New York City at 26 Broadway, 50 Broadway, Ambassador Hotel, Fordham Road and Morris Avenue, it will have offices in Chicago. in Chicago, Ill.; Omaha, Neb., and Washington, D. C., and direct wire connections to other principal cities.

The firm of Winthrop, Mitchell & Co. has been in existence since 1929, and with its predecssor firms dates back to 1906. The firm of Clark Williams & Co. was organized in 1919 and became a member of the New

York Stock Exchange in July, 1926.

-William J. Price 3d, of Marburg, Price & Co., Batlimore, was elected to the chairmanship of the Southeastern Group of the Investment Bankers Association of America for the year 1939-40 at the annual meeting of the group on Friday, Sept. 8, at the Merchants Club in Baltimore, it was announced by Rush S. Dickson of R. S. Dickson & Co., Inc., Charlotte, N. C., Chairman of the group at present. Others elected at the meeting were James Parker Nolan of Folger, Nolan & Co., Inc., Washington, and Rutherfoord Fleet of The Richmond Corp., Richmond, as Vice-Chairmen; J. Elliott Irvine of Meade, Irvine & Co., Baltimore, Secretary-Treasurer; Russell F. Hall of Lewis & Hall, Greensboro, N. C., member of the Executive Committee for a three-year period; and C. Prevost Boyce of Stein Bros. & Boyce, Baltimore, member of the National Board of Governors, to serve ex-officio for one year.

The Executive Committee will consist of the elected members above, together with James H. Brady Jr. and William Frazier. The elections followed the report of the Nominating Committee, of which John Redwood Jr., of Baker, Watts & Co., Baltimore, was Chairman.

wood Jr., of Baker, Watts & Co., Baltimore, was Chairman.

#### DIVIDENDS

Dividends are grouped in two separate tables. In the first we bring together all the dividends announced the current week. Then we follow with a second table in which current week. Then we follow with a second table in which we show the dividends previously announced, but which have not yet been paid. Further details and record of past dividend payments in many cases are given under the com-pany name in our "General Corporation and Investment News Department" in the week when declared. The dividends announced this week are:

### Weekly Return for the Member Banks of the Federal Reserve System

Following is the weekly statement issued by the Board of Governors of the Federal Reserve System, giving the principal items of the resources and liabilities of the reporting member banks in 101 leading cities from which weekly returns are obtained. These figures are always a week behind those for the Reserve banks themselves. The comment of the Board of Governors of the Federal Reserve System upon the figures for the latest week appears in our department of "Current Events and Discussions," immediately preceding which we also give the figures of New York and Chicago reporting member banks for a week later.

Commencing with the statement of May 19, 1937, various changes were made in the breakdown of loans as reported in this statement, which were described in an announcement of the Federal Reserve Bank of New York of April 20, 1937, as follows:

The changes in the report form are confined to the classification of loans and discounts. This classification has been changed primarily to show the amounts of (1) commercial, industrial and agricultural loans, and (2) loans (other than to brokers and dealers) for the purpose of purchasing or carrying securities. The revised form also eliminates the distinction between loans to brokers and dealers in securities located in New York City and those located outside New York City. Provision has been made also to include "acceptances of own bank purchased or discounted" with "acceptances and commercial paper bought in open market" under the revised caption "open market paper," instead of in "all other loans," as formerly.

Subsequent to the above approximent it was made known that the new items "commercial industrial and agricultural loans" and "other loans")

Subsequent to the above announcement, it was made known that the new items "commercial, industrial and agricultural loans" and "other loans") would each be segregated as "on securities" and "otherwise secured and unsecured."

A more detailed explanation of the revisions was published in the May 29, 1937, issue of the "Chronicle," page 3590.

<sup>† &</sup>quot;Other cash" does not include Federal Reserve notes or a bank's own Federal Reserve bank notes.

These are certificates given by the United States Treasury for the gold taken over from the Reserve canks when the dollar was, on Jan. 31, 1934, devalued from 100 cents to 59.06 cents, these certificates being worth less to the extent of the difference, the difference itself having been appropriated as profit by the Treasury under the provisions of the Gold Reserve Act of 1934.

### Weekly Return of the Board of Governors of the Federal Reserve System

The following was issued by the Board of Governors of the Federal Reserve System on Thursday afternoon, Sept. 14, showing the condition of the 12 Reserve banks at the close of business on Wednesday. The first table presents the results for the System as a whole in comparison with the figures for the eight preceding weeks and with those of the corresponding week last year. The second table shows the resources and liabilities separately for each of the 12 banks. The Federal Reserve note statement (third table following) gives details regarding transactions in Federal Reserve notes between the Reserve Agents and the Federal Reserve banks. The comments of the Board of Governors of the Federal Reserve System upon the returns for the latest week appear in our department of "Current Events and Discussions."

<sup>\* &</sup>quot;Other cash" does not include Federal Reserve notes.

x These are certificates given by the United States Treasury for the gold taken over from the Reserve banks when the dollar was devalued from 100 cents to 59.06 cents on Jan. 31, 1934, these certificates being worth less to the extent of the difference, the difference itself having been appropriated as profit by the Treasury under provisions of the Gold Reserve Act of 1934.

y With the statement of Jan. 4, 1939 two new items appeared, "Other liabilities, including accrued dividends," and "Other capital accounts." The total of these we items corresponde exactly to the total of two items formerly in the statement but now excluded, vis.; "All other liabilities," and "Reserve for contingencies." The statement for Sept. 14, 1938 has been revised on the new basis and is shown accordingly

# Bond Record—New York Stock Exchange

FRIDAY, WEEKLY AND YEARLY

NOTICE—Prices are "and interest"—except for income and defaulted bonds. Cash and deferred delivery sales are disregarded in the week's range, unless they are the only transactions of the week, and when selling outside of the regular weekly range are shown in a footnote in the week in which they occur. No account is taken of such sales in computing the range for the year. The italic letters in the column headed "Interest Period" indicate in each case the month when the bonds mature.

New York Curb Exchange—Weekly and Yearly Record Sept. 16, 1939

NOTICE—Cash and deferred delivery sales are disregarded in the week's range unless they are the only transactions of the week and when selling outside of the regular weekly range are shown in a footnote in the week in which they occur. No account is taken of such sales in computing the range for the year.

In the following extensive list we furnish a complete record of the transactions on the New York Curb Exchange for the week beginning on Saturday last (Sept. 9, 1939) and ending the present Friday (Sept. 15, 1939). It is compiled entirely from the daily reports of the Curb Exchange itself, and is intended to include every security, whether stock or bond, in which any dealings occurred during the week covered.

#### CURRENT NOTICES

—A new concept of investment timing, forecasting major movements in business and the markets, has been developed by the Economics and Investment Department of Independence Fund of North America, Inc. In effect the new method correlates the fluctuations of a large number of economic indexes which differ greatly in their timing value, but in their composite result produce an indicator which, if application to markets of the past 20 years is a criterion, gives unusually clear and accurate "buy" and "sell" signals. Dr. Frederick R. Macaulay, Consulting Economist of the Independence Fund of North America, Inc., author of "Bond Yields, Interest Rates and Stock Prices," is responsible for the statistical methods and analyses used to obtain from the various series this forecasting technique. casting technique.

Other economists of the Independence Fund of North America's Economics and Investment Department who directer the Investment Timing Study are Dr. Thatcher C. Jones, Directing Economist, and Dr. Max Winkler, authority on foreign securities, industries and finance, Consulting Economist.

The new Investment Timing Index, it is emphasized, is without value to day-to-day traders. Instead, it is the result of an effort to throw light on long-term business and security market trends with attention also

Entering into the new composite Investment Timing Index the following indicators are accorded basic importance: The trend of bond yields in an inverted position so as to reflect bond prices; industrial production and construction trends; banking and credit factors, and stock yield and stock price trends. These are interpreted against the background of two other studies of increasingly great importance, namely, the influence of United States Government activities on private business and the impact upon this Nation's economy of foreign political developments.

-Cecil E. Fraser has been elected Vice-President of Bond & Goodwin,

—Cecil E. Fraser has been elected Vice-President of Bond & Goodwin, Inc., in their Boston office, it was announced. He has resigned as Chairman of the Board and Treasurer of Boston Fund, Inc., in order to assume his new duties immediately.

During the past three years he has been the principal executive officer of Boston Fund, Inc., and he is also a former officer and director of Massachusetts Distributors, Inc., general distributors of shares of Massachusetts Investors Trust and Boston Fund, Inc.

For the previous six years he was Tressurer and director of Incorporated.

For the previous six years he was Treasurer and director of Incorporated Investors, where he was closely identified with the management and sales policies, and for a year previous to becoming Treasurer directed the

organization's research work. Prior to joining Incorporated Investors, Mr. Fraser was on the staff of the Harvard Graduate School of Business Administration for 10 years, and was Associate Professor of Finance at the time of his retirement. He is the author of several books, including "Problems in Finance," and with Professor George F. Doriot is co-author of "Analyzing Our Industries."

While on the staff of the Harvard Business School Mr. Fraser consultant on various financial problems for a number of different

He is a former President of the Harvard Business School Alumni Association, and is well known in financial and industrial centers throughout the country.

-A. M. Kidder & Co., 1 Wall Street, New York City, members of the New York Stock Exchange, have prepared a circular discussing the present purchasing power of England and France in this country and the possibility of a considerable war boom here.

#### FILING OF REGISTRATION STATEMENTS UNDER SECURITIES ACT

The following additional registration statement (No. 4188) has been filed with the Securities and Exchange Commission under the Securities Act of 1933. The amount

involved is approximately \$156,750.

Great Western Silver Mines Trust Co. (2-4188, Form A-1), of Gold Hill, Colo., has filed a registration statement covering 6,400 certificates of beneficial interest, of which 130 certificates will be issued to four persons for their services and the remaining 6,270 certificates will be offered publicly at \$25 each. Proceeds of the issue will be used for development of mill, factory site, building, equipment, and working capital. W. A. Moore is trustee. No underwriter named. Filed Sept. 7, 1939.

The last previous list of registration statements was given in our issue of Sept. 9, page 1615.

Allemannia Fire Insurance Co.—Extra Dividend—
The directors have declared an extra dividend of five cents per share in addition to a regular quarterly dividend of 25 cents per share on the capital stock, par \$10, both payable Sept. 30 to holders of record Sept. 21. A similar extra dividend was paid in each of the 15 preceding quarters. The company paid extra dividends of 10 cents per share on Jan. 2, 1935, and in each of the four quarters prior to this latter date—V. 148, p. 3832.

American Bakeries Co.—Dividend—
Directors have declared a dividend of 75 cents per share on the class B stock, payable Oct. 2 to holders of record Sept. 15. Dividend of 37½ cents was paid on July 1, last and previously regular quarterly dividends of 25 cents per share were distributed.

Directors also declared an extra dividend of 25 cents per share in addition to the regular quarterly dividend of 50 cents per share on the class A participating stock, both payable Oct. 2 to holders of record Sept. 15. Like amounts were paid on July 1 and April 1, last; Dec. 27, Oct. 1, July 1 and April 1, 1938.—V. 148, p. 3832.

American Business Credit Corp.—Operations—
Corporation reports preliminary figures showing gross receivables outstanding on Aug. 31, 1939, totaling \$6,941,322, the highest in the company's history.

Gross volume of business transacted during the month of August amounted to \$3,856,729, exceeding by 43% the largest volume of business written by the company during any previous month, according to the report.—V. 149, p. 403.

American-Canadian Properties Corp.—Liquidating Div.
Bankers Trust Co., as dividend disbursing agent for the corporation, has been informed that the corporation has declared a further liquidating dividend of 80 cents per share, payable Sept. 20 to holders of record Sept. 11. A dividend of 50 cents was paid Feb. 9 last and a div. of 15 cents Dec. 23, 1938 and 25 cents Feb. 15, 1937.—V. 148, p. 721.

American Discount Co — To Pay 30-Cent Dividend—
Directors have declared a dividend of 30 cents per share on the common stock, no par value, payable Oct. 2 to holders of record Sept. 20. This compares with 50 cents paid on July 1 and on April 1, last 30 cents paid on Dec. 15, 1938, 75 cents paid on Aug. 25, 1938, 25 cents paid on June 1, 1938 and 50 cents paid on Dec. 15, 1937.—V. 148, p. 1792.

American Felt Co.—Accumulated Dividend—
Directors have declared a dividend of \$1.50 per share on account of accumulations on the 6% cumulative preferred stock, payable Oct. 2 to holders of record Sept. 15 leaving arrears of \$6 per share.—V. 148, p. 2884.

American Fruit Growers, Inc.—Annual Report—
William H. Baggs, President, in his report to the stockholders, says:
The financing program which was set forth in the annual report of the previous fiscal year was consummated and all the 7% serial convertible gold notes have been exchanged for 5% convertible sinking fund notes due Aug. 1, 1950. The program involved:

(1) Obtaining a loan of \$1,000,000 from the Reconstruction Finance Corporation and giving as security therefor mortgages on 16 properties of the company.

(2) Paying out of the proceeds of the \$1,000,000 loan obtained from the RFC:
(a) The \$180,000 balance which was owing the RFC on the loan the company previously obtained, and (b) paying \$150,000 on the principal of the \$600,000 of 7% serial convertible gold notes then outstanding.

(3) Refunding the remaining \$450,000 7% serial convertible gold notes with 5% convertible sinking fund notes due Aug. 1, 1950, containing a sinking fund provision that requires the company to purchase for retirement or redemption each year beginning with the year ending July 31, 1941 10% of the greatest amount of the notes issued.

The RFC loan is payable \$50,000 on Aug. 1, 1940 and 1941, \$100,000 on Aug. 1, 1942, 1943, 1944, 1945, 1946, 1947 and the remaining \$300,000 on Aug. 1, 1948.

The complete financing program provided the company with additional cash working capital amounting to \$670,000 and substantially improved its financial position.

Company announced the opening of direct radio-telephone service to The Netherlands beginning Sept. 12 at 10:30 a.m. Direct radio-telephone service with Italy opened on Sept. 11.

Initially the New York-Amsterdam channel will enable all Bell System and Bell-connected telephones in the United States to reach telephones throughout The Netherlands. Plans are under way to extend service over wire lines beyond Holland to other countries in Northern Europe to which service with the United States has been interrupted. The company hopes to be able to arrange such extensions in the near future.

Radio-telephone conversations with Holland will pass between the Bell System radio-telephone stations in New Jersey and those of the Netherlands Telephone Administration. The rate for a three-minute call from telephones in the northeastern United States to Holland telephones will be \$22.50. Calls from other parts of the United States will cost slightly more, depending on distance.—V. 149. p. 1615.

Anheuser-Busch, Inc.—Offering of Trust Shares—
Stirel, Nicolaus & Co., Inc., St. Louis, recently offered 3,750 shares of trust for equitable interests at \$54.50 per share. Offering was made to residents of Missouri only.

A total of 20,315 shares of trust for equitable interests in Anheuser-Busch, Inc., shares, represent shares in a trust created by a trust indenture dated June 15, 1939, between Stifel, Nicolaus & Co., Inc., and St. Louis Union Trust Co., trustee. The assets of this trust consist of an undivided 1-13 equitable interest in a trust estate created by Lilly Busch by a trust indenture dated May 10, 1926, which trust estate presently holds 264,101 shares of the common stock of Anheuser-Busch, Inc. (par \$20).

The 1-13 interest constituting the trust property of this issue therefore represents an interest in the Lilly Busch Trust Estate equal to 20,315 shares of stock of Anheuser-Busch, Inc.

The shares issued under the trust indenture creating the trust for equitable interests in Anheuser-Busch, Inc., shares equal in number the number of shares of Anheuser-Busch. Inc., which are represented by the interest

The shares issued under the trust indenture creating the trust for equitable interests in Anheuser Busch, Inc., shares equal in number the number of shares of Anheuser-Busch, Inc., which are represented by the interest constituting the trust property of this trust. Subject, however, to all the terms and conditions of the Lilly Busch trust and the trust for equitable interests in Anheuser-Busch, Inc., shares as set forth in the trust indentures creating said trusts, and no warranty of title to the assets constituting the trust property has by either the depositor or trustee been made.

The shares are fully transferable and assignable upon the books of the trustee, St. Louis Union Trust Co.

The shares offered for sale are part of an original offering of 20,315 shares which was purchased by a limited group. 3,750 shares of that original offering are now being reoffered to the public by Stifel, Nicolaus & Co., Inc., at an offering price of \$54.50 per share.

Depositor—Stifel, Nicolaus & Co., Inc., has deposited with the trustee the trust property under the terms of the trust indenture dated June 15, 1939.

Upon distribution of the Lilly Bush trust of income, the trustee of trust will promptly distribute such income to the holders of the trust shares.

The trust indenture provides that income shall include not only cash distributions, but shall also include distributions of property, except (1) shares of Anheuser-Busch, Inc., (2) shares of stock in any corporation into which or with which Anheuser-Busch, Inc., should be merged or consolidated, or (3) shares in any corporation it which Anheuser-Busch, Inc., shall transfer all or part of its assest.—V. 149, p. 1016. Baldwin Rubber Co.—Meeting—
Failure of quorum of stockholders to be represented at the adjourned annual meeting held Sept. 11, which was to cover operations for the fiscal year ended Sept. 30, 1938, resulted in elimination of the 1938 meeting. At the regular stockholders meeting Nov. 21, which will cover the 1939 fiscal year ending Sept. 30, results for the 1938 fiscal year will be reviewed.—V. 149, p. 1319.

Baltimore & Ohio RR.—Interest—
The company has notified the New York Stock Exchange that payment of fixed interest of 2% will be made on company's first mortgage 50-year 5% gold bonds, due 1948, on Oct. 1.
The Committee on Floor Procedure of the Exchange has ruled that the bonds be quoted ex-interest and will continue to be dealt in flat.
Company has also stated payment of fixed interest of 1% will be made on registered bonds of said issue and certificates of deposit. These bonds and certificates will also be quoted ex-interest and dealt in flat.
Company has also notified the Exchange that payment of fixed interest of ½% (\$8.75 per \$1.000 bond) will be made on Oct. 1 to holders of B. & O. Southwestern Division first mortgage gold 5s, extended to 1950. These will also be quoted ex-interest and shall continue to be dealt in flat.
These payments are being made under the terms of the road's interest adjustment plan.—V. 149, p. 1467.

Boeing Airplane Co.—New President, &c.—
Philip G. Johnson has been elected President of the company and its subsidiary Boeing Aircraft Co. C. L. Egtvedt, who has been President for several years was elected Chairman of both companies.—V. 149, p. 1468.

Boston Elevated Ry.—Directors Sue State—
The company has filed a bill in the Massachusetts Supreme Cours asking the courts to declare void the revocation by the 1939 Legislature of the Elevated franchise on Atlantic Ave., Boston, and forfeiture of the

abandoned elevated structure there. The bill was brought by the directors of the company against the Boston Transit Commission, the Board of Public Trustees of the Elevated and the Commonwealth of Massachusetts. The directors claim that the action of the Legislature was unconstitutional because the legislators acted on acts of their own agents, the Board of Public Trustees, and say that the board of directors of the Elevated road at all times objected to the abandonment of the Atlantic Ave. property. The case is returnable in the Supreme Court Nov. 6.—V. 149, p. 1320.

Canadian Breweries, Ltd.—Accumuated Dividend—Directors have declared a dividend of 50 cents per share on the account of accumulations on the \$3 cumulative preferred stock, payable Oct. 2 to holders of record Sept. 20, leaving arrears of \$6.25 per share.—V. 149, p. 1618.

Canadian Celanese, Ltd.-Listed on Toronto Stock Exchange-

Common and preferred shares have been approved for listing on the Toronto Stock Exchange. Listing covers the 260,409 outstanding (no par) common shares of an authorized 300,000 and the outstanding 100,000 7% cumulative participating preferred shares (\$190 par) out of an authorized 150,000. In addition, the company has an authorized 90,000 income funding rights, of which 79,255 are issued after deducting 10,745 held in special fund and for sinking fund.

Celanese was incorrorated under Dominion charter in January, 1926 for the purpose of manufacturing cellulose acetate and by-products such as synthetic yarns, lacquers, varnishes and many other products, covering nearly every step from raw materials to finished products. Manufacture is done under the Dreyfus patents and processes, some of which are of chemical nature, others mechanical while some apply to dyestuffs and dyeing and finishing methods used in the manufacture of cellulose acetate artificial silk. Major portion of yarn produced is consumed in production of fabrics. New fabrics being brought into commercial production by the company simulate tweeds, cheviots, homespuns and similar materials.

Regular dividends have been paid on the preferred at the rate of \$7 per share since initial payment on Dec. 31, 1930 to date, while participating dividends have been paid in each year since 1935. Common dividends have been paid since March 31, 1936, the latest of 25 cents a share having been paid last June 30. Income funding rights which were issued at the end of 1934 to preferred shareholders on a share for share basis in satisfaction of arrears, have received payments of \$1 per right in each year commencing March, 1936.—V. 149, p. 408.

Coastal Minerals Development, Inc .- Promoters In-

The Department of Justice and the Securities and Exchange Commission on Sept. 7 reported the indictment of W. A. Walsingham, A. T. Sibley and Abram Luria, all of New Orleans, La., and others for violation of the Securities Act of 1933, the Mail Fraud Statute and conspiracy in connection with the sale of the stock of this company.

The 12-count indictment by a Federal Grand Jury in New Orleans, returned octore Judge Wayne G. Borah in the Eastern District of Louisiana, charged that the defendants induced persons to purchase stock of Coastal by representing that the SEC had approved the stock of the company as asfe investment, when in fact, the indictment charged, the Commission had in no way approved the stock of that company.

The defendants, it was charged, made certain false representations for the purpose of inducing investment by the public. Among these, the indictment charged, were statements that the stock would be listed on the New York Curb Exchange, that stock dividends would be paid and that the stock offered to the public was the unissued stock of the company. The indictment charged that the defendants, when they made the representations, knew full well that the stock could not be listed on the New York Curb Exchange, that stock dividends could not be listed on the New York Curb Exchange, that stock dividends could not be paid, and that the stock issued was the stock of promoters and not the unissued stock of the company.

V. 143, p. 917.

Coca Cola Bottling Corp. (Del.)—Extra Dividend—
Directors have declared an extra dividend of \$1.25 per share in addition to the regular quarterly dividend of 62½ cents per share on the class A and class B shares, all payable Oct. 1 to holders of record Sept. 15. Similar payments were made on Dec. 30 and Oct. 1, 1938, Dec. 24 and Oct. 1, 1937, and on Dec. 28 and Oct. 1, 1936.—V. 147, p. 3759.

Coleman Lamp & Stove Co.—Extra Dividend—
Directors on Sept. 5 declared an extra dividend of 25 cents per share in addition to a dividend of 25 cents (or a total of 50 cents per share) on the common stock, no par value, both payable Sept. 30 to holders of record Sept. 23. Similar amounts were paid on June 30 last. A dividend of 25 cents was paid on April 15 last; one of \$1.50 was paid on Dec. 22, 1938; \$1.75 paid on Dec. 28, 1937, and regular quarterly dividends of 25 cents were paid on Oct. 15, 1937.—V. 149, p. 1619.

Colombian Petroleum Co.—Interest Rate Reduced—
The company, owned jointly by the Socony-Vacuum Oil Co., Inc., and the Texas Corp., has negotiated an agreement with two insurance companies whereby the interest rate on \$12,500,000 of its notes dated Nov. 15, 1937, has been reduced to 1½% annually from 3%, according to a report to the Securities and Exchange Commission. The notes, endorsed by Socony-Vacuum and the Texas Corp., will mature on Oct. 2, 1944.
The Metropolitan Life Insurance Co. holds \$11,250,000 of the notes and the Equitable Life Assurance Society of the U. S. the remainder. The readjustment was made on Aug. 4 last.—V. 145, p. 3970.

Columbia Corp.—Reduction in Capital—

The Securities and Exchange Commission made effective Sept. 12 a declaration by the corporation, a subsidiary of the Columbia Gas & Electric Co., covering the proposed reduction of its capital, represented by 115,000 shares of no-par common stock, from \$5,750,000 to \$3,450,000. The effect of the lowered capital will be to create a surplus account of \$2,300,000.

The change is part of a general plan by Columbia Gas & Electric Co. and its subsidiaries to provide surplus accounts against which downward revaluation of assets may be charged if necessary.

## Creameries of America, Inc. \$1,200,000 Debentures

Approved-

The issuance of \$1,200,000 of 15-year 3½% sinking fund debentures has been approved at a special meeting of stockholders. The new issue will be dated Sept. 1. The proceads will be used to retire \$1,098,000 of 5% debentures due in 1946 and for other corporate purposes.

The lower interest rate will permit a saving of approximately \$15,000 annually, officials said. Another saving of \$15,000 has been effected, according to officials, by exercise of the company's option on the minority interest in the 7% preferred stock of a subsidiary.—V. 149, p. 1022.

# Crown Cork International Corp.—25-Cent Class A Div. The directors have declared a dividend of 25 cents per share on account of accumulations on the \$1 cum. class A stock, no par value, payable Oct. 2 to holders of record Sept. 15. Like amount was paid on July 1, April 1 and Jan. 3 last, Oct. 1, July 1 and Jan. 3, 1938; a dividend of 75 cents was paid on Oct. 1, 1937; dividends of 25 cents were paid in each of the six preceding quarters; on Dec. 20, Aug. 30 and May 22, 1935, and on Dec. 21, 1934, and 50 cents paid on March 30, 1934, and Nov. 1, 1933. The last regular quarterly dividend of 25 cents per share was paid on April 1, 1931.—V. 149, p. 256.

#### Denver & Rio Grande Western RR.—Company Opposed to ICC's Plan-

The road charged Sept. 12 in a petition filed with the Interstate Commerce Commission that the Commission had discouraged investment of private capital in the railroad industry by the "wiping out of an existing investment" through its reorganization plans.

"If by reducing capitalization the Commission reduced the invested capital entitled to a fair return under the Fifth Amendment," the railroad's petition stated, "there might be at least a political justification for that policy. The rate structure would be lowered in the interest of the shipper and a forward step taken toward redistribution of wealth."

"But," the petition continued, "this is not-the effect of a reduction in capitalization. The original investment in the equity still remains but is transferred from stockholder to creditor where it continued to be protected by the Fifth Amendment."

The petition added that "nothing constructive has been accomplished by this process and a blow that may prove to be a fatal blow has been administered to the railway industry."

The road's petition was one of a number filed with the ICC taking exception to the plan of reorganization approved by the Commission, and asking for its modification.

The railroad stated the plan was defective principally in that it "arbitarily, without lawful valuation and without warrant of law, proposes to limit the capitalization of the reorganized company to \$147,433.354 invested in the debtor's property."

The plan, the petition asserted, in order to limit or restrict the number of sbares of common stock without par value distributable in reorganization so that no shares will be available for distribution in respect of the capital in excess of \$147,433,354, "arbitrarily affixes to the shares of common stock without par value distributable in reorganization stock without par value distribution in respect of the capital in excess of \$147,433,354, "arbitrarily affixes to the shares of common stock without par value distribution in respect of the capital in excess of the proposed new no par common stock into two classes, one consisting of the number of shares necessary to be issued to existing creditors at the rate of one share for each \$100 of principal and interest accrued to or earned after Nov. 1, 1935, and the other to be reserved for

Driver-Harris Co.—Dividend Increased—
Directors have declared a dividend of 20 cents per share on the common stock, payable Oct. 10 to holders of record Sept. 30. This compares with 15 cents paid on July 10 last, and dividends of 10 cents paid on April 10 and Jan. 10 last; the last previous payment was the 37½ cents dividend distributed on Dec. 22, 1937.—V. 149, p. 1473.

#### Dubilier Condenser Corp.—To Pay 13-Cent Dividend-

Meeting Postponed-

Directors on Sept. 13 declared a dividend of 13 cents per share on the common stock, payable Oct. 2 to holders of record Sept. 22. Previous payment was 10 cents made on Oct. 12, 1938 and an initial dividend of 15 cents was paid on Oct. 8, 1937

The directors also announced that the annual meeting of stockholders had been postponed from Sept. 21 to Oct. 26.—V. 147, p. 2528.

Duff-Norton Mfg. Co.—Poys 40-Cent Dividend—
Company paid a dividend of 40 cents per share on the common stock, no par value, on Sept. 11 to holders of record Sept. 5. This compares with 30 cents paid on June 10 last; 25 cents paid on March 10 last; 50 cents on Dec. 10, 1938; 25 cents paid on Sept. 10 and on June 11, 1938; a dividend of 40 cents paid on March 18, 1938; dividends of 50 cents per share paid on Dec. 28, Sept. 15, and on June 15, 1937, and a dividend of 40 cents paid on March 15, 1937. In addition an extra dividend of 25 cents per share was paid on Sept. 15, 1937—V. 148, p. 3686; V. 147, p. 3608.

#### Eastern Massachusetts Street Ry.—Special Report to

Stockholders-

Stockholders—

A special report to the stockholders summarizes changes adopted as of June 30, 1939, at the suggestion of the Securities and Exchange Commission, in the presentation of certain balance sheet accounts, and comments briefly on the results for the first six months of 1939.

Total operating revenues of \$3,597,240 in the first half of 1939 exceeded those in the same period of the previous year by \$360,659, or 11.1%. Due partly to the generally low state of business early in 1938 and to a larger amount of special bus business operated in 1939 in conjunction with governmental relief projects, passenger receipts scored an impressive gain of \$367,073, or 11.9% over the first six months of 1938.

Operating expenses, in the six months' period, exclusive of depreciation, were \$126,364, or 6.1%, higher than in 1938, while taxes jumped to \$337.032 including \$60.000 Federal income tax, an increase of \$76,664, or 29.4%.

These two items consumed 56.3% of the increase in gross revenue for the periods under review.

Bond interest decreased \$31,044 to \$253,328, chiefly due to the concentration of 1938 bond retirements in the latter part of that year, although \$168,812 pri ucipal amount of funded debt was acquired during the first six months of 1939.

Net income from operations for the first half of 1939, after provision for Federal income taxes, but before retirement losses, amounted to \$253,209 compared with \$20,517 during the corresponding period of 1938.

Dividends of \$1.50 per share were paid on first preferred stock, series A on March 15 and June 15, 1939, out of current operating earnings.

Balance Sheet Adjustments—Recent annual reports of company have recorded in some detail the progress made in substituting motor buses for electric street cars to satisfy the public demand for an improved mode of local and interuphan transportation. In view of the fact that the company operates but forty-five electric street cars, the program may be considered substantially complete.

Naturally enough, the abdonment of prop

operates but forty-five electric street cars, the program may be considered substantially complete.

Naturally enough, the abdonment of property long before its physical life had been exhausted resulted in substantial book losses in excess of salvage and depreciation previously provided through charges against earnings, and they have been carried in the account—property abandoned chargeable to operating expenses—as a deferred charge to surplus. However, such losses have been reduced in prior years by \$3.976.856 through the application of a like amount of discount on securities reacquired.

This company is subject to the Securities Exchange Act of 1934. The SEC has requested a reclassification of certain balance sheet accounts of the company, principally arising from the past treatment of losses on abandoned property, and after conference, it was agreed to make these adjustments as at June 30, 1939. The restatement of the several accounts does not alter in any way the intrinsic value of the property.

The following brief summary clarifies statements appearing below: (1) Profits of \$344,716 and losses of \$57,198 accumulated in prior years from the disposal of investment securities and carried in investment reserve

were transferred to surplus, while \$24,879, representing discount on company's securities reacquired in the first six months of 1939, was credited to property abandoned chargeable to operating expenses in reduction of property losses previously incurred.

(2) At the formation of this company, Jan. 15, 1919, property investments recorded on the books were based on a valuation made by the P. S. Commission and included lines of other companies operated under long term leases. No securities of this company were issued for leased property, but the value thereof was offset by a contra account—capital adjustment leased lines.

but the value thereon was offset by the leased lines.

To eliminate the value of property leased from others from the balance sheet at June 30, 1939, the asset accounts road and equipment and miscellaneous physical property were reduced by a total of \$338,108 and capital adjustment leased lines by a like amount. The balance of \$366,468 in the latter account was credited to property abandoned chargeable to operating expenses.

capital adjustment leased lines by a like amount. The balance of \$366,468 in the latter account was credited to property abandoned chargeable to operating expenses.

(3) Profit and loss balance at Jan. 1, 1939, amounting to \$148,129, was transferred to surplus.

(4) Property abandoned chargeable to operating expenses stood at \$14.101,675 on Dec. 31, 1938, and after allowing for additional net losses during the first six months of 1939, amounting to \$33,605, and for credits of \$391,348 during the same period, there remained \$13,743,932 at June 30, 1939. In keeping with the recommendations of the \$EC, this amount was charged against surplus, resulting in a deficit at June 30, 1939 of \$13,308,247, before deducting earnings from operations for the six months ended June 30, 1939, of \$253,209, or allowing for dividend payments of \$104,473 in the same period that were charged against those earnings.

(5) The unadjusted debit account—difference between the par value of securities issued for tangible property at date of organization and the value at which such property was carried, representing intangible rights, amounting to \$6,565,356—was previously captioned—Difference Between the Par Value of Securities Issued for the Property at Date of Organization and the Value at which the Property was Carried.

Conclusion—The revised balance sheet at June 30, 1939, indicates unmistakably that only through a drastic write-down of the capital stock account may past property losses be extinguished and provision made for future abandonments.

It is hoped that your directors may soon formulate a plan of capital readjustment acceptable to representatives of the several classes of equity securities and concurred in by substantially all steelchedeses of equity

It is hoped that your directors may soon formulate a plan of capital readjustment acceptable to representatives of the several classes of equity securities, and concurred in by substantially all stockholders, so that the company will be in a position to complete the revamping of its financial structure to the distinct benefit of all interested parties.

Signed—Arthur G. Wadleigh (Chairman), Edgar C. Rust, Edmond P. Talbot, Public Trustees.]

#### Florida Public Service Co.—Annual Report-

A. W. Higgins, President, in the annual report for 1938 says:

An important change was made during 1938 in the convertible income debentures and the preferred stock of the company. Of the 7% convertible income debentures of the company, \$3,000,000 was delivered in exchange for a new issue of unsecured 5% serial debentures. The interest rate on the balance of \$5,167,900 of 7% convertible income debentures was decreased from 7% per annum to 5% per annum. Southeastern Electric & Gas Co.

also surrendered to the company for cancellation all of its holdings of 7% cumulative preferred stock of the company, amounting to 21,605 shares (par \$2,160,500). The resulting increase in capital surplus was transferred to the stated value of common stock. The 47 shares of preferred stock outstanding in the hands of the public were called for redemption, leaving no preferred stock outstanding at the end of the year.

This entire financial readjustment has improved the position of the company by reducing the interest on \$8,167,900 of debentures from 7% to 5% and by eliminating unpaid cumulative dividends on the preferred capital stock, which amounted to \$1,250,403 at Dec. 31, 1937.

Foreign Bond Associates, Inc.—To Pay Smaller Dividend

Foreign Bond Associates, Inc.—To Pay Smaller Dividend
Directors have declared a dividend of 10 cents per share on the common
stock, payable Sept. 22 to holders of record Sept. 15. This compares
with 15 cents paid on June 22 and on March 22, last; 12½ cents paid on
Dec. 22, 1938, 10 cents paid on Sept. 22, 1938; 20 cents paid on June 22,
1938, and regular quarterly dividends of 25 cents per share previously
distributed.—V. 149, p. 1177.

Dec. 22, 1938, 10 cents paid on Sept. 22, 1938; 20 cents paid on June 22, 1938, and regular quarterly dividends of 25 cents per share previously distributed.—V. 149, p. 1177.

Fort Smith & Van Buren Ry.—Acquisition & Operation The Interstate Commerce Commission on Sept. 8 issued a certificate authorizing acquisition and operation by the company of a line of railroad formerly owned and operated by the Fort Smith & Western Ry. extending from Coal Creek to milepost 41, beyond McCurtain, approximately 20.9 milies, all in LeFlore and Haskell counties, Okla.

The applicant is organized under the laws of Arkansas. It owns approximately 3.30 miles of industrial tracks in Fort Smith, Ark., which are operated by the Kansas City Southern Ry., and through a trackage arrangement its tracks are also used by the 8t. Louis-San Francisco Ry. All the outstanding capital stock is owned by the Kansas City Southern. In an order dated Aug. 7, 1939, permission was granted the receiver by the ICC to abandon the entire line of railroad. of ft. Smith & Western Ry. The Fort Smith & Western owned certain terminals in Fort Smith, operated under trackage rights over the Kansas City Southern from Fort Smith to Coal Creek, 20 miles, owned a line of railroad extending westwardly from Coal Creek to Guthrie, 196 miles, and operated under trackage rights over the Missouri-Kansas-Texas RR. from Fallis to Oklahoma City, 33 miles. Previous to the date permitting abondonment of the line, the court having jurisdiction over the receivership directed the receiver to discontinue operation and to wind up the business affairs of the company. Pursuant thereto an embargo was placed against shipments over the line except that the court ordered service continued between Fort Smith and certain coal mines west of Coal Creek located near Bokoshe and McCurtain. The owned property of the company was sold under foreclosure on July 1, 1939. The receiver of the Fort Smith & Western property to execute and deliver to the Kansas City Southern, or its nomine, the special

Fox West Coast Theatres Corp.—Suit Filed by United States Against Film Companies-Charges Violation of Consent Decree

Assistant Attorney General Thurman Arnold announced Aug. 30 that he has instituted criminal contempt proceedings against 13 motion picture corporations and 54 of their officers for alleged violation of a nine-year-old consent decree which was intended to terminate "monopolistic" practices in the industry.

in the industry.

He said the action was filed in Federal District Court for the southern California area after repeated complaints that the defendants discriminated against independent motion picture distributors by granting Fox West Coast Theatres valuable rights not accorded their competitors.

In 1930, he said, the defendants consented to the entry of a decree

In 1930, he said, the defendants consented to the entry of a decree enjoining the continuance of preferences to Fox West Coast Theatres, Accused in the action are Fox West Coast Theatres Corp.; Loew's, Inc.; Metro-Goldwyn-Mayer Distributing Corp.; Paramount Pictures, Inc.; R. K. O.-Radio Pictures, Inc.; R. K. O. Distributing Corp.; Universal Film Exchanges, Inc.; Warner Bros. Pictures, Inc.; Vitagraph, Inc., and United Artists Corp.; Fox West Coast Agency Corp.; Fox West Coast Service Corp., and Twentieth Century-Fox Film Corp.

Among individuals named are Sidney R. Kent and Joseph M. Schenck, President and Vice-President of Twentieth Century-Fox; Barney Balaban, Paramount Pictures, Inc.; Nicholas M. Schenck and Al Lichtman, Loew's, Inc.; Leo Spitz, R. K. O.-Radio Pictures, Inc.; Harry M. and Albert W. Warner, Warner Bros. Pictures, Inc.

Mr. Arnold said that, despite the consent decree tend "a conspiracy to restrain and monopolize trade in motion pictures," comprehensive field

investigation showed "considerable evidence" that seven major distributors gave Fox West Coast Theatres "prior prights to negotiate for and to exhibit pictures released by them; that Fox West Coast Theatres Corp. demands and receives adherence to zoning and clearing schedules in favor of its theatres and to the discrimination of independent theatres, and that such practices have resulted in the monopolization by Fox West Coast Theatres of first run and other early run theatres in virtually every desirable location in southern California."—V. 141, p. 3861.

Chevrolet August Sales-Chevrolet August Sales—
Chevrolet dealers' retail sales of new cars and trucks in August totaled 48,840 units, a gain of 14.6% over those for August, 1938, W. E. Holler, General Sales Manager, announced on Sept. 8. Sales in the same period last year were 42,611.

The last 10 days of the month showed gains over both the last 10 days of August, 1938 and the second 10 days of August, immediately preceding the period reported. Truck sales accounted for 12,692 units, a substantial part of the total sales.

Used car sales for the month, Mr. Holler said, were 121,619 units as compared with 107,593 in August, 1938, combined new and used unit sales for August being 170,459.

compared with 107.593 in August, 1938, combined new and used unit sales for August being 170.459.

Complaint by FTC—

The corporation and its subsidiary, AC Spark Plug Co., Flint, Mich., were charged with violations of the Clayton, Robinson-Patman and Federal Trade Commission Acts in the sale of spark plugs, oil filters and accessorities, under a complaint issued by the Commission Sept. 12.

The respondents allegedly entered into contracts with some 1.500 wholesalers concerning the sale of "AC" products. It was alleged that certain of the contracts provided that the distributors handle "AC" products on an exclusive basis, and that prices were fixed and charged on the basis of such agreements. With other wholesalers, the respondents allegedly fixed prices and sold "AC" products to such dealers on the agreement, condition and understanding that they would not use or deal in similar competing products. All of these contracts were alleged to be in violation of Section 3 of the Clayton Act prohibiting exclusive dealing arrangements.

The results and effect was to compel many dealers to cancel sales contracts with the respondents' competitors and to substantially lessen competition in the sale of spark plugs and oil filters, according to the complaint. Price discrimination allegedly was practiced by the respondents in violation of Section 2(a) of the Robinson-Patman Act between classes of their indirect accounts; between direct and indirect accounts, classes of their indirect accounts; between direct and indirect accounts, classes of their indirect accounts; between direct and indirect accounts; between and preventing competition between the customers receiving benefit of the discrimination and those not receiving it, and between the respondents and their competitors.

Under this count, it was alleged that the respondents discriminated in price by selling spark plugs at unit prices ranging all the way from 6 cents or less to automobile manufacturers for original equipment, to 41 cents to non-contract retail suppliers

#### General Realty & Utilities Corp. (& Subs.) - Earnings

6 Mos. End. June 30— Net profit after interest	1939	1938	1937	1936
and deprec. but before Federal income taxes.	\$28,174	\$67,605	\$100,789	x\$14,60

\*\*\*Xafter Federal income taxes. \$28,174 \$67,605 \$100,789 \$314,607 \$\$ \*\*\*Xafter Federal income taxes. \*\*\*Note-There has been excluded from income the share of ioss for the six months period ended June 30, 1939, of Lefcourt Realty Corp. applicable to stockholdings of General Realty & Utilities Corp., which share amounted to \$132,292 after making provision for dividends on preference stock as compared with a loss of \$112,392 for the same period of 1938. There also has been excluded from income the results of operations of Central Park Plaza Corp. in which company has a one-half ownership. The corporation's share of these net earnings for the six months period amounted to \$12,472. Of this amount, General Realty & Utilities received \$12,000 in dividends which was taken into income. This compares with net income of \$10,236 in first half of previous year.—V. 148, p. 3688.

General Telephone Corp.—Gain in Phones—
Corporation reports for its subsidiaries a net gain of 1.665 companyowned telephones for the month of August, 1939 as compared with a net
gain of 1.370 telephones for the month of August, 1938. The net gain for
the first eight months of 1939 totals 15.305 (exclusive of purchases and
sales) or 3.33% as compared with a net gain of 8.832 telephones or 2% for
the corresponding period of 1938.

The subsidiaries now have in operation 474,372 company-owned telephones.—V. 149, p. 1025.

General Time Instruments Corp.—To Pay 20-Cent Div.
Directors have declared a dividend of 20 cents per share on the common stock, payable Oct. 2 to holders of record Sept. 19. This will be the first dividend paid on the common shares since April 1, 1938, when 15 cents per share was distributed; previously regular quarterly dividends of 25 cents per share were paid.—V. 149, p. 413.

Huntington Development & Gas Co.-Par of Stock Reduced-

Reduced—

The Securities and Exchange Commission on Sept. 11 issued an order approving a declaration filed by the company pursuant to Section 7 of the Public Utility Holding Company Act of 1935, regarding the reduction of the par value of its 40,000 shares of common stock from \$100 per share to \$50 per share.

Columbia Gas & Electric Corp., a registered holding company, filed an application pursuant to Instruction 8-C to the Uniform System of Accounts for Public Utility Holding Companies, requesting approval of proposed entries to record the transfer to Columbia of the stocks of Huntington Development & Gas Co., and other assets of the former Huntington Gas Co., a wholly-owned subsidiary of Columbia which has been dissolved. Huntington Development is a Delaware corporation. By virtue of the dissolution of Huntington Gas Co., it is now a direct subsidiary of Columbia Gas & Electric Corp. It is a gas utility company operating in the State of West Virginia. It has 40,000 shares of common capital stock outstanding, 99.7% of which is owned by its parent Columbia Gas & Electric Corp. By the reduction of the par value of the 40,000 shares of its common \$2,000,000 will be created. Such capital surplus will be segregated into an account to be designated "Special capital surplus will be segregated into an account to be designated "Special capital surplus will be segregated into an account to be account on accoung of advances made to Huntington Development. Columbia proposes to forgive this indebtedness, thus making a capital contribution to Huntington Development in the amount of \$3,342,465. This amount will be credited to special capital surplus, increasing that account to \$5,32,060 as of Dec. 31, 1937. It proposes to eliminate this deficit by charging \$55,500 to capital surplus and the balance of \$726,806 to special capital surplus. After these transactions have taken place there will remain in special capital surplus a balance of \$4,615,658 to provide for any downward revaluations in its property account, as such acco

The effect of the foregoing transactions on the books of Huntington Development is shown by the following statements of capitalization (including completes) as of Dec. 21, 1937.

Society, has been elected a director of this company, to fill the unexpired term of the late Arthur W. Sewall.—V. 148, p. 1809.

Interborough Rapid Transit Co.—City Names Depository for Junior Securities—

Acquisition by the city of the properties of the I. R. T. and Manhattan Ry. as a final step toward unification of the subway system came closer Sept. 12 when the Comptroller of the city designated the Chemical Bank & Trust Co., 165 Broadway, as the depository for junior securities. This means that after 18 years of negotiations the securities actually are being deposited for the account of the city as the first step toward taking over its oldest subway system.

It is believed that the cause of objecting stockholder groups will be materially weakened, because the large stockholders are expected to deposit their stock in exchange for negotiable certificates.

The agreement, which would make the city the owner of the properties of the two companies through the payment of \$151,248,187, has been approved by the Manhattan directors and by a committee representing the holders of 556,000 shares of modified Manhattan stock; also by the holders of the 7% unmodified stock, and by the first and second mortgage bondholders. Letters of approval have been signed and forwarded to the Transit Commission.

Although there has been some talk of organizing an independent committee of Interborough stockholders, this has not been done to date. The advocates of unification are hopeful that no obstacle of this nature will be placed across their path. The 6% note holders are reported to favor the agreement. In the near future foreclosure bills probably will be put in for the I. R. T. and Manhattan first lien mortgages.

As the city's depository, the Chemical Bank & Trust Co. will issue negotiable certificates in exchange for all junior certificates, 6% I. R. T. notes and common stock. The securities being deposited include second mortgage bonds of the Manhattan, its modified and unmodified stock, which carry 5% guaranties and 7% guara

International Agricultural Corp.—Annual Report-

International Agricultural Corp.—Annual Report—

J. H. Hunt, Secretary, in his remarks to stockholders says:

Through the operation of the sinking fund, \$250,000 of bonds were retired during the year. There are bonds now outstanding in the amount of \$4,500,000, of which the corporation owns \$1,208,000, leaving the net bonds outstanding in the hands of the public \$3,292,000.

Fertilizer shipments during the year were equal to those of the previous year; however, prices were disappointing in many sections and, in general, carried small profit.

Despite an increase in tonnage and in net return from our Tennessee phosphate rock operations, our net income from both Tennessee and Florida phosphate rock departments is less than the previous year. A reduction of approximately 20% in export shipments from Florida occasioned by foreign exchange restrictions has been primarily responsible for this result.

The appeal which was taken by Southern Phosphate Corp. in its patent litigation with our affiliate, Phosphate Recovery Corp., has been decided in favor of Phosphate Recovery Corp.

In the reports for the years ended June 30, 1937, and June 30, 1938, reference was made to our interest in the development of potash properties in New Mexico. On July 1, 1939, the corporation exercised its option to subscribe for additional stock of Union Potash & Chemical Co. The subscription price was \$800,000 and the shares thus obtained, when taken with the corporation's previous holdings in the Union Potash & Chemical Co., acquired at a cost of \$240,125, give the corporation 52½% of the outstanding preferred stock.

y Effective July 1, 1935, the company resumed charging depreciation on assets where the appraised value was greater than the book value. The

effect of this change in accounting policy was to increase the depreciation charge and decrease the net profit for the current year by approximately \$71.000. \*After deducting \$21.385 in 1939, \$16.259 in 1938 and \$8,195 in 1937 in excess of dividends received over corresponding equity in net earnings of affiliated companies, not consolidated.

a Includes other interest of \$9,729.

a Represented by 436,048 no par shares. b After deducting reserves of 76,492 in 1939 and \$452,806 in 1938.—V. 149, p. 1328.

International Business Machines Corp.—Foreign Profits

In view of the disturbed conditions abroad company calls stockholders' attention to the consolidated income account as published in the annual statement for 1938.

It will be noted that the total foreign profits including royalties for 1938 amounted to \$1,559,622: of that amount only \$739,025 was included in the profits. The balance of \$820,597 represents profits in countries from which company has been unable to get its money and are covered 100% by reserves.

reserves.

The net profits before Federal taxes, of \$10,830,034, therefore only included \$739,025 of foreign profits, or 6.9%. In this figure of \$739,025 there were included profits from South America and other parts of the world not directly affected by war conditions.

Company's records for the first seven months of this year show the increase in profits in the United States and Canada, alone, amounts to more than the total foreign net profits for the same period.—V. 149, p. 732.

more than the total foreign net profits for the same period.—V. 149, p. 732.

International Match Corp.—Assets of \$3,779,126 Shown
The estate of International Match Corp. had gross assets on July 31 of \$3.779,126 in cash, the capital stock of Vulcan Match Co., Inc., an account receivable therefrom, and a claim in the Swedish brankuptcy of A|B Kreuger & Toll, the seventh intermediate report of Irving Trust Co., Trustee in bankruptcy, submitted to Referee Oscar Ehrhorn discloses.

Vulcan Match Co., Inc., at July 31 had cash of \$1,538,158 and an account receivable of \$3,478 from American Turkish Investment Corp., its only assets. Against these assets there were accounts payable of \$12,528,158 and an account receivable of \$3,478 from American Turkish Investment Corp., its only assets. Against these assets there were accounts payable of \$12,520,000 kmile \$7,249,661 was due the trustee of International, leaving a deficit of \$5,720,849.

In addition, the assets of Vulcan are subject to a claim of \$125,000 by the trustee for services in connection with the sale of sertain Mexican assets formerly owned by a subsidiary. No provisions have been made for the amount chargeable against services rendered by the trustee, its attorneys and accountants.

Moreover, the United States Customs authorities have issued antidumping orders against at least 168 customs entries by Vulcan of foreign-nade matches. Assessments of at least \$170,000 have been made against 79 of these entries, which have been contested by the company.

It is asserted that there is no indication of the amounts which might be assessed against the remaining entries.

The report says that "any further dividends received" from the estate of Kreuger & Toll "are likely to be small in amount."

The report, which covers the period from June 1, 1932, to July 31, 1939, and for the first time the period from June 1, 1932, to the latest date, discloses that total dividends of \$29,788,855 have been pald against total claims of \$97,936,875. This represents a recover to date o

International Paper Co.—Present Prices to Prevail—
R. J. Cullen, President of the company, Sept. 14 stated that the company is announcing to its domestic newsprint customers that, taking advantage of inventories on hand, present prices will be protected without change throughout the first three months of 1940. While it is impossible under existing conditions to make at this time any specific commitment beyond that date, it is hoped that a firm price for the coming six months will be reassuring to publishers and will demonstrate the company's desire to maintain an orderly market. For the future, prices for newsprint will be indicated just as far in advance as possible and will be made in the light of conditions as they develop, always recognizing that the interests of our customers as well as ourselves demand as large a degree of stability as can be preserved.—V. 149, p. 1179.

Italo Petroleum Corp. of America—Meeting Adjourned-The special meeting of the stockholders to be held Sept. 11 has been adjourned to Sept. 25. At said meeting the stockholders will be called upon to consider and act only upon the proposition of transferring, assigning and conveying all of the assets, real and personal, of every kind and character, other than the corporate franchise and goodwill, owned by the corporation, to Westates Petroleum Corp., and the assumption by Westates (\$2.50 par) of Westates Petroleum Corp., and the assumption by Westates of all the liabilities and obligations of every kind and character of the corporation, and the subsequent operation of Westates Petroleum Corp. as a wholly-owned subsidiary of Italo corporation. See also V. 149, p. 1329. Jenkins Brothers—Dividends-

Directors have declared a dividend of 25 cents per share on the non-voting common stock, par \$25, and a dividend of \$1 per share on the founders' shares, par \$100, both payable Sept. 28 to holders of record Sept. 14. Dividends at half these amounts were paid on the respective issued on June 29, last. See also V. 148, p. 3851.

Jersey Mortgage Co.—Interest—
Directors of the company Sept. 13 declared interest on certain series of the company's outstanding income bonds, payable Sept. 25 to holders of such bonds of record Sept. 15, in respect of the six months' period ended June 30, as follows:

Series A, \$1 per \$100 principal amount of bonds; series B, \$1.25; series C, \$1.50; series D, 85 cents; series E, \$1.50; series I, \$3; series N, \$2.

(Mead) Johnson & Co.—Extra Dividend—

to the regular quarterly dividend of 75 cents per share in addition to the regular quarterly dividend of like amount on the common stock, no par value, both payable Oct. 1 to holders of record Sept. 15. Like amounts were paid on July 1 and April 1 last.—V. 149, p. 1478.

Kansas City Public Service Co.—Final Call for Deposits Approximately 83½% of the publicly-held bonds of this company have now been deposited under the plan of capital readjustment. Thus approximately \$780,600 of bonds remain to be deposited to meet the 90% requirement of the Reconstruction Finance Corporation.

Further deposits will be accepted to the close of business on Sept. 23, whereupon the RFC will be notified of the amount on hand and action taken for the consummation or abandonment of the plan as the situation may warrant.

Bondholders who have not yet deposited are requested to do so promptly.—V. 149, p. 1329.

-V. 149, p. 1329.

Kansas City Structural Steel Co.—Accumulated Div.-Directors have declared a dividend of \$6 per share on account of accumulations on the 6% cumulative preferred stock, payable Sept. 15 to holders of record Aug. 31, leaving arrears of \$16.50 per share.—V. 148, p. 2274.

Kelvinator of Canada, Ltd.—Interim Dividend—
Directors on Sept. 9 declared an interim dividend of 50 cents per share on the common stock, payable Sept. 28 to holders of record Sept. 18. This will be the first dividend paid on the common shares since Sept. 29, 1938, when 75 cents per share was distributed; dividend of \$1 was paid on Sept. 29, 1937, and an initial dividend of \$1.25 per share was disbursed on Sept. 25, 1936.—V. 147, p. 4058.

Kinner Airplane & Motor Corp., Ltd.-Property

See Kinner Motors, Inc.-V. 148, p. 585.

Kinner Motors, Inc.—Stock Offered—G. Brashears & Co., Los Angeles, in August offered 385,978 shares common stock (par \$1) at \$1.25 per share. This stock is offered as a speculative security.

The 385,978 shares offered consist of (a) 150,000 unissued shares which are offered for the account of the company to the public generally at \$1.25 per share, or an aggregate price of \$187.500; (b) 145,029.5 unissued shares which are offered for the account of the company to the stockholders of Kinner Airplane & Motor Corp., Ltd., at 86 cents per share, or an aggre-

gate price of \$124.725.37 (14 cents per share, or \$20.304, having already been supplied by the promoters); and (c) 90.948.5 outstanding shares which are offered to the public generally for the account of the promoters at \$1.25 per share, or an aggregate price of \$113.686. Any of the 145.029.5 shares which are not subscribed for by stockholders will be issued to the promoters in payment of indebtedness of the company to them and such shares are offered for the account of the promoters at \$1.25 per share, or an aggregate price of \$181.287. None of the 90.948.5 shares will be sold for the account of the promoters and none of the 145.029.5 shares will be resold for the account of the promoters until all of the 150,000 unissued shares have been sold for the account of the company.

\*\*Capitalization\*\*—Authorized. 500.000 shares (par \$1). Company had

account of the promoters until all of the 150,000 unissued shares have been sold for the account of the company.

Capitalization—Authorized, 500,000 shares (par \$1). Company had outstanding as of Aug. 16, 1939, 150,948.5 shares (of which 90,948.5 shares are offered for the account of the promoters) and the remaining 60,000 shares are in escrow subject to the order of the California Commissioner of Corporations, which are not offered. Said 150,948.5 shares were issued to the promoters as fully paid up in consideration of (a) the assignment of a contract to purchase assets for \$200,000, (b) the payment of \$75,274 of the promoters are in each complete the payment of said purchase price. Of the \$75,274 of the said purchase price, and (c) lending the company \$124,725.37 without interest to complete the payment of said purchase price. Of the \$75,275, \$20,304 was allocated to the 145,029.5 unissued shares being offered to the stockholders of Kinner Airplane & Motor Corp., Ltd., leaving \$54,971 thereof attributable to the outstanding shares. The assets so acquired are carried by the company at the contract price of \$200,000, subject to adjustments as the result of operations from Oct. 31, 1938, plus the sum of \$95,978, which is carried on the balance sheet under the heading "promotion," and which is not represented by the company to be an actual or realizable value. This amount is equal to the difference between the par value of the 150,948.5 shares and the \$\$54,970.50 allocated thereto. Upon the company will have outstanding 445,978 shares of stock, of which the promoters will continue to own 60,000 escrowed shares.

Acauisition of Properties

Acauisition of Properties

Company—Incorp. in California Jan. 18, 1939. The company owns no real property but conducts its business on leased premises at Glendale, California.

Company—Incorp. in California Jan. 18, 1939. The company owns no real property but conducts its business on leased premises at Glendale. California.

Company was organized primarily for the purpose of acquiring substantially all of the physical assets owned by Earl Herring as trustee of the estate of Kinner Airplane & Motor Corp., Ltd., debtor in a proceeding for reorganization under Chapter X of the Bankruptcy Act. Kinner Airplane & Motor Corp., Ltd., which the company does not regard as its predecessor, commenced business in 1919 as a manufacturer of aircraft and aircraft engines and parts. It substantially discontinued the manufacture of aircraft about the middle of 1936, although it manufactured some planes as late as the early part of 1937. Thereafter it continued in the business of manufacturing aircraft engines and parts.

On Dec. 2, 1937, corporation filed its petition for reorganization as a debtor under Section 77-B of the Bankruptcy Act. alleging that it was unable to meet its obligations as they matured. The Federal Court continued debtor in possession with authority to operate its properties under the supervision of the Court until May 13, 1938, at which time the Court appointed Earl Herring as trustee. On Jan. 12, 1939, the Court approved an offer by B. B. Robinson (acting on behalf of himself, Reese L. Milner and G. Brashears & Co., as "promoters") to purchase substantially all of the physical assets of the trustee as of Oct. 31, 1938, for \$200,000, with the agreement by the promoters to offer to the stockholders of the debtor corporation, for a period of 30 days, the right to purchase for \$125,000 a 49% interest in such property or 49% of such shares as the promoters might receive for the assets in the event they should transfer the same to a new corporation.

An agreement between the promoters and the company, dated March 25, 1939, provided, among other things, for the assignment of the offer of such shares to be paid by the promoters to the company to the offer of such shares to be paid by the

company has not and does not intent to engage in the business of manufacturing aircraft, although Kinner Airplane & Motor Corp., Ltd., did so engage.

Purpose—If all of the 150,000 shares offered are sold, the gross proceeds, after the deduction of selling commissions, will be \$150,000. If all of the 145,029 shares offered to stockholders of Kinner Airplane & Motor Corp., Ltd., are subscribed for by said stockholders, the gross proceeds therefrom to the company will be \$145,029, of which \$20,304 has already been paid to the company by the promoters, leaving \$124,725 yet to be received. There will be no selling commissions in connection with any shares subscribed for by stockholders as G. Brashears & Co. is acting as selling agent of the company without compensation as regards such offering. The promoters have agreed to bear two-thirds of the expenses in connection with the issue of the shares offered, and the remaining one-third of such expenses, which is to be borne by the company, is estimated at \$4.776. After deduction of this amount from the \$295,029 freelived or to be received by the company for the 295,029 5 shares offered for its account, there will remain estimated net proceeds to the company of \$290,253.

These net proceeds are to be used as follows:

To repayment of loans totaling \$124,725 made by the promoters to the company to enable it to complete the purchase of certain properties and assets formerly owned by Kinner Airplane & Motor Corp., Ltd.

To repayment of subsequent loan made by the promoters to the company.

306,000

To the completion of the purchase price of the company's assets (already paid).

307,000

To payment under Braunwalder contract upon the issuance of an approved type certificate on parallel type engine.

5000

To additional cash working capital (estimated).

The proceeds shown above do not include the estimated net proceeds to the selling stockholders from the sale of the 30,948.5 outstanding shares offered, which will amount to a maximum of \$98,527.

Management and Control—The following is a list of all persons who are the directors and chief executive, financial and accounting officers of the company: B. B. Robinson (Pres.), Reno, Nevada; Reese L. Milner (Sec. Treas.), Los Angeles, Calif.; Arthur Lee (V.-Pres.), Los Angeles, Calif.; G. Brashears (director), Los Angeles, Calif. There are two vacancies on the board of directors.

The 150,948.5 outstanding shares are owned as follows: One-third by B. B. Robinson; one-third by Reese L. Milner, and one-third by G. Brashears & Co.

shears & Co.

Underwriting—150,000 unissued shares are offered to the public for the account of the company at \$1.25 per share when, as and if issued and subject to the approval of counsel and to the withdrawal, cancellation or modification of the offering without notice. There is no commitment on the part of G. Brashears & Co. or any other person to purchase all or any part of aid shares.
90,948.5 outstanding shares are offered to the public for the account of B. B. Robinson, Reese L. Milner and G. Brashears & Co., at \$1.25 per

share.

145,029.5 unissued shares are offered for the account of the company to the stockholders of Kinner Airplane & Motor Corp., Ltd., of record as of June 30, at 86 cents per share (14 cents per share having already been paid by the promoters to the company), when, as and if issued and subject to the approval of counsel. The offering to stockholders of record is made for a period of 30 days ending at 5 o'clock p. m., Pacific Standard Time, on the 30th day after the date of this prospectus (Aug. 16, 1939). Said offer is made on the basis of one share of the company's stock for each 10 shares of the stock of Kinner Airplane & Motor Corp., Ltd. Auy of such shares which are not subscribed for by said stockholders will be issued to B. B. Robinson, Reese L. Milner and G. Brashears & Co. in consideration of the

14 cents per share already paid and the cancellation of indebtedness of th company to them at the rate of 86 cents per share.

G. Brashears & Co., B. B. Robinson and Reese L. Milner may be considered underwriters in respect of the 145,022.5 shares which are offered to stockholders in that they have agreed to accept any of the shares not subscribed for by stockholders in payment of indebtedness of the company to them at the rate of 86 cents per share.

Koppers Associates, Inc.—Dissolution—
The New York Curb Exchange has received notice of the dissolution of Koppers Associates, Inc. (originally named The Koppers Co.), and of the assumption by Koppers United Co. of all of the liabilities of Koppers Associates, Inc., including its obligations as guarantor of the payment of dividends for the \$3 preferred stock of the Connecticut Gas & Coke Securities Co. New forms of \$3 preferred stock certificates of the Connecticut Gas & Coke Securities Co. have been prepared with an endorsement of guaranty of Koppers United Co. and on future transfers only the new form of certificates will be issued.

Accordingly, the Committee on Security Rulings of the New York Curb Exchange has ruled that until and including Oct. 4, 1939, deliveries against transactions in the \$3 preferred stock of the Connecticut Gas & Coke Securities Co. may be made with either the old forms or the new forms of certificates. After that date only the new form of certificates bearing an endorsement of guaranty of Koppers United Co., will be a delivery.

Koppers Co.—Preferred Dividend—

Koppers Co.—Preferred Dividend-Directors have declared a dividend of 75 cents per share on the 6% preferred stock, payable Oct. 1 to holders of record Sept. 21. Like amount was paid on July 1, April 1 and Jan. 1 last, and on Oct. 1, 1938; previously regular quarterly dividends of \$1.50 per share were distributed.—V. 149, p. 1479.

Kroger Grocery & Baking Co.—Acquisition—
Company has purchased the Oakley Economy Stores Co., which operates 58 retail grocery and meat stores in eastern Illinois and western Indiana. Albert H. Morrill, Kroger President, stated. The purchase price was not revealed.

During 1938 Oakley Economy Stores sold \$4,300,000 worth of merchandise and 1939 sales to date are 5% ahead of last year, according to H. N. Oakley, President of the chain, who added that the company has made a profit every year since the first store opened in 1909. Mr. Oakley will continue to manage the chain bearing his name, which has headquarters in Terre Haute, Ind., and will assume management of the present Kroger stores in that city.—V. 149, p. 1330.

(Marcus) Loew's Theatres, Ltd.—Accumulated Div.—
The directors have declared a dividend of \$3.50 per share on account of accumulations on the 7% cum. pref. stock, par \$100, payable Sept. 30 to holders of record Sept. 16. Like amount was paid on June 30 last, and dividend of \$21 was paid on Mar. 31 last. See also V. 148 p. 1174 and 3379.

Lyon Metal Products, Inc.—Accumulated Dividend—Directors have declared a dividend of \$3 per share on account of accumulations on the 6% cumulative participating preferred stock, payable Oct. 2 to holders of record Sept. 15. Dividend of \$1.50 per share was paid on Aug. 1, last.—V. 149, p. 735.

(Arthur G.) McKee & Co.—Extra Dividend-The directors have declared an extra dividend of 25 cents per share in addition to a regular quarterly dividend of 25 cents per share on the class B stock, both payable Oct. 2 to holders of record Sept. 20. Extras of 75 cents were paid in each of the eight preceding quarters; an extra of 50 cents was paid on April 1, 1937, and extra dividends of 25 cents were paid on Jan. 2, 1937, on Oct. 1, July 1 and Jan. 1, 1936, and on Oct. 1, 1935. In addition, a year-end dividend of 50 cents was paid on Dec. 20, 1937, and a special dividend of 25 cents per share was distributed on Dec. 22, 1936.—V. 148, p. 3692.

McQuay-Norris Mfg. Co.—Interim Dividend—
The directors have declared an interim dividend of 50 cents per share on the common stock, payable Oct. 2 to holders of record Sept. 20. Like amount was paid on July 3 and April 1 last; dividends of 25 cents were paid on Jan. 3 last and on Oct. 1 and July 1, 1938, and compares with 50 cents paid on April 1 and Jan. 3, 1938, and a dividend of 75 cents per share paid on Oct. 1, 1937, and each three months previously. In addition, an extra dividend of 25 cents per share was paid on Dec. 22, 1936.—V. 149, p. 1029.

Madison Square Garden Corp.—To Decrease Directorate
Stockholders at their annual meeting on Sept. 26 will consider amendments to the certificate of incorporation and by-laws to provide that the
affairs of the corporation shall be managed by a board of directors consisting
of not less than 12 nor more than 16, instead of 17 directors as heretofore.
—V. 149, p. 1029.

Mahoning Coal RR.—\$7.50 Common Dividend The directors have declared a dividend of \$7.50 per share on the common stock, par \$50, payable Oct. 2 to holders of record Sept. 25. Dividend of \$6.25 was paid on July 1, last; \$4 was paid on April 1 last; one of \$10 was paid on Oct. 26, 1938; regular quarterly dividend of \$4 per share was paid on Oct. 1, 1938; a dividend of \$15 was paid on Dec. 29, 1937; dividends of \$7.50 were paid on Oct. 1, July 1 and on April 1, 1937; \$13 was paid on Dec. 23, 1936, and \$6.25 was paid on Nov. 2, 1936 and in each quarter previously.—V. 149 p. 1182.

Massachusetts Mutual Life Insurance Co.-6 Months

\$24,407,746 \$865,133,748 Since Jan. 1, 1939, when the company's investments exceeded \$600,-000,000, new investments amounting to over \$47,000,000 have been made. Death losses decreased \$1,173,893; payments to living policyholders increased \$507,485. Expense ratios fell off slightly despite an increase of \$133,794 in Federal, State and local taxes paid (as compared with first six months of 1938), this total being \$1,320,377. Over 35% of the new insurance sold was taken by persons already insured in the company. In connection with real estate the company handled over \$105,000,000 of mortgages, and \$62,000,000 of real estate through the head office in Springfield, Mass., as well as branches.

May Department Stores Co. (& Subs.) - Earnings-

Mengel Co.—Bookings—
August bookings of subsidiaries totaled \$921,218, an increase of 7% over the \$859,522 bookings in the same month of last year. More than a dozen industries, including furniture, building and numerous consumer lines using fibre containers, wooden boxes and lumber, are customers of Mengel, so that its orders usually reflect the trend of general business.

New bookings for the first eight months of this year amounted to \$5,994,319, an increase of 25% as compared with bookings of \$4,807,279 in the corresponding period of 1938, according to the company's statement.

Mengel shipments in August totaled \$881,860, an increase of 15% over shipments in August totaled \$881,860, an increase of 15% over shipments in August, 1938, while eight months' shipments were \$5,587,525, or 28% over the same period of 1938.

Mengel's unfilled orders as of Aug. 31 were \$1,658,643, compared with \$1,629,654 on the company's books at the end of July and \$1,602,068 on Aug. 31, 1938.—V. 149, p. 1182.

#### Minneapolis General Electric Co.-Merger of Subs.

The Securities and Exchange Commission announced Sept. 11 that the Minneapolis General Electric Co. and its subsidiaries, St. Croix Falls Wisconsin Improvement Co. and St. Croix Falls Minnesota Improvement Co. have filed applications (File 46-170) under the Holding Company Act covering a series of transactions which will place ownership of the St. Croix Falls Hydro Project and the Nevers Dam Development Co. in one company in the system, the St. Croix Falls Wisconsin Improvement Co. The company states that the transaction will result in a simplification of the financial structure of the system and, in addition, will eliminate three companies in the system.—V. 144, p. 943.

Minnesota Power & Light Co.—Accumulated Dividends
The directors have declared dividends of \$1.75 per share on the 7%
cum. pref. stock, par \$100; \$1.50 per share on 6% cum. pref. stock, par

\$100 and \$1.50 per share on the no par \$6 cum. pref. stock, all on account of accumulations and all payable Oct. 2 to holders of record Sept. 15. Like amounts were paid in each of the six preceding quarters. See V. 145, p. 3822, for record of previous dividend payments.—V. 149, p. 1481.

Mobile Gas Service Corp.—Interest Payment—
At a meeting held Aug. 14, 1939 the board of directors declared the following amounts of interest to be payable on Oct. 1, 1939 on the first mortgage income bonds, series A and B, due Oct. 1, 1956 equivalent to: 7½% of the principal of the series B bonds.

On Oct. 1, 1939, the accumulated unpaid interest on the series A and series B income bonds will amount to 22½% and 17½% respectively.

Monsanto Chemical Co.—British Subsidiary Bal. Sheet—In a special message to shareholders, Edgar M. Queeny, President, presented the balance sheet of Monsanto Chemicals, Ltd., the overseas subsidiary of the company, for their information in view of the European war. The British company has plants in Sunderland, England, and Ruabon, North Wales, and had general offices in London until evacuation on Sept. 3.

war. The British company has plants in Sunderland. England, and Ruabon, North Wales, and had general offices in London until evacuation on Sept. 3.

"In view of the war, you may be interested in reviewing the balance sheet of our British subsidiary, Monsanto Chemicals, Ltd., which, with other subsidiaries, always has been consolidated with that of the parent company," he said.

"The net worth of our British subsidiary, after allowance for their preference shares, is equivalent to approximately \$2 a share of Monsanto Chemical Co. common stock. After deduction for the dividends on their preference shares, their earnings were the equivalent for Monsanto Chemical Co. common stock of 46 cents a share for 1937, 29 cents a share for 1938 and 15 cents a share for the first six months of 1939.

"It is difficult to estimate now what effect the war will have upon this subsidiary or our American operations.

"As has been stated repeatedly, Monsanto does not manufacture munitions. None of the articles whose export is prohibited under the Neutrality Act are current Monsanto products. Some of our present facilities could be converted for the manufacture of these munitions if the requirements of our Government demanded, but we could not at the same time manufacture our current output of products entering into everyday commerce without extensive additions to our facilities. As our normal program is occupying the entire time of our development and engineering staffs, we do not contemplate the manufacture of munitions.

"Although sales continue well above the levels of 1938, no unusual demands have been felt so far. We are, however, preparing for the probability in the export markets formerly held by European nations as well as the possibility of increased demands from American manufacturers of rubber, oil, steel, textiles, foodstuffs, and many other industries whom we serve, who may find it necessary to accelerate operations."

Note—The net current assets, investments and deferred charges have been converted at the rate of \$4.64 to £1, and the remaining items at not more than \$4.85 to £1. A reserve for exchange fluctuation on the books of the parent company is sufficient to write down net current assets to approximately \$4.25 to £1.—V. 149, p. 881.

Montreal Light Heat & Power Consolidated-Montreal Light fleat & Power Consolidated—Output
Electricity output for consumption in the Montreal area during August,
according to a statement issued by this company, amounted to 93,898,770
kilowatt-hours, an increase of 5.65% over August 1938. Output for the
first eight months reached 767,239,240 kilowatt-hours, as against 731,681,910 kilowatt-hours for the corresponding period of 1938, an increase of
35,557,330 kilowatt-hours, or 4.66%.
Gas output in August amounted to 371,285,000 cubic feet as against
370,344,090 cubic feet in August, 1938, an increase of 0.25%. Output for
the first eight months in 1939 was 3,221,953,000 cubic feet, as compared
with 3,265,702,000 cubic feet in 1938, a decrease of 1.34%.—V. 149, p. 1030.

Mount Diablo Oil Mining & Development Co.-Extra

Directors have declared an extra dividend of one cent per share in addition to the regular quarterly dividend of like amount on the common stock, both payable Dec. 1 to holders of record Nov. 15.—V. 145, p. 3503.

#### Ohio Fuel Gas Co .- Par of Stock Reduced-

Ohio Fuel Gas Co.—Par of Stock Reduced—
The Securities and Exchange Commission has issued an order approving a declaration filed by the company pursuant to Section 7 of the Public Utility Holding Company Act of 1935, regarding the reduction of the par value of its authorized shares of common stock from \$50 to \$45, per shares. The company has presently outstanding 1.343.803 shares of common stock. Thus, the proposed decrease in par value will result in a reduction of the common capital stock account in the amount of \$6,719,015. Such amount will be segregated in a separate account to be designated as special capital surplus. The purpose of the creation of special capital surplus is to provide an account against which may be charged such downward revaluations in property account, as of Dec. 31, 1937, as may possibly in the future be required by regulatory bodies having jurisdiction in the premises.

The following is a condensed balance sheet, both actual and pro forma, as of Dec. 31, 1937 (the date as of which the entries will be made), compiled from figures submitted by the company:

\_117,989,863 117,989,863 Total\_

a Payable to Columbia Gas & Electric Corp. (parent). b Including \$750,000 current maturities of funded debt. c Pending rate decisions, less Federal income taxes thereon. d Due to certain debits to this account during 1938, earned surplus prior to Jan. 1, 1938, was stated at \$6,063,358 as at Dec. 31, 1938.

All of the outstanding stock is held by its parent, Columbia Gas & Electric Corp. The demand notes are also held by Columbia. The only securities held outside the system are the guaranteed 4% serial notes (guaranteed as to principal and interest by Columbia Gas & Electric Corp., which are held by two insurance companies which have given their written assents to the proposed transaction.

At the present time the company does not propose to make any charges to special capital surplus. The immediate and motivating reason for the setting-up of special capital surplus is in order to reduce to a minimum the risk that surplus since Dec. 31, 1937, will not be free for the payment of dividends under this Commission's Rule U-12C-2, regarding the payment of dividends out of capital or unearned surplus. In addition, company hopes to retain part of its earned surplus prior to Jan. 1, 1938, as surplus available for dividends. This earned surplus prior to Jan. 1, 1938, as surplus ing to \$6,063,358 as of the end of that year) is stated to be a valid earned surplus. It is proposed to charge to this account only readjustments with respect to transactions which occurred prior to Jan. 1, 1938, and which involve charges that should, in accordance with sound and generally accepted accounting principles, be made to earned surplus. In the event that either earned surplus prior to Jan. 1, 1938, or special capital surplus is exhausted, the balance in the other of such accounts will be used.

The Commission funds it necessary to attach certain conditions to its order permitting the declaration to become effective so as to insure compliance with the standards specified in Section 7. These conditions are as follows:

(1) That all corpora

pliance with the standards specified in Section 7. These conditions are as follows:

(1) That all corporate action and all matters connected therewith or related thereto shall be performed in all respects as set forth in, and for the purposes represented by, the declaration as amended.

(2) That no charges be made to earned surplus prior to Jan. 1, 1938, or to special capital surplus unless (a) such charge has previously been authorized by appropriate resolution of declarant's board of directors, and (b) subsequent to such resolution of the board of directors, 30 days' prior notice of the making of such charge be given to this Commission. In the event that such proposed charge is to be made to special capital surplus and is not of a capital nature, such notice to this Commission shall be accompanied by a copy of the order of the Public Utilities Commission of Ohio approving such charge to special capital surplus as provided in the order of the P. U. Commission of Ohio, in Case No. 10,869. The Commission reserves jurisdiction, on receipt of such notice, in and as part of the proceedings herein, after notice given within such 30 days and opportunity for hearing, to disapprove such charge on the basis of the record herein and any additional evidence that may be adduced by any interested party; and in the event that the Commission shall notify declarant to show cause why such charge should not be disapproved, the charge in question shall not be made until expressly authorized by order of this Commission.

(3) That no dividend shall be paid out of earned surplus prior to Jan. 1, 1938, without prior application to and order of approval by this Commission's order.

(4) That with respect to any part of special capital surplus which is not used for the purposes outlined by the declarant jurisdiction is reserved

mission's order.

(4) That with respect to any part of special capital surplus which is not used for the purposes outlined by the declarant jurisdiction is reserved by this Commission, in and as part of the proceedings herein, with respect to the ultimate disposition of such balance.—V. 148, p. 1970.

Philadelphia Rapid Transit Co.-Plan Approved by

The reorganization plan of the company, one of the largest street transportation companies in the country, involving 68 different companies and \$85,000,000 in securities, was approved by Judge George A. Welsh in the U. S. District Court for the Eastern District of Pennsylvania at Philadelphia Sept. 14 in a statement which strongly praised the work of the reorganization managers and the spirit of cooperation shown by the municipal and other authorities.

The Pennsylvania Public Utility Commission, the City of Philadelphia, and the boards of directors of all the different companies have approved the plan which now awaits only the ratification of the stockholders and creditors to be made effective by the Court. Special meetings of the stockholders of the various companies have been called to be held the latter part of October for this purpose.

Approximately \$21,000,000 of bonds will not be disturbed by the reorganization. New securities to be issued in exchange for old securities will amount to approixmately \$65,000,000. The plan provides for acquisition by the P. R. T. of all corporate powers, franchises, property, rights and credits of its wholly-owned subsidiaries, Philadelphia Rural Rapid Transit Co., under legislation of June 26, 1931, and July 2, 1937.

Judge Welsh, in his statement approving the plan, said:

"The P. R. T. reorganization managers, Albert M. Greenfield and Edward Hopkinson Jr., filed with me their interim report on the various steps which have been taken to present the plan of reorganization to the approximately 50,000 separate individual stockholders and creditors of the system companies for their individual action thereon. The raport shows that 57 differ mt kinds of notices have been mailed to public stockholders, bondholders, stock trust certificate holders and holders of certificates of deposit. In addition 46 other separate kinds of notices have been given in the case of wholly intercompany owned corporations. 68 separate companies are involved. Separate meetings of stockholders of each of the companies have been called to be held during the latter half of October, at which they will take formal action on the plan. Only those familiar with the intricate details and the staggering amount of complicated work involved can truly appreciate the magnitude and significance of the task already accomplished. The report is a most heartening one and has been approved by me.

"We have come a long way down the track in the past 12 months. The Pennsylvania Public Utility Commission has approved the plan. The City of Philadelphia has approved the plan. The boards of directors of all companies involved have approved it. The reorganization managers and their capable staff have completed all duties necessary to place the plan before security holders.

"Now the plan is before the stockholders and creditors themselves.

"The report of the reorganization managers clearly shows that no stone has been or will be left unturned to give investors complete and accurate information about the reorganization managers clearly shows that no stone has been or will be left unturned to give investors complete and accurate information about the reorganization proposals and the fullest opportunity for action upon it.

"The report sts forth the action recently taken in the Orp

in all estates holding system securities, and is of the greatest importance in this situation.

"The progress achieved so far furnishes a splendid illustration of what can be successfully accomplished when fair minded private investors and cooperative civic and governmental agencies unite to resolve an intricate problem of both public and private charcater.

"The present plan of reorganization is intended to eliminate the weaknesses which so far have worked against transit investors and the city as a whole, and to provide a solid foundation on which will be suilt a new transit structure, more serviceable to the city and more valuable to its owners. The plan unifies the many separate companies into one single owning and operating company. It greatly reduces fixed charces in the light of present-day earning power. It makes provision for modernization of the system, so that it can do business in the competitive transportation market on more equal terms than at present.

"Such results would be great advantages, both to security holders and to car riders, for there is a community of interest between these two groups. The results of modernized service on Wayne Ave., where light-weight, streamlined street cars produced a 20% increase in revenue during their first year of service indicate that the better service the car rider receives, the more of it he will buy. And the more he buys, the stronger will be the position of the private owners of the system, as well as the taxpayers who have invested city-owned facilities.

"I am most gratified with the situation today. There is still work to be done, but it is in capable hands. To the many representatives of both private and public interests who have contributed to recent transit progress, I extend my appreciation."

\*\*Trustee\*\* Can Vote for Plan\*\*—

Trustee Can Vote for Plan-

President Judge Lewis H. Van Dusen in the Orphans' Court, Philadelphia, has signed a decree authorizing the trustees of the estate of J. Bolton Winpenny to vote Transit underlier securities in the trust in favor of the plan of P. R. T. reorganization and to execute the voting trust agreement. A petition to vote the stock affirmatively was filed by the trustees several weeks ago.—V. 149. p. 1336.

Philadelphia & Reading Coal & Iron Corp.—Delisting
The Board of Governors of the New York Stock Exchange at its meeting
Sept. 13 approved the recommendation of the Committee on Stock List
that application be filed with the Securities and Exchange Commission to
remove from listing and registration the common stock, no par value. The
security will continue on the list pending action by the Commission.
In its recommendation to the Board of Governors, the Committee on
Stock List stated that continued listing on the Exchange of the common
stock is not warranted in view of the present status of the corporation, the
assets and earnings applicable to the issue, and the price range.

Pratt & Lambert, Inc.—Dividend Increased—
Directors have declared a dividend of 50 cents per share on the common stock, payable Oct. 2 to holders of record Sept. 15. Previously regular quarterly dividends of 25 cents per share were distributed.—V. 148, p. 2441.

Public Service Co. of Indiana-Offerings Delayed-

Robert A. Gallagher, President of the company, testified at a Securities and Exchange Commission hearing at Washington, Sept. 8, that due to the European war, bonds had fallen to such an extent that he felt it was not now possible to carry out the company's proposed offering of \$38,000.000 and \$10,000,000 serial debentures of 1940'49 which are to carry an average coupon rate of not over 3½%.

However, he said, he felt in view of all the preparations the company had undertaken in connection with the proposed offering, the proceedings should be carried out as far as possible so that if there is any change in the market rate, the company could take advantage of it.

Counsel for the company said the course that probably would be followed would be to file delaying amendments under the Securities Act as necessary rather than to withdraw the registration statement. In the meantime the company would endeavor to get approval of the offering under the Holding Company Act. In this way, he explained, the company would be prepared to take advantage of any change in the market.—V. 149, p. 1628.

Reo Motor Car Co.-RFC Willing to Lend \$2,000,000 in Reorganization

The Reconstruction Finance Corporation has indicated to the Federa Court at Detroit that it is willing to lend the corporation \$2,000,000 provided the reorganization plan now pending is consummated, Judge Arthur F. Lederle stated.

Such a loan is necessary if the company is to continue operations, Theodore I. Fry, trustee under Chandler Act proceedings, has reported. His third

amended plan of reorganization for the company proposes, in part, that the company be managed by three voting trustees to be appointed by the Court, that shareholders exchange their present shares for voting trust certificates of a new corporation to be organized and that working capital be obtained by a loan from the RFC or from some other lending agency.

His plan was opposed by W. H. Gallagher, attorney for the company's present management, who declared that it was "merely a device to take management out of the hands of the board of directors and place it in the hands of those who have been seeking to retain control of the company."—V. 149, p. 1628.

Sacred Heart Congregation of Oshkosh, Wis.—Bonds Offered—An issue of \$100,000 1st ref. mtge. serial bonds is being offered by B. C. Ziegler & Co., West Bend, Wis. Prices: Bonds maturing on and before 1, 1944, 1001/4 and int.; bonds maturing on and after Dec. 1, 1944, 101 and int.

Dated June 1, 1939; due semi-annually June 1, 1940 to June 1, 1951; coupon form in denoms. of \$1,000, \$500, and \$100, registerable as to principal. Principal and int. payable on June 1 and Dec. 1, at office of First National Bank of West Bend, West Bend, Wis., trustee and registrar. Both principal and interest of these bonds will be payable in lawful money of the United States of America.

The net proceeds of this issue of bonds were used to pay and retire the outstanding mortgage of Sacred Heart Congregation of Oshkosh, Wis., dated Dec. 1, 1938 and given to secure the payment of \$70,000; to pay and retire the corporation's promissory note outstanding in the amount of \$10,000; and the balance will be used to pay the cost of completing the construction of the new church building.

These bonds have been authorized with the permission of Most Reverend Paul P. Rhode, Bishop of the Diocese of Green Bay, and President of Sacred Heart Congregation of Oshkosh, Wis.

Total valuation of land and buildings (upon completion of the new church) included in the lien of the indenture is \$308,916.

Safeway Stores, Inc.—Listing—Acquisition—

Total valuation of land and buildings (upon completion of the new church) included in the lien of the indenture is \$308,916.

Safeway Stores, Inc.—Listing—Acquisition—

The New York Stock Exchange has authorized the listing of 3,500 shares of 5% cumulative pref. stock (\$100 par), representing the maximum amount to be issued upon the acquisition of all of the issued and outstanding shares of capital stock (i. e. 3,070 shares) of the Empress Manufacturing Co., Ltd., a corporation organized under the British Columbia Companies Act; making the total amount applied for 26,284 shares.

The corporation, through its wholly-owned subsidiary, Safeway Stores, Ltd., a Canadian corporation, will acquire from the stockholders of Empress Manufacturing Co., Ltd., all of the issued and outstanding shares of the capital stock of said corporation (i. e., 3,070 shares). In consideration of the transfer and delivery to Safeway Stores, Ltd. of the 3,070 shares of capital stock of the Manufacturing company, the corporation will issue shares of its 5% prefererd stock. The number of shares to be so issued will be determined by dividing the net assets of the Manufacturing company as of Aug. 19, 1939, by the average market price on the New York Stock Exchange of the shares of 5% preferred stock of the corporation on Aug. 19, 1939, or on the date one week prior to the date of delivery of said shares, whichever is the lower, less the sum of \$5 per share.

On Aug. 28, 1939, there were outstanding \$13,300,000 10-year 4% sinking fund debentures dated as of June 1, 1937. On Aug. 28, 1939, the corporation deposited with the trustee funds sufficient to redeem on Sept. 29, 1939, all of said issued and outstanding debentures and irrevocably authorized the trustee to call such debentures for redemption on Sept. 29, 1939, all of said issued and outstanding debentures and irrevocably authorized the trustee of a sufficient to redeem on Sept. 29, 1939, all of said issued and outstanding debentures and irrevocably authorized the trustee to call such deb

## Securities Investment Co. of St. Louis (& Subs.)-

Earnings for 5 Months Ended June 30, 1939
Earnings per share on 40,000 common shares

—V. 147, p. 4067.

Sheep Creek Gold Mines, Ltd.—Extra and Larger Div.-The directors have declared an extra dividend of one cent per share in addition to a quarterly dividend of four cents per share on stock, both payable Oct. 14 to holders of record Sept. 30. Regular quarterly dividends of three cents in addition to extras of one cent were paid on July 15, April 15 and Jan. 14, last, and on July 15 and April 13, 1938.—V. 148, p. 3388.

Sherwin-Williams Co. of Canada, Ltd.—Accum. Div.—
The directors have declared a dividend of \$1.75 per share on account of accumulations on the 7% cum. pref. stock, par \$100, payable Oct. 2 to holders of record Sept. 15. A similar payment was made on June 22 and on Jan. 3, last and in the seven preceding quarters. See also V. 147, p. 3170. V. 148, p. 2914.

Silesian-American Corp.—Subsidiay Confiscated-Corporation has been advised that with the advance of the German Army beyond Polish Silesia the properties of its subsidiary, Giesche Spolka Akcyjna, have been taken possession of by a Commisar appointed by the German Government.—V. 149, p. 1628.

Silver King Coalition Mines Co.-To Pay 10-Cent Common Dividend-

Directors have declared a dividend of 10 cents per share on the common stock, payable Oct. 2 to holders of record Sept. 15. This will be the first payment made since April 1, 1938 when 10 cents per share was distributed; prior to then requiar quarterly dividends of 25 cents were paid.—V. 149, 1190.

Silverwood Dairies, Ltd.—Accumulated Dividend—
Directors have declared a dividend of 20c. per share on the 40c. cum.
partic. pref. stock, no par value, payable Oct. 2 to holders of record Sept. 16.
Arrearages after the current payment will amount to 60 cents per share.
—V. 148, p. 745.

Siscoe Gold Mines, Ltd.—August Production—
August production amounted to \$160,431, recovered from the milling of 18,067 tons of ore for an average recovery per ton of \$8.87, the company reported Sept. 5. This compares with output of \$164,484 from 18,472 tons for an average recovery of \$8.90 in July and production of \$190,249 from 19.503 tons and an average of \$10.64 in the corresponding month last year.—V. 149, p. 1628.

Sisters of St. Francis of the Martyr St. George, St. Louis County, Mo.—Bonds Offered—Francis, Bro. & Co., St. Louis, Mo., are offering \$100,000 1st mtge. real estate

Dated Sept. 1, 1939; due serially Sept. 1, 1940-1949. Bonds maturing Sept. 1, 1940, to and incl. Sept. 1, 1943, bear interest at the rate of 3% per annum, payable semi-annually from Sept. 1, 1939. Bonds maturing Sept. 1, 1944, to and incl. Sept. 1, 1947, bear interest at rate of 3% per annum, payable semi-annually from Sept. 1, 1939, to and incl. Sept. 1, 1943, and 3½% thereafter. Bonds maturing Sept. 1, 1948, and Sept. 1, 1949, bear interest at the rate of 3% per annum, payable semi-annually from Sept. 1, 1949, and 3½% 1948, and 1949.

Coupon bonds in denom. of \$1,000. Principal and interest (M. & S.) payable at Mississippi Vailey Trust Co., St. Louis, Mo., trustee and paying agent. Callable in whole or in part on 30 days' notice at par and accrued interest.

These bonds are the direct obligation of the Sisters of Saint Francis of the Martyr Saint George, a corporation duly incorporated in Missouri, and secured by a first mortgage on the property of the Sisters located in St. Louis County, Mo., known as the Mother of Good Counsel Home, 6825 Natural Bridge Road. Value of property is estimated at \$225,000. The Order of the Sisters of St. Francis of the Martyr St. George was founded in Germany, in 1857. Their principal work is teaching and nursing, and they now carry on this work in Holland, Japan, India, and the United States. The Sisters began operating the Sanitarium in St. Louis County in 1932, for the National Catholic Women's Union, and in 1935 hey assumed full control.

The purpose of this financing is to provide funds with which to build an additional sanitarium. This new building will house 90 to 100 patients and will cost approximately \$125,000.

Skelly Oil Co.—To Pay 50-Cent Dividend—
Directors have declared a dividend of 50 cents per share on the common stock, payable Nov. 15 to holders of record Oct. 16. Dividends of like amount were paid on Dec. 15 and July 25, 1938.—V. 149, p. 1037.

(L. C.) Smith & Corona Typewriters, Inc.—Common Dividend Resumed-

Directors on Sept. 11 declared a dividend of 12½ cents per share on the common stock, payable Oct. 1 to holders of record Sept. 21. This will be the first dividend paid on the common shares since April 1, 1939, when a regular quarterly dividend of 25 cents per share was distributed.—V. 149, p. 1190.

The corporation in a report to the Securities and Exchange Commission made public Sept. 8 by the New York Stock Exchange, recorded an agreement for a loan of \$2,500,000 from four banks. The money will be advanced in instalments over seven years, with interest starting at 2% and increasing gradually to 3½% for the longest maturity.—V. 149, p. 1341.

Terminal & Shaker Heights Realty Co .--Collateral

Terminal & Shaker Heights Realty Co.—Collateral Purchase Is Basis of \$10,000,000 Suit—Securities with Market Value of \$2,000,000 Alleged to Have Been Bought for \$318,000—The purchase of securities valued at \$2,134,069 for the sum of \$318,000 by Mid-America Corp., was the basis of a suit filed in Federal Court, Cleveland, Sept. 11, by creditors of Cleveland Terminals Building Co. against the Terminal & Shaker Heights Realty Co., successor to Mid-America Corp.

The suit, filed directly in behalf of holders of \$6,000,000 leasehold bonds of Cleveland Terminals Building Co., seeks judgment of \$10,214,299 in addition to interests and costs. Action is brought on behalf of all general creditors whose claims exceed \$25,000,000, according to the suit.

The suit charges that in October, 1930, the Cleveland Terminals Building Co. executed a promissory note in the amount of \$23,500,000 and payable at office of J. P. Morgan & Co., New York. Securities of Alleghany Corp., Pittston Co., Higbee Co. and Cleveland Terminals Building Co. were given as collateral for the note. In August, 1935, when Cleveland Terminals Building Co. was known to be insolvent, the suit charges, the defendants organized the Mid-America Corp., which in September, 1935, purchased for \$318,000, the collateral, having a listed market value at that time of \$2,134,069. The transaction resulted in an immediate profit of \$1,816,069 and within one year, the market value of the securities had increased \$8,-398,230. In addition the purchase resulted in the Mid-America Corp., acquiring control of some 23,000 miles of railroads, represented by the securities.

The suit seeks a judgment of \$10,214,299 in addition to interest and costs, also an accounting of all the profits

acquiring control of some 23,000 miles of railroads, represented by the securities.

The suit seeks a judgment of \$10,214,299 in addition to interest and costs, also an accounting of all the profits.

The defendants named in the suit include Joseph J. Anzalone, Charles L. Bradley, John P, Murphy, and George A. Tomiinson, who with the late Van Sweringen Brothers, were officers of Mid-America Corp.

The railroads whose control went to Mid-America Corp., with the purchase of securities included Chesapeake & Ohio, New York, Chicago & St. Louis, Pere Marquette, Erie, Missouri Pacific, Wheeling & Lake Erie, New Orleans, Texas & Mexico, Texas & Pacific, Chicago & Eastern Illinois and International Great Northern.

Tintic Standard Mining Co.—7½-Cent Dividend—
The directors have declared a dividend of 7½ cents per share on the common stock, par \$1, payable Sept. 30 to holders of record Sept. 16. This compares with five cents paid on June 30, last; 10 cents paid on March 31, last, and on Dec. 23, 1938; 5 cents paid on Sept. 30 and on June 30, 1938; 10 cents paid on March 21, 1938; 25 cents paid on Dec. 23, 1937; 15 cents paid on Sept. 30, 1937; 25 cents on June 30, 1937, and 18 cents paid on March 31, 1937. For detailed record of previous dividend payments see V. 146, p. 3972.—V. 148, p. 3700.

Tonopah & Tidewater RR. Co., Ltd.—Examiner Recommends to ICC Discontinuance of Line—

Recommends to ICC Discontinuance of Line—
A recommendation that the application of the company for permission to abandon operations of its 143 miles of line from Crucero, Calif. to Beatty, Nev., should be granted was made Sept. 13 to the Interstate Commerce Commission by W. J. Schtrumpf, an examiner.

The railroad is owned by Borax Consolidated, Ltd., a British holding company. It was built in 1905-1907 to move borate ore from Death Valley. The Pacific Coast Borax Co., a subsidiary of Borax Consolidated, closed its Death Valley mines in 1927 and transferred mining operations to the so-called Kramer district of California, ruining the railroad's business, the application said.

Despite the proposed abandonment the railroad is to maintain the right-of-way, road-bed and equipment because the trust indentures on the road's bonds require that this be done.—V. 137, p. 1048, V. 132, p. 123.

To Pay 30-Cent Dividend-To Pay 30-Cent Dividend—
The directors have declared a dividend of 30 cents per share on the common stock payable Oct. 2 to holders of record Sept. 20. This compares with 40 cents paid on June 24, last; 30 cents paid on April 1, last; 25 cents paid on Jan. 2, last; 20 cents paid on Oct. 1 and on April 1, 1938 30 cents paid on Jan. 3, 1938; 40 cents paid on Oct. 1, 1937, and a special year-end dividend of 70 cents paid on this issue on June 25, 1937, this latter being the first disbursement made on the new stock since the three-for-one split-up. A regular quarterly dividend of \$1 per share was paid on the old stock on April 1, 1937.—V. 148, p. 3701.

Traylor Engineering & Mfg. Co.—Tenders—
Sealed proposals for the sale to Fidelity-Philadelphia Trust Co., trustee, of a sufficient amount of the preferred stock of the company to exhaust the sum of \$5.000 will be received at the office of Fidelity-Philadelphia Trust Co., trustee, 135 So. Broad St. Philadelphia, until Sept. 29, at 12 o'clock m. All stock accepted by the slaking fund is to be presented for payment

and cancellation as of Oct. 2, 1939.

The dividend due on that date has been declared and will be paid by the company, on stock accepted. Therefore, offerings should be made at a figure which does not include accrued dividends.—V. 148, p. 1497.

Twentieth Century-Fox Film Corp.—No Common Div.
Directors at their meeting held Sept. 7 decided that in view of the present uncertainty of revenue from the foreign markets, it would not be wise to declared a dividend on the common shares at this time. Dividend of 50 cents per share was paid on June 30, last, and each three months previously.—V. 149, p. 1040.

Union Oil Co. of Calif.—Listing of Bonds—
The New York Stock Exchange has authorized the listing of \$30,000,000
20-year 3% debentures due Aug. 1, 1959, being the total authorized issue, all of which are issued and outstanding.—V. 149, p. 1341.

J. Cheever Cowdin, Chairman of the Board, in a letter to stockholders

J. Cheever Cowdin, Chairman of the Board, in a letter to stockholders says:

"The outbreak of hostilities in Europe has brought a number of inquiries from stockholders as to the probable effect upon Universal's business. It is still too early, of course, to gauge with any degree of accuracy what the final results will be but, in the opinion of directors, it has been deemed advisable to meet these inquiriée by submitting pertinent facts regarding your company's current business, together with such observations as may be made without venturing into the field of prophecy.

"The progress noted in the latest annual report has continued throughout the first three quarters of the current fiscal year.

"Although the final figures for the month of August are not as yet available, it appears that the company was opreated at a profit.

"Company at the present time is further advanced in its production schedule for the current releasing season than at this date for many years past. A number of important pictures are already completed and scheduled for early release, while a number of others are well under way. Company expects to complete its full season's program on schedule.

"Factors contributing to the strengthening of company's position include an improvement in the general quality of Universal's pictures as reflected in box office drawing power and the greater ease in obtaining playing time for its pictures; the continuation of economies and of rigid cost controls at the studio; and the development or acquisition of a versatile and well-rounded group of stars.

"Company's position in the domestic market has shown a marked im-

rounded group of stars.

"Company's position in the domestic market has shown a marked improvement both in respect to exhibition contracts obtained and receipts received therefrom. There is no indication, as yet, of any reaction on motion picture attendance in this country as a result of the war. However, if as a result thereof, there is a stimulation of general business, it might be expected to lead to an upturn in motion picture business rather than otherwise.

if as a result thereof, there is a sumulation of general business, it languages be expected to lead to an upturn in motion picture business rather than otherwise.

"England, which has been an important market for Universal's product, at the outset of the war announced severe restrictions on the motion picture industry but after the first week the Government lightened these restrictions and at the moment, 65% to 70% of the theaters in Great Britain are operating. The tense conditions prevailing during war time have in the past created an insistent demand for entertainment of all kinds; and at the moment there is no reason to believe that the psychological effects of this war will differ from those of previous wars.

"Universal has not been distributing pictures in Germany for some time past and the increasing peace-time restrictions imposed on foreign pictures by France has made that country a relatively unimportant market. In any event, we are informed that approximately 50% of the motion picture theaters in France are now operating. On the other hand, company has been receiving an increasing amount of business from Holland, Belgium, and the Scandinavian countries, and with European production almost certain to be curtailed, some expansion in this market may reasonably be anticipated.

"In Latin America, in Canada, and in other B-itish Dominions, which are remote from the scene of actual hostilities, Universal has been making substantial progress and, with the probable lessening competition from foreign—made pictures, confidently looks forward to continued expansion of its business in these markets.

"It is impossible to forecast at this time what disturbances there will be in the various rates of exchange from time to time, but the management is watching this phase of the business very carefully.

"The motion picture industry must necessarily adjust itself to whatever changed conditions occur from time to time. We believe that company is in as good a position as any company in the industry to make whatever adj

# The Commercial Markets and the Crops

COTTON-SUGAR-COFFEE-GRAIN

PROVISIONS—RUBBER—HIDES—DRY GOODS—WOOL—ETC.

#### COMMERCIAL EPITOME

Coffee—On the 9th inst. futures closed 5 to 11 points net higher for the Santos contract, with sales totaling 51 lots. Old Rios closed 7 to 9 points higher, with only one sale reported. New Rios were inactive. The local market ruled steady during most of the session, though without any noteworthy features. A firmer market in Brazil influenced a better market here. Spot prices in Brazil were 200 to 300 reis higher, with soft Santos 4s at 19.300 milreis per 10 kilos, hard 4s at 18.100 and Rio 5s at 16.300. Most of the gains in the local market were made at the opening, and from then on the market ruled relatively quiet. On the 11th inst. futures closed 19 to 29 points net higher for the Santos contract, with sales totaling 195 lots. The market continued its upward trend today, with trading being entirely confined to the Santos contract. Improvement reflected advances in actuals, which attracted new buying for trade account. There also was new buying and short covering entered from Europe, actuals, which attracted new buying for trade account. There also was new buying and short covering entered from Europe, it was reported. The belated rise in coffee is based on a prospect that freight rates later may be increased, and the prospect of a rise based on the stock position here. Visible based on the stock position here. Trade supplies here are sufficient for about 3 weeks. Trade observers believe that if shipments were interferred with from primary markets, prices at the source might decline but would create an opposite effect in this market. On the 12th inst. futures closed 12 to 15 points net lower for the Santos contract, with sales totaling 103 lots. The new Rio contract closed 2 points higher to 5 points lower. The market ruled easy during most of the session, with trade houses buying on the scale down. There was also some short covering noticed. However, there were no really significant There was also some short features to the trading and no incentive to take the upward side of the market. The Brazilian dollar rate was improved today by 30 reis to 19.80. Late in the previous day spot quotations in Brazil were advanced 400 to 600 reis. Coffee destruction in the last half of August was reported at 151,000 bags, making the grand total 67,435,000 bags since June,1931. On the 13th inst. futures closed 9 to 2 points net higher for

the Santos contract, with sales totaling 72 lots. The new Rio contract recorded the sale of 1 contract in the March delivery, which closed 9 points net higher. Coffee futures recovered yesterday's losses on a light turnover as actuals continued firm and rumors of a freight rate rise were heard. During early afternoon Santos contracts were up 13 to 15 points with March at 6.68 up 13 points. The new A contract was 17 points higher with March at 4.82c. In Brazil spot Santos prices were 100 reis higher.

On the 14th inst. futures closed 14 to 17 points net higher for the Santos contract, with sales totaling 153 lots. Old Rio contracts closed 6 to 7 points higher and new Rios 1 to 6 points up. There were 4 sales in the old Rio and 2 sales in the new Rio contracts. News of a freight shortage inspired a fresh buying movement in coffee, which advanced Santos futures 20 points, with most positions registering new seasonal high prices. Mar. sold at 6.79c., up 20 points. Europe again was a buyer of futures here, believed to represent short covering mostly. All freight space from Brazil to New York is reported booked through Nov. Today futures closed 3 points up to 13 points net lower for the Santos contract, with sales totaling 106 lots. There were no Rio sales. The coffee futures market has the appearance of consolidating its recent gains. solidating its recent gains. After opening 3 points lower to solidating its recent gains. After opening 3 points lower to 5 points higher, Santos contracts this afternoon stood 2 net lower, with May at 6.77c. Two transferable notices were issued. Trading during the first three hours totaled 11,000 bags. Brazilian spot prices were unchanged to 100 reis higher. A leading roaster was reported a good buyer of Oct. shipment Colombian coffees, paying 12c. for Manizales. Including for coffee from Europe continues good. Inquiry for coffee from Europe continues good.

Rio coffee prices closed as follows: eptember 4.45 March 4.45 Santos coffee prices closed as follows:

Saptember 6.78 May

December 6.61 July

March 6.64

Cocoa-On the 9th inst. futures closed 6 to 10 points net lower. For the week the market showed a net gain of 117

to 114 points. The easiness of the market today was attributed to profit-taking on the part of the speculative element and absence of any substantial buying on the part of manufacturers. Transactions totaled 250 lots or 3,350 tons. There was no spot business reported by dealers in the outside market today, but large as well as small consumers bought substantial quantities of actuals during the week. Local closing: Sept., 6.09; Oct., 6.16; Dec., 6.18; Jan., 6.19; Mar., 6.17; May, 6.17. On the 11th inst. futures closed 5 to 12 points net higher. The market held steady during most of the session today. There was moderately heavy selling, but despite this and the absence of the strong proceedable to the service held up well. neavy sening, but despite this and the absence of the strong speculative buying of last week, prices held up well. Manufacturers continued good buyers, and the market proved responsive to this stable demand. With the exchanges of large blocks of futures for the actual commodity swelling the total volume, turnover reached 622 lots or 8,335 tons. A cable from Africa to the New York Cocoa Exchange reported that the Gold Coast Cocoa Committee has deferred the issuance of the estimate of the main eron for one month. the issuance of the estimate of the main crop for one month. Local closing: Sept., 5.17; Nov., 6.21; Dec., 6.25; Jan., 6.27; Mar., 6.29. On the 12th inst. futures closed 10 to 15 points net lower. The market was highly erratic today swinging widely back and forth. In the later trading prices plunged downward 40 to 47 points from the highs of the day. There was a rally of 13 to 15 points from these levels, with prices showing substantial net losses at the close. The sharp drop in the late trading was attributed to a combination of factors. Manufacturer buying, which had been continuing strong all day, suddenly dried up, and offerings simultaneously broadened out. A large part of the selling at this point emanated from houses with European connections, according to ring observers. Transactions totaled 12,529 The sharp break in the afternoon uncovered a large block of stop-loss orders, but the wave of selling was halted by the final upward surge at the closing. Local closing: Sept., 6.03; Oct., 6.06; Dec., 6.13; Jan., 6.13; Mar., 6.15; May, 6.16; July, 6.22. On the 13th inst. futures closed unchanged to 3 points off. Transactions totaled 204 lots. The cocoa futures market was quiet but firm, prices standing 2 to 4 points net higher during early afternoon, with Dec. at 6.15c., up 2 points. Sales to early afternoon totaled only 175 lots, quite a contrast to recent extreme activity. market appeared to be consolidating its gains. Warehouse stocks decreased 2,800 bags overnight. They now total 1,320,000 bags compared with 894,889 bags a year ago. Local closing: Oct., 6.03; Dec., 6.10; Jan., 6.11; Mar., 6.13; May, 6.16; July, 6.19.

On the 14th inst. futures closed 14 to 16 points not leave.

On the 14th inst. futures closed 14 to 16 points net lower. Transactions totaled 376 lots. The sharp decline in sterling hit the cocoa market hard because of the large British production of that commodity. Futures here broke 16 to 19 points on a moderate volume of selling, which to early afternoon totaled about 300 lots. The selling represented scattered liquidation. Warehouse stocks decreased 9,300 bags overnight. They now total 1,310,861 bags. A year ago stocks amounted to 903,057 bags. Local closing: Oct., 5.89; Dec., 5.95; Jan., 5.95; Mar., 5.98; May, 6.00; July, 6.04; Sept., 6.08. Today futures closed 29 to 26 points net lower, with sales totaling 412 lots. The further weakness in sterling caused continued unsettlement in the cocoa futures market. During early afternoon on liquidation under stop loss orders and west African hedge pressure, prices stood 12 to 25 points lower with Dec. at 5.70, off 25 points. Manufacturers were reported out of the market. Sales to that time totaled 300 lots. Withdrawals from warehouses decreased 5,800 bags over night. They now total 1,315,017 bags. A year ago the total was 899,766 bags. Local closing: Oct., 5.60; Dec., 5.66; Jan., 5.67; Mar., 5.70; May, 5.74; July, 5.78; Sept.,

New York Cocoa Exchange to Publish Open Interest in Cocoa Futures Daily—Members of the New York Cocoa Exchange, Inc., voted on Sept. 8 to amend the by-laws and rules for the purpose of making public the "open interest" in the cocoa futures market daily. The open interest will be made public daily commencing Oct. 1, covering all positions from November, 1939. The following paragraph is added to Trade Rule 2 as a result of the members' vote:

All members of the Exchange who are members of the New York Cocoa Clearing Association, Inc., shall report at the close of business each day, to the Clearing Association, the number of purchases and sales executed on the Exchange which are open on the members' books for each delivery month and the open position for each month shall be published by the Secretary of the Exchange not later than 9:45 a. m. of the following business day.

Sugar—On the 9th inst. futures closed 12 to 18 points net lower. After a steady advance of 5 days, the market came to a halt today and showed substantial net losses at the close. The rumor that the Government would jettison the quota control system was the real factor behind the day's decline. Another bearish influence was the estimate of F. O. Licht, European authority, that the European beet crop would be 7,717,000 tons, exclusive of Russia, which represents an increase of 1,326,000 tons over a year ago. As a result of the nervousness in the futures market, raws were irregular. While futures were firm, sellers of raws were holding at 3.85c. and buyers were interested at 3.80c. but following the break, buyers withdrew and sellers were offering at 3.80c. The world contract for the first time in a week failed to hit the permissible limit of 25 points. The market closed 7 to 15 points net lower. On the 11th inst. futures

closed 3 to 8 points net higher. Following the heavy liquidation in the domestic contract on Saturday as a result of the rumor of Government action, the market was considered in a better buying range today, particularly after the opening initial losses of 2 to 5 points. That decline put March down to 2.58c., or 40 points under the best level of last week. From the 2.58c. basis March rallied 9 points to 2.67c. and From the 2.58c. basis March railled 9 points to 2.67c. and closed at 2.66c. Profit taking continued heavy in today's session for the account of Wall Street and trade houses. Hedge selling was also in evidence, but late in the day trade houses with Cuban connections were on the buying side and this demand attracted other trade houses and operator buying. World sugar contracts which advanced more rapidly last week, were 3 to 8 points lower on sales of 370 lots. No sales were reported in the raw sugar market today and at the close it was described as a trading affair at 2.85c. and at the close it was described as a trading affair at 2.85c. for Cubas, 3.75c. for duty frees. On the 12th inst. futures closed 25 points net lower. The market opened 25 points off and stayed at that level throughout the session. The overnight drastic announcement by President Roosevelt temporarily suspending domestic quota control, threw the market into reverse and confusion today. It was impossible market into reverse and confusion today. It was impossible to sell in volume because buyers withdrew. Only 56 lots were traded, but there were 750 lots offered, which went unexecuted. The world contract closed 23½ to 25 points net lower, which was also influenced adversely by the President's announcement. However, in this contract the demand was much better than in the domestic market, since prices on a relative basis are better, so that volume was fairly heavy at 684 lots. Actual sugar operations were suspended because of the complex problems created by the Government's announcement. On the 13th inst. futures closed 19 to 4 points net lower for the domestic contract, with sales totaling 684 lots. The world sugar contract, closed 13½ to 9 points up, this range covering all deliveries except distant September, which closed 16 points net lower. Volume totaled 401 lots. Sugar markets were active but nervous. The domestic market touched the 25 point limit on an opening decline, but recovered smartly afterwards on appearance of better demand. The market's recovery reflected behef that the President would sign a new treaty with Cuba which would put the duty on Cuban sugar back to the old level of 90c. a hundred pounds. During early afternoon prices were but 3 to 7 points under last night's closing prices. In the raw market a cargo of late September Puerto Ricos offered yesterday at 3.70c., was taken by an operator, but no Cubas were offered. During early afternoon world contracts were 11 to 13½ points higher after having opened 2 to 3 points net lower. New buying appeared, while hedge selling was light. It was reported that the entire Santo Domingo crop had been sold and that Canada was bidding for sugar.

On the 14th inst. futures closed unchanged to 9 points net higher for the domestic contract. Total sales were 587 lots. The world sugar contract closed 6½ to 9 points higher. Both domestic and world sugar markets recovered sharply during early trading, but they failed to hold all of their gains. The domestic market still governed by a firm belief that the President will reduce the Cuban duty, advanced as much as 20 points before it suffered a reverse. During early afternoon the market was 8 to 10 points higher. Early in the session duty free raw sugars were held at 3.90c., but later, it was said they could be had at 3.75c. Refiners maintained the price of 5.75c for the refined product. The world sugar market at one time was 11 to 11½ points higher, but around early afternoon stood only 3½ points net higher, with March at 2.15c. Today futures closed 2 to 7 points net lower, with sales totaling 454 lots in the domestic contract. The world sugar contract closed 1 point up to 1 point off, with sales totaling 248 lots. Domestic sugar futures were lower, but the world market was higher this afternoon. In the domestic market issuance of 42 notices of delivery on September contracts caused a sharp break in the spot September position of 11 points. Other positions were 3 to 5 points lower in sympathy. Up to that time about 15,000 tons had been done. In the raw market American paid 3.70c. for 3,000 tons of Philippines out of New York warehouses. Yesterday Pennsylvania Sugar Refining paid 3.75c. for a cargo of Puerto Ricos, first half October shipment. Cubas are not offered. In the world sugar market prices were 2½ to 6 points net higher during early afternoon after having dipped below last night's close earlier.

 Prices closed as follows:
 2.24 May
 2.44 May

 September
 2.24 May
 2.44 May

 January
 2.31 July
 2.48 May

Lard—On the 9th inst. futures closed 20 to 30 points net higher. The lard futures market showed surprising firmness, especially in view of the easier trend of grains and hogs. The opening range was 10 to 27 points higher, with the distant deliveries very firm. As the session progressed short covering became quite general. As a result of this stimulus prices reached levels 20 to 30 points net higher. Lard exports today were 228,000 pounds, destined for London. Hog prices at Chicago were 25c. lower. Hog sales ranged from \$7.25 to \$8. The latter price was the top for the day and early in the week \$9.50 was paid. On the 11th inst. futures closed 10 points net lower to 10 points net higher. Trading was mixed, with prices irregular. In the early trading, as a result largely of short covering—the market moved upward 12 to 20 points on the near deliveries and 7

to 17 points on the distant months. On a wave of profitto 17 points on the distant months. On a wave of profit-taking, much of these gains were lost. Western hog marketings totaled 59,200 head for the day, against 58,700 head for the same day a year ago. Hog prices at Chicago closed 50 to 75c. lower. Sales ranged from \$6.65 to \$7.75. The late top price was \$7.75, the latter price representing a decline of \$1.75 per cwt. Lard exports from the Port of New York over the week-end were 10,960 pounds, destined for Antwerp-Rotterdam and Stockhelm. On the 12th inst. futures closed unchanged to 10 points lower. During the early part of the day the market ruled steady, but towards the close prices eased. It is pointed out that during the past week the active deliveries have advanced over 100 points on the war news. There has been considerable profit-taking, the war news. There has been considerable profit-taking, but prices have held relatively well. Lard exports from the Port of New York were 66,600 pounds destined for Manchester and Antwerp. Chicago hog prices were firmer today and closed 25c. higher. Western hog marketings today totaled 49,200 head, against 61,700 head for the same day last year. Hog sales ranged from \$7 to \$8. On the 12th last year. Hog sales ranged from \$7 to \$8. On the 13th inst. futures closed 2 to 10 points net lower. The opening range was 2 to 7 points down from previous finals. These range was 2 to 7 points down from previous finals. These declines were later extended to 10 to 20 points net lower. From these levels there was a rally on short covering and speculative buying. No lard exports were reported today. Chicago hog prices closed 15 to 25c. net higher. Hog sales ranged from \$7.25 to \$8.25. Western hog marketings were 52,600 head, against 51,600 head for the same day last year. On the 14th inst. futures closed 7 points higher to 10 points

The market was active, with trading decidedly mixed. The European demand for American lard was quieter, due to the severe decline in the sterling rate of exchange. Export shipments of lard totaled 33,000 pounds, destined for Malta. Chicago hog prices were 10 to 20c. lower. Receipts of hogs at Chicago and other Western markets were 52,800 head against 54,900 head for the same day last year. Sales of hogs at Chicago ranged from \$7.15 to \$8.15. Today futures closed 13 to 5 points net higher. The market ruled firmer today, largely due to short covering.

Rubber-On the 9th inst. futures closed 131 to 205 points net higher. The 205 points advance was registered in Sept. Transactions totaled 2,940 tons, including 150 which were exchanged for physicals. Spot standard No. 1 ribbed smoked sheets in the actual market advanced 1c. to 22½c. Today the futures market advanced the full limit of 200 points. The opening range was 166 to 200 points. points. The opening range was 166 to 200 points. Commission house and some trade buying was held largely responsible for the initial advance. On speculative and commission house selling the market dropped more than 100 points at about 11 o'clock. Later, there was renewed buying from the speculative and commission house elements and as a result most of the early losses were recovered. The decision of the International Rubber Regulation Committee not to withdraw all restrictions on rubber exports for the duration of the war, but rather to uphold stringent control for the time being, was the factor really behind today's rise. Local closing: Sept., 22.00; Dec., 20.95; Jan., 20.15; Mar., 20.13. On the 11th inst. futures closed 140 to 48 points net higher. Transactions totaled 2.910 tons, including 150 higher. Transactions totaled 2,910 tons, including 150 tons which were exchanged for physicals. The trade displayed considerable anxiety to get nearby rubber, this being

reflected in the widening spread between Dec. and Mar., reflected in the widening spread between Dec. and Mar., the difference between the two deliveries being 97 points at the close. At one time during the day the spread was about 120 points. The outside market was reported as generally quiet. Spot standard No. 1 ribbed smoked sheets in the trade advanced 1½c. to 24c. Rumors were current that substantial quantities of actual rubber for Sept.-Oct. shipment were sold to Russia today. The London and Singapore markets closed with prices ranging 5-32 to 1d. better. Local closing: Sept., 23.40; Oct., 21.87; Dec., 21.77; Jan., 21.00; Mar., 20.68; May, 20.65. On the 12th inst. futures closed 40 points higher to 95 points lower. The 40-point advance was recorded in the Nov. position, which was purely nominal, no trades being made. The market had a decidedly heavy appearance throughout most of the session. Heavy commission house liquidation was chief factor in the decline. The demand was relatively light. The spread between Dec. and Mar. has now widened to 140 points. The demand for nearby and spot rubber continues to rule at a big premium over other months. Transactions in futures totaled 3,200 tons. Spot standard No. 1 ribbed smoked sheets in the actual market declined ½c. to 23½c. The outside market was reported as quiet. London and Singapore continued strong with prices advancing ¼ to 3-32d., respectively. Local closing: Oct., 22.85; Dec., 21.50; Jan., 20.85; Mar., 20.14; May, 20.05; July, 19.70. On the 13th inst. futures closed 120 to 45 points net lower. The 120-point loss was registered in spot Sept. Total sales 213 lots. An easier the difference between the two deliveries being 97 points at closed 120 to 45 points net lower. The 120-point loss was registered in spot Sept. Total sales 213 lots. An easier trend was in evidence in which rubber futures showed substantial losses for the session. Prices during early afternoon were 56 to 66 points net lower, as traders ignored the bullish Aug. statistics. Trading was moderate, volume reaching 1,480 tons to early afternoon. Dec. then stood at 20.94c and Mar. at 19.48c. The London and Singapore markets closed quiet and stoody respectively. and Mar. at 19.48c. The London and Singapore markets closed quiet and steady, respectively. Prices on London were unchanged to ½d. higher. Local closing: Sept., 22.00; Dec., 20.90; Mar., 19.48; May, 19.35; July, 19.25.

On the 14th inst. futures closed 10 to 3 points net lower, which closed 15 points

On the 14th inst. futures closed 10 to 3 points net lower, with the exception of spot September, which closed 15 points net higher. Transactions totaled 346 lots. The crude rubber futures market was weak, the fall in prices being attributed in no small part to the drop in sterling exchange. After opening 15 to 40 points lower, the market this afternoon suffered further losses, with the result that prices this afternoon were 58 to 78 points net lower on transactions that totaled 2,900 tons, of which 1,020 tons were exchanged for physicals. December stood at 20.12 cents and March at 18.90 cents. Japanese were reported to have been sellers of the December position. The London market was ½d. to ½d. lower, while Singapore closed 7-32d. to 5-32d. lower. Local closing: Sept., 22.15; Dec., 20.80; Jan., 20.05; Mar., 19.45; May, 19.32. Today futures closed 10 to 18 points net lower on all deliveries excepting the spot Sept., which net lower on all deliveries excepting the spot Sept., which closed 10 points net higher. Transactions totaled 115 lots. Trading in rubber futures was small, but prices on the whole were fairly steady. Sept. was an exception. That position broke 113 points. In early afternoon Dec. stood unchanged broke 113 points. In early afternoon Dec. stood unchanged at 20.80c.; but March was 5 points net lower at 19.40c. Fifty tons were tendered on the spot Sept. contract, bringing the total so far this month to 2,230 tons. London closed unchanged to ½c. higher. The market will remain closed tomorrow. Singapore was unchanged to 25-32d. lower. Local closing: Sept., 22.25; Oct., 21.50; Dec., 20.62; Jan., 19.90 Mar., 19.30; May, 19.20.

Hides—On the 9th inst. futures closed 8 to 23 points net Transactions totaled 63 lots, or 2,520,000 pounds The opening range was 15 to 30 pts. higher. The market ruled quiet and heavy during most of the session, though fair net gains were shown at the close. In view of the general ungains were shown at the close. In view of the general uncertainty traders appeared disposed to await developments over the week-end. Local closing: Sept., 13.43; Dec., 13.78; Mar., 14.12; Sept., 14.68. On the 11th inst. futures closed 48 to 57 points net higher. The opening range was 32 to 53 points net higher. There was considerable profit taking on this bulge, but this seemed fairly well absorbed after prices had dropped off slightly. Subsequently there was a rally and the market closed at about the highs of the day. Transactions totaled 13,200,000 pounds. Rumors were current that domestic hides were sold at 14½c., but this could not be confirmed. Certificated stocks of hides in licensed warehouses decreased by 4,263 hides today to a total of 1,366,969 hides. Local closing: Sept., 13.95; Dec., 14.30; Mar., 14.65; June, 14.95; Sept., 15.25. On the 12th inst. futures closed 33 to 50 points net higher. The opening range was 15 to 30 points advance. From these levels the market worked steadily forward. The strength in the domestic spot hide market played a considerable part in the activity and forward market played a considerable part in the activity and forward movement of futures. Since the outbreak of the war interest in hides and hide futures has been unusually keen. The increasing reluctance to sell on the part of tanners has been accompanied by a marked gain in the demand from leather manufacturers. It was reported that approximately 15,000 hides have been sold on the 15c. basis. Transactions in the hides have been sold on the 15c. basis. Transactions in the local futures market totaled 21,720,000 pounds. Certificated stocks of hides in warehouses licensed by the Exchange decreased by 2,338 hides to a total of 1,364,631 hides. Local closing: Sept., 14.29; Dec., 14.63; Mar., 15.00; June, 15.40. On the 13th inst. futures closed 20 to 26 points net lower. Transactions totaled 180 lots. Heavy liquidation, largely profit taking, caused prices of raw hide futures to fall off considerably. The buying, which was said to have been on resting orders, served to check the decline, with the result that this afternoon the market was 5 to 7 points lower on active options. Sales were moderate, only 3,560,000 pounds changing hands to that time. December stood at 14.58c. and March at 14.93c. Sales in the spot hide market yesterday reached 50,000 hides. Local closing: Dec., 14.40; Mar., 14.80; June, 15.14.

14.80; June, 15.14.

On the 14th inst. futures closed 17 to 15 points net higher. Transactions totaled 89 lots. Raw hide futures opened lower but improved, with the result that the market this early afternoon was only 1 to 2 points off from last night. It was reported that packers had withdrawn from the spot market even at the current higher prices. Sales of futures to early afternoon totaled only 1,920,000 pounds. Dec. then stood at 14.39c. and March at 14.78c. Local closing: Dec., 14.57; Mar., 14.97; June, 15.29. Today futures closed 8 to 5 points net higher. Transactions totaled 116 lots. Scattered commission house selling and offerings by traders caused raw hide futures to ease off after a fairly steady opening. However, the undertone was good. During early afternoon Dec. stood at 14.62 cents, up 5 points. The spot hide market was firm with packers inclined to hold their hides off the market. Local closing: Dec., 14.65; Mar., 15.02.

Ocean Freights—Although the market has not been very active the past week, the undertone has been firm, with most owners holding out for war time rates. Charters included: Grain: New York to Copenhagen, Sept., \$12.50 per ton. Grain Booked: Montreal to Copenhagen, Sept., 55c., option safe outport, at 65c. Thirty-two loads New York to Antwerp, Sept., 40c. Serap: Atlantic range to Japan, Sept., \$10.25. Atlantic or Gulf to Japan, Oct., \$10.50. Atlantic range to Japan, Sept., \$10.25. Atlantic or Gulf to Japan, Oct., \$10.50. Atlantic range to Japan, Oct., \$10. Time: Six months, west coast South American trade, Nov. 15th-Dec. 15, \$2.50. Round trip trans-Atlantic trade delivery U. K. Continent, Sept., 10s. Round trip trans-Atlantic trade, delivery United Kingdom, spot, 12s. 6d. Short period West Indies trade, Sept., \$3.50. Two to 3 months, West Indies Trade, delivery Brazil, \$3.25. Trip out from Bordeaux, Sept., \$2.50, followed by trans-Atlantic, round, \$3.50. Two to 4 months, West Indies trading, Sept., \$2.10. Grain Booked: Thirty loads New York to Antwerp-Rotterdam, Sept., 30c. Thirty loads New York to Antwerp-Rotterdam, Sept., 35c.

Coal—As an indication of what to expect as a result of the European ban on coal exports, latest advices state that a heavy demand for anthracite coal by Canada during the past week has had a stimulating effect on the trade. Although at present most of the shipments are being made by rail and water, this route will probably be closed in Nov. or Dec. when lake and river transportation ceases. Effective on Sept. 25th, the Eastern railroads announce that they will arrange for a currency equalization charge for all coal shipments to Canada. Twice a month the charge will be set at the prevailing rate of foreign exchange. Coal for export to South America has also had its effect on the market here. Although no definite sales commitments were reported, inquiries have been rather heavy. South America is normally supplied by Wales, Germany, Russia and France. Most of these countries have placed a ban on all coal exports.

Wool—The uncertainty in the wool markets was further heightened by reports that Western wool producers were beginning to hold back their clip from the market because of skyrocketing prices, added to which was the lack of any definite idea of what the British were planning to do with the Australian wool clip. It is stated that the country's wool production is not sufficient to supply domestic needs and raw wool as well as some woolen goods are ordinarily imported from abroad. With the British having taken over the Australian clip, fears have arisen in trade quarters as to whether available supplies will be sufficient to meet demand.

Silk—On the 11th inst. futures closed 15c. net higher for the No. 1 contract, the trading limit for one day, with sales totaling 2,350 bales. The No. 2 contract closed 10 to 15c. net higher, with sales totaling only 40 bales. For the fourth time since the outbreak of war in Europe, raw silk futures advanced to their daily trading limits of 15c. today. Sept. No. 1 sold at \$3.02, which is the highest price registered since July, 1930, when the spot month sold at \$3.67. Again most of the trading was in the form of short covering at the limit levels. There also was some commission house buying in evidence. Futures at Yokohama were 29 to 80 yen lower, the 80-yen drop being recorded in the Sept. position. Private cables from the primary centers indicated that trading in all futures positions except Sept., was restricted to a range of 50 yen below and above the previous day's closing levels. Spet sales in both markets totaled 500 bales, while futures transactions in Kobe totaled 6,600 bales. Most of the Yokohama cable was mutilated. Local closing: Contract No. 1: Sept., 3.02; Oct., 2.96½; Dec., 2.80; Jan., 2.78; Mar., 2.77. Contract No. 2: Sept., 2.95; Oct., 2.90; Nov., 2.75; Jan., 2.73. On the 12th inst. futures closed 14½ to 15c. net higher for the No. 1 contract, while the No. 2 contract closed 14c. up from previous finals. For the fifth time since Labor Day raw silk futures advanced to their trading limits in today's session. At the opening, prices immediately went to the limit levels, repeating the performance near the close after a midday drop of from 2c. to 12c. The session was one of the most active in two years, transactions totaling

4,460 bales, including 4,380 bales in the No. 1 contract and 80 bales in the No. 2 contract. Futures at Yokohama advanced 30 to 85 yen, Sept. gaining 70 yen. Transactions in futures there totaled 12,500 bales. The Kobe futures market was closed. Grade D at Yokohama moved up 120 yen to 1,660 yen, and advanced 110 yen to 1,650 yen at Kobe. Spot sales in Kobe totaled 300 bales. Local closing: Contract No. 1: Sept., 3.16½; Oct., 3.11; Nov., 3.01½; Dec., 2.95; Jan., 2.93; Mar., 2.92. Contract No. 2: Sept., 3.09; Oct., 3.04; Nov., 2.94; Dec., 2.89; Jan., 2.87. On the 13th inst. futures closed 15c. net lower, the trading limit. Transactions totaled 267 lots, all in the No. 1 contract. The silk futures market ignored strength in the Japanese markets. Prices this afternoon were 6½ to 9c. lower after having opened as much as 13c. below last night. Sales to that time totaled 1,590 bales, mostly in the No. 1 contract. Oct. stood at \$3.02 and Dec. at \$2.88½. Twenty bales were tendered on the No. 1 Sept. contract. The price of crack double extra silk in the New York spot market advanced ½ to \$3.16 a pound. The Yokohama Bourse closed 20 to 31 yen higher while in the outside market grade D silk was bid up 35 yen to 1,695 yen a bale. Yen exchange declined ½ to 23½c. Local closing: No. 1 Contract: Sept., 3.01½; Oct., 2.96; Nov., 2.86½; Dec., 2.80; Jan., 2.78; Feb., 2.77½; Mar., 2.77.

On the 14th inst. futures closed 5 to 11c. net lower. Transcitions totaled 116 letter A decline in reversible futures reserved.

On the 14th inst. futures closed 5 to 11c. net lower. Transactions totaled 116 lots. A decline in raw silk futures was attributed to the break of sterling exchange and lower prices in Yokohama, due to the fact that the Japanese currency is tied to sterling. The opening was 4 to 9½c. lower. Up to early afternoon there had been no improvement. Active positions were 6 to 9c. lower. The price of crack double extra silk on the New York spot market was 17½c. lower at \$2.98½ a pound. On the Yokohama Bourse prices closed 72 to 87 yen lower. Grade D silk in the outside market was 115 yen lower at 1,580 yen a bale. Yen exchange declined ½ to 23½c. Local closing: No. 1 contracts: Sept., 2.95½; Oct., 2.89; Nov., 2.78; Dec., 2.75; Jan., 2.70; Mar., 2.66½; Apr., 2.66. Today futures closed 10 to 14c. net higher for the No. 1 contract, with sales totaling 127 lots. There were no sales reported in the No. 2 contract. Silk futures rallied strongly in sympathy with the Yokohama markets. The improvement was ascribed to modification of Japanese foreign exchange policy, partially freeing the yen from sterling. The opening was at the limit of 15c. higher on some positions. During early afternoon active No. 1 positions were 12½ to 15c. higher. Sales to that time had totaled 540 bales, of which 480 were on the No. 1 contract. Ten bales were tendered on the Sept. No. 2 contract. The price of crack double extra silk in the Yokohama market advanced 70 yen to 1,650 yen a bale. Yen exchange remained unchanged at 23½c. Local closing: No. 1 contract: Oct., 2.99½; Nov., 2.92; Dec., 2.85; Jan., 2.80; Mar., 2.79½.

#### COTTON

Friday Night, Sept. 15, 1939

The Movement of the Crop, as indicated by our telegrams from the South tonight is given below. For the week ending this evening the total receipts have reached 266,665 bales, against 196,344 bales last week and 140,844 bales the previous week, making the total receipts since Aug. 1, 1939, 1,023,274 bales, against 797,702 bales for the same period of 1938, showing an increase since Aug. 1, 1939, of 225,572

Receipts at-	Sat.	Mon.	Tues.	Wedl	Thurs.	Fri.	Total

The exports for the week ending this evening reach a total of 136,774 bales, of which 71,224 were to Great Britain, 9,885 to France, 10,579 to Italy, 12,191 to Japan, and 32,895 to other destinations. In the corresponding week last year total exports were 55,174 bales. For the season to date aggregate exports have been 470,695 bales, against 407,154 bales in the same period of the previous season. Below are the exports for the week.

Week Ended Sept. 15, 1939 Exports from—	Exported to—

Speculation in cotton for future delivery during the past week was generally quite active, with the trading considerably mixed. There was no incentive to encourage aggressiveness on the upward side, and the market ruled heavy during most sessions of the week. With Southern weather unusually favorable for rapid picking and ginning operations, selling pressure from the South through spot houses increased sharply, and with no appreciable support prices yielded rather easily.

On the 9th inst. prices closed 30 to 38 points net lower. The opening range was 26 to 32 points lower than previous finals. The weakness at the opening was due to heavy hedge selling and liquidation by Bombay brokers. Prices fluctuated rapidly over a range of about \$1 to \$1.25 a bale. The list soon recovered to within 3 to 10 points of Friday's closing levels. The rally was short-lived, however, prices later lows of the day. tne There was little new in the cotton situation to influence sentiment. Attention was given to statements from Washington that the cotton crop of 12,380,000 bales would be likely to increase next season's carry-over by about 1,000,000 to 2,000,000 bales of American cotton. Supplies earried over into the present season represented a record surplus of 14,250,000 bales. Farm officials said that the European war was expected to lessen world demand for cotton. Spot sales at reporting markets totaled

70,288 bales for the day, compared with 47,183 on the corresponding day a year ago. Middling declined 34 to 37 points, with price averaging 8.93c. On the 11th inst. prices closed 23 to 29 points net higher. The opening range was 9 to 15 points higher than provious finals. From these levels the points higher than previous finals. From these levels the market soon sold up to net gains of 33 to 37 points. Commission house and local buying was soon supplemented by trade price fixing, but the gains brought in renewed Southern Prices reacted as much as \$1 a bale from the top levels in the later trading, but experienced support from Wall Street in the afternoon. Reports of a fairly good demand for cotton goods following last week's extreme buying activity in Worth Street, were encouraging. Southern spot markets reported sales today of 55,605 bales, (Memphis missing) compared with 55,104 on the same day last year. Middling quotations were 22 to 32 points higher, ranging from 8.67 to 9.49c., and averaging 9.18c. at the 10 designated markets.

On the 12th inst. prices closed barely steady at 2 points higher to 2 points off. Trading was relatively small. The opening range was 5 to 8 points higher. Shortly after, net gains of 6 to 11 points were established. Liverpool cables were steady and buying orders were sent here from that market while the trade continued to fix prices. Moderately active hedge selling developed at the advance, while there was scattered liquidation. Bombay also sold cotton as the East active hedge selling developed at the advance, while there was scattered liquidation. Bombay also sold cotton as the East Indian market eased. Quieter cotton goods markets, a feeling in some quarters that last week's advance was not warranted by the supply situation, and prospects of difficult shipping conditions, coupled with Administration intimations that there were ample supplies of commodities, all contributed to the market's lower trend. Trading was only moderate and the general disposition was to await developments in Washington as well as abroad. Southern spot markets were 10 points lower to 1 point higher, with middling quotations ranging from 8.61 to 9.49c. Sales totaled 57,989 bales, against 53,200 a year ago. On the 13th inst. prices closed 13 to 19 points net lower. A sudden influx of hedge selling just before the end of trading caused the cotton market selling just before the end of trading caused the cotton market to suffer losses of about \$1 a bale on some active months. Earlier in the day a slightly irregular tone prevailed, although a number of declines far outnumbered the number of advances. At the close prices registered substantial losses. Although the market had a steady undertone, with President Roosevelt's statement that cotton prices are too low, attracting considerable attention among traders, the weakness in Liverpool furnished the cue for the local opening. Conditions were generally favorable in the eastern portions of the cotton belt, but this crop was unfavorably affected by the hot, dry weather in the western and northwestern parts, according to the weekly weather report from Washington.

On the 14th inst. prices closed net 20 points higher to 19 points off. Cotton prices displayed a mixed tone throughout the greater part of the day in a moderate volume of business. Shortly before the end of the trading period the list was 7 points above to 6 points below previous finals. Futures were hesitating this morning, with prices 2 points lower on the distant July and unchanged to 1 point higher on the other positions at the opening. At noon prices rallied somewhat, with the list 8 points higher to 1 point Brokers with Bombay connections were on both sides of the list, while Liverpool houses were credited with selling in most of the active positions. Hedge selling was small, although Southern interests had scattered selling orders in the 1940 positions. The trade continued to absorb contracts in a fair way, and Wall Street and professional interests lent further support. The lower sterling rate caused uneasiness in some portions of the trade and was believed responsible for some Liverpool liquidation.

Today prices closed 4 to 10 points net lower. After displaying a firmer tone throughout the earlier part of the day, prices for cotton futures turned irregular in later dealings in a moderate volume of sales. A short time before the close of business active positions showed an advance of 8 points to a decline of 3 points from the closing levels of the previous day. Around midday the market also was 8 points higher to 3 points lower. The strength at Liverpool and Bombay influenced the higher trend in the local futures market this morning and initial prices showed gains of 3 to 10 points. The sharp advance at Bombay made for a narrowing of differences between that market and New York and brought in considerable buying by Indian accounts in all the 1940 deliveries. Brokers with Liverpool affiliations also took fair quantities of cotton on the opening, while trade covering and Wall Street buying lent moderate support. Most of the offerings came from the South, New Orleans and spot houses.

The official quotation for middling upland cotton in the New York market each day for the past week has been: Sept. 9 to Sept. 15— Sat. Mon. Tues. Wed. Thurs. Fri. Middling upland (nominal) --- 9.35 9.64 9.58 9.45 9.55 9.48

New York Quotations for 32 Years

Argentine Cotton Crop Estimated at 304,000 Bales—The 1938-39 cotton crop in Argentina, harvesting of which was completed recently, is officially estimated by the Argentine Cotton Board at 304,000 bales of 478 pounds each, according to a cablegram received Sept. 12 in the Office of Foreign Agricultural Relations from the American Agricultural Attache in Bueons Aires. The Agricultural Department's announcement in the matter also said:

Early in the season it was expected that the crop would reach the record

Early in the season it was expected that the crop would reach the record level of 387,000 bales from plantings estimated at 1,005,000 acres. That estimate was reduced, however, by damage from unfavorable climatic conditions and insect pests.

The latest estimate indicates that the crop is 28% above the crop of last season and 31% above the average for the five years ended with 1936-37. Despite record plantings last season's (1937-38) crop amounted to only 237,000 bales because of damage from frost, excessive rains and locusts. The average crop for the five years ended with 1936-37 was 232,000 bales.

Cotton Ginned from Crop of 1939 Prior to Sept. 1 The census report issued on Sept. 8 compiled from the individual returns of the ginners, shows 1,401,756 running bales of cotton (counting round as half bales and excluding linters) ginned from the crop of 1939 prior to Sept. 1, compared with 1,335,643 bales from the crop of 1938 and 1,874,320 bales from the crop of 1937. Below is the report in full:

REPORT ON COTTON GINNING Number of bales of cotton ginned from the growth of 1939 prior to Sept. 1, 1939, and comparative statistics to the corresponding data in 1938 and 1937.

Running Bales (Counting Round as Half Bales and Excluding Linters) State 1938 127,543 16,953 46,104 1,295 129,686 2,548 40,503 353 20,886 3,136 Arizona

All other States 40,282 378 1,912 10.488 \*1,401,756 United States .... 1,335,643 1,874,320

\* Includes 137,254 bales of the erop of 1939 ginned prior to Aug. 1 which was counted in the supply for the season of 1938-39, compared with 157,865 and 142,883 bales of the crops of 1938 and 1937.

The statistics in this report include 16,556 round bales for 1939; 11,260 for 1938 and 24,360 for 1937. Included in the acove are 130 bales for American-Egyptian for 1939; 477 for 1938; also 132 bales Sea-Island for 1939; and 200 for 1938.

The statistics for 1939 in this report are subject to revision when checked against the individual returns of the ginners being transmitted by mail.

CONSUMPTION, STOCKS, IMPORTS, AND EXPORTS—UNITED STATES

Cotton consumed during the month of July, 1939, amounted to 521,405 bales. Cotton on hand in consuming establishments on July 31, was 861,656 bales, and in public storage and at compresses 11,620,955 bales. The number of active consuming cotton spindles for the month was 21,915,363. The total imports for the month of July, 1939, were 15,840 bales and the exports of domestic cotton, excluding linters, were 106,531 bales.

WORLD STATISTICS The world's production of commercial cotton, exclusive of linters, grown in 1938, as compiled from various sources was 28,221,000 bales, counting American in running bales and foreign in bales of 478 pounds lint, while the consumption of cotton (exclusive of linters in the United States) for the year ended July 31, 1939, was 27 028,000 bales. The total number of spinning cotton spindles, both active and idle, is about 144,000,000.

Cotton Export Subsidy Program Extended to Canada and Mexico—The Department of Agriculture announced on Sept. 9 that effective Sept. 11, the cotton and cotton products export program will be extended to Canada, Mexico, and other nearby countries and areas to which it has not been applicable. The extension of the program followed a proclamation by the President placing limitations on imports of cotton and cotton waste into the United States, effective Sept. 20 (referred to in our Sept. 9 issue, page 1558).

Under the cotton and cotton products export program, payments of 1½ cents per pound are being made on exports of lint cotton and equivalent payments are being made on exports of cotton goods. In addition to extending the program to all foreign countries, the minimum limitation on any single payment under the program was reduced from

The cotton subsidy program went into effect on July 27, as was noted in our issue of July 29, page 666.

Census Report of Cottonseed Oil Production—This report will be found in our department headed "Indication of Business Activity."

Census Report on Cotton Consumed and on Hand, &c., in August—This report will be found in our department headed "Indication of Business Activit ."

Agricultural Department's Report on Cotton Acreage Condition and Production—The Agricultural Depart-ment at Washington on Friday (Sept. 8) issued its report on cotton acreage, condition and production as of Sept. 1. None of the figures take any account of linters. Comments on the report were given in the editorial pages last week. Below is the report in full:

Below is the report in full:

A United States cotton crop of 12,380,000 bales is forecast by the Crop Reporting Board of the Agricultural Marketing Service, based on condition as of Sept. 1, 1939. This is an increase of 968,000 bales over the forecast as of Aug. 1, and compares with 11,943,000 bales in 1938, 18,946,000 bales in 1937, and 13,800,000 bales, the 10-year (1928-37) average. The indicated yield per acre for the United States of 244.7 pounds compares with 235.8 pounds in 1938 and 190.8 pounds, the 10-year (1928-37) average. It is estimated that 2.9% of the acreage in cotton on July 1 has been, or will be, abandoned, leaving 24,222,000 acres remaining for harvest. In 1938 the abandonment was 3.1%; the 10-year (1929-38) average abandonment was 2.2%.

Conditions affecting the crop have generally been quite favorable during August, and reports indicate improved prospects in all States except Virginia, North Carolina, Florida, and New Mexico. The most important increase is in Texas where 495,000 bales more are in prospect than were indicated on Aug. 1. Most of the increase in that State is in the northwest portion, where conditions during August were unusually favorable for the crop. Marked improvement is also shown in Okiahoma and the States adjoining the Mississippi River. In Alabama and Georgia heavy rains caused damage in some sections, but these losses were more than offset by improvement elsewhere. The reduction in Virginia and North Carolina is due primarily to increased boil weevil damage in those States.

For the United States, prospective damage by boll weevils on Sept. 1 is about the same as the 10-year average and only slightly smaller than was indicated a month earlier. Reports indicate that in Virginia and North Carolina weevil damage will be about the same as or less than was expected earlier.

COTTON REPORT AS OF SEPT. 1, 1939

#### COTTON REPORT AS OF SEPT. 1, 1939

The Crop Reporting Board of the Agricultural Marketing Service makes the following report from data furnished by crop correspondents, field statisticians, and cooperating State agencies. The final outturn of cotton will depend upon whether the various influences affecting the crop during the remainder of the season are more or less favorable than usual.

a Allowances made for interstate movement of seed cotton for ginning. b Included in State and United States totals. Grown principally in Georgia and Florida with small acreages in South Carolina, Alabama, Mississippi, Arkansas, Louisiana and Texas. c Included in Arizona and United States totals. d Short-time average. e Not included in California figures, nor in United States total.

Returns by Telegraph—Telegraphic advices to us this evening denote that blooming at the top and increased shedding has been reported from central and some north central areas of Texas. The cotton crop is opening rapidly and picking is making good advance in practically all of the eastern portions of the belt.

Receipts from the Plantations-The following table indicates the actual movement each week from the plantations. The figures do not include overland receipts nor Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the outports.

The above statement shows: (1) That the total receipts from the plantations since Aug. 1, 1939, are 1,183,781 bales; in 1938 they were 1,042,318 bales and in 1937 were 1,664,843 bales. (2) That although the receipts at the outports the past week were 266,655 bales, the actual movement from plantations was 369,908 bales, stock at interior towns having increased 103,243 bales during the week.

Foreign Cotton Statistics—Regulations due to the war in Europe prohibit cotton statistics being sent from abroad and we are therefore obliged to omit the following tables which we have heretofore given weekly:

World's Supply and Takings of Cotton. India Cotton Movement from All Ports.

Alexandria Receipts and Shipments. Manchester Market.

Liverpool Imports, Stocks, &c.

Shipping News—As shown on a previous page, the exports of cotton from the United States the past week have reached 136,774 bales. The shipments in detail, as made up from mail and telegraphic reports, are as follows: Bales

#### BREADSTUFFS

Friday Night, Sept. 15, 1939

Flour—The flour market showed quite a pick-up the past week, with decidedly heavy bookings reported. Although a very large proportion of the consuming trade is covered by contracts, anywhere from 30 to 60 days, it appears that many consumers do not want to let the market get away from them before they cover their additional needs for the early part of next year. Several mills are still running behind in regular contract shipments, and they are finding

it hard to catch up with deliveries. Wheat—On the 9th inst. prices closed 21/4c. to 23/4c. net Wheat—On the 9th inst. prices closed 2½c. to 2¾c. net lower. Heavy profit taking broke out in the grain market today for the second consecutive session, tumbling prices of leading cereals. Wheat broke as much as 3½c. There were slight rallies, but the undertone was heavy. The decline carried wheat quotations about 7c. a bushel below the war boom highs of Thursday, but lifted prices about 14c. above levels prevailing before the outbreak of hostilities in Europe and 19c. above a year ago figures. A larger than expected official estimate of the Canadian wheat crop and fear that temporary withdrawal of subsidy payments may retard domestic export business, were factors in the selling. Many traders, however, were guided mostly by the desire to take good profits as a result of the week's sharp upturn which broke records in the grain trade because of its swiftness. Mill and export purchasing was reported when prices broke. The official Canadian crop report estimated production of The official Canadian crop report estimated production of wheat at 449,000,000 bushels, compared with 350,000,000 last year. On the 11th inst. prices closed 1½c. to 1½c. net higher. The wheat market showed considerable strength and activity today, prices pushing upward as much as 2½c. a bushel at times. Heavy selling of Friday and Saturday had put the pit in a well liquidated position which enabled prices to respond to new speculative and commercial buying. Prices were above Saturday's close throughout the session, but gains were held in check by profit taking and hedging. Strength in securities proved quite a stimulating influence to buying of wheat. Commercial buying came from millers and shippers, the latter lifting hedges on sales of 110,000 Trade reports indicated flour business continued to exceed milling capacity. Tending to check buying, however, was uncertainty regarding the Government's export policy. War risk insurance rates were increased again. On the 12th inst. prices closed 1%c. to 2%c. net lower. This grain slumped today with the renewal of belated profit taking. Selling was not on a large scale, however, the market weakening more because of lack of buying power than pressure of sales. Grain men watched the action of securities and other commodities in determining their course. Relaxing of sugar quotas, which was interpreted as reflecting the Government's attitude toward too rapidly advancing commodity prices, had a bearish effect. Increased ocean freight rates checking export business, temporary withdrawal of the export subsidy and greatly increased margin requirements for grain trading, were factors tending to curb pit operations. Increase of approximately 5,000,000 bushels in the Government estimate of domestic wheat production had only little market effect, but trade attention was called to the fact that available supplies in the United States and Canada now are large enough to satisfy domestic needs as

well as normal import requirements for the entire world for one season. On the 13th inst. prices closed 3½c. to 3½c. net higher. Wheat prices soared 4c. a bushel on the Chicago Board today, scoring their sharpest advance since last Thursday, when they reached their war-boom peak. Buying by locals and commission houses uncovered some stop loss buying and early gains of more than 2c. were extended. Other North American prices also advanced sharply. Paris reports that Soviet ships were ordered to return to their home ports, and calling of a special session of Congress for Sept. 21 influenced scattered buying. Strength at Winnipeg, where prices were up as much as 2½c., aided the upturn here. Margin requirements in the Winnipeg market, effective today, were reduced 10c. to a minimum of 20c. a bushel from requirements put into effect Sept. 7 by te Winnipeg grain exchange to curb speculation and profiteering.

On the 14th inst. prices closed 1½ to 1¾c. net higher. Wheat prices advanced 2½ to 3c. a bushel today as a fresh buying wave swept over the grain pits, but about half of this upturn was lost later due to heavy profit-taking. The grains lifted prices to within less than a cent of the warboom highs reached last week. Commercial and speculative buying accelerated the early rise, while dealers who hastened to accept profits did so in view of discouraging export business since the start of the war and reports of increasing sales of stored wheat. Although export business remained slow, due to withdrawal of the subsidy and unsettled shipping because of the war, domestic flour demand was reported good and lifting of hedges on this type of business helped to strengthen prices. Considerable short covering and investment buying was in evidence on the upturn. Many traders took notice of the statement of Secretary of Agriculture Wallace that an orderly advance of arm commodity prices to parity levels would be viewed with satisfaction, provided the advance was due to real consumptive demand and not profiteering or consumer hoarding.

Today prices closed unchanged to %c. lower. After fluctuating nervously within a range of more than 3c. a bushel, wheat prices closed slightly lower today. The market was depressed by hedging sales on the part of commercial interests acquiring either wheat or flour, as well as some profit-taking. On the other hand, buying that lifted prices a cent or more above yesterday's close at times was encouraged by reports of unfavorable moisture conditions in the winter wheat belt. Export sales of Canadian wheat and flour this week were reported to have reached substantial proportions, and traders here assumed that this means that newly-established European buying agencies are swinging into action. However, a continuous flow of Canadian grain into overseas channels is needed to avoid congestion due to the heavy movement of the new crop. Open interest in wheat tonight totaled 75,672,000 bushels.

Corn—On the 9th inst. prices closed 15% to 3½c. net lower. Sept. corn led the decline, reflecting partly the heavy country sales, although bookings diminished when the price tumbled. Spot prices were 2 to 3c. lower and local handlers booked 317,000 bushels to come here (Chicago,) bringing total purchases since late Friday to approximately 400,000 bushels. Hedging pressure against these purchases helped to weaken the futures market. On the 11th inst. prices closed ¼ to 1¼c. net higher. This grain held firm throughout most of the session, influenced of course by the strength and activity in the wheat market and a strong securities market. On the 12th inst. prices closed 1½ to 1¾c. net lower. Corn traders said increase of approximately 64,000,000 bushels in the crop estimate had mildly bearish effect, but this was offset by Government estimates indicating a prospective Oct. 1 carry-over slightly less than the 500,000,000 bushels or more expected by many dealers. The Government's corn crop figures were only about 13,-000,000 bushels larger than the average of six private crop experts 12 days ago. On the 13th inst. prices closed 15% to 23%c. net higher. Corn prices advanced with wheat, gaining more than 2c. a bushel, Dec. reaching 57%c., up 2½c., and May, 60½c., up 2½c. Corn futures opened steady and later developed firmness, influenced largely by the strength and vigor of the wheat markets. There was considerable short covering in evidence.

On the 14th inst. prices closed ¾ to ¼c. net higher. Corn prices advanced more than a cent with wheat, but many traders were inclined to act with caution in this market, due to large receipts and greatly increased farmer selling yesterday, when approximately 500,000 bushels were booked to come to Chicago. Receipts today totaled almost

200 cars. Today prices closed unchanged to %c. higher. Corn prices held about steady despite very liberal receipts, exceeding 400 cars, much of which was not for sale in the open market. Most of this grain, traders said, satisfied recent country purchases, and some was believed to be loan corn brought to Chicago for storage. Industries were good buyers, and there were reports that hot, dry weather may damage some late corn. Open interest in corn to-night totaled 30,773,000 bushels.

Oats-On the 9th inst. prices closed 34 to 13/8c. net lower. As a result of the pronounced weakness in corn and wheat. many holders of oat contracts let go their holdings, with the result that prices slumped sharply. On the 11th inst. prices closed \(^{5}\epsilon\) to \(^{1}\epsilon\) c. net higher. Trading was relatively light, the market's steadiness being influenced almost entirely by the strength of wheat and corn markets. On the 12th inst. prices closed 5%c. lower to ½c. higher. An increase of 32,000,000 bushels in the official oats crop estimate depressed prices somewhat, though the Sept. delivery showed relative firmness. On the 13th inst. prices closed 11/8 to 13/4c. net Influenced by the activity and strength displayed by the wheat and corn markets, there was a fair demand for oat futures, a considerable portion of which was for short

On the 14th inst. prices closed 1 to 1/2c. net lower. Oats showed fractional gains in the early trading, but later developed heaviness as a result of some short selling and liquidation. Today prices closed unchanged to %c. lower. Trading was light and without special feature.

Rye—On the 9th inst. prices closed 2½ to 2½c. net lower. There was some rather heavy selling of rye futures, apparently influenced by the marked weakness in wheat and corn and the bearish news on the Canadian wheat crop. On the 11th inst. prices closed 1½ to 1½c. net higher. This grain was quite active, and maintained firmness throughout most of the session, closing at near the top levels of the day. On the 12th inst. prices closed  $\frac{3}{4}$  to  $\frac{1}{8}$ c. net lower. In sympathy with the weakness of wheat and corn values, the rye market fell off substantially. There was nothing in the news to induce any real support, and the market yielded rather easily to the slightest pressure. On the 13th inst. prices closed  $\frac{23}{4}$  to  $\frac{23}{8}$ c. net higher. A good speculative demand was in evidence in this grain, influenced of course by the marked strength in other grains, particularly wheat. the marked strength in other grains, particularly wheat. Shorts were active also, covering their commitments.

On the 14th inst. prices closed % to ¼c. net higher. Although trading was light, the market for rye futures ruled firm a good part of the day, influenced by the firmness of wheat and corn markets. Today prices closed ½ to %c. net lower. Today's market in rye futures ruled heavy in sympathy with the heaviness of wheat and corn.

Weather Report for the Week Ended Sept. 13-The general summary of the weather bulletin issued by the Department of Agriculture, indicating the influence of the weather for the week ended Sept. 13, follows:

Department of Agriculture, indicating the influence of the weather for the week ended Sept. 13, follows:

The weather of the week was marked by a general absence of rainfall and by high temperatures in most of the central parts of the country, except for a reaction to cooler on the 8th. In sastern sections the week was also largely dry, except for scattered showers, while abnormally warm weather prevailed on the 8th. In western parts showers occurred in some Rocky Mountain and southwestern areas, but the far West was generally dry and warm.

The week was generally warm, except in the Northeast, the upper Lake region, the Great Basin, locally in the Southwest, and along the upper Pacific coast. In the lower Missouri Valley and adjacent sections the week was abnormally warm, with the departures from normal temperature ranging 9 degrees to as many as 13 degrees. Elsewhere in the Great Plains area and the Ohio Valley the departures ranged from 4 degrees to 7 degrees.

Maximum temperatures for the week were again high in central sections, ranging above 100 degrees throughout most of the Ohio, middle Missippi, and lower Missouri Valleys and in the southern Great Plains. Other areas with temperatures in excess of 100 degrees were located in the Carolinas, parts of Maryland, and locally in the Southwest and West. The highest temperatures in the Northeast were mostly in the 70's, while they were also moderate in the upper Great Lakes and along the Pacific coast, but elsewhere were generally in the 90's.

Precipitation was locally moderate in the upper Mississippi Valley, parts of the northern Great Plains, and in eastern and southern Texas, as well as in considerable areas of the Southwest. Elsewhere, except for local showers, the rainfall for the week was generally light, especially in the Southeast and quite generally in the Great Plains, and the far West.

The continuation of inadequate rainfall in the Great Plains, attended by extremely high temperatures, agravated an already serious condition and soil moisture is n

Small Grains—Some remnants of winter grain remain to be threshed in the Northwest, but otherwise this work is completed. Early rice is being threshed in Louisiana and harvest is progressing in Texas, although delayed somewhat by rain near the end of the week.

In the principal winter wheat belt fall plowing and seeding are practically at a standstill as the soil is generally too dry for this work. In more northern portions, however, there were some scattered reports of plowing and seeding, while in Minnesota the ground is reported in good condition and work is progressing satisfactorily. Rains improved conditions locally in Montana, but more rain is still needed in much of the Northwest.

Corn—Corn progressed favorably in most of the Ohio Valley, although the late crop was unfavorably affected locally by the absence of rainfall and high temperatures. In this area the bulk of the crop is expected to be safe from frost in two weeks, with about 75% now safe in central parts. Hot, dry winds damaged late corn in Missouri, while deterioration was general in northwestern Arkansas and most of Kansas and Nebraska where there were reports of premature ripening and drying. In Kansas practically all corn in the western part has been cut for fodder and silos, but fair to good condition is noted in some more eastern localities. Rapid maturity was noted in more northern portions of the country where some has already been cut.

been cut.

In Iowa the unprecedented heat, in combination with a three-week drought caused serious deterioration of late corn in about one-fourth of the acreage and reduced yields elsewhere. However, one beneficial feature was the rapid maturity of the bulk of the crop, as more than four-fifths is now safe or twice as much as is normally safe at this date: moisture tests indicate that some may be dry enough to crib by the end of this month.

Cotton—Conditions were generally favorable in the eastern portion of the cotton belt, but this crop was unfavorable in the eastern portion of the cotton belt, but this crop was unfavorably affected by the hot, dry weather in western and northwestern parts.

In Texas progress and condition of cotton were generally fair to locally poor, although scattered areas show good condition; considerable blooming at the top and increased shedding were reported in west-central and some north-central areas. Picking is practically completed in the extreme south and made excellent advance elsewhere. In Oklahoma cotton deteriorated or made only poor progress, while condition was poor to only fair, but rapid opening was favored and picking made good progress.

In the central States of the belt condition of cotton is good, except in western and north-central Arkansas where the soil moisture was badly depleted; the crop is opening rapidly, with picking making good advance. In practically all of the eastern portion of the belt the crop was opening rapidly and good progress was made in gathering, with this work nearing completion in the Southeast.

The Weather Bureau furnished the following resume of conditions in the different States:

Virginia—Richmond: Warm; little rain. Corn cutting and silo filling favored, but ground too dry for fall plowing or planting. Sweet potatoes and beans look good. Tobacco cutting and curing progressing rapidly; in some cases stalks turned under. Cotton opening well. Picking pears and

North Carolina—Raleigh: Warm on 8-9th, subnormal remainder; little rain, except adequate very locally. Condition of corn excellent; progress good. Progress of cotton very good account favorable warmth, low humidity, and abundant sunshine; condition fairly good; picking fairly active in south: about normal shedding; favorable for checking weevil. Digging potatoes and saving hay favored. Fruits and vegetables satisfactory advance.

South Carolina—Columbia: Much sunshine and dry, warm weather caused rapid opening of cotton; nearly all open locally in south and east; picking and ginning active, favorable for checking weevil; progress and condition generally very good. Too dry for late forage, pastures, gardens, and truck. Considerable haying.

Georgia—Atlanta: Too dry and hot for pastures, truck, and late-growing crops. Ootton opening rapidly in north; picking rapid progress in all sections nearly over in south. Late apples and peaches ripening in north.

Florida—Jacksonville: Very warm days; adequate rains; soil moisture ample. Progress of cotton fair; condition rather poor; ginning fairly active. Sweet potatoes fair. Preparing land and seed beds for fall truck. Ranges improved. Citrus good; fruit holding and sizing well. Persimmons

Alabama—Montgomery: Favorable warmth; little rain. Cotton ing rapidly and picking good progress; condition mostly fair, but good in north. Much hay saved. Sweet potatoes mostly good. fair to fairly good. Truck fair to good. Cotton open

Mississippi—Vicksburg: Harvesting favored. Little rain in Delt Counties. Cotton opening rapidly; picking rapid and ginning fairly good progress. Housing corn mostly poor progress account cotton picking Much hay saved. Too dry for gardens, pastures, and truck, except localing in central interior.

Louisiana—New Orleans: Unfavorably hot in north; adequate to exessive rains locally, but lack felt in many areas. Progress of cotton fair to cod; damaged few areas by wind and rain; picking good progress. Thresh-

ing early rice near end; cutting late varieties. Good progress gathering corn and sweet potatoes. Cane progress good.

Texas—Houston: Too hot early part, favorable warmth latter; lack of rain felt, except on coastal plains and in extreme south where rains temporarily adequate. Late corn matured; generally poor condition; practically all early harvested. Most winter wheat land prepared in Panhandie; elsewhere soil too dry for plowing. Progress and condition of cotton fair to locally poor, except locally where condition good; continued blooming at top and increased shedding reported in west-central and some north-central areas; picking nearly over in extreme south and rapid advance elsewhere. Ranges, truck, and citrus helped greatly by rains in south and coast areas. Cattle fair to good condition. Rice harvest favorable progress, but delayed by rains near close.

Oklahoma—Oklahoma City: Unfavorably hot and dry; soil moisture badly depleted. Stock water low, or depleted in much of State. Soil too dry for planting winter wheat. Progress of cotton mostly poor or deteriorating; condition poor to fair; opening rapidly; picking good progress. Late feed and minor crops mostly deteriorated. Likestock fair, but show effect of severe drought. Pastures badly burnt; some trees dying. Corn mostly gathered.

\*\*Arkansas—Little Rock: Progress of cotton good, except in most of west and north-central were fair to poor due to heat and dry soil; opening rapidly; picking rapid progress; some complaints of small bolls, premature opening and no bloom received in hill sections. Progress of late corn fair to good in most of east and central, poor or deteriorated elsewhere. Rice ripening rapidly; harvesting most areas. Pastures brown. Truck about gone. Trees dying in west and north-central.

Price Limits and Margin Requirements Raised by Chicago and Winnipeg Grain Markets—The Chicago Board of Trade doubled the permissible limits for a single day's advance or decline in grain prices effective at the opening Sept. 7. The action was taken because trading in both cash grains and futures had become virtually deadlocked because of the tendency of prices to rise in excess of locked because of the tendency of prices to rise in excess of the limitations previously enforced. At the same time margin requirements on new speculative trades in futures were doubled, but on Sept. 15 the wheat, oats and rye margins were reduced while the margin on soy beans was increased. Changes were also made by the Winnipeg Grain Exchange. According to the The New York "Sun" of Sept. 15:

Directors of the Chicago Board of Trade at a special meeting reduced margin requirements, effective today, on wheat and rye three cents per bushel and two cents per bushel on oats. Margin requirements on soy beans were increased from 12 cents to 15 cents. The rate of 12 cents on corn was left unchanged.

Directors fixed the minimum margin requirements on grain futures transactions other than hedging or spreading transaction at 15 cents per bushel on wheat, rye, barley, and soy beans; 12 cents per bushel on corn, and 7 cents per bushel on oats.

These requirements compared with 18 cents per bushel on wheat and rye. 12 cents on corn and soy beans, and 9 cents per bushel on oats, which rates were put into effect last week.

The directors further ordered that margins on all commitments made on and after today other than hedging or spreading transactions shall be maintained at a minimum of 10 cents per bushel on wheat, rye, barley, and soy beans; 8 cents per bushel on corn, and 6 cents per bushel on oats.

The following bearing on the earlier changes at Chicago and margin requirements on new speculative trades in futures

The following bearing on the earlier changes at Chicago and those at Winnipeg is from Chicago advices of Sept. 6 to the New York "Times":

New York "Times":

Effective at the opening tomorrow, wheat and rye futures will be permitted to advance or dacline ten cents a bushel compared with closing prices of the preceding day. The permissible limit on corn and soy beans will be eight cents and on oats, six cents. The price of all grain futures advanced today the permissible limit of five cents on wheat and rye, four cents on corn and soy beans and three cents on oats.

Margin requirements on new speculative trades in grain futures also were doubled in order to be certain that there will be no indiscriminate operations in the markets. Effective tomorrow initial margins on new commitments in wheat and rye will be 18 cents a bushel; corn and soy beans, 12 cents, and oats, nine cents.

The directors also ruled that margin requirements on all new commitments in grain futures other than hedging or spreading transactions shall be maintained at a minimum price of 10 cents a bushel on wheat and rye; eight cents on corn and soy beans and six cents a bushel on wheat and rye; eight cents on corn and soy beans and six cents a bushel on oats.

The permissible limit on advances or declines in lard and dry salted meats was doubled and both commodities can fluctuate a maximum of \$1 a,100 pounds.

The Winnipeg Grain Exchange announced today that effective tomorrow margin requirements on new speculative trades in wheat futures in that market would be 30 cents a bushel. This followed a four-day straight advance of 20 cents a bushel, establishing what is said to be a new all time record for an upturn in the grains markets in such a short period.

Inability of flour mills and cash interests to remove hedges on transactions in cash grain due to the futures market advancing the permissible limit with little trading in the last two days resulted in stagnation in the cash markets. Mills are reported to have received orders for several million barrels of flour in the last few days, but could not name a price on the flour as they had no way of determining at what price they coul

Canadian Press advices of Sept. 7 from Winnipeg reported

as follows:

A. E. Darby, Secretary of the Winnipeg Grain Exchange, announced today new daily limits for price fluctuations on the Winnipeg grain market to facilitate trading in the present national emergency. The new limits are 10 cents for wheat, flaxseed and rye, and six cents for oats and barley. The present limit is five cents for all grains.

The following statement was issued by the Exchange:
"Effective Sept. 8, 1939, the daily range of quotations of any futures contract authorized for trading shall not exceed 10 cents a bushel higher or lower than the closing prices of the previous business session in the case of wheat, flaxseed and rye and six cents a bushel in the case of oats and barley.
"This rule shall also apply to options. Options cannot be exercised above or below the daily limits set for each grain respectively."

Agricultural Department's Official Report on Grains, &c.—The Crop Reporting Board of the United States Department of Agriculture made public late Monday afternoon, Sept. 11, its forecasts and estimates of the grain crops of the United States as of Sept. 1, based on reports and data furnished by crop correspondents, field statisticians and cooperating State Boards (or Departments) of Agriculture. This report shows that the production of all wheat is now placed at 736,115,000 bushels, as against 731,432,000 bushels, the Department's estimate a month are and combushels the Department's estimate a month ago, and comparing with a harvest of 930,801,000 bushels in 1937, and a 10-year (1928-37) average production of 752,952,000 bushels. The production of spring wheat is estimated as of Sept. 1 to be 185,405,000 bushels, which compares with a production of 244,164,000 bushels in 1938, and a 10-year (1928-37) average production of 192,792,000 bushels. Comments concerning the report will be found in our editorial department. give below the report:

Crop prospects improved about 4% during August, due to marked increases of 8 to 10% in expectations for cotton, flaxseed and grain sorghums, an increase of nearly 7% in the indicated bean crop and increases, mostly

from 2 to 4%, in corn, spring wheat, cats, barley, potatoes, hay and sugar beets. Changes in prospects for other crops were mostly nominal.

Seatern portions of the corn belt, with Ohio, Indiana, Illinois and Iowa all expected to have record yields of 48 to 50 bushels. The large acreage of expected to have record yields of 48 to 50 bushels. The large acreage of properts for the highest yield per acre on record, and cotton the second Notes. Notwithstanding heavy prought damage to cropp in the Dakotas. Whether, the properts for the highest yield per acre on record, and cotton the second Notes. So the properts for the highest yield per acre and the properts of the highest yield per acre and the properts of the properts of the highest yield per acre and the properts of the pr

Wheat—The 1939 wheat crop of 736,115,000 bushels, as indicated on Sept. 1, is not much different from the Aug. 1 forecast. The slight increase is entirely in spring wheat production as the winter wheat estimate remains unchanged from that of Aug. 1 at 550,710,000 bushels. In 1938, all wheat production was 930,801,000 bushels, and the 10-year (1928-37) average production, 752,952,000 bushels. The 1939 acreage for harvest, however, is almost 22% smaller than the 1938 acreage, and 1.4% smaller than the 10-year average acreage.

Production of all spring wheat is estimated at 185,405,000 bushels, compared to 180,722,000 bushels on Aug. 1, 244,164,000 bushels, compared to 180,722,000 bushels on Aug. 1, 244,164,000 bushels, an increase of 1,270,000 bushels, the 10-year average.

Durum wheat production is estimated to be 32,652,000 bushels, an increase of 1,270,000 bushels above the August forecast, due to a half bushel increase in yield per acre in the principal producing State of North Dakota where this crop suffered less damage from the July heat than was expected Harvest of both durum and other spring wheat was largely completed by the middle of August.

Production of other spring wheat is indicated at 152,753,000 bushels which compares with 203,719,000 bushels harvested last year and the 10-year average production of 157,716,000 bushels.

Yields of other spring wheat are reported higher in Minnesota. Idaho, and North Dakota than on Aug. 1, but are unchanged in South Dakota and Montana. In Washington a half bushel decline occurred as a result of heat damage which caused greater shrink than was anticipated. In the minor spring wheat States, east of the Mississippi, yields held up to or exceeded the August estimates with weather generally favorable to rapid harvesting. For the entire spring wheat belt, the September yield of 11.5 bushels is 0.3 of a bushel above the August estimate, a half bushel below that of 1938, and 0.6 of a bushel above the 10-year (1928-37) average.

a Includes durum wheat in States for which estimates are not shown separately.

b Indicated 1939.

Oats—The 1939 oats crop is estimated at 929,968,000 bushels which is about 32 million bushels, or 4%, greater than the indicated production on Aug. 1, but 12% smaller than last year's crop of 1,053,839,000 bushels. The 10-year (1928-37) average production is 1,049,300,000 bushels. Threshing returns, which are now practically complete, indicate yields are higher than expected earlier. Both yields and quality appear to vary more than usual. In Iowa, the leading State in oats production, the yield per acre is about 2.0 bushels below the 10-year average. In Minnesota, which ranks second in oats production, the yield per acre is 7.0 bushels above average and the quality is good.

The yield per acre is now indicated to be 27.7 bushels. This is 1.0 bushel higher than indicated on Aug. 1, 2.0 bushels lower than in 1938, and the same as the 10-year (1928-37) average.

Corn—Production of corn as of Sept. 1 is forecast as 2,523,092,000 bushels. This is some 63,000,000 bushels more than indicated last month and is 19,146,000 bushels less than the 1938 corn crop. The average production for the 10 years, 1928-37, was 2,309,674,000 bushels, including the low production of the severe drought years.

The yield forecast is 27.8 bushels per acre, which is the highest since 1923, with the exception of 1937. The 1938 yield was 27.7 bushels and the 1928-37 average is 23.0 bushels.

Drought prevailing in some sections a month ago was followed by good growing weather due to rains early in August. As a result, prospects improved somewhat in the northeastern States and Kansas, Nebraska and Missouri.

The exceptionally favorable conditions in the Country of the country of the conditions in the Country of the conditions in the Country of the conditions in the Country of the conditions in the Country of the conditions in the Country of the conditions in the Country of the country of the conditions in the Country of the coun

Missouri.

The exceptionally favorable conditions in the States of Minnesota, Iowa, Illinois, Indiana and Ohio continued with the result that record yields are in prospect for these States. Other sections of the country made only slight changes during August.

The advanced stage of growth of the corn crop, which has been 7 to 10 days early since tasseling, enabled it to profit, in all except the Great Plains States, from the warm days of late August. Maturity was hastened, and the inroads of diseases favored by abundant moisture were checked. Most of the corn crop will be safe from frost damage long before the average frost date. In only a few localities has maturity been forced to the extent that chaffiness of grain will result.

pounds, compared with 129,250,000 pounds harvested last year and the 10-year (1928-37) average production of 25,217,000 pounds. The dark air-cured tobacco crop is now indicated at 37,383,000 pounds. The dark air-cured tobacco crop is now indicated at 37,383,000 pounds, which is an increase of about 1.3% over the Aug. 1 prospects, compared with 32,789,000 pounds harvested last year and the 10-year (1928-37) average production of 44,494,000 pounds.

Froduction of all classes of cigar tobacco is expected to be 126,437,000 pounds, compared with 119,993,000 pounds in prospect on Aug. 1, 107,651,-000 pounds harvested last year and the 10-year (1928-37) average production. 000 pounds harvested last year and the 10-year (1928-37) average production of 129,533,000 pounds. The indicated production this year compared with last year by classes is: Filler, this year, 52,465,000 pounds; last year, 45,580,000 pounds; binder, this year, 62,687,000 pounds; last year, 53,042,000 pounds; and wrapper, this year, 11,285,000 pounds; last year, 9,029,000 pounds.

Potatoes—Sept. 1 conditions indicate a potato crop of 364,208,000 bushels. This production compares with the 1938 crop of 371,617,000 bushels, and the 10-year (1928-37) average of 372,258,000 bushels. The September forecast is 7,374,000 bushels larger than was indicated on Aug. 1. Adequate rainfall during August relieved dry conditions in most of the heavy-producing northern States. For the country as a whole, crop prospects improved markedly during August.

In Maine, however, growers report that yield prospects have declined. Heavy rains in the northern part of Aroostook county have damaged the crop and late blight is generally prevalent. Central and southern sections of the county, on the other hand, have been dry and early varieties are dead. Insects are reported to be causing considerable damage in the dry sections. In New York, rains have improved the up-State crop. Production on Long Island is indicated to be the same as the forecast of Aug. 1—7,493,000 bushels, compared with 11,253,000 bushels last year.

Prospects have improved in Pennsylvania and Ohio. In Michigan, conditions are much better than a month ago, especially in the northern part of the State.

In Wisconsin, rains have improved the late crop and so far no frost damage has been reported. In Minnesota, excellent conditions in the north central and southern counties are offset by rather poor prospects in the Red River Valley, where the early crop is dead and will make no further growth. Conditions are similar on the North Dakota side of the Valley. The late crop, however, still has a chance for improvement. In Nebraska, the early commercial crop turned out well, and rain has benefited the late crop.

In Idaho, early August frosts nipped the tops of plants on the higher elevations, but the weather was generally warm and brought about some improvement. The Colorado crop is turning out much better than was expected earlier in the season. In Washington, high temperatures during August damaged the crop. Yield prospects in Oregon and California are the same as on Aug. 1.

#### GENERAL CROP REPORT AS OF SEPT. 1, 1939

The Crop Reporting Board of the Agricultural Marketing Service makes the following report from data furnished by crop correspondents, field statisticians, and cooperating State agencies:

#### THE DRY GOODS TRADE

New York, Friday Night, Sept. 15, 1939

Helped by favorable weather conditions, the continued sharp upward movement in security and commodity prices and a growing improvement in the industrial employment situation, retail business gave a satisfactory account during the past week. Wide-spread fears of impending further price advances were a contributing factor in stimulating purchases on the part of consumers. Department store sales, the country over, for the week ended Sept. 2, according to the Federal Reserve Board, were 3% above the corresponding week of last year. .In New York and Brooklyn stores a gain in sales amounting to 10.2% was registered, while in Newark establishments the increase was limited to 0.7%. For the entire month of August, the Federal Reserve Board reported an increase in department store sales over August 1938, amounting to 7%, with the Atlanta district making the best showing with a gain of 15%.

Trading in the wholesale dry goods markets, while displaying a great deal of unsettlement, continued very active, and numerous further price advances were announced, following the withdrawal of offerings in a variety of lines. Retailers, in many instances, proceeded to cover part of heir requirements into January and wholesalers, on their part, also placed additional substantial orders for the fall season. Price advances included sheets and pillowcases, percales, coverts, chambrays, tickings and underwear. Business in silk goods was greatly affected by the sharp rise in raw silk values, with the ensuing advances in prices of the finished product serving to cause extreme unsettlement Trading in rayon yarns continued very active as users rushed to cover their nearby and future requirements, owing to fears of impending price advances. In the meantime, producers persisted in their refusal to accept yarn orders for November delivery, and surplus stocks were reported to approach the vanishing point.

Domestic Cotton Goods-Trading in the gray cloths markets, following the previous week's almost unprecedented buying rush, assumed more orderly conditions, although the volume of sales continued at very substantial figures. The temporary withdrawal of many mills from the market, and the observance of the religious holidays, also served to hold down transactions to more normal levels. Prices ruled firm throughout the week, and late in the period a further stiffening occurred, following the establishment of a new minimum wage rate for cotton mills. In addition to the continued strength in the security and commodity markets, much of the current eagerness to acquire supplies is attributed to the fact that inventories everywhere previously had been permitted to sink below normal levels, also that finished goods business is keeping pace with orders on gray cloths. Business in fine goods also expanded materially, with a further gain in the volume of transactions prevented solely by the unwillingness of mills to reach for the business available at current quotations. In addition to combed goods, broadcloths were in very active demand, and an increasing volume of business was done in carded Closing prices in print cloths were as follows: fancies. 39 inch 80s, 71/8e., 39 inch 72-76s 61/8e., 39 inch 68-72s 61/8e.,  $38\frac{1}{2}$  inch 64-60s  $5\frac{3}{8}$  to  $5\frac{1}{2}$ e.,  $38\frac{1}{2}$  inch 60-48s  $4\frac{5}{8}$ e.

Woolen Goods-Trading in men's wear fabrics expanded materially, with the advance in prices on worsteds averaging 25c. a yard meeting with little opposition on the part of buyers. The call for lightweight materials also held up quite satisfactorily, notwithstanding a markup in quotations averaging 15c. a yard. Overcoatings and topcoatings, here-tofore neglected too, came in for increased attention. Re-ports from retail clothing centers made a better showing as the probability of price advances served as a stimulus to consumer buying. Business in women's wear fabrics turned irregular, partly because of the temporary withdrawl of a number of mills from the market. A moderate call continued for worsted dress goods, and plaids and tweeds also moved in fair relume. moved in fair volume.

Foreign Dry Goods-Trading in linens was unsettled, owing to the increasing uncertainty over the future flow of supplies from abroad, the further rise in war risk insurance rates and the sharp fall in sterling. A feature of the week was the announcement of an advance of 10% in the prices of handkerchiefs, dress linens and table damasks. Business in burlap expanded materially, and prices made additional sensational gains, in smypathy with the steady uprush in the Calcutta market. An active demand prevailed throughout the period, and limited available supplies were quickly absorbed by the trade. Domestically lightweights were quoted at 6.55c., heavies at 8.15c.

#### MUNICIPAL BOND SALES IN AUGUST

We present herewith our detailed list of the municipal bond issues put out during the month of August, which the crowded condition of our columns prevented our publishing

at the usual time.

The review of the month's sales was given on page 1643 of the "Chronicle" of Sept. 9. The total of awards during the month stands at \$69,657,032. This total does not include Federal Emergency Relief Administration or Public Works Administration loans or grants actually made or promised to States and municipalities during the month.

The number of municipalities issuing bonds in August was 312 and the number of separate issues was 342.

312	and	the	number	of	separate	issues	was 342

Total long-term Canadian debentures sold in August\_\$31,081,500 \* Temporary loan; not included in month's total.

Arkansas—New Highway Refunding Litigation to Be Started—New litigation will be instituted by Governor Carl E. Bailey of Arkansas to test before the State Supreme Court the validity of the State's \$140,000,000 highway fund Refunding Act, which was recently enacted by a special session of the Legislature.

The Supreme Court on Aug. 16 held invalid an emergency clause in the Refunding Act but handed down no decision on the validity of the legislation itself. Previously, it was indicated that the State would ask the high Court for a rehearing of its August decision, but the time limit on filing a motion for a rehearing expired.

Governor Bailey in disclosing his plan said that had the Court ruled on the validity of the Act itself the State probably would have proceeded with the financing prior to Sept. 1. Most of the-outstanding bonds were callable on Oct. 1.

"The time limit for refunding the highway debt prior to Oct. 1 maturity date has already expired." he said. "We have condiuded, therefore, that no useful prupose would be served by filing a motion for rehearing. The Act will become a law at the conclusion of 90 days from adjournment of the special session. In the meantime, litigation will be started in the lower courts on validity of the Act itself.

"We hope that its validity will be affirmed, so that through the efforts of the incumbent administration or some future administration, the benefits of the refunding program may be secured."

In its Aug. 16 decision, the Arkansas Supreme Court indicated that suits relative to the validity of the Act itself should be more thoroughly briefed. Counsel for the Governor will comply with this request. The Court will reconvene on Sept. 25, but the Refunding Act probably will not be submitted than, as Governor Bailey has said there is "no particular hurry" in securing a decision.

Municipal Bond Issues for Relief Found Compara-

Municipal Bond Issues for Relief Found Comparatively Small—Comparatively few large cities and counties have issued bonds for relief purposes during the past seven years, a survey by the Municipal Finance Officers' Association of the United States and Canada indicated on Sept. 11.

Since 1932 a total of \$286,753,283 in bonds has been issued by 20 cities and 16 counties out of the 118 local governments replying to the Association's nation-wide inquiry, which included cities over 100,000 population, and usually the counties in which they are located. Bonds listed were issued for direct relief only and did not include borrowings to make up the local governments' contribution to work relief projects or to unemployment relief through public works.

Of the bonds issued by the 20 cities, \$143,779,852, or nearly 60%, is now outstanding. The 16 counties still have \$22,080,820 outstanding in deats for relief.

Four cities accounted for \$186,957,000 or 77%, of the total amount of oonds issued by the 20 cities included in the group. One county issued slightly more than one-third of the county bonds.

Eight of the citier plan to issue about \$5,000,000 in new bonds for relief during the balance of 1939, they reported. Four of the 16 counties reported that they expect to borrow a total of \$6,785,972 over the next few months. More than half of this amount will be borrowed by the same county that showed the largest sond issues for relief in the past.

The survey showed that some of the local governments had followed a continuous policy of issuing bonds for relief purposes, without much change from year to year. Others issued bonds only in certain years, to meet emergencies until other sources of revenue were discovered or the financing of relief was taken over by other political subdivisions, the Association said.

New York State—Gross City Budgets Increase 1% Up-

New York State—Gross City Budgets Increase 1% Up-State—Cross budgets of all except 7 of 58 up-State New York cities increased this year to raise total municipal spending programs to \$184,867,785, a 1% rise over 1938 and 9% over

five years ago.

A survey by the Mayors Conference information service disclosed the largest increases in currently spending municipal budgets are in Ithaca and Port Jervis, each 45% over 1934.

Over 1934.

Ithaca, with 21,000 population, adopted a \$786,310 budget as compared with \$541,342 five years ago and Port Jervis, with 11,000 inhaibtants, \$287,377 as against 1934's \$197,607.

Fulton, a city of 13,000 population, gained the distinction of having the largest decrease, 11%, in gross budgets, comprising all operating expenses and debt service, dropping from \$581,451, in 1934 to \$517,443 this year.

Other municipalities which whittled their spending programs over five years ago are Tonawanda, from \$627,665 to \$574,936; Buffalo, from \$41,-992,536 to \$39,167,352; North Tonawanda, from \$772,606 to \$724,929; Alabany, from \$8,158,635 to \$7,792,985; Yonkers, from \$14,414,925 to \$14,144,858, and Utica, from \$6,256,436 to \$6,213,267.

The total financial outlay for the municipalities this year is \$14,564,973 more than in 1934 and \$559,645 more than last year.

The 1934 and 1939 comparisons:

South Dakota—Supreme Court Rules on Rural Credit Bond Proposal—The South Dakota Supreme Court on Sept. 8 held that the only method available to the Rural Credit Board for issuance of new bonds is through a public sale on sealed bids. It also held that no open exchange can be legally made.

This opinion was handed down by the Supreme Court in response to a query by Governor Harlan J. Bushfield. The Rural Credit Board of the State had proposed a voluntary plan providing for the liquidation of the rural credit debt.

The plan proposed the issuance of new refunding bonds up to \$21,500,000, which were to be exchanged for a like amount of the total of \$36,869,000 now outstanding. The effect of the Supreme Court's decision leaves the Rural Credit Board in a position where it will be required to find some other method of transfer.

method of transfer.

In connection with the above report we quote herewith from the Chicago "Journal of Commerce" of Sept. 12:

A further effort is likely to be launched by the Rural Credit Board of the State of South Dakota toward the refunding of the State's rural credit debt of \$36,869,000, it was indicated yesterday.

Millard G. Scott, a director of the Board, was said to be very anxious to effect the refunding and is to confer with attorneys as a probable new pian to proceed with the move, in light of a State supreme court ruling on the program.

The Court Friday held that the only method open to the Board in the issuance of new bonds is through a public sale on sealed bids. It handed down an opinion, in response to a query by Governor Harlan J. Bushfield, that no open exchange of new bonds for outstanding obligations legally can be made.

be made.

This opinion will make it impossible for the State to proceed with the refunding on the basis of a tentative program that was drawn up. This proposal called for the issuance of \$21,500,000 of new obligations, maturing serially 1950-59, in exchange for an equivalent amount of the outstanding

securities.

One probable method of proceeding with the program that is likely to be considered is through a public offering, subject to exchanges made by present bondholders.

Investment men figure that it still would be possible for the Board to work out a refunding program under some legal basis in current market conditions. If the market works any lower, however, they figure that any refunding would have to be tabled. Average interest rate on the outstanding bonds amounts to about 3.80%. The bonds are all due in the next 10 years, and are not callable.

State Officials' Association Elects Officers—Officers elected at the 24th annual convention of the National Association of State Auditors, Comptrollers and Treasurers, held at Seattle, Wash., recently, for the coming year are:

L. B. Baynard, President, State auditor of Louisiana; R. E. Talbott, first Vice-President, State Treasurer of West Virginia; F. Clair Ross, Second Vice-President; State Treasurer of Pennsylvania; Frank J. Murray, Third Vice-President, State Comptroller of New Jersey; F. Gordon Kimball, Fourth Vice-President, State Treasurer of Missouri, and Phil H. Gallagher, Treasurer, State Treasurer of Washington.

Tennessee—Polt Tax Upheld—An Associated Press dispatch from Nashville on Sept. 11 reported that two Federal district judges, sitting together on that date, ruled that Tennessee's poll tax as a prerequisite to voting in national elections is constitutional. They denied a petition for an injuction sought by Henry Pirtle against Grundy County election officials. The petition was backed by the Southern Conference for Human Welfare.

United States—States Avoid Double Taxes on Estates— To avoid collecting double death taxes from a single estate, 22 States have waived their legal privilege and do not levy such taxes on the intangible personal property of non-residents, information from the Federation of Tax Administrators showed on Sept. 14.

These States now have statutes providing reciprocal tax exemption on stocks, bonds and other intangibles held in the estates of non-residents, even though recent decisions of the United States Supreme Court left the way open for double or multiple taxation of such property.

Thus, if John Doe of Arkansas dies and bequeaths some stocks held in trust in a New Hampshire bank to Richard Roe of Wyoming, all three States can constitutionally tax the single bequest. Under reciprocal exemption statutes, only the home State of John Doe does so.

The States which eliminate possibility of the multiple levy by reciprocal agreement are: Arkansas, California, Georgia, Idaho, Illinois, Indiana, Iowa, Maryland, Michigan, Missispippi, Nebraska, New Hampshire, New Mexico, North Dakota, Ohio, Oretgon, Pennsylvania, South Carolina, Texas, West Virginia, Wisconsin and Wyoming.

In Nebraska reciprocity applies only to stocks and bonds. In North Dakota it includes stock of domestic corporations only, and in Iowa and Rhode Island there are other limitations.

Besides the 22 States which eliminate double death duties by rrciprocal agreement, Nevada is free of the problem, since it imposes no death taxes. Ten other States also avoid the problem because their death taxes are restricted to tangible property. These States are Connecticut, Delaware, Florida, Maine, Massachusetts, New Jersey, New York, Tennessee, Vermont and Virginia.

Three State Surveys Show Excess Subdivision in Urban Areas

Three State Surveys Show Excess Subdivision in Urban Areas —Mounting evidence of excess subdivision in metropolitan areas was cited by the American Society of Planning Offi-cials in three recent surveys of new land platting in Michigan,

cials in three recent surveys of new land platting in Michigan, New Jersey and New York.

The surveys, made by planning agencies within the past year, are being followed by studies now under way in several other States. While many localities are separately studying land subdivision, the Society said, the States are attempting to unify consideration of the problem.

The Michigan study revealed that an additional two million people could be accommodated in the subdivided and platted area adjacent to Detroit, while the city itself has enough vacant lots to accommodate an increase of a million people. In four of the 13 townships studied, only 5.4% of the residence lots had been used, and only 1.7% of business lots.

In the New Jersey survey, it was found that there were vacant lots sufficient to accommodate double the present 4,000,000 inhabitants of the State. More than two-thirds of the acreage had been subdivided since 1915.

The New York survey showed that in four of the seven metropolitan districts of the State, including New York City, 501,669 parcels of land were vacant and presumably unused. The heaviest concentration of yacant lots occurred, however, in the 31 suburban towns on which information was compiled.

In general, the surveys showed that many subdivisions were chopped into parcels convenient for speculative sale, with little regard for suitability to ultimate use and for the public interest, the Society said. The subdivisions usually had been laid out without the guidance of city or county

In general, the surveys showed that many subdivisions were chopped into parcels convenient for speculative sale, with little regard for suitability to ultimate use and for the public interest, the Society said. The subdivisions usually had been laid out without the guidance of city or county plans, and without concern for the costs of improvements and maintenance. Street and lot arrangements for most subdivisions were found to be on the old-fashioned gridiron plan, and little or no provision had been made for parks and playgrounds. In some cases the subdividing had strangled the development of higher grade residential areas.

In nearly every case, vacant lots in undeveloped subdivisions were shown to contribute a high percentage of tax delinquency. In the Detroit area, for example, 65% of all subdivision lots had been advertised in the 1938 tax sale, 78% of them being delinquent for five or more years. A 10-year moratorium on taxes in Michigan had failed to stop abandonment of land in subdivisions.

ARKANSAS, State of—SCHOOL DISTRICTS' SAVINGS UNDER REVOLVING LOAN FUND—Operation of the revolving loan fund in the 1938-39 fiscal year brought a saving to local school districts estimated at \$208,831.71 in the purchase of bonds and in the five years since the fund was established the total on principal is given at \$743,286.31 with \$2,000.000 additional as savings through refinancing and refunding, it is shown in a report by Commissioner of Education T. H. Alford.

The revolving loan fund in the past two years has received proceeds of the sale of \$1,490,000 of bonds. Assets also have been increased by allocations from income to the permanent school fund through the sale of lands and other sources.

cations from income to the permanent school fund through the sale of lands and other sources.

Local school districts to which revolving loans are granted pay 4½% compared with the former rate of 6%, and the Department of Education receives, to pay necessary costs, the difference between this rate and the rate at which its bonds are sold.

Commissioner Alford said that under the former plan, by which no restriction was placed on the marketing of bonds by local school districts, heavy obligations were incurred and adjustments have been necessary. The State at present limits school district bonded indebtedness to 7% of assessed valuations.

CALIFORNIA, State of—WARRANTS NOT SOLD—An issue o \$3.352,768.33 registered general fund warrants was offered on Sept. 12, but no bids were received. It is reported that they will be registered at a rate of 3%, and will be turned over to persons having claims. Dated Sept. 15, 1939. Due on or about Aug. 29, 1940.

In connection with the above report we quote herewith as follows from the "Wall Street Journal" of Sept. 14:

"The San Francisco Clearing House Association, together with representatives of Los Angeles bankers, met yesterday to consider what the position of the banks should be with respect to the State of California warrants should the State decide to register individual warrants in payment of employee salaries and relief payments.

"The conference failed to establish a unified plan for banks to follow, some banks holding that the State's financial condition is sound and that the warrants are a reasonable risk. Others stood flatly against acceptance of warrants under threat of the Nov. 7 special election on the "Ham and Egg" pension plan, and the State's present financial state.

"Best information now available is that some banks are planning to accept a limited amount of new warrants from their commercial customers with the customers' endorsement. Thus a department store may accept warrants from its customers and turn them in to banks bearing the store's guaranty. That some market will exist for individually registered warrants is seen in the announcement of Kaiser & Co., San Francisco dealers, that they are making a firm bid of 95 for warrants up to \$500,000 maximum.

"Registration of individual warrants is expected to start within the next 24 hours, with unemployment relief warrants probaoly the first to be issued.

"California on Sept. 4 had scheduled sale of \$2,000,000 warrants, for which no bids were received. Governor Culbert L. Olson then appealed to the Reconstruction Finance Corporation for purchase of the warrants. The Commission has not yet taken any action on the request. Jesse Jones, Feder

FRESNO COUNTY (P. O. Fresno) Calif.—NOTES OFFERED—ealed bids were received until 10 a. m. on Sept. 15, by E. Dusenberry,

County Clerk, for the purchase of an issue of \$1,100,000 of not exceeding 5% tax anticipation notes. Denom. \$100,000. Due on Dec. 31, 1939.

#### INDIANA

INDIANAPOLIS SCHOOL CITY, Ind.—WARRANT OFFERING—A. B. Good, Business Director of Board of School Commissioners, will receive sealed bids until 8 p.m. on Sept. 26 for the purchase of \$300,000 not to exceed 6% interest temporary loan warrants. Dated Oct. 2, 1939. Due Dec. 30, 1939. Payable at office of Treasurer of Board of Commissioners. The loan shall be evidenced by time warrants of the Board and be paid only out of the proceeds to be collected in 1939 of the Board's tax levy, for the benefit of its special fund, made in 1938, to which payment the Board has by its said action pledged and appropriated the necessary amount of such proceeds. The warrants are to be issued in pursuance of the Statutes of Indiana of 1917 (Session Laws 1917, Page 184), as amended by the Statute of 1933 (Session Laws 1933, Page 1160), having to do with the borrowing of money by school corporations on time warrants in anticipation of the collection of taxes already levied, and pursuant to the Statute of 1931 (Ac's 1931, Page 219) creating the Board and defining its powers. The loan shall be consummated and the money received by the Board not later than noon, Oct. 2.

Daleville), Ind.— PRICE PAID—The \$7,000 impt. bonds awarded to the Merchants National Bank of Muncie—V. 149, p. 1646—were sold as 33/s at a price of 100.357, a basis of about 3.40%. Dated Sept. 1, 1939, and due as follows: \$500 July 1, 1940; \$500 Jan. 1 and July 1 from 1941 to 1946, incl., and \$500 Jan. 1, 1947.

#### IOWA

ADEL, lowa—BONDS OFFERED—It is reported that bids were received until Sept. 12, by the Town Clerk, for the purchase of \$7,700 funding bonds.

ADEL, lowa—BONDS SOLD—It is stated by Ray McNichols, Town Clerk, that \$7,700 funding bonds were offered on Sept. 12 and were awarded to Jackley & Co. of Des Moines.

ALLISON, Iowa—BOND SALE—The \$4,500 (not \$8,000) coupon special assessment sewer bonds offered for sale on Sept. 11—V. 149, p. 1646—were purchased by the State Bank of Allison, as 4s, paying a premium of \$25, equal to 100.55, according to W. C. Shepard, Town Clerk. Denominations \$500 and \$400. Dated Oct. 1, 1939. Due from June 1, 1940 to 1949 incl. Interest payable J-D.

BELLEVUE, Iowa—BOND OFFERING—Sealed bids will be received until 7:30 p. m. on Sept. 20, by the Town Treasurer, for the purchases of the following bonds aggregating \$17,095.68:

\$9,345.68 5% town bonds. Dated May 19, 1939. Due May 1, as follows?

\$900 in 1940 to 1945, \$1,000 in 1946 to 1948, and \$945.68 in 1949. Principal and interest payable at the City Treasurer's office. The town will furnish the bonds.

7,750.00 street improvement fund bonds. The bonds are issued in anticipation of the collection of annual taxes for each of the years 1939 to 1950, to be levied by the Town Council and duly certified, for the purpose of paying the cost of construction of street improvements of the town.

cerror Gordo County (P. O. Mason City) Iowa—BOND OFFER-ING—It is stated that both sealed and open bids will be received until Oct. 2, at 10 a. m., by L. L. Raymond, County Treasurer, for the purchase of \$65,000 coupon funding bonds. Dated Oct. 1, 1939. Due \$10,000 May and Nov. 1, 1941 and 1942, and \$10,000 May and \$15,000 Nov. 1, 1943. Prin. and int. (M-N) payable at the County Treasurer's office. Bidders should specify the rate of interest, but no award will be made on any bid of less than par and accrued interest. All other things being equal, preference will be given to the bid of par and accrued interest or better which specifies the lowest coupon interest rate. The county will furnish the approving opinion of Chapman & Cutler of Chicago. Enclose a certified check for 2% of the principal amount of bid.

DAVENPORT, Iowa—BONDS SOLD—It is now stated by C. F. Schmidt, City Treasurer, that the \$48,000 coupon general obligation corporate bonds offered for sale on Sept. 6, when all bids were rejected, as noted here—V. 149, p. 1646—have been purchased by the First Galesburg National Bank & Trust Co. of Galesburg, Ill., as 2½s, paying a premium of \$175, equal to 100.364, a basis of about 2.71%. Due on March 1 in 1950 and 1951.

The purchaser agreed to pay the coats of printing and segistaring the

and 1951.

The purchaser agreed to pay the costs of printing and registering the bonds, and to furnish the legal opinion.

bonds, and to furnish the legal opinion.

DES MOINES, Iowa—BOND SALE POSTPONED—We are informed by Harvey Bogenrief, City Treasurer, that the sale of the following bonds aggregating \$249,000, which was scheduled for Sept. 11—V. 149, p. 1646—has been postponed for an indefinite period:
\$107,000 bridge fund bonds. Due Feb. 1, as follows: \$3,000 in 1942 and 1943, \$23,000: in 1944, \$20,000 in 1946 and 1947, and \$19,000 in 1948 and 1949. Issued against a one-mill levy authorized by Section 6209, Paragraph I, Code of Iowa, 1935.

142,000 emergency fund bonds. Due Feb. 1, as follows: \$47,000 in 1942 and 1943 and \$48,000 in 1944. Issued against a one-mill annual tax levy by Section 373, Code of Iowa, 1935, under authorizy of Chapter 53, Laws of the 48th General Assembly. This law authorized the city to issue bonds in anticipation of the taxes levied during the years 1939 to 1942, inclusive, under the Emergency Fund one-mill levy. There is no existing pledge against this levy.

gency Fund one-mill levy. There is a superstanding superst

at the City Preasurer's office.

The Chicago "Journal of Commerce" of Sept. 11 reported on the postponement as follows:

"Sale of a new issue of \$249,000 in bonds by the City of Des Moines,
scheduled for today, has been postponed as a result of a suit instituted
in the district court at Des Moines. The suit, flied by Gregory Brunk,
Des Moines attorney, contended that the city has exceeded its constitutional debt limit. Legal question involved is whether limited tax bonds
should be included with general tax levy bonds in determining the total
bonded indebtedness. If the limited tax bonds are included, the city is
said to be above its constitutional debt limit. The bonds were to be
issued to finance work relief projects."

pes Moines, Iowa—Bond offering the doors in the folials were to be issued to finance work relief projects."

DES Moines, Iowa—Bond offering doors in 1940 to 1940 to 1940.

Detail 10 a. m. on Sept. 18, by Harvey Bogenrief, City Treasurer, for the Oct. 1, 1939. Due on Oct. 1 as follows: \$3,000 in 1940 to 1943, and 1945 to 1951, and \$7,000 in 1952. Prin. and int. (A-O) payable at the office of the City Treasurer.

It is stated in the offering notice that all other things being equal, preference will be given to the bid of par and accrued interest or better which specifies, the lowest coupon interest rate. Prin. and int. (A-O) payable at the City Treasurer soffice. The bonds are issued against a three-eighths of one mill levy authorized by Section 6211, par. 8, Code of lowa, 1935, which millage rate under present real estate valuations will raise annually \$49,950. The surplus of available levy over bond requirements is in no year less than \$20,000, and is increasingly greater during later years. Code Section 6261 authorizes the issuance of bonds under this levy. The tax authorized for property within the city. The maximum millage rate mentioned above amounts only to a restriction upon the amount of bonds which can be issued

at any one time. Code Section 1179-c1. The annual debt service requirements for the complete issue are certified to the county tax collection officials and the taxes therefor are levied, prior to the time at which the bonds are issued. Code Section 1179-b2. The county officials are required thereafter to each year spread the taxes upon the tax lists according to the actual requirements of the bond issue. A municipal budget law enacted recently by the State Legislature provides for the levying of taxes in an amount exceeding by 1-19th the annual requirements. This is applied to all funds. Including bond funds, and provides a 5% cushion fund for losses in tax collections. Issuance of the bonds is subject to the approving opinion of Stipp, Perry, Bannister & Starzinger of Des Moines. All costs of issuance and of approving opinion will be paid by the city. Enclose a certified check for \$1,000.

MASON CITY, Iowa—BOND ISSUANCE NOT SCHEDULED—We are informed by the City Clerk that, contrary to recent reports, the city loes not intend to issue any municipal light plant remodeling bonds, insmuch as the city does not own a municipal light plant.

NEW HAMPTON, Iowa—BOND OFFERING—Sealed and open bids will be received until Sept. 18, at 8 p. m.. by Alvah Griffith, City Clerk, for tha purchase of an issue of \$178.000 electric revenue bonds. Dated Oct. 1, 1939. Due \$5,000 on Oct. 1, 1941 and on April and Oct. 1, 1942 to 1957, and \$5,000 on April and \$8,000 on Oct. 1, 1958. All or any part of the bonds shall be subject to call for redemption and payment before maturity on April 1, 1945, and on any interest payment date thereafter at the price of par value plus accrued interest by giving 30 days notice thereof by registered mail to the registered holders of the bonds, or in case any of the bonds are not registered, by giving notice by registered mail date shown by the City Treasurer's records, and by publication once of notice of redemption in a newspaper of general circulation in the State, said publication to be made at least 30 days prior to the date of redemption. All bids shall specify the rate of interest bid upon, and, other things being equal, the bid of par and accrued interest or bettar, for the lowest rate of interest bid upon, will be given preference. Prin. and int. (A-O) payable at the City Treasurer's office. These bonds are not general obligations of the city, but are payable solely and only out of the net earnings of the municipal electric light and power plant of the city and the obligation of the bonds shall be a first lien on the net earnings of the entire plant and on the improvements, to pay for which these bonds are being issued. The bonds will be sold subject to the opinion, as to their legality, of Stipp, Perry, Bannister & Starzinger of Des Moines, which opinion will be furnished with the bonds. Enclose a certified check for 5% of the principal amount of the bonds.

OELWEIN SCHOOL DISTRICT (P. O. Oelwein), lowa—BOND OFFERING—It is stated by M. G. Stebbins, School Director, that he will receive bids until 1:30 p.m. on Sept. 22, for the purchase of the following coupon bonds aggregating \$100,000: \$65,000 high school remodeling, and \$35,000 grade school construction bonds. Dated Oct. 1, 1939. Denom. \$1,000. Due Oct. 1 as follows: \$9,000 in 1944 to 1953, and \$10,000 in 1954. Bidder to name rate of interest. Prin. and int. (A. & O.) payable in Oelwein. These are the bonds authorized at the election held on June 6, by a vote of 510 to 288. The approving opinion of Chapman & Cutler of Chicago, will be furnished. Enclose a certified check for 3% of bid.

SLOAN CONSOLIDATED SCHOOL DISTRICT (P. O. Sloan), lowa—BOND SALE—We are informed by A. L. Calderhead, District Secretary, that the \$32,000 (not \$30,000) coupon school bonds offered for sale on Sept. 7—V. 149, p. 1505—were awarded to the Carleton D. Beh Co. of Des Moines, as 3½s, paying a premium of \$55, equal to 100.1718. Other bids were as follows:

Names of Other Bidders—	Price Bid

Veith, Duncan & Wood	plus \$240
W. D. Hanna Co	plus \$230
Wachob-Bender Co	plus \$175
Jackley & Co	plus \$100
Polk, Peterson & Co.       49         Veith, Duncan & Wood       46         W. D. Hanna Co.       46         Wachob-Bender Co.       46         Jackley & Co.       46         Ballard, Hassett & Co.       46	plus \$85

SWEA CITY CONSOLIDATED SCHOOL DISTRICT (P. O. Swea City), lowa—BOND SALE—The \$30,000 issue of school building bonds offered for sale on Sept. 8—V. 149; p. 1646—were awarded to the Carleton D. Beh Co., and Shaw, McDermott & Sparks, both of Des Moines, jointly, as 3s, paying par.

Coupon bonds, dated Sept. 1, 1939. Due on Nov. 1 as follows: \$1,000 in 1942 to 1944 \$4,000, 1945 to 1950, and \$3,000 in 1951. Interest payable M-N.

#### KANSAS

STERLING, Kan.—BOND ELECTION—It is reported that an election will be held on Sept. 19 in order to vote on the issuance of \$198,000 in power plant rebuilding bonds.

#### KENTUCKY

KENTUCKY, State of—CHAIN TAX MONIES ORDERED RE FUNDED—An Associated Press dispatch out of Frankfort on Sept. 13 stated that formal order for the State to refund to the Great Atlantic & Pacific Tea Co. the \$102,004 chain store tax it paid under a law since invalidated, plus costs and 6% interest, was entered in Circuit Court on that date. The company paid the tax under protest and won a suit last spring when the Court of Appeals declared the Act "unreasonable and arbitrary."

LOUISVILLE, Ky.—BOND PROPOSAL REJECTED—It is reported that the Mayor has turned down a proposal that the city issue \$2,500,000 in flood wall bonds.

#### LOUISIANA

DE QUINCY, La.—BOND OFFERING—It is stated by Frank H. Moxom, Town Clerk, that he will receive sealed bids until 10 a.m. on Oct. 18, for the purchase of a \$265,000 issue of water and light plant revenue bonds. Interest rate is not to exceed 6%, payable A-O. Denom. \$500. Dated Oct. 1, 1939. Due Oct. 1, 1942 to 1959. The town may call all or any part of the bonds in the inverse order of their maturities on Oct. 1 of any year after the year 1943 at a price of \$1.05 on the dollar of the face value plus the accrued interest to call date upon publication of a call notice in a newspaper published in New Orleans and in a financial journal published in New York City in at least one issue thereof not less than 30 days prior to call date. These bonds were authorized at an election held on Sept. 28, 1938. The approving opinion of B. A. Campbell of New Orleans, and the transcript of record as passed upon will be furnished the purchaser. Enclose a certified check for \$5,500, payable to the town.

HAUGHTON SCHOOL DISTRICT (P. O. Benton). La.—BOND

HAUGHTON SCHOOL DISTRICT (P. O. Benton), La.—BOND ELECTION—It is reported that an election will be held on Oct. 3 in order to vote on the issuance on \$85,000 in construction bonds.

LIVINGSTON PARISH (P. O. Springville), La.—BONDS NOT SOLD—It is stated by the Secretary of the Police Jury that the \$100.000 not to exceed 6% semi-annual court house and jail bonds offered on Sept. 13—V. 149, p. 1357—were not sold as no bids were received. Dated Oct. 1, 1937. Due serially in from 1 to 25 years.

LOUISIANA, State of BOND OFFERING—It is reported by F. Warren Raggio, Chairman of the State Highway Commission, that he will receive sealed bids until 11 a. m. (CST), on Oct. 18, for the purchase of an issue of \$1,000,000 not to exceed 4% semi-annual highway, series X coupon or registered bonds. Due on June 15 as follows: \$20,000 in 1943 and 1944, \$10,000 in 1945 to 1948, \$3,000 in 1949 and 1950, \$40,000 in 1951, \$60,000 in 1952 to 1956, \$95,000 in 1957, \$130,000 in 1958, \$150,000 in 1959, \$155,000 in 1959, \$155,000 in 1959, \$155,000 in 1959, \$155,001 in 1959, \$15

specifically pledged for the retirement of said bonds should prove insufficient, then the State Treasurer is directed and authorized by Act 66 of the Regular Session of Legislature of 1936 to use such other revenues of State Highway Commission as may be necessary to pay said and bonds and interest thereon. In addition to the above, the full faith and credit of the State are irrevocably pledged for the amount of the principal and interest on said bonds at maturity. Enclose a certified check for \$10,000, payable to the State Highway Commission.

Dated June 15, 1939. Denom. \$1,000. Prin. and int. payable in lawful money at the State's fiscal agency in the city of New York, or at the State Treasurer's office. The bonds will be awarded to the bidder offering to pay not less than par and accrued interest and to take the bonds at the lowest interest cost to the State. The amount of any premium offered will be deducted from the total amount of interest to be paid by the State at the rate or rates of interest specified in the bid, in determining the best bid. submitted. No bid for less than the entire issue will be considered, and no bidder will be allowed to designate more than three coupon rates. There is no controversy pending or threatening the title of present officials to their respective offices or the validity of these bonds. All bidders must agree to accept delivery of the bonds in Baton Rough and to pay the purchase price thereof not later than Aug. 9, 1939, upon tender of the bonds by the State together with the opinion of Thomson, Wood & Hoffman of New York approving the validity of the bonds.

ST. LANDRY PARISH SCHOOL DISTRICT NO 5 OF THE FOURTH POLICY JURY WARD (P. O. Opelousas), La.—BOND OFFERING—It is stated by W. B. Prescott, Secretary of the Parish School Board, that he will receive sealed bids until 11 a. m. on Oct. 10, for the purchase of a \$40,000 issue of school bonds. Interest rate is not to exceed 6%, payable A-O—Dated Oct. 1, 1939. Denom. \$500. Due Oct. 1, 1940 to 1954. These bonds were authorized at an election held on Sept. 5. The approving opinion of B. A. Campbell of New Orleans and a transcript of record as passed upon will be furnished the purchaser. Enclose a certified check for \$800, payable to the Treasurer Parish School Board.

#### MAINE

MAINE (State of)—BONDS DEFEATED—The voters on Sept. 11 decisively defeated the proposed issuance of \$9,000,000 highway and bridge construction bonds.—V. 149, p. 1646.

#### MASSACHUSETTS

BOSTON, Mass.—REDUCES TAX RATE—The 1939 tax rate has been reduced to \$39.90, or \$1.40, under the 1938 figure, according to the Civic Bureau of the Boston Chamber of Commerce. The property tax levy for the year 1939 is \$60,839,759.40, as compared with \$64,031,829.75 for last year. Assessed valuation is \$1,524,806,000, a reduction of \$25,601,500 from the \$1,550,407,500 valuation for 1938.

Bonds will be issued in coupon form with privilege of registration as to principal. Prin. and int. (A-O) payable in Boston or at the City Treasury. Coupon bonds exchangeable for fully registered certificates, interest on which is payable at City Treasurer's office. Bonds will be engraved under supervision of and authenticated as to genuineness by the First National Bank of Boston. Legal opinion of Ropes, Gray, Boyden & Perkins of Boston will be furnished the cuccessful bidder.

#### MICHIGAN

BIRMINGHAM, Mich.—BONDS SOLD—The \$217,340 series B-1 refunding bonds offered Sept. 11—V. 148, p. 3564—were awarded to Watling, Lerchen & Co. and Martin, Smith & Co., both of Detroit, jointly, on a bid of par for interest 2½% to Oct. 1, 1939; 3½% to Oct. 1, 1945 and 4% to final maturity. Dated July 1, 1939 and due Oct. 1 as follows: \$4,340, 1940; \$5,000, 1941 to 1943 incl.; \$6,000, 1944 to 1946 incl.; \$7,000, 1947 to 1949 incl.; \$8,000, 1950 to 1952 incl.; \$9,000, 1953 and 1954; \$10,000, 1955 and 1956; \$11,000, 1957 and 1958; \$12,000, 1959 to 1961 incl. and \$13,000 from 1962 to 1964 incl.

BOYNE CITY, Mich.—BOND OFFERING—Cecil Ormsby, City Clerk will receive sealed bids until 8 p. m. (EST) on Sept. 18 for the purchase of \$76,000 refunding bonds. Dated Sept. 15, 1939. Coupon in \$1,000 de nomination. Due Sept. 15 as follows: \$2,000 from 1940 to 1952. incl. \$3,000 from 1953 to 1962, incl., and \$4,000 from 1963 to 1967, incl. Rate

or rates of interest to be expressed in a multiple of  $\frac{1}{2}$  of  $\frac{1}{2}$ . Prin. and int. (M-S 15) payable at office of a paying agent to be agreed upon between the purchaser and the city. The bonds are payable from unlimited ad valorem taxes. A certified check for  $\frac{2}{2}$  of bonds bid for, payable to order of City Treasurer, must accompany each proposal. Bids will be conditioned upon the unqualified opinion of the purchaser's attorney, approving legality of the bonds. Successful bidder to pay cost of legal opinion and printing of bonds.

MICHIGAN (State of)—PROPOSED REFUNDING BY STATE AND CITY OF DETROIT, MAY BE DEFERRED—Higher interest rates and unsettlement in the market for municipal and State bonds will result in postponement of Detroit's \$120,000,000 refunding program and delay in iquidation by the State of Michigan of its bonds held in sinking fund, according to report. Sale of State sinking fund bonds had been planned to raise cash in anticipation of maturity of about one-half of the State's bonded indebtedness by the end of the 1940-41 fiscal year.—V. 148, p. 2466.

Since the first of the year Detroit has taken advantage of the strong market for municipal bonds by solling two issues of serial refunding bonds. The first issue amounted to \$3,999,000 and the second to \$6,922,000.

The refunding program had been intended to level out the curve of the city's debt charges which due to an earlier refunding program undertaken in 1935, would run between \$19,000,000 and \$20,000,000 from the fiscal year 1944-45 through 1952-53. For the present fiscal year debt service is about \$14,000,000.

Postponement of plans of the State of Michigan to liquidate its sinking fund portfolio in anticipation of maturities of \$40,469,000 Michigan bonds by the end of the 1940-41 fiscal year and additional maturities of \$31,950,000 over the following three years, also is in prospect. State Treasurer Miller Dunckel has been gradually selling State sinking fund holdings of municipal bonds over the past four months but current softness of municipal bond market will cause indefinite suspension of such sales, it is believed.

MONROE COUNTY (P. O. Monroe), Mich.—TENDERS WANTED—F. E. Gillespie, Clerk of the Board of County Road Commissioners, will receive scaled tenders of highway refunding bonds dated March 1, 1939, until 11 a. m. (EST) on Sept. 25. Tenders must fully describe the bonds and the price, not more than par, at which the securities will be sold to the sinking fund. The bonds total \$143,000 and are described as follows:

Road				Road

OAKLAND COUNTY (P. O. Pontiac), Mich.—BONDS NOT SOLD—No bids were received at the Sept. 13 offering of \$709,000 coupon highway improvement refunding bonds, detailed description of which appeared in V. 149, p. 1507.

ISSUE REOFFERED—Lee O. Brooks, Chairman of Board of County Road Commissioners, announces that the above issue will be reoffered for sale on Sept. 27.

ROYAL OAK, Mich.—BONDS NOT SOLD—No bids were submitted for the \$392,000 3½% waterworks mortgage refunding bonds offered on Sept. 11—V. 149, p. 1647. Dated Sept. 1, 1939 and due semi-annually on March 1 and Sept. 1 from 1941 to 1957 incl.

ROYAL OAK AND TROY TOWNSHIPS FRACTIONAL SCHOOL DISTRICT NO. 11 (P. O. Clawson), Mich.—TENDERS WANTED—Lyle Baker, District Secretary, will receive sealed tenders of 1937 certificates of indebtedness, dated Oct. 1, 1937, and due Oct. 1, 1947, until 8 p. m. on Oct. 13. About \$5,000 is available toward purchase of certificates, being non-interest-bearing prior to maturity. They were originally issued in amount of \$45,043.54, of which \$7,993.77 were purchased from tenders on March 8, 1939, at an average price of 55.04. Tenders must fully describe the certificates offered.

STURGIS, Mich.—BOND SALE DETAILS—The \$40,000 general obligation municipal building bonds awarded to Paine, Webber & Co. of Chicago—V. 149, p. 1647—were sold as 2¼s, at a price of 100.176, a basis of about 2.71%. Dated June 1, 1939 and due \$5,000 on Sept. 1 from 1940 to 1947 incl.

VERNON TOWNSHIP SCHOOL DISTRICT NO. 7 (P. O. Durand), Mich.—TENDERS WANTED—Robert Kerr Jr., District Secretary, will receive sealed tenders of series C refunded bonds of 1937, dated Nov. 1, 1937, until 8 p. m. on Sept. 26. Offering should be firm for five days and should be plainly marked on outside of sealed envelope. Tenders should describe securities offered, giving series number and should state the sum for which the bond with the Nov. 1, 1939, and subsequent coupons attached will be sold to the district.

WYOMING TOWNSHIP, Mich.—SEWER DISTRICT BONDS CALLED FOR PAYMENT—Clyde Bulliment, Township Treasurer, announces that \$22,000 Galewood, Urbandale, Burlingame special asst. sanitary sewer district bonds dated April 15, 1939, in \$1,000 denoms, and due serially on April 1 from 1941 to 1944, incl., have been called for payment on Oct. 15, 1939, at par and interest. Bonds should be presented for prepayment at the office of the Township Treasurer.

BONDS SOLD—Of the \$99,000 special assessment sewer bonds of the above-mentioned district for which no bids were received on April 10—V. 148, p. 2307—a total of \$80,000 were subsequently sold to Stifel, Nicolaus & Co. of Chicago. Township retained balance of the issue.

#### MINNESOTA

EDINA JOINT SEWER DISTRICT NO. 1 (P. O. Minneapolis), Minn.—WARRANT SALE—The \$65,000 issue of sewer warrants offered for sale on Sept. 8—V. 149, p. 1507—was awarded to a group headed by the First National Bank & Trust Co. of Minneapolis, as 3s, paying a premium of \$601, equal to 100.924, a basis of about 2.83%. Dated Sept. 1, 1939. Due on Jan. 1 in 1941 to 1950 incl.

ST. LOUIS PARK, Minn.—CERTIFICATE SALE—The \$2,587 certificates of indebtedness offered on Sept. 11—V. 149, p. 1507—were purchased by the W. G. Schanke Co. of Minneapolis, according to the Village Recorder. Due on Dec. 15 in 1940 to 1942.

WAVERLY, Minn.—BONDS SOLD TO STATE—The Village Recorder ports that the following 3% bonds aggregating \$24,000, approved by the voters in September, 1938, have been purchase municipal building, and \$10,000 refunding bonds. ed by the State:

#### MISSISSIPPI

CARROLL COUNTY (P. O. Carrollton), Miss.—BOND SALE DETAILS—It is stated by the Clerk of the Chancery Court that the \$8,000 5% semi-annual funding bonds sold to J. G. Hickman & Co., Inc., of Vicksburg, as noted here—V. 149, p. 1507—were purchased at a price of 108.57, and mature \$500 on April 1 in 1940 to 1955, giving a basis of about \$2.51%

GULFPORT, Miss.—BONDS SOLD TO RFC—It is stated by Ivan Ballenger, City Clerk, that the Reconstruction Finance Corporation has purchased \$300,000 harbor improvement bonds.

HUMPHREYS COUNTY (P. O. Belzoni) Miss.—BOND TENDERS INVITED—It is stated by A. A. Gore, Clerk of the Board of Supervisors, that he will receive sealed tenders until Dec. 4, at 10 a. m., of 4% refunding bonds. The sum of \$50,000 is said to be available for the purchase of such bonds, but the Board will only consider bids at par or below par, no bids above par to be entertained.

LAUDERDALE COUNTY (P. O. Meridian), Miss.—BOND ISSU-UANCE HELD UP.—In connection with the \$65,000 county bonds offered for sale without success on Jan. 2, it is now stated by Howard Cameron, Clerk of the Chancery Court, that the Board of Supervisors cannot issue these bonds until a certificate of approval is received from a governmental agency stating that the Government will spend over \$1,000,000 on the pro-posed lake and fish hatchery.

PASCAGOULA, Miss.—CONFIRMATION OF ELECTION—City Attorney Ford confirms the report given in our issue of Sept. 2 that an election will be held on Sept. 25 in order to vote on the issuance of \$360,000 in gas system bonds.

POPULARVILLE, Miss.—BOND SALE DETAILS—It is reported by the Town Clerk that the \$20,000 street improvement bonds sold jointly to M. A. Saunders & Co. of Memohis, and the Bank of Commerce of Poplarville, as noted here—V. 149, p. 1212—were purchased at par, as follows: \$13,000 as 3 1/4s, due \$1,000 in 1940 to 1952, the remaining \$7,000 as 3s, due \$1,000 in 1953 to 1959.

#### MISSOURI

COMBS TOWNSHIP (P. O. Miami Station), Mo.—BOND ELECTION—An election is said to be slated for Sept. 23 in order to have the voters pass on the issuance of \$50,000 in road improvement bonds.

CROCKER, Mo.—BONDS SOLD—It is stated by the City Clerk that the following 4% bonds aggregating \$29,000, approved by the voters last December, have been purchased by the Commerce Trust Co. of Kansas City: \$15,000 water works, and \$14,000 sanitary sewer bonds.

FARMINGTON, Mo.—BONDS VOTED—It is said that the voters approved recently the issuance of \$14,800 in school construction bonds.

approved recently the issuance of \$14,800 in school construction bonds.

SOUTHWEST-WEBSTER SEWER DISTRICT (P. O. Webster Groves) Mo.—BOND OFFERING—It is reported by C. R. Studer, Secretary of the Board of Trustees, that he will receive sealed bids until 8 p. m. on Sept. 26, for the purchase of a \$19,000 issue of sewer bonds. Denom. \$500. Dated Oct. 1, 1939. Due April 1, as follows: \$500 in 1942 to 1947, \$1,000 in 1948 to 1953, \$1,500 in 1954 to 1957, and \$2,000 in 1958 and 1959. Bidders are requested to designate in their bids the rate of interest to be paid on the bonds; provided, however, that the interest rate thus designated shall be an even multiple of ¼ of 1%, and all of the bonds shall bear interest at the same rate. Prin. and int. (A-O) payable at a place to be designated by the bidder and approved by the Board of Trustees. No bid at less than par and accrued interest will be accepted. These bonds were authorized at an election held on June 6, by a vote of 129 to 1. The district will furnish the legal opinion of Charles & Trauernicht, of St. Louis, and will pay for the printing of the bonds and the registration fee at the State Auditor's office. Enclose a certified check for \$400, payable to the district.

NYACK, N. Y.—BOND SALE—The \$7,000 coupon or registered water bonds offered Sept. 14—V. 149, p. 1648—were awarded to the First National Bank & Trust Co. of Pearl River, as 4s, at a price of 100.07, a basis of about 3.97%. Dated Aug. 15, 1939 and due Aug. 15 as follows: \$2,000 from 1940 to 1942 incl. and \$1,000 in 1943. Only one bid was received.

from 1940 to 1942 incl. and \$1,000 in 1943. Only one bid was received.

ROCHESTER, N. Y.—BORROWING NECESSARY TO MEET INCREASED RELIEF COSTS—Rising welfare costs will mean additional
borrowing of from \$500,000 to \$750,000 this year, city officials announced.
The new welfare needs will supplement borrowing of \$1,915,900 already
undertaken by the city for relief financing this year.

Comptroller Louis B. Cartright said a note issue probably would be sold
rather than a bond issue with the notes to be refunded next year. The
notes would run for seven or eight months. The last city note sale brought
an extraordinarily low interest rate of less than one-half of 1%, but due to
present war conditions abroad city officials fear that the interest rate will
be materially higher on the planned issue.

City Manager Baker's 1939 budget contemplated only the \$1.915,900
borrowing for welfare this year, but costs have been running far over
estimates. In a recent statement Mr. Baker said that such costs were about
\$500,000 over estimates up to mid-August. For general and veterans'
home relief Mr. Baker allowed \$4,715,000 in the 1939 budget. Gross welfare
costs, not including veterans, were \$3,009,568 up to Sept. 1, according to
the city Welfare Department. Veterans' costs have been running about
17% of home relief costs. This would make the total so far this year approximately \$3.521,000. Borrowing for welfare in 1938 reached a total of
\$1.865,000, so that this year's borrowing will run at least \$550.000 over the
1938 figures.

Rochester tax returns on the 1939 levy, up to Sept. 1, amounted to \$15,530,105, leaving \$2.080,984 of the levy of \$17,611,080 etcli.

Rochester tax returns on the 1939 levy, up to Sept. 1, amounted to \$15,-530,105, leaving \$2,080,984 of the levy of \$17,611,089 still to be collected. Collections for the first eight months of this year were \$59,000 greater than in the corresponding period a year ago, and the uncollected balance this year compares with \$2,518,136 on Sept. 1, 1938.

Delinquent tax collections this year, up to July 31, the last date for which figures are available, were \$994,301 greater than for the same period last year.

ROCHESTER, N. Y.—BOND OFFERING—L. B. Cartwright, City Comptroller, will receive sealed bids until 11 a. m. (DST) on Sept. 21 for the purchase of \$1,595,000 not to exceed 4% interest coupon or registered bonds, divided as follows:

bonds, divided as follows:
\$1,500,000 tax revenue bonds. Due Oct. I as follows: \$400,000 in 1940;
\$350,000 in 1941 and \$250,000 from 1942 to 1944 incl.
95,000 school bonds. Due Oct. I as follows: \$10,000 from 1940 to
1947 incl. and \$15,000 in 1948.
All of the bonds will be dated Oct. I, 1939. Denom. \$1,000. Bidder to
name a single rate of interest, expressed in a multiple of ¼ or 1-10th of 1%.
Principal and interest (A-O) payable at the paying agent of the City of
Rochester in New York City. The bonds are payable from unlimited ad
valorem taxes and the approving legal opinion of Reed, Hoyt, Washburn
& Clay of New York City will be furnished the successful bidder. A certified
check for 2% of the bonds bid for, payable to order of the City Comptroller,
must accompany each proposal.

SARATOGA COUNTY (P. O. Saratoga), N. Y.—BOND OFFERING

SARATOGA COUNTY (P. O. Saratoga), N. Y.—BOND OFFERING—Arthur I. Bumstead, County Treasurer, will receive sealed bids until 11 a.m. (DST) on Sept. 21 for the purchase of \$60,000 not to exceed 4% interest coupon or registered series of 1939 highway bonds. Dated Sept. 1, 1939. Denom. \$1,000. Due \$6,000 on Sept. 1 from 1940 to 1949 incl. Bidder to name a single rate of interest, expressed in a multiple of ¼ or 1%. Principal and interest (M-S) payable at the Saratoga National Bank, Saratoga Springs, with New York exchange, or at the holders option at the Chase National Bank of New York City. The bonds are general obligations of the county, payable from unlimited taxes. A certified check for \$1,200, payable to order of the County Treasurer, must accompany each proposal. Legal opinion of Dillon, Vandewater & Moore of New York City will be furnished the successful bidder.

UTICA, N. Y.—ACCORDED HIGH CREDIT RATING—Prospects for a continued improvement in the finances of the City together with existing favorable factors. warrant a high credit rating for the city's obligations, according to a study by Lazard Freres & Co., New York City.

"In our opinion," the investment concern said, "the financial situation in Utica is sound, especially in its long-term outlook. Tax anticipation

borrowing is restored to each year and the city continues to borrow against delinquent taxes and for relief purposes.

"The delinquent tax debt has declined since 1936, however, and the expansion in the relief debt is now small and is being more than offset by a reduction in other categories of obligations. Consequently the debt trend has been downward since 1935. The tax rate is rather high but tax collections remain fairly satisfactory."

#### NORTH CAROLINA

DAVIDSON COUNTY (P. O. Lexington), N. C.—NOTES SOLD—A \$50,000 issue of revenue notes is reported to have been purchased by the Security National Bank of Raleigh, at 6%, plus a premium of \$626.28.

KINGS MOUNTAIN, N. C.—BOND SALE—The three issues of coupon smi-annual bonds, aggregating \$35,000, offered for sale on Sept. 12—V. 149. p. 1648—were awarded to R. S. Dickson & Co. of Charlotte, as follows:

\$10,000 water and sewer bonds as 5¼s at par. Due on March 1 in 1942 to to 1948, inclusive.
6,000 refunding school bonds at par, divided: \$2,000 as 5¼s, due on March 1, 1949, and \$4,000 as 5s, due \$2,000 on March 1, 1950 and 1951.

and 1951.

19,000 general refunding bonds at a price of 100.019, a net interest cost of about 5.17% on the bonds divided: \$15,000 as 5%s, due on March 1 as follows: \$1,000 in 1942, and \$2,000 in 1943 to 1949; the remaining \$4,000 as 5s, due \$2,000 on March 1 in 1950 and 1951.

MOORESVILLE, N. C.—BOND OFFERING—Sealed bids will be received until 11 a.m. (EST) on Sept. 19, by W. E. Easterling, Secretary of the Local Government Commission, at his office in Raleigh, for the purchase of \$11,000 refunding bonds, dated Oct. 1, 1939 and maturing \$7,000 April 1, 1944 and \$4,000 April 1, 1953, without option of prior payment. There will be no auction. Denom. \$1,000, coupon bonds registerable as to principle alone; prin. and int. (A-O). payable in legal tender in New York City; general obligations; unlimited tax; delivery on or about Oct. 9, at place of purchaser's choice.

Bidders are requested to name the interest rate or rates, not exceeding 6% per annum in multiples of ½ of 1%. Each bid may name one rate for part of the bonds (having the earliest maturities), and another rate for the balance, but no bid may name more than two rates, and each bidder must specify in his bid the amount of bonds of each rate. The bonds will be awarded to the bidder offering to purchase the bonds at the lowest interest cost to the town, such cost to be determined by deducting the total amount of the premium bid from the aggregate amount of interest upon all of the bonds until their respective maturities. No bid of less than par and accrued interest will be entertained. Bids are required on forms to be furnished with additional information and each bid must be accompanied by a certified check upon an incorporated bank or trust company, payable unconditionally to the order of the State Treasurer for \$220. The approving opinion of Masslich and Mitchell, New York City, will be furnished the purchaser.

NORTH CAROLINA, State of—Local Bond Issues Approved—
The following issues of bonds are said to have been approved by the Local
Government Commission on Sept. 5:
\$7.000 Pinetops School District refunding bonds.
40.000 Harnett County school refunding bonds.
170,000 Raleigh refunding bonds.
11,000 Mooresville refunding bonds.
13,000 Forest City refunding bonds.

PASQUOTANK COUNTY (P. O. Elizabeth City) N. C.—BOND ELECTION—It is reported that an election has been called for Oct. 7 to vote on the issuance of \$160,000 in grammar school bonds.

SILER CITY, N. C.—BOND SALE—The \$12,000 sanitary sewer bonds offered for sale on Sept. 12—V. 149. p. 1648—were purchased by the Chatham Bank of Siler City, as 6s at par. Dated Sept. 1, 1939. Due on March 1 in 1941 to 1947 incl. No other bid was received.

WILMINGTON, N. C.—BOND ELECT ON—It is stated by the City Clerk that an election has been called for Oct. 24 in order to have the voters pass on the issuance of \$177,000 in bonds, divided as follows: \$160,000 street improvement, and \$17,000 water and sewer extension bonds.

### NORTH DAKOTA

GARRISON, N. Dak.—BONDS SOLD—It is stated by H. T. Holt, City Auditor, that the \$1,500 auditorium bonds offered for sale without success on May 22, have been purchased at par by the Bank of North Dakota, of Bismarck.

GRAND FORKS, N. Dak.—BOND ELECTION—It is reported that a special election will be held on Oct. 3 in order to vote on the issuance of \$25,000 in swimming pool bonds.

JAMESTOWN, N. Dak.—WARRANT OFFERING—It is reported that bids will be received until 8:30 p. m. on Sept. 25, by A. R. Thompson, City Auditor, for the purchase of a \$15,000 issue of special improvement paving warrants. Bidders are to state the rate of interest the warrants shall bear. They will be issued in equal amounts over a period of not exceeding nine years, payable annually with interest coupons attached.

MORTON COUNTY (P. O. Mandan) N. Dak.—CERTIFICATES NOT SOLD—It is now stated by M. J. Tobin, County Auditor, that the \$50,000 not to exceed 7% certificates of indebtedness offered for sale without success last February, are still unsold.

(EST) on Sept. 20 for the purchase of \$60,000 2½, 2¾, 3, 3½, 3½, 3¾, 4, 4¼, 4½, 4¾ or 5% coupon, registerable as to principal only, operating revenue bonds. Dated Sept. 15, 1939. Denom. \$1,000. Due \$12,000 on Sept. 15 from 1940 to 1944, incl. Bidder to name a single rate of interest, payable M-8. The bonds are general obligations of the district and are authorized under the provisions of Act No. 69 of the 1939 session of the Legislature, signed by the Governor on May 16, 1939. Proceeds will be used to pay operating expenses of the district. A certified check for \$1,200, payable to order of the District Treasurer, is required.

LIBERTY (P. O. McKeesport), Pa.—BOND OFFERING—John Weissert, Borough Secretary, will receive sealed bids until 8 p. m. on Oct. 3 for the purchase of \$8.000 coupon bonds. Dated Nov. 1, 1939. Denom, \$1,000 on Nov. 1 from 1947 to 1954, incl. Bidder to name a single rate of interest, expressed in a multiple of ½ of 1%. Interest M-N. Sale of bonds is subject to approval of proceedings by the Pennsylvania Department of Internal Affairs. A certified check for \$500, payable to order of the Borough Treasurer, is required. Legal approving opinion of Burgwin, Scully & Churchill of Pittsburgh will be furnished the successful bidder.

PHILADELPHIA, Pa.—TAX RECEIPTS LOWER THAN YEAR AGO
—Tax collections from all sources by the city in the first eight months of
1939, amounted to \$71,342,052, a drop of \$438,929 from collections in the
corresponding period of 1938. The monthly report of Receiver of Taxes
Frank J. Willard shows that during the eight months period collections
totaled \$34,493,400 of the \$42,983,720 city levy and \$20,711,205 of the
\$25,857,309 school levy. City tax payments for the period compare with
\$34,333,722 a year ago while school tax receipts in 1938 were \$18,622,155.
Personal property payments were off slightly, totaling \$3,189,830 against
\$3,250,855. Delinquent receipts continued to lag, delinquent city collections of \$3,221,418 being \$338,648 less than year ago, while delinquent
school receipts were \$1,778,505, a drop of \$120,153. Personal property
delinquency payments amounted to \$76,667, compared with \$173,057 in
the 1938 period. Water rent payments continued to top last year, receipts
reaching \$5,830,184 against \$5,489,839 year ago.

ROCHESTER TOWNSHIP SCHOOL DISTRICT (P. O. Rochester),

reaching \$5,830,184 against \$5,489,839 year ago.

ROCHESTER TOWNSHIP SCHOOL DISTRICT (P. O. Rochester),

Pa.—BOND OFFERING—J. Geyer Cook, Secretary of Board of School

Directors, will receive scaled bids until 8 p. m. on Oct. 3, for the purchase
of \$15,000 not to exceed 5% interest coupon refunding bonds of 1939.

Dated Oct. 1, 1939. Denom. \$1,000. Due \$1,000 on Oct. 1 from 1940 to
1954, incl. Rate of interest to be expressed in a multiple of ½ of 1%.

Principal and interest (A-O) payable at the Rochester Deposit Bank.

Furpose of issue is to fund an equal amount of floating debt and issuance
of bonds will be subject to approval of proceedings by the Pennsylvania
Department of Internal Affairs. Legal opinion of Burgwin, Scully &
Churchill of Pittsburgh will be furnished by the district. Bonds are payable
from ad valorem taxes on all of district's taxable property within the tax
limits prescribed by law. A certified check for \$500, payable to order of
M. G. Bentel, District Treasurer, is required.

WEST VIEW. Pa.—BOND OFFERING—J. N. Myers, Borough Secre-

WEST VIEW, Pa.—BOND OFFERING—J. N. Myers, Borough Secretary, will receive sealed bids until 7 p. m. (EST) on Sept. 26 for the purchase of \$20,000 not to exceed 3% interest coupon street improvement bonds. Dated Oct. 1, 1939. Denom. \$1,000. Due \$1,000 on Oct. 1 from 1941 to 1960, incl. Bidder to name a single rate of interest, expressed in a multiple of \(\frac{1}{3}\) of 1\%. Prin. and int. (A-O) payable at the Allegheny Trust Co., Pittsburgh. Sale of bonds is subject to approval of proceedings by the Pennsylvania Department of Internal Affairs. A certified check for \$300, payable to order of the Borough Treasurer, must accompany each proposal. Legal opinion of Burgwin, Scully & Churchill of Pittsburgh will be furnished the successful bidder.

YARDLEY, Pa.—BONDS NOT SOLD—The \$10,000 not to exceed 3½% interest street improvement bonds offered Sept. 1—V. 149, p. 1363—were not sold, as no bids were submitted. Dated Sept. 1, 1939 and due \$1,000 each in 1941, 1943, 1945, 1947, 1949, 1951, 1953, 1955, 1957 and 1959. Issue will be reoffered.

#### RHODE ISLAND

PROVIDENCE, R. I.—BOND SALE—The \$2,300,000 emergency unemployment relief bonds offered Sept. 12—V. 149, p. 1511—were awarded to a syndicate composed of the First National Bank of New York, Bankers Trust Co., National City Bank, First Boston Corp., R. W. Pressprich & Co., Salomon Bros. & Hutzler and Lee Higginson Corp., all of N. Y. City, as 3s, at par plus a premium of \$10,120, equal to 100.44, a basis of about 2,95%. Dated Aug. 1, 1939, and due \$115,000 on Aug. 1 from 1940 to 1959, incl. Only other bid was an offer of 100.415 for 3s entered by a group composed of Halsey, Stuart & Co., Inc., Lehman Bros., Blair & Co., Inc., F. S. #### VIRGINIA

RICHMOND, Va.—CITY REPORTS GAIN IN REVENUES—City revenues for the first seven months of 1939 show an increase of \$284.776 over the like period of 1938 according to the monthly report of the City Comptroller, giving cash receipts of Aug. 31 at \$5,039,135. as against \$4.754,359 on the same date last year.

Approximately \$204,500 of the increase, however, is due to the fact that the city received more than \$172,000 from the State as Richmond's share of alcoholic beverage control stores' profits at an earlier date than was the case in 1938.

The State's payment to the city of \$32,500 for moving the Aluminum Building from the Ford lot also swelled the cash receipts.

When these deductions are made, there still is an increase of more than \$80,000 in receipts from all sources over receipts for the same period in 1938. The Comptroller's estimate of 1939 revenues from all sources was \$9,565,000, of which \$5,039,138 already has been collected and the heaviest payments in real estate taxes due in December.

City borrowings up to Aug. 31 were \$800,000 as against \$1,000,000 last year. City debt charges this year have also been lighter, due to the retirement of a considerable amount of city bonds earlier in the year.

#### WASHINGTON

CENTRALIA, Wash.—BOND ISSUANCE NOT SCHEDULED—We are informed by Vernon Fear, City Clerk, that contrary to recently published reports, the city has no \$550,000 issue of water refunding bonds up for sale. The city did sell a \$520,000 issue of light fund bonds on June 13 but one has been offered since then.

MOUNT VERNON, Wash.—BOND ELECTION—A special election is aid to be scheduled for Nov. 1 in order to have the voters pass on the suance of \$410,000 in water revenue bonds.

OTHELLO, Wash.—BOND SALE—The \$5,500 water system revenue bonds offered for sale on Sept. 11—V. 149, p. 1650—were purchased by the Ritzville State Bank of Ritzville, as 4s, paying a price of 100.45, according to the Town Treasurer. No other bld was received.

PORT OF EVERETT (P. O. Everett), Wash.—BOND SALE—The \$190,000 issue of general bonds offered for sale on Sept. 11—V. 149, p. 1650—was purchased by the General Construction Co. of Seattle, it is stated. No other bid was received.

ROCKPORT, Texas—BONDS VOTED—It is reported that the voters approved recently the issuance of \$145,000 in storm protection bonds.

TAHOKA, Texas—BONDS VOTED—At an election held on Aug. 29 the voters are said to have approved the issuance of the following bonds: \$35,000 street improvement, and \$15,000 sanitary sewer system bonds.

VANCOUVER, Wash.—BONDS NOT TO BE ISSUED—It is stated by C. A. McDonald, City Clerk, that \$50,000 library bonds offered for sale without success last November, will not be issued.

WESTPORT, Wash.—BONDS NOT SOLD—It is stated by the Town Attorney that the \$50,000 6% semi-annual water system bonds offered on April 26 without success, as noted in these columns at the time, are still unsold.

WEST VIRGINIA

CHARLESTON, W. Va.—BONDS VOTED—At the election held on Sept. 6—V. 149, p. 1216—the voters are said to have approved the issuance of the following bonds aggregating \$375,000: \$325,000 river front boulevard, and \$50,000 street improvement bonds.

of the following bonds aggregating \$375,000: \$325,000 river front boulevard, and \$50,000 street improvement bonds.

WEST VIRGINIA, State of—BOND OFFERING—We are informed by Governor Homer A. Holt that he will receive sealed bids until 1 p. m. on Sept. 20 for the purchase of a \$500,000 issue of road bonds. Bidders are to name the rate of interest, not to exceed 4%, in a multiple of ½ of 1%, it being provided that a part of the issue may bear one rate and a part a different rate. Not more than two rates will be considered in any one bid. Coupon bonds in \$1,000 denominations, convertible into fully registered bonds of \$1,000 and \$5,000 denominations. Dated Sept. 1, 1939. Due \$20,000 from Sept. 1, 1940 to 1964, incl. Prin. and int. (M-S) payable in lawful money of the United States at the State Treasurer's office in Charleston, or at the option of the holder, at the National City Bank in New York.

These bonds are issued under authority of amendment to the Constitution known as \$50,000,000 State Road Bond Amendment, and under authority of an Act of the Legislature of the State of West Virginia known as Chapter 77, Act of 1937, regular session. To secure the payment of this bond, principal sum and interest, when other funds and revenues sufficient are not available for that purpose, it is agreed that, within the limits prescribed by the Constitution, the Board of Public Works of the State of West Virginia shall annually cause to be levied and collected an annual State tax on all property in the State, until said bond is fully paid, sufficient to pay the annual interest on said bond and the principal sum thereof within the lowest interest rate and to pay the highest price offered for bonds bearing the lowest interest rate and to pay the highest price offered for bonds bearing the lowest interest rate and to pay the highest price offered for bonds bearing the lowest interest rate and to pay the highest price offered for bonds bearing such rate. Each bid must be accompanied by a certified check upon a bank or trust com

liquidated damages in case a successful bidder fails to take up and pay for the bonds.

The bonds cannot be sold at less than par and accrued interest. Purchasers will be required to pay accrued interest to the date of delivery. Delivery will be made in N. Y. City. To expedite delivery, interim certificates will be furnished purchasers. The purchaser or purchasers will be furnished with the final approving opinion of Caldwell & Raymond, New York, but will be required to pay the fee for approving said bonds.

## WISCONSIN

MAPLE BLUFF, Wis.—BONDS SOLD—A \$10,000 issue of park acquisition and improvement bonds was offered for sale on Sept. 11 and was awarded to the First National Bank of Madison, according to report. Dated June 1, 1939. Due \$1,000 from June 1, 1940 to 1949, incl. Principal and interest (J-D) payable at the above named bank.

milwaukee County (P. O. Milwaukee) Wis.—BOND OFFER-ING—Sealed bids will be received until 10 a. m. (CST), on Oct. 3, by C. M. Sommers, County Treasurer, for the purchase of \$3,700,000 coupon poor relief bonds. Interest rate is not to exceed 5%, payable A-O. It is stated in the offering notice that alternate bids will be received on the basis of the following alternate maturities, to-wit: (a) \$3,700,000 due \$2,500,000 on April 1, 1941, and \$1,200,000 on April 1, 1942; or (b) \$3,700,000 due April 1, 1940. Rate of interest to be in multiples of ¼ or 1-10th of 1%, and must be the same for all of the bonds. Bidders may offer olds for either or both of the above alternate maturity schedules. The bonds will be awarded to the bidder offering to take the entire issue at not less than par whose bid provides the lowest total interest cost to the county calculated on the basis of the life of the bonds.

The County Board will meet at 2:00 p. m. on the day on which the bids are opened to determine which maturity schedule it will accept, and adopt the necessary resolutions to complete this authorization. All bids must be unconditional. No deposits are required with bids. No special bidding forms are necessary.

Bidders are requested to name the rate of interest which the bonds are

the necessary resolutions to complete this authorization. All bids must be unconditional. No deposits are required with bids. No special bidding forms are necessary.

Bidders are requested to name the rate of interset which the bonds are to bear. The rate must be in multiples of \( \frac{1}{2} \)% or 1-10\% not exceeding 5\%. The interest rate must be the same for all the bonds. Interest coupons are attached to the bonds payable April 1. 1940 and semi-annually thereafter. The purchaser must pay accrued interest to date of delivery.

The bonds are payable out of unlimited ad valorem taxes. The legal opinion of Chapman & Cutler will be furnished at the expense of the county. Interest and principal on bond issues are payable at the option of the holder at the office of the fiscal agent of the county in New York, or at the office of the County Trasurer at the courthouse, Milwaukee. The bonds may be registered as to principal only. Delivery of the bonds will be made on or about Oct. 16 at the expense of the county to Chicago or any point within a radius of 100 miles from Milwaukee. Delivery beyond must be paid for by the purchaser. The bond forms will be furnished by Milwaukee County at its own expense.

This issue is a part of an authorization of \$3,900,000, \$200,000 of which will be sold to the Employees' Retirement System of Milwaukee County. No additional bond issues will be offered for public sale by Milwaukee County within the next five or six months.

MOUNT HOREB, Wis.—BONDS SOLD—It is stated by the Village
